was proved by Dr. Franklin, about this period. The electricity of the *Aurora Borealis* was discovered by means of the electric kite, in 1769.

**ELECTRO-GALVANISM.** It owes its origin to the discoveries of Dr. L. Galvani, an eminent Italian philosopher, in 1789. Volta pursued the inquiries of this good man (for he was alike distinguished by his virtues and genius), and discovered the mode of combining the metals; constructed what is very properly called the Voltaic pile; and extended the whole science into a system which should rather be called Voltaism than Galvanism.

**ELECTRO-MAGNETISM.** Analogies between electricity and magnetism were discovered by Oersted of Copenhagen, in 1807. This analogy was established in 1819, and was confirmed by subsequent experiments in England, France, Germany, the United States and other countries.

**ELECTRIC TELEGRAPH.** Experiments in electricity, having more or less bearing upon its practical use in telegraphic communication, were made by Winckler, at Leipsic, 1746; La Monnier, in Paris; Watson, in London, 1747; Lomond, in 1784; Betancour, at Madrid, 1798. Galvani's discovery of "Galvanism," at Bologna, 1791. Prof. Volta's "Voltaic Battery," at Pavia, 1801; Soemmerring, at Munich, 1807. The practical use of Galvanism in telegraphs, as prophesied by John Redman Coxe, of Phila., in 1816. Great advance made by Prof. Oersted at Copenhagen, in 1819. The electro-magnetic agency first fully developed and applied by Prof. Morse, 1832, patented 1840. The first telegraph by this agency in the United States, was between Washington and Baltimore, in 1844. Cooke & Wheatstone's patent in England, 1840. Bain's patent in England, first, 1842; applied in United States in 1849. House's in 1848. The telegraphic lines in the United States, in Jan. 1850 extended 6,679 miles.—See *Supplement*.

**ELEPHANT.** This animal, in the earliest times, was trained to war. The history of the Maccabees informs us, that "to every elephant they appointed 1000 men, armed with coats of mail, and 500 horse; and upon the elephants were strong towers of wood," &c. The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England, was one of enormous size, presented by the king of France to our Henry III., in 1238.—*Baker's Chron.*

**ELEUSINIAN MYSTERIES.** A great festival under this name was observed by the Athenians and other nations: these mysteries were the most celebrated of all the religious ceremonies of Greece, and were instituted by Eumolpus, 1356 B. C. They were so superstitiously observed, that if any one revealed them, it was supposed that he had called divine vengeance upon him, and he was put to death. The mysteries were introduced from Eleusis into Rome, and lasted about 1800 years, and were at last abolished by Theodosius the Great, A. D. 389.

**ELGIN MARBLES.** These admirable works of ancient art were derived chiefly from the Parthenon, a temple of Minerva in the Acropolis at Athens, of which temple they formed part of the frieze and pediment, built by Phidias about 500 B. C. Lord Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; they were purchased of him by the British government for 36,000*l.*, and placed in the British Museum, in 1816.

**EMBALMING.** The ancient Egyptians believed that their souls, after many thousand years, would come to inhabit their bodies, in case these latter were preserved entire. Hence arose their practice of embalming the dead. The Egyptian manner of preserving the dead has been the admiration and wonder of modern times. They rendered the body not only incorruptible,

but it retained its full proportion of size, symmetry of features, and personal likeness. They called the embalmed bodies *mummies*, some of which, buried 3000 years ago, are perfect to this day. The art of such embalming is now lost. When Nicodemus came with Joseph of Arimathea, to pay the last duties to our Saviour after his crucifixion, he brought a mixture of myrrh and aloes to embalm his body.—*John* xix. 38.

**EMBARGO IN ENGLAND.** This power is invested in the crown, but it is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, Jan. 14, 1801. See *Armed Neutrality*.

**EMBARGO IN THE UNITED STATES.** Embargo on all vessels in the ports of the United States, passed by Congress with reference to the quarrel with Great Britain after the attack on the U. S. frigate Chesapeake, 1807. Repealed and non-intercourse act passed, 1809. Embargo again laid for 90 days, April, 1812. War declared June 19, 1812.

**EMBER WEEKS.** Observed in the Christian church in the third century, to implore the blessing of God on the produce of the earth by prayer and fasting. **EMBER DAYS**, three of which fall in these weeks, and in which penitents sprinkle the ashes (embers) of humiliation on their heads. Four times in each year were appointed for these acts of devotion, so as to answer to the four seasons, spring, summer, autumn, and winter.

**EMBROIDERY.** Its invention is usually ascribed to the Phrygians; but we learn from Homer, and other ancient authors, that the Sidonians particularly excelled in this decorative species of needle-work. Of this art very early mention is made in the Scriptures.—*Exodus* xxxv. 35, and xxxviii. 23. An ancient existing specimen of beautiful embroidery is the Bayeux tapestry, worked by Matilda, the queen of William I. of England. See *Bayeux Tapestry*.

**EMERALD.** The precious stone of a green color is found in the East and in Peru; inferior ones in other places. It has been alleged that there were no true emeralds in Europe before the conquest of Peru; but there is a genuine emerald in the Paris Museum, taken from the mitre of pope Julius II., who died in 1513, and Peru was not conquered till 1545; hence it is inferred that this emerald was brought from Africa, or the East.

**EMIGRATION.** Of late years emigrations from Britain have been considerable. In the ten years ending 1830, the emigrations to the North American colonies, West Indies, Cape of Good Hope, New South Wales, Swan River, Van Diemen's Land, &c. were, according to official returns, 154,291. In the decennial period to 1840, the emigrations advanced to 277,696, exclusively of the vast numbers settling in the United States of America. The number of emigrants to the United States in *one year* ending Sept. 30, 1848, were registered as born in

|                           |               |                            |               |
|---------------------------|---------------|----------------------------|---------------|
| Great Britain and Ireland | - - - 148,212 | Denmark                    | - - - - - 210 |
| Germany                   | - - - 58,018  | Switzerland                | - - - - - 319 |
| France                    | - - - 7,748   | Other countries or unknown | - - - 3,043   |
| Sweden and Norway         | - - - 903     |                            |               |

**EMIR.** A title of dignity among the Turks and Persians, first given to caliphs. This rank was first awarded to the descendants of Mahomet by his daughter Fatima, about A. D. 650.—*Ricaut*. To the emirs only was originally given the privilege of wearing the green turban. It is also given to high officers (another title being joined).

**EMPALEMENT.** This barbarous and dreadful mode of putting criminals to

death is mentioned by Juvenal, and was often inflicted in Rome, particularly by the monster Nero. The victim doomed to empalement is spitted through the body on a stake fixed upright; and this punishment is still used in Turkey and Arabia. The dead bodies of murderers were sometimes staked in this manner, previously to being buried, in England.—*Southern*. Williams (who committed suicide) the murderer of the Marr family, in Ratcliffe Highway, London, Dec. 8, 1811, was staked in his ignominious grave. This practice has since been abolished there. See *Burying Alive*.

**EMPEROR.** Originally a title of honor at Rome, conferred on victorious generals, who were first saluted by the soldiers by that name. Augustus Cæsar was the first Roman emperor, 27 B. C. Valens was the first emperor of the Eastern empire, A. D. 364. Charlemagne was the first emperor of Germany, crowned by Leo III. A. D. 800. Ottoman I., founder of the Turkish empire, was the first emperor of Turkey, 1296. The Czar of Russia was the first emperor of that country, 1722. Don Pedro IV. of Portugal was the first emperor of Brazil, in 1825.

**EMPIRICS.** They were a set of early physicians who contended that all hypothetical reasoning respecting the operations of the animal economy was useless, and that experience and observation alone were the foundation of the art of medicine. The sect of Empirics was instituted by Acron o' Agrigentum, about 473 B. C.

**ENAMELLING.** The origin of the art of enamelling is doubtful. It was practised by the Egyptians and other early nations; and was known in England in the times of the Saxons. At Oxford is an enamelled jewel which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about A. D. 887.

**ENCAUSTIC PAINTING,** known to the ancients. This very beautiful art, after having been lost, was restored by Count Caylus and M. Bachelier, A. D. 1749.

**ENCYCLOPÆDIA.** The first work to which this designation was expressly given, was that of Abulfarius, an Arabian writer, in the thirteenth century. Many were published as early as the fifteenth century, but none alphabetically. Chambers' Dictionary was the first of the circle of arts and sciences, in England, first published in 1728. The great French work, *Encyclopédie Méthodique*, to which Voltaire, Diderot, D'Alembert, and other savans contributed, was published in 1782 *et seq.*, in 200 quarto volumes. The British Encyclopedia, printed in Philadelphia in 1798, by Thomas Dobson, was the first in the United States. The *Edinburgh Encyclopedia*, edited by Sir David Brewster, was published, 1810 *et seq.*, and republished in the United States. Rees' Cyclopedia republished in the United States in 1822. The cost of the 7th edition of *Encyclopædia Britannica*, edited by Professor Napier, and published by A. & C. Black, Edinburgh, in 1840 *etc.*, was stated to have been £126,000, of which £23,000 were paid to the contributors. This was probably the most costly undertaking of the kind ever achieved by private enterprise. The *Encyclopædia Metropolitana* was commenced in 1815 and finished in 1845. Both of these works comprised articles by the most distinguished writers in Great Britain. The German *Conversations Lexicon*, published 1796–1830, and upon the basis of this the *Encyclopædia Americana* was commenced in Philadelphia in 1829–30. *Penny Cycl.* (Knight's) finished 1844.

**ENGINEERS.** This name is of modern date, as engineers were formerly called Trench-masters. Sir William Pelham officiated as trench-master in 1622. The chief engineer was called camp-master-general in 1634. Captain Thomas Rudd had the rank of chief engineer to the king, about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, April 25, 1787. It has a

colonel-in-chief, and a second, and five colonel-commandants, and twenty colonels. The Association of civil engineers was established in 1828. The Bureau of Topographical Engineers of the U. S. Army, established at Washington.

ENGLAND. See *Britain*. So named by order of Egbert, first king of England, in a general council held at Winchester, A. D. 829. This appellative had been used as far back as A. D. 688, but had never been, until then, ratified by any assembly of the nation. It came from *Angles*, a tribe of Saxons, and *land*, the Saxon for country. For English history and succession of Sovereigns, see *Tabular Views*, beginning on p. 75 in this volume. England and Wales were united A. D. 1283, and Scotland was united to both in 1707, and the three were then styled Great Britain. Ireland was incorporated with these countries by the Act of Legislative Union, January 1, 1801, and the whole called the United Kingdom of Great Britain and Ireland.

ENGLAND, NEW. See *New England*.

ENGLISH LANGUAGE. See article *Languages*. From the High Dutch or Teutonic sprung (among others) the English language, now one of the most copious and beautiful of Europe. Law pleadings were made in English by order of Edward III. instead of the French language, which had been continued from the time of the Conqueror, A. D. 1362. The English tongue and English apparel were ordered to be used in Ireland, 28 Henry VIII. 1536. The English was ordered to be used in all lawsuits, and the Latin disused, May 1731.

ENGRAVING. The engraving of gems is a branch of art of the highest antiquity. The earliest writers make mention of engraved seals and seal rings, and there still exist many antique engravings equal to later productions of similar artists. Engraving from plates and wood is chiefly of modern invention, having its origin about the middle of the fifteenth century. Engraving on glass was perfected to an art by Boudier of Paris, 1799. The art of engraving, in various styles, has made great progress in the United States during the last ten years.

ENGRAVING ON COPPER. Prints from engraved copper-plates made their appearance about A. D. 1450, and were first produced in Germany. Masso, surnamed Finiguerra, was the first Italian artist in this way, 1450. The earliest date known of a copper-plate engraving is 1461. Rolling presses for working the plates were invented in 1545, and many improvements of it followed. Of the art of etching on copper by means of *aqua fortis*, Francis Mazzouli, or Parmagiano, is the reputed inventor, about A. D. 1532.—*De Piles*.

ENGRAVING, LITHOGRAPHIC. This is a new branch of the art, and Alois Sennefelder may be regarded as the inventor of it. It was first announced on the Continent in 1798, and became more known as polyautography in 1808. It was introduced into general use in England by Mr. Ackermann of London in 1817.

ENGRAVING, MEZZOTINTO. The art was discovered by Siegen, and was improved by prince Rupert in 1648; Sir Christopher Wren further improved it in 1662. Aquatinta, by which a soft and beautiful effect is produced, was invented by the celebrated French artist, St. Non, about 1662; he communicated his invention to Le Prince. Barrabe of Paris was distinguished for his improvements in this kind of engraving, 1763. Chiaro-oscuro engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491. See *Zincography*, &c.

ENGRAVING ON STEEL. The mode of engraving on soft steel, which, after it has been hardened, will multiply copper plates and fine impressions, in-

definitely, was introduced into England by Messrs. Perkins and Heath, of Philadelphia, in 1819.

ENGRAVING ON WOOD, took its rise from the *brief mahlers*, or manufacturers of playing-cards, about A. D. 1400; and from this sprung the invention of printing, first attempted by means of wooden types not movable. See *Printing*. The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Durer and Lucas Van Leyden in 1497; and was brought to perfection in England by Bewick, his brother, and pupils, Nesbitt, Anderson, &c., 1789, *et. seq.* The earliest wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date A. D. 1423.

ENTOMOLOGY. This branch of natural history cannot be regarded as ranking as a science until the arrangement of Linnæus, A. D. 1739. The London Entomological Society was instituted in 1806; it is directed chiefly to the study of insects found in Great Britain; and inquires into the best methods of destroying noxious insects, and making known such as are useful.

ENVOYS. They enjoy the protection, but not the ceremonies of ambassadors. Envoys Extraordinary are of modern date.—*Wicquefort*. The court of France denied to them the ceremony of being conducted to court in the royal carriages, A. D. 1639.

EPHESUS. Famous for the temple of Diana, which magnificent structure was one of the seven wonders of the world; it was 425 feet long and 200 broad, and cost 220 years of labor. Ctesiphon was the chief architect, and 127 kings contributed to its grandeur. The temple was burnt by Erostratus, solely to perpetuate his memory, 356 B. C.—*Pliny*. It rose from its ruins, and was richer and more splendid than before; but it was again burnt A. D. 260.—*Univ. Hist.*

EPHORI. Powerful magistrates of Sparta, first created by Theopompus to control the royal power, 760 B. C. They were five in number, and acting as censors in the state, they could check and restrain the authority of the kings, and even imprison them, if they were guilty of irregularities.

EPIC POETRY. Homer's *Iliad* and *Odyssey* the first epic poems. See HOMER.

EPICUREAN PHILOSOPHY. Epicurus of Gargettus, near Athens, was the founder of it, about 300 B. C. and taught that the greatest good consists in a happiness, springing not from sensual gratifications or vicious pleasures, but from virtue, and consisting in the peace and harmony of the soul with itself. His disciples had all things in common; and the pleasantness of his system, and its ease and luxury, made him many followers.

EPIGRAMS. They derive their origin from the inscriptions placed by the ancients on their tombs. Marcus Valerius Martialis, the celebrated Latin epigrammatist, who flourished about A. D. 83, is allowed to have excelled all others, ancient or modern, in the tasteful and pointed epigram. The following Latin epigram on the miracle of our Saviour in turning water into wine at Cana (John iii.) is a beautiful example:—

“Videt et erubuit lympha pudica Deum.”

And Dr. Johnson has declared that the subjoined English epigram, by Dr. Doddridge, on the words *Dum vivimus vivamus*, is the finest specimen in our language:—

“Live while we live!” the epicure will say,  
 “And taste the pleasures of the present day.”  
 “Live while we live!” the hoary preacher cries,  
 “And give to God each moment as it flies.”  
 Lord! in *my* view let both united be,  
 We live in pleasure when we live to thee.—*Doddridge*.

**EPIRUS.** Known by the great warlike achievements of Pyrrhus. Its early history is very obscure, and it is only during the reign of this sovereign, who was the last, that it becomes interesting. The first Pyrrhus (Neoptolemus) settled in Epirus after the Trojan war, 1170 B. C. He was killed in the temple of Delphi, about 1165 B. C.

|                                                                     |         |     |                                                                                     |         |      |

**EPISCOPACY.** The government, by its bishops, of the Christian church. It may be said to have been instituted A. D. 33, when Peter sat in the bishop's chair at Rome.—*Butler.* Episcopacy commenced in England in the second century; in Ireland about the same time; and in Scotland in the fourth century; but historians dispute with theologians upon this point. See *Bishops.* In Scotland, episcopacy was finally abolished at the period of the revolution, 1688–9. The sect called Episcopalians first appeared about the year 500.—*Burnet.*

**EPISCOPAL CHURCH, IN THE UNITED STATES.** Episcopacy established in New-York by law, 1693; introduced into Connecticut, 1706. The first bishops of the Protestant Episcopal Church in America were bishop White of Pennsylvania and Provost of New-York, consecrated in London, 1787. First Episcopal convention, 1789. Bishops of Vermont, New Jersey, Kentucky, and Ohio consecrated at New-York, Nov. 2, 1832.

**EPITAPHS.** They were used by the ancient Jews, by the Athenians, the Romans, and most of the nations of antiquity; their date is referred in England to the earliest times. In the epitaphs of the ancients arose the epigram.—*Boileau.*

**EPITHALAMIUM.** Tisias, the lyric poet, was the first writer of a nuptial complimentary song, or epithalamium. He received the name of Stesichorus from the alterations made by him in music and dancing; 536 B. C.—*Bossuet.*

**EPOCHAS.** These are periods in history which are agreed upon and acknowledged by the respective historians and chronologers, and which serve to regulate the date of events. The following are the epochas thus particularly adopted.—See *Eras.*

|                       |   |       |      |                      |   |   |       |     |
|-----------------------|---|-------|------|----------------------|---|---|-------|-----|
| Creation              | - | B. C. | 4004 | Building of Rome     | - | - | B. C. | 753 |
| Deluge                | - | -     | 2349 | Nabonassar           | - | - | -     | 747 |
| Calling of Abraham    | - | -     | 1921 | The Seleucidæ        | - | - | -     | 312 |
| Argonautic expedition | - | -     | 1225 | The battle of Actium | - | - | -     | 38  |
| Destruction of Troy   | - | -     | 1184 | The Christian era    | - | - | A. D. | 1   |
| 1st Olympiad          | - | -     | 776  | Diocletian           | - | - | -     | 284 |

**EQUINOX.** The precession of the equinoxes was confirmed, and the places and distances of the planets were discovered by Ptolemy, A. D. 130. When the sun in his progress through the ecliptic comes to the equinoctial circle, the day and night are equal all over the globe: this occurs twice in the year; once in the first point of Aries, which is called the vernal equinox; next in the first point of Libra, which is the autumnal equinox.—*Blair.*

**EQUITY, COURTS OF.** To determine causes according to the rule of equity and conscience, rather than according to strict law, A. D. 1067.—See *Chancery.*

**ERAS.** Notices of the principal eras will be found in their alphabetical order; a few only need be mentioned here. The era of Nabonassar, after which

the astronomical observations made at Babylon were reckoned, began Feb. 26, 747. The era of the Seleucidæ (used by the Maccabees) commenced 312 B. C. The Olympiads belong to the Grecians, and date from the year 776 B. C.; but they subsequently reckoned by Indictions, the first beginning A. D. 313: these, among chronologers, are still used.—See *Indictions*. The Romans reckoned from the building of their city, 753 B. C.; and afterwards from the 16th year of the emperor Augustus, which reckoning was adopted among the Spaniards until the reign of Ferdinand the Catholic. The disciples of Mahomet began their *Hegira* from the flight of their prophet from Mecca, which occurred A. D. 622.

**ERAS OF THE CREATION AND REDEMPTION.** The Jews and Christians have had divers epochas; but in historical computation of time are chiefly used the most extraordinary epochs, which are two, the Creation of the World, and the appearance of our REDEEMER, which last the Christians have made their era. They did not adopt it, however, until the sixth century, when it was introduced by Denys the Little, a Scythian, who became abbot of a monastery near Rome: he was the first who computed time from the birth of Christ, and fixed that great event according to the vulgar era.—*Cassiodorus Chron.* This computation began in Italy, A. D. 525, and in England in 816. It is the only one now in general use, and is that observed in this work.—See *Creation*, and *Christian Era*.

**ESCURIAL.** The palace of the kings of Spain, one of the largest and most magnificent in the world. It was commenced by Philip II. in the year 1562; and the first expenditure of its erection was 6,000,000 of ducats. It forms a vast square of polished stone, and paved with marble. It may give some notion of the surprising grandeur of this palace to observe, that, according to the computation of Francisco de los Santos, it would take up more than four days to go through all its rooms and apartments, the length of the way being reckoned thirty-three Spanish leagues, which is above 120 English miles. Alvarez de Colmenar also asserts, that there are 14,000 doors, and 11,000 windows belonging to this edifice.

**ESQUIRES.** Among the Greeks and Romans, esquires were armor-bearers to, or attendants on, a knight.—*Blount*. In England the king created esquires by putting about their necks the collar of S S, and bestowing upon them a pair of silver spurs. A British queen is recorded as having married the *armigerum*, or esquire, of her deceased husband. The distinction of esquire was first given to persons of fortune not attendant upon knights, A. D. 1341.—*Stowe. Meyrick's Ancient Armor*.

**ETHER.** It was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether was first made from the chloride of tin, by Courtanvaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriodic ether was first prepared by Gay-Lussac. The phosphoric was obtained by M. Boullay. Ether is said to have been first applied to the purpose of causing insensibility to pain by Dr. Horace Wells, of Connecticut, in 1846. This, however, is disputed, for about the same time Dr. C. T. Jackson, of Boston, well known as a geologist and chemist, suggested the use of ether in surgery; but to Dr. Morton, of Boston, probably belongs the credit of first demonstrating, by actual experiment, the use of ether in dentistry and surgery, as an annihilator of pain. It was used in surgical cases, in that year, by Drs. J. C. Warren, Channing, and Morton, of Boston, who afterwards published the results of their experiments. The practice was first copied in Europe by Dr. Robertson, of Edinburgh, and Dr. Booth, of London, the same year. The sulphuric ether is inhaled from an apparatus with flexible tube, &c. Etherization was first used in operative midwifery, in the United States, May, 1847. The substance

called chloroform, originally discovered by Soubeiran, in 1831, was also first employed for similar purposes in 1847, by professor Simpson, of Edinburgh.

**ETHICS.** The doctrine and system of morality; a science which is scarcely more inculcated by religion and virtue, than it is influenced by manners and government: the Chinese, who are said to have been acquainted with astronomy at least 3000 years before the birth of Christ, were so refined in the earliest ages, that they studied ethics, we are told, a thousand years before that event; and hence they must have lived at that time under not only civilized and enlightened, but refined and moral governments.

**EINA, MOUNT.** Here were the fabled forges of the Cyclops; and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B. C., and Thucydides speaks of three eruptions as occurring, 734, 477, and 425 B. C. There were eruptions, 125, 121, and 43 B. C.—*Livy*. Eruptions A. D. 40, 253, and 420.—*Carrera*. One in 1012.—*Geoffrey de Viterbo*. Awful one which overwhelmed Catania, when 15,000 inhabitants perished in the burning ruins, 1169. Eruptions equally awful and destructive, 1329, 1408, 1444, 1536, 1537, 1564, and in 1669, when tens of thousands of persons perished in the streams of lava which rolled over the whole country for forty days. Eruptions in 1766, 1787, 1809, 1811, and in May 1830, when several villages were destroyed, and showers of lava reached even to Rome. Another violent eruption, and the town of Bronte destroyed, Nov. 18, 1832.

**EUKLID, ELEMENTS OF.** Euclid was a native of Alexandria, and flourished there about 300 B. C. The *Elements* are not wholly his, for many of the invaluable truths and demonstrations they contain were discovered and invented by Thales, Pythagoras, Eudoxus, and others; but Euclid was the first who reduced them to regular order, and who probably interwove many theorems of his own, to render the whole a complete and connected system of geometry. The *Elements* were first printed at Basil, by Simon Grynæus, in A. D. 1533.

**EUNUCHS.** This species of mutilation is first mentioned among the Egyptian and Assyrian nations; and eunuchs in the earliest times were attendants in courts. The first princess who was waited upon by eunuchs in her chamber, was Semiramis, queen of Assyria and Babylon, about 2007 B. C.—*Lenglet*. Numbers of this class of persons are in the quality of attendants on the ladies of the Seraglio in Turkey.

**EUSTATIA, ST.** This island was settled by the Dutch in 1632: it was taken by the French in 1689; by the English in 1690; and again by the British forces, under admiral Rodney and general Vaughan, February 3, 1781. It was recovered by the French under the marquis de Bouillé, Nov. 26, same year; and was again captured by the British in 1801, and 1810; but restored in 1814.

**EVANGELISTS.** Mark and Matthew wrote their Gospels in A. D. 44; Luke in 55; and John in 97. In 95, John was thrown into a caldron of boiling oil at Rome, whence, being taken out unhurt, he was banished to the Isle of Patmos, and there, in the year 96, he wrote the *Apocalypse*, and died in 100.—*Butler*. At the council of Nice in 325, there were 200 varied versions of the adopted Evangelists.

**EVESHAM, BATTLE OF,** between prince Edward, afterwards Edward I., and Simon de Montfort, earl of Leicester, in which the barons were defeated, and the earl, his son, and most of his adherents slain. Henry III. at one period of the battle was on the point of being cleft down by a soldier who did not know his rank, but was saved by his timely exclamation, "Do not

kill me, soldier, I am Henry of Winchester, thy king!" This victory broke up the treasonable conspiracy of the barons; fought August 4, 1265.

**EXCHANGE.** One called *Collegium Mercatorum*, existed at Rome, 493 B. C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. Many edifices of this name in the United Kingdom are magnificent. The exchange of London was founded by sir Thomas Gresham, June 7, 1566, and was called *Royal*, by Elizabeth, on her paying it a visit in Jan. 1571. Destroyed by fire in 1666 and in 1838: rebuilt and opened in 1844.

**EXCHANGE (MERCHANTS') IN NEW YORK.** The present building, on the site of the one destroyed in the great fire of 1835, was commenced in 1836, and finished in 1840. It is of blue granite, and cost \$1,800,000. That of Boston, also of Quincy granite, finished in 1846.

**EXCHEQUER.** An institution of great antiquity, consisting of officers whose functions are financial or judicial: the chancellor of the exchequer is the first of these, and he formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III., about 1221. The exchequer stopped payment from Jan. to May the 24th, Charles II. 1673.—*Stowe*. The English and Irish exchequers were consolidated in 1816.

**EXCISE.** The excise system was established in England by the Long Parliament; was continued under Cromwell and Charles II.; and was organized as at present in the Walpole administration. It was first collected and an office opened in 1643, and was arbitrarily levied upon liquors and provisions to support the parliament forces against Charles I. The excise office was built on the site of Gresham College, in 1774. The officers of excise and customs were deprived of their votes for members of parliament in 1782. See *Revenue*.

| AMOUNT OF THE EXCISE REVENUE OF GREAT BRITAIN IN THE FOLLOWING YEARS. |                |   |   |            |                     |       |   |             |            |

**EXCOMMUNICATION.** An ecclesiastical anathema, or interdict from Christian communion. It was originally instituted for preserving the purity of the church; but ambitious ecclesiastics converted it by degrees into an engine for promoting their own power. Some suppose excommunication to be of Hindoo origin in the Pariah caste, and that it was adopted by the Jews (who had three degrees of it), and from these latter by the Christian churches. The Greek and Roman priests and even the Druids had similar punishments in aid of their respective religions.—*Phillips*.

**EXCOMMUNICATION BY THE POPES.** The Catholic church excommunicates by bell, book, and candle.—See *Bell, Book, and Candle*. The popes have carried their authority to such excess as to excommunicate and depose sovereigns. Gregory VII. was the first pope who assumed this extravagant power. He excommunicated Henry IV. emperor of Germany, in 1077, absolving his subjects from their allegiance; and on the emperor's death, "his excommunicated body" was five years above ground, no one daring to bury it. In England were many excommunications in Henry II.'s reign; and king John was excommunicated by Pope Innocent III. in 1208, when all England lay under an interdict for six years. The citizens of Dublin were excommunicated by Clement IV. in 1206. Bulls denouncing hell-fire to queen Elizabeth accompanied the Spanish Armada, and plenary indulgences were offered to all who should assist in deposing her.

**EXECUTIONS.** See *Crime*. In the reign of Henry VIII. (thirty-eight years

it is shown that no less a number than 72,000 criminals were executed.—*Stowe*. In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less bloody, the number of executions proportionally decreased. In the three years ending 1820, the executions in England and Wales amounted to 312; in the three years ending 1830, they were reduced to 178; and in the three years ending 1840, they had decreased to 62.—*Parl. Returns*.

EXECUTIONS IN LONDON IN THE FOLLOWING YEARS.

EXPLORED EXPEDITION (U. S.), consisting of the Vincennes, sloop of war; Peacock, ditto; Porpoise, brig; Relief, Flying Fish, and Sea Gull, smaller vessels, under Lieut. Wilkes, U. S. N., sailed from Hampton Roads, Va., Aug. 19th, 1838. Antarctic continent discovered, July 19, 1839. Attack on the Fejees for murdering two of the officers, July 25, 1846. The Peacock lost on the bar of Columbia river, July 1841. The Vincennes (flag-ship) returned to New York, after an absence of nearly four years, June 11, 1842. Captain Wilkes's Narrative of the Expedition, in 6 vols. Imp. 8vo. and quarto, was published in 1845. The scientific reports of the expedition form about 20 quarto and folio volumes.

EXPORTS, AND IMPORTS OF THE UNITED STATES FROM 1791.

| Years. | Imports.     | Exports.     | Years. | Imports.     | Exports.     |
|--------|--------------|--------------|--------|--------------|--------------|

EXPORTS, GREAT BRITAIN. Edward III., by his encouragement of trade, turned the scale so much in favor of English merchandise, that by a balance of trade taken in his time, the exported commodities amounted to 294,000*l.*, and the imported to only 88,000*l.*

VALUE OF EXPORTS FROM GREAT BRITAIN TO ALL PARTS OF THE WORLD, VIZ:—

|         |            |         |             |         |              |
|---------|------------|---------|-------------|---------|--------------|
| In 1700 | £5,097,120 | In 1820 | £51,733,113 | In 1842 | £102,180,517 |
| In 1750 | 10,130,991 | In 1830 | 66,735,445  | In 1843 | 100,260,101  |
| In 1775 | 16,326,363 | In 1835 | 78,376,732  | In 1844 | 117,877,278  |
| In 1800 | 38,120,120 | In 1840 | 97,402,726  | In 1845 | 131,564,503  |
| In 1810 | 45,869,539 | In 1841 | 102,705,372 | In 1846 | 134,509,116  |

\* Only nine months of 1843.

† For the year ending June 30.

The amounts above given relate to the exports of the United Kingdom of *British and Irish* produce only. The total exports, including foreign and colonial produce, were, according to official returns, as follows :

|         |   |   |              |         |   |   |              |         |   |   |              |
|---------|---|---|--------------|---------|---|---|--------------|---------|---|---|--------------|
| In 1841 | - | - | £116,479,678 | In 1843 | - | - | £113,844,259 | In 1845 | - | - | £145,961,749 |
| In 1842 | - | - | 116,903,668  | In 1844 | - | - | 131,833,391  | In 1846 | - | - | 150,879,936  |

In the year ending 5th January 1846, the amount of imports into the United Kingdom was 85,281,958*l.*; and the balance of trade in favor of England, deducting this sum from her exports, was 65,598,028*l.* But even this great balance has been exceeded in recent years, as, for instance, the year immediately preceding, when it mounted to upwards of seventy millions.—*Brit. Revenue Returns.*

**EYLAU, BATTLE OF,** between the French and Russians, one of the most bloody of Napoleon's wars: it terminated in favor of Napoleon, who commanded in person; but both armies by this and other recent battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel: the loss to the victor was 15,000 men, and the Russian loss in slain alone was 20,000. Feb. 8, 1807.

## F.

**FABII.** A noble and powerful family at Rome, who derived their name from *faba*, a bean, because some of their ancestors cultivated this pulse: they were said to be descended from Fabius, a supposed son of Hercules, and were once so numerous that they took upon themselves to wage war against the Veientes. They came to a general engagement near the Cremera, in which all the family, consisting of 306 men, were slain, B. C. 477. There only remained one, whose tender age had detained him at Rome, and from him arose the noble Fabii in the following ages.

**FABLES.** "Jotham's fable of the trees is the oldest extant, and as beautiful as any made since."—*Addison*. Nathan's fable of the poor man (2 *Sam.* xii.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnoo Sarma, called Pilpay, are the most beautiful, if not the most ancient, in the world.—*Sir William Jones*. The well-known Æsop's fables (*which see*), were written about 540 years B. C.—*Plutarch*.

**FACTIONS.** Among the Romans, factions were parties that fought on chaotic riots in the cirque, and who were distinguished by their different colors, a green, blue, red, and white, to which Domitian added two others, on blue coats embroidered with gold, a second wearing scarlet, about A. D. 90. Both the emperors and people had generally greater inclination for some particular color than the rest; but upon a quarrel happening in Justinian's reign, between the blue and green, when 40,000 were killed on both sides, the name of faction was abolished. With us, faction means a party or sect in religious or civil matters, and is always taken in an ill sense.

**FAIRS AND WAKES.** They are of Saxon origin, and were first instituted in England by Alfred, A. D. 886.—*Spelman*. They were established by order of Gregory VII. in 1708, and termed *Feriae*, at which the monks celebrated the festival of their patron saint; the vast resort of people occasioned a great demand for goods, wares, &c. They were called wakes from the people making merry during the vigil, or eve. Fairs were established in France and England by Charlemagne and William the Conqueror, about A. D. 800 in the first, and 1071 in the latter kingdom. The fairs of Beaucaire, Falaise, and Leipsic, are the most famous in Europe.

**FALKIRK, BATTLE OF,** between the English under Edward I. and the Scots, commanded by the heroic Wallace, in which 40,000 of the latter were slain.

the whole Scotch army was broken up, and was chased off the field with dreadful slaughter, July 22, 1298.

**FAMINES, AND SEASONS OF REMARKABLE SCARCITY.** The famine of the seven years in Egypt began 1708 B. C.—*Usher*; *Blair*. In a famine that raged at Rome thousands of the people threw themselves into the Tiber, 436 B. C. *Livy*.

|                                                                                            |       |      |                                                                           |       |        |
|--------------------------------------------------------------------------------------------|-------|------|---------------------------------------------------------------------------|-------|--------|
| Awful famine in Egypt                                                                      | A. D. | 42   | voured the flesh of horses, dogs, cats, and vermin                        | A. D. | 1315   |
| At Rome, attended by plague                                                                | -     | 262  | One in England and France ( <i>Rapin</i> )                                | -     | 1353   |
| In Britain, so grievous that people ate the bark of trees                                  | -     | 272  | Again, one so great, that bread was made from fern roots ( <i>Stowe</i> ) | -     | 1438   |
| In Scotland, and thousands die                                                             | -     | 306  | Awful one in France ( <i>Voltaire</i> )                                   | -     | 1693   |
| In England, where 40,000 perish                                                            | -     | 310  | One general in Great Britain                                              | -     | 1748   |
| Awful one in Phrygia                                                                       | -     | 370  | One which devastates Bengal                                               | -     | 1771   |
| So dreadful in Italy, that parents ate their children ( <i>Dufresnoy</i> )                 | -     | 450  | At the Cape de Verds, where 16,000 persons perish                         | -     | 1775   |
| In England, Wales, and Scotland                                                            | -     | 739  | One grievously felt in France                                             | -     | 1789   |
| Again, when thousands starve                                                               | -     | 823  | One severely felt in England                                              | -     | 1795   |
| Again, which lasts four years                                                              | -     | 954  | Again, throughout the kingdom                                             | -     | 1801   |
| Awful one throughout Europe                                                                | -     | 1016 | At Drontheim, owing to Sweden intercepting the supplies                   | -     | 1813   |
| In England and France; this famine leads to a pestilential fever, which lasts from 1193 to | -     | 1195 | Scarcity of food, severely felt by the Irish poor, 1814, 1816, 1822, and  | -     | 1845-6 |
| Another famine in England                                                                  | -     | 1251 |                                                                           |       |        |
| Again, so dreadful, that the people de-                                                    |       |      |                                                                           |       |        |

**FAN,** The use of the fan was known to the ancients: *Cape hoc flabellum et ventulum huic sic facito*.—*TERENCE*. The modern custom among the ladies was borrowed from the East. Fans, together with muffs, masks, and false hair, were first devised by the harlots in Italy, and were brought to England from France.—*Stowe*. The fan was used by females to hide their faces in church.—*Pardon*.

**FARCE.** This species of dramatic entertainment originated in the droll shows which were exhibited by charlatans and their buffoons in the open street. These were introduced into our theatres in a ludicrous and more refined form; and they are now only shorter, but often superior to the pieces called comedies. See article *Drama*.

**FASTING, AND FASTS.** They were practised and observed by most nations from the remotest antiquity. Annual fasts, as that of Lent, and at other stated times, and on particular occasions, begun in the Christian church, to appease the anger of God, in the second century, A. D. 138. Retained as a pious practice by the reformed churches.—*Eusebius*.

**FEASTS AND FESTIVALS.** The feast of the Tabernacles was instituted by Moses in the wilderness, 1490 B. C., but was celebrated with the greatest magnificence for fourteen days, upon the dedication of the temple of Solomon, 1005 B. C.—*Josephus*. In the Christian church, those of Christmas, Easter, Ascension, and Pentecost or Whitsuntide, were first ordered to be observed by all Christians, A. D. 68. Rogation days were appointed in 469. Jubilees in the Romish church were instituted by Boniface VIII. in 1300. See *Jubilees*. For fixed festivals observed in the church of England, as settled at the Reformation, *et seq.*, see *Book of Common Prayer*.

**FEBRUARY.** The second month of the year, so called from *Februa*, a feast which was held therein in behalf of the manes of diseased persons, when sacrifices were performed, and the last offices were paid to the shades of the dead. This month, with January, was added to the year, which had previously but ten months, by Numa, 713 B. C. See *Calendar, and Year*.

**FERRARA.** A city in the papal dominions, evacuated by the Austrians, except the citadel, Dec. 23, 1847.

**FEUDAL LAWS.** The tenure of land, by suit or service to the lord or owner of it, was introduced into England by the Saxons, about A. D. 600. The

slavery of this tenure was increased under William I. in 1068. This was done by dividing the kingdom into baronies, and giving them to certain persons, requiring them to furnish the king with money, and a stated number of soldiers. These laws were discountenanced in France by Louis XI. in 1470. The vassalage was restored, but limited by Henry VII. 1495. Abolished by statute 12 Charles II. 1663. The feudal system was introduced into Scotland by Malcolm II. in 1008; and was finally abolished in that kingdom 20 George II. 1746.—*Littleton; Ruffhead; Blackstone.*

**FEUILLANS.** Members of a society formed in Paris to counteract the intrigues and operations of the Jacobins, named from the Feuillan convent, where their meetings were held, early in the revolution. A body of Jacobins invested the building, burst into their hall, and obliged them to separate, Dec. 25, 1791.

**FEZ.** The ancient *Mauritania*, founded by Edrus, a Barbary farmer, about A. D. 696. It soon afterwards became the capital of all the western Morocco States. Leo Africanus describes the Mauritani as containing more than seven hundred temples, mosques, and other public edifices, in the twelfth century.

**FICTION LAW.** Invented by the lawyers in the reign of Edward I. as a means of carrying cases from one court to another, whereby the courts became checks to each other.—*Hume.* Memorable declaration of Lord Mansfield, in the court of King's Bench, emphatically uttered, that "NO FICTION OF LAW SHALL EVER SO FAR PREVAIL AGAINST THE REAL TRUTH OF THE FACT, AS TO PREVENT THE EXECUTION OF JUSTICE," May 21, 1784. This constitutional maxim is now a rule of law.

**FIEF.** In France we find fiefs-men mentioned as early as the age of Childebert I., A. D. 511. They were introduced into Italy by the Lombards. Into Spain, before the invasion of the Moors, A. D. 710. Into England by the Saxons (see *Feudal Laws*). Into Scotland, directly from England, by Malcolm II., 1008.

**FIELD OF THE CLOTH OF GOLD.** Henry VIII. embarked at Dover to meet Francis I. of France, at Ardres, a small town near Calais in France, May 31, 1520. The nobility of both kingdoms here displayed their magnificence with such emulation and profuse expense, as procured to the place of interview (an open plain) the name of *The Field of the Cloth of Gold*. Many of the king's attendants involved themselves in great debts on this occasion, and were not able, by the penury of the rest of their lives, to repair the vain splendor of a few days. A painting of the embarkation, and another of the interview, are at Windsor Castle.—*Butler.*

**FIFTH MONARCHY-MEN.** Fanatical levellers who arose in the time of Cromwell, and who supposed the period of the Millennium to be just at hand, when Jesus should descend from heaven and erect the fifth universal monarchy. They actually proceeded to elect Jesus CHRIST king at London! Cromwell dispersed them, 1653.

**FIGURES.** Arithmetical figures (nine digits and zero), and the method of computing by them, were brought into Europe from Arabia, about A. D. 900. They were first known in England about the year 1253, previously to which time the numbering by letters was in use there. See *Arithmetic.*

**FIRE.** It is said to have been first produced by striking flints together. The poets suppose that fire was stolen from heaven by Prometheus. Zoroaster, king of Bactria, was the founder of the sect of the Magi, or worshippers of Fire, since known by the appellation of Guebres, still numerous in the countries of the East, 2115 B. C.—*Justin; Pliny.* Heraclitus maintained that the world was created from fire, and he deemed it to be a god omnipotent, and

taught this theory about 506 B. C.—*Nowv. Dict.* In the Scriptures God is said often to have appeared in, or encompassed with fire—as to Moses in the burning bush, on mount Sinai; and to the prophets Isaiah, Ezekiel, and St. John. The wrath of God is described by a consuming fire, and the angels, as his ministers, are compared to it. See the *Bible*.

**FIRE-ARMS.** Small arms were contrived by Schwartz, A. D. 1378; they were brought to England about 1388. Fire-arms were a prodigious rarity in Ireland in 1489, when six muskets were sent from Germany as a present to the earl of Kildare, who was then chief-governor. Muskets were first used at the siege of Rhegen, in 1525. The Spaniards were the first nation who armed the foot soldier with these weapons.—*Ulloa*. Voltaire states, that the Venetians were the first to use guns, in an engagement at sea against the Genoese, in 1377; but our historians affirm, that the English had guns at the battle of Cressy, in 1346; and the year following at the siege of Calais. See *Artillery*.

**FIRE-ENGINES.** The fire-engine is of modern invention, although the forcing pump, of which it is an application, is more than two centuries old. The fire-engine, to force water, was constructed by John Vander Heyden, about the year 1663; it was improved materially in 1752, and from that time to the present. The fire-watch, or fire-guard of London, was instituted November 1791. The fire brigade was established in London in 1833.

**FIRE-SHIPS.** They were first used in the sixteenth century. Among the most formidable contrivances of this kind ever used, was an explosion vessel to destroy a bridge of boats at the siege of Antwerp, in 1585. The first use of them in the English navy was by Charles, lord Howard of Effingham, afterwards earl of Nottingham, lord high admiral of England, in the engagement with the Spanish Armada, July, 1588.—*Rapin*.

**FIRE-WORKS.** Are said to have been familiar to the Chinese in remote ages: they were invented in Europe at Florence, about A. D. 1360; and were first exhibited as a spectacle in 1588. At an exhibition of fire-works in Paris, in honor of the marriage of the dauphin, afterwards Louis XVI., the passages being stopped up occasioned such a crowd, that the people, seized with a panic, trampled upon one another till they lay in heaps; a scaffold erected over the river also broke down, and hundreds were drowned; more than 1000 persons perished on this occasion, June 21, 1770. Madame Blanchard ascending from Tivoli Gardens, Paris, at night, in a balloon surrounded by fire-works, the balloon took fire, and she was precipitated to the ground, and dashed to pieces, July 6, 1819. See *Balloon*.

**FIRES.** Some of the most noted and destructive in North America.

|                                                                                                                                                                 |                |                                                                                                  |                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|--------------------------------------------------------------------------------------------------|----------------|
| In New York, destroying 600 warehouses and property to amount of \$20,000,000                                                                                   | Dec. 16, 1835  | New York, destroying 302 stores and dwelling-houses, and property worth \$6,000,000—4 lives lost | July 19, 1845  |
| At Washington, destroying the General Post Office and Patent Office, with 10,000 valuable models, drawings, &c.                                                 | Dec. 15, 1836  | St. John's, Newfoundland; nearly the whole town destroyed—6,000 people made houseless            | June 12, 1846  |
| At Charleston, S. C.; 145 acres and 1,158 buildings destroyed                                                                                                   | April 27, 1838 | Quebec Theatre Royal; 47 persons burned to death                                                 | June 14, 1846  |
| New York; 46 buildings; loss, \$10,000,000                                                                                                                      | Sept. 6, 1839  | Nantucket; 300 buildings, valued \$800,000                                                       | July 13, 1846  |
| Philadelphia; 52 buildings; loss, \$500,000                                                                                                                     | Oct. 4, 1839   | Dupont's powder mills, Md., exploded, 18 persons killed                                          | April 14, 1847 |
| Pittsburgh, Pa. 1,000 buildings, and property valued about \$6,000,000                                                                                          | April 10, 1845 | At Albany; 600 buildings, besides steamboats &c., 24 acres burned over, loss, \$3,000,000        | Aug. 17, 1849  |
| Quebec, Canada; 1,500 houses burnt, immense loss of property, and several lives, May 23, 1845. Another, burning 1,300 dwellings; in all, two-thirds of the city | June 23, 1845  | At Brooklyn, N. Y., 200 houses, value, \$750,000                                                 | Sept. 9, 1848  |
|                                                                                                                                                                 |                | At St. Louis; 23 steamboats and 15 blocks of houses destroyed, loss about \$3,000,000            | May 17, 1849   |
|                                                                                                                                                                 |                | At Philadelphia, 300 houses                                                                      | July 9, 1850   |

**FIRE OF LONDON, THE GREAT.** Destroyed in the space of four days eighty-nine churches, including St. Paul's; the city gates, the Royal Exchange, the Custom House, Guildhall, Sion College, and many other public buildings, besides 13,200 houses, laying waste 400 streets. This conflagration happened (not without strong suspicion of treason), Sept. 2, 1666, and continued three days and nights, and was at last only extinguished by the blowing up of houses.—*Hume; Rapin; Carte.*

**FIRST FRUITS.** *Primitiæ* among the Hebrews. They were offerings which made a large part of the revenues of the Hebrew priesthood. First fruits were instituted by pope Clement V., in A. D. 1306; and were collected in England in 1316. The first year's income of every church benefice in England was given to the popes till the 27th of Henry VIII., 1535, when the first fruits were assigned, by act of parliament, to the king and his successors.—*Carte.* Granted, together with the tenths, to increase the incomes of the poor clergy, by queen Anne, Feb. 1704. Consolidation of the offices of First Fruits, Tenths, and queen Anne's Bounty, by Statute 1 Vict., April 1838.

**FLAGELLANTS, SECT OF.** They established themselves at Perouse, A. D. 1260. They maintained that there was no remission of sins without flagellation, and publicly lashed themselves, while in procession, preceded by the cross, until the blood flowed from their naked backs. Their leader, Conrad Schmidt, was burnt, 1414.

**FLANDERS.** The country of the ancient Belgæ; conquered by Julius Cæsar, 47 B. C. It passed into the hands of France, A. D. 412. It was governed by its earls subject to that crown, from 864 to 1369. It then came into the house of Austria by marriage; but was yielded to Spain in 1556. Flanders shook off the Spanish yoke in 1572; and in 1725, by the treaty of Vienna, it was annexed to the German empire.—*Priestley.* Flanders was overrun by the French in 1792 and 1794, and was declared part of their Republic. It was made part of the kingdom of the Netherlands in 1814, and was erected into the kingdom of Belgium in 1831.—See *Belgium.*

**FLAX.** The flax seed was first planted in England in A. D. 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill which was invented in Scotland about 1750. See article *Hemp.*

**FLODDEN FIELD, BATTLE OF,** between the English and Scots. James IV. of Scotland, having taken part with Louis XII. of France, against Henry VIII. of England, this battle was one of the consequences of his unfortunate policy; and James, and most of his chief nobles, and upwards of 10,000 of his army were slain, while the English, who were commanded by the earl of Surry, lost only persons of small note. Henry VIII. was at the time besieging Terouenne, near St. Omer; fought Sept. 9, 1513.

**FLORENCE.** It is said to have been founded by the soldiers of Sylla, and enlarged by the Roman Triumviri. It was destroyed by Totila, and was rebuilt by Charlemagne. This city is truly the seat of the arts. In its palaces, university, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy, and the *Accademia della Crusca*, were instituted to enrich the literature and improve the language of Tuscany; the latter is so named because it rejects like *bran* all words not purely Tuscan. Florence was taken by the French in July 1796, and again in March, 1799; and was restored in 1814.

**FLORIDA,** now one of the United States, was discovered by Sebastian Cabot sailing under the English flag, in 1497. Ponce de Leon, a Spanish adven-

turer from Hispaniola, explored the country in 1512 and 1516. In 1539, Hernando de Soto, who had been an officer under Pizarro, overran the peninsula with an armed force, but most of his followers were cut off a few years after. In 1763 Florida was ceded to Great Britain by Spain in exchange for Havana. The Spanish reconquered it in 1781, and ceded it to the United States in 1819. It was admitted into the Union in 1845. First war with the Seminoles in Florida in 1818, when general Jackson subdued them. Another protracted and expensive warfare there commenced and continued until 1842. General Jessup, general Taylor, and others, were engaged in it. The Seminole chief, Osceola, was captured, 1837. Population in 1830, 34,723; in 1840, 54,477 including 25,717 slaves.

**FLORIN.** A coin first made by the Florentines. A *floren* was issued by Edward III, which was current in England at the value of 6s., in 1337.—*Camden.* This English coin was called *floren* after the Florentine coin, because the latter was of the best gold.—*Ashe.* The florin of Germany is in value 2s. 4d.; that of Spain 4s. 4½d.; that of Palermo and Sicily 2s. 6d.; that of Holland 2s.—*Ayliffe.*

**FLOWERS.** The most delightful and fragrant among the ornaments of our gardens are of foreign production. The modern taste for flowers came, it is said, from Persia to Constantinople, and was imported thence to Europe for the first time in the sixteenth century; at least many of the productions of our gardens were conveyed by that channel.—*Beckmann.* With what goodness does God provide for our happiness and enjoyments, by making even the most remote countries contribute towards them!—*Sturm.* From the reign of Henry VII. to that of Elizabeth, our present common flowers were, for the most part, introduced into England. The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by George Morris, in 1792. Among the flowers, the periods of whose introduction to English gardens have been traced, Haydn gives the following:—

| FLOWERS, PLANTS, &c.              |         |      |                                                        |
|-----------------------------------|---------|------|--------------------------------------------------------|
| Acacia, N. America, before        | - A. D. | 1640 | Gold-plum, Japan - - - 1783                            |

| Passion-flower, orange, Carolina                         | - 1792 | Tea tree, China, about                  | - 1762 |
| Pigeon-berry, N. America                                 | - 1736 | Tooth-ache tree, Carolina, before       | - 1739 |
| Pink, from Italy                                         | - 1567 | Trumpet-flower, N. America              | - 1640 |
| Ranunculus, Alps                                         | - 1528 | Trumpet-flower, Cape                    | - 1823 |
| Roses, Netherlands                                       | - 1522 | Tulip, Vienna                           | - 1578 |
| Rose, the China, China                                   | - 1789 | Virginia creeper, N. America, before    | - 1629 |
| Rose, the damask, Marseilles, and south of Europe, about | - 1543 | Virgin's-bower, Japan                   | - 1776 |
| Rose, the Japan, China                                   | - 1793 | Weeping willow, Levant, before          | - 1692 |
| Rose, the moss, before                                   | - 1724 | Wax tree, China                         | - 1794 |
| Rose, the musk, Italy                                    | - 1522 | Winter berry, Virginia                  | - 1736 |
| Rose, the Provence, Flanders                             | - 1567 | Youlan, China                           | - 1789 |
| Rose, sweet-scented guelder, from China                  | - 1821 |                                         |        |

**FLUTE.** Invented by Hyagnis, a Phrygian, the father of Marsyas.—*Plutarch.* The flute, harp, lyre, and other instruments were known to the Romans; and the flute was so prized in antiquity, that several female deities lay claim to its invention. It was in far more general use as a concert instrument than the violin, until early in the last century, when the works of Corelli came over.—See *Music.*

**FLUXIONS.** Invented by Newton, 1669. The differential calculus by Leibnitz, 1684. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place.

**FLYING, ARTIFICIAL.** It has been attempted in all ages. Friar Bacon maintained the possibility of the art, and predicted it would be of general practice, A. D. 1273. Bishop Wilkins says, it will yet be as usual to hear a man call for his *wings* when he is going on a journey, as it is now to hear him call for his boots, 1651. We apprehend that many ages will pass away previously to the accomplishment of these predictions.

**FONTAINEBLEAU, PEACE OF,** concluded between France and Denmark in 1679. Treaty of Fontainebleau between the emperor of Germany and Holland, signed November 8, 1785. Treaty of Fontainebleau between Napoleon and the royal family of Spain, Oct. 27, 1807. Concordat of Fontainebleau between Napoleon and pope Pius VII. January 25, 1813. Fontainebleau was entered by the Austrians, Feb. 17, 1814. And here Napoleon resigned his imperial dignity, and bade a farewell to his army, April 5, 1814.

**FONTENOY, BATTLE OF,** near Tournay, between the French under count Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland. The battle was fought with great obstinacy, and the carnage on both sides was considerable, the allies losing 12,000 men, and the French nearly an equal number of lives; but the allies were in the end defeated. Count Saxe, who was at the time ill of the disorder of which he afterwards died, was carried about to all the posts in a litter, assuring his troops that the day would be their own; April 30, 1745.

**FONTS.** Formerly the baptistry was a small room, or place partitioned off in a church, where the persons to be baptized (many of whom in the early

ages were adults), were submerged. Previously to these artificial reservoirs, lakes and rivers were resorted to for immersion. Fonts for the initiation into Christianity were instituted in A. D. 167.

**FOOLS, FESTIVALS OF**, at Paris. They were held on the first of January, and were continued for 240 years. In their celebration, we are told, all sorts of absurdities and indecencies were committed, A. D. 1198. Fools or licensed jesters were kept at court in England (as they were at other courts of Europe), and were tolerated up to the time of Charles I. 1625.

**FORESTS**. There were in England, even in the last century, as many as 65 forests, 18 chases, and upwards of 780 parks. The New Forest in Hampshire was made by William I., who for that purpose destroyed 36 parishes, pulled down 36 churches, and dispeopled the country for 30 miles round, A. D. 1079-85.—*Stowe*.

**FORGERY IN ENGLAND**. The forging of, or giving in evidence forged deeds, &c., made punishable by fine, by standing in the pillory, having both ears cut off, the nostrils slit up and seared, the forfeiture of land, and perpetual imprisonment, 5 Elizabeth, 1562. Forgery was first punished by death in 1634.

**FORGERY, REMARKABLE EXECUTIONS FOR**. The unfortunate Daniel and Robert Perreau, brothers and wine-merchants, were hanged at Tyburn, January 17, 1776. The rev. Dr. Dodd was found guilty of forging a bond, in the name of Lord Chesterfield, for 4,200*l.*: the greatest interest was made, and the highest influence was exerted to save him, but when the case came before the council, the minister of the day said to George III., "if your majesty pardon Dr. Dodd, you will have murdered the Perreaux;" and he was hanged accordingly, June 27, 1777. Mr. Henry Fauntleroy, a London banker, was hanged, November 30, 1824. Joseph Hunton, a quaker merchant, suffered death, December 8, 1828. The last criminal hanged for forgery at the Old Bailey, was Thomas Maynard, December 31, 1829.

**FORKS**. They were in use on the Continent in the 13th and 14th centuries.—*Voltaire*. This is reasonably disputed, as being too early. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in Italy, and adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," A. D. 1608.

**FORTIFICATION**. The Phœnicians were the first people who had fortified cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about A. D. 1500. Albert Durer first wrote on the science in 1527; and improvements were made by Vauban, towards 1700.

**FOTHERINGAY CASTLE**, Northamptonshire. Built A. D. 1408. Here Richard III. of England was born in 1443; and Mary queen of Scots, whose death is an indelible stain upon the reign of our great Elizabeth, was beheaded in this castle, in which she had been long previously confined, February 8, 1587, after an unjust and cruel captivity of almost nineteen years in England. It was ordered to be demolished by her son James I. of England.

**FOUNDLING HOSPITAL**. "A charity practised by most nations about us for those children exposed by unnatural parents."—*Addison*. Foundling hospitals are, comparatively, of recent institution in England, where it would appear none existed when Addison wrote. The foundling hospital at Moscow, built by Catherine II., was an immense and costly edifice, in which 8000 infant children were succored.

FRANCE. This country was known to the Romans by the name of Gaul. In the decline of their power it was conquered by the Franks, a people of Germany, then inhabiting what is still called Franconia. These invaders gave the name to the kingdom; but the Gauls, being by far the most numerous, are the real ancestors of the modern French. Previous to the revolution, France was divided into 32 provinces; and after that era it was divided, first into 84, and subsequently into 103, departments, including Corsica, Geneva, Savoy, and other places, chiefly conquests. *Tab. Views*, 65 et seq.

The Franks, under their leader Pharamond, settle in that part of Gaul till late called Flanders - A. D. 420  
 Reign of Clovis the Great - 451  
 [The Events in French History and the succession of sovereigns will be found in the Tabular Views in this volume, commencing p. 65.]  
 720. Childeric II.  
 737. Charles Martel ruled with despotic sway during an interregnum.  
 742. Childeric III., the Stupid; turned monk.

#### THE CARLOVINGIANS.

752. Pepin the Short, son of Charles Martel; this race called Carolingians.  
 768. Charlemagne, or Charles the Great; also emperor of Germany.  
 814. Louis I., the Gentle, surnamed, also, the *Debonnaire*; dethroned, and imprisoned in a monastery.  
 840. Charles II., surnamed the Bald; poisoned by his physician *Henault*.  
 877. Louis the Stammerer.  
 879. Carloman and Louis III. The latter died, 882. Carloman reigned alone.  
 884. Charles the Fat; an usurper.  
 887. Eudes or Hugh.  
 898. Charles III., the Simple; deposed and died in prison.  
 923. Rudolph.  
 936. Louis IV., d'Outremer; died by a fall from his horse.  
 954. Lothaire III. poisoned; it is said by his wife Emma.  
 986. Louis V. the Indolent; poisoned by his wife Blanche, and in him ended the race of Charlemagne.

#### THE CAPETS.

987. Hugh Capet, from whom this race of kings are called Capevingians.  
 996. Robert the Sage.  
 1031. Henry I.  
 1060. Philip I., the Fair.  
 1108. Louis VI., the Lusty.  
 1137. Louis VII., the Young.  
 1180. Philip II., Augustus.  
 1223. Louis VIII., the Lion.  
 1226. Louis IX., called St. Louis; died in his camp before Tunis; canonized.  
 1270. Philip III., the Hardy.  
 1285. Philip IV., the Handsome.  
 1314. Louis X., Hutin.  
 1316. John, who reigned only eight days.  
 1316. Philip V., the Long.  
 1323. Charles IV., the Handsome; king of Navarre.

#### HOUSE OF VALOIS.

1328. Philip de Valois.

1350. John II.; died suddenly in the Savoy, in London.  
 1364. Charles V., surnamed the Wise; the first prince who had the title of dauphin. (See article *Dauphin*.)  
 1380. Charles VI., the Beloved.  
 1422. Charles VII., the Victorious.  
 1461. Louis XI., detested for his atrocious cruelties.  
 1483. Charles VIII., the Affable.  
 1498. Louis XII., duke of Orleans, surnamed the Father of his People.  
 1515. Francis I.  
 1547. Henry II.: died of a wound received at a tournament.  
 1559. Francis II.; married Mary Stuart afterwards queen of Scots; died the year after his accession.  
 1560. Charles IX. Catherine of Medicis, his mother, obtained the regency, which trust she abused.  
 1574. Henry III., elected king of Poland; murdered Aug. 1, 1589, by Jacques Clement, a Dominican friar. In this prince was extinguished the house of Valois.  
 1589. Henry IV., the Great, of Bourbon, king of Navarre; murdered by Francis Ravillac. (See *Ravillac*.)  
 1610. Louis XIII., the Just.  
 1643. Louis XIV., the Great, also styled *Dieu-Donne*.  
 1715. Louis XV., the Well-Beloved; but which surname he lost.  
 1774. Louis XVI., his grandson; guillotined, Jan. 21, 1793; and his queen Maria-Antoinette, Oct. 16, following.  
 1789. The Revolution commences with the destruction of the Bastille, July 14.  
 1795. Louis XVII., dies in prison.

#### FRENCH EMPIRE.

1804. Napoleon Bonaparte declared Emperor, May 18, 1804; crowned by the pope, Dec. 2, following; assumes the iron crown, May 26, 1805. Renounces the thrones of France and Italy, Apr. 5, 1814.

#### BOURBONS RESTORED.

1814. Louis XVIII.; ascends the throne May 3, 1814; dies, Sept. 16, 1824.  
 1824. Charles X.; deposed, July 30, 1830, retires to Rambouillet same day, and subsequently seeks protection in England.

#### HOUSE OF ORLEANS.

1830. Louis-Philippe; declared "king of the French," August 9.

**FRANCHISE.** A privilege, or exemption from ordinary jurisdiction; and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as they were formerly in England. The elective franchise was conferred for counties on persons having 40s. a year in land, 89 Henry VI., 1460.—*Ruffhead's Statutes.* See *Electors.*

**FRANCISCANS.** An order of friars, called also Gray Friars, in the Church of Rome, founded by Francis de Assise in A. D. 1209, or, according to some authorities, about 1220. Their rules were chastity, poverty, obedience, and very austere regimen of life. In 1224 they are said to have appeared in England, where, at the time of the dissolution of Monasteries by Henry VIII., they had fifty-five abbeys or other houses, A. D. 1536–38.

**FRANKFORT ON THE MAIN.** Many ages a free city; it was taken and retaken several times during the wars of the late and present centuries, and felt the iron rule of Bonaparte from 1803 to 1813, when its independence was guaranteed by the allied sovereigns. The diet of the princes of Germany was established here by the Rhenish confederation in 1806.

**FREDERICKSHALL, SIEGE OF.** Rendered memorable by the death of Charles XII., of Sweden, who was killed by a cannon-shot before its walls, and while in the trenches, leaning against the parapet, examining the works. He was found in that position, with his hand upon his sword, and a prayer-book in his pocket, Dec. 11, 1718. It is now generally supposed that a pistol fired by some near and traitorous hand closed the career of this celebrated monarch, who was too aptly styled the “Madman of the North.”

**FREEMASONRY.** It is of great antiquity. Writers on masonry, themselves masons, affirm that it has had a being “ever since symmetry began, and harmony displayed her charms.” Masonry is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the sixth century, as a protection against Christian fanatics. Its introduction into Great Britain has been fixed at the year A. D. 674; although by other authorities it is assigned a much earlier date. The grand lodge at York was founded A. D. 926. Freemasonry was interdicted in England, A. D. 1424; but it afterwards rose into great repute. In 1717, the grand lodge of England was established; that of Ireland was established in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope, in 1738.

**FRENCH LANGUAGE.** The language of France and many of the French laws and customs were first introduced into England by William I. 1066. The language, and fashions in dress and diet were then very general in England. Law pleadings were changed from French to English, in the reign of Edward III., 1362.—*Stowe.*

**FRENCHTOWN, CANADA.** This town was taken from the British by the American general, Winchester, January 22, 1813. It was retaken by the British forces under general Proctor, immediately afterwards, and the American commander and his troops were made prisoners.

**FRENCH WAR, in North America.** The first war between France and England, which was carried on also by the American colonies, 1689. The French destroyed Schenectady, N. Y., Casco, Me., &c., 1690; but were defeated by Schuyler at La Prairie, 1691. Peace of Ryswyck, 1697. “Queen Anne's war,” 1702. French and Indians ravaged Maine, 1703. French and Spanish invade Carolina, 1706. Expedition from New England against the French in Port Royal, 1707; and against Canada, 1710; both failed. Peace of Utrecht, 1713. Another war declared by England, 1744; Louisbourg and Cape Breton taken by English colonists, 1745. Peace, 1749. French en-

croachment on English colonies, 1750, leads to the noted French war, 1752-8. Washington's mission, 1754. Braddock's defeat, 1755. Oswego, &c. taken by French, 1756, and fort William Henry, 1757. Louisbourg taken by the English general Amherst, and fort Du Quesne by general Forbes, 1758. Ticonderoga, Crown Point, Niagara, and Quebec taken by the English (sir W. Johnson and General Wolfe), 1759. Canada surrendered to Great Britain, Sept. 8, 1760, and secured to her by the peace of Paris, 1763.

French alliance with the United States in the war of the revolution, Feb. 6, 1778. French revolution and politics caused serious dissensions in the United States, 1793-6. French spoliations on American commerce, 1797.

**FRIDAY.** The sixth day of the week; so called from Friga, a goddess worshipped by our forefathers on this day, commonly supposed to be the same with Venus. Friga was the wife of Thor, and goddess of peace, fertility, and riches. Good-Friday is a fast in the church of England in memory of our Saviour's crucifixion, April 3, 33. See *Good Friday*.

**FRIEDLAND, BATTLE OF,** between the allied Russian and Prussian armies on the one side, and the French, commanded by Napoleon in person, who completely vanquished the allies, with the loss of eighty pieces of cannon, and 50,000 men, June 14, 1807. This victory led to the peace of Tilsit, by which Russia lost no territory, but Prussia was obliged to surrender nearly half her dominions.

**FRIENDLY ISLES.** These islands were discovered by Tasman, A.D. 1642. Visited by Wallis, who called them Keppel Isles, 1767; and by capt. Cook, who called them by their present name on account of the friendly disposition of the natives, 1773.

**FRIENDLY SOCIETIES, ENGLAND.** These useful institutions originated in the clubs of the industrious classes; and since they began to spring into importance they have been regulated and protected by various legislative enactments. They have now, with other similar institutions, more than twenty millions sterling in the public funds. Laws regarding Friendly Societies consolidated by statute, June, 1829. See *Charities*.

**FRIESLAND.** Formerly governed by its own counts. On the death of prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, and afterwards to the French empire; but Prussia regained the country in 1814. The term *Chevaux de Frise* (sometimes, though rarely, written *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

**FROBISHER'S STRAITS.** Discovered by sir Martin Frobisher, the first Englishman who attempted to find a northwest passage to China, in 1576. After exploring the coast of New Greenland, he entered this strait, which has ever since been called by his name. Frobisher returned to England, bringing with him a quantity of black ore, which was supposed to contain gold, and which induced queen Elizabeth to patronize a second voyage, and lend a sloop of war for the purpose. The delusion was even kept up to a third expedition; but all of them proved fruitless.

**FROSTS.** The Euxine Sea frozen over for twenty days, A.D. 401.—*Univ. Hist.* A frost at Constantinople which commenced in October, 763, and continued until February of the next year; the two seas there were frozen a hundred miles from the shore.—*Univ. Hist.* A frost in England on Midsummer-day was so violent that it destroyed the fruits of the earth, 1035.—*Speed.* The frost in Russia in 1812 surpassed in intenseness that of any winter in that country for many preceding years, and caused the total destruction of the French army in its retreat from Moscow, at the close of that memorable

year. Napoleon commenced his retreat on the 9th November, when the frost covered the ground, and the men perished in battalions, and the horses fell by hundreds on the roads. What with her loss in battle, and the effects of this awful and calamitous frost, France lost in the campaign of this year more than 400,000 men.

**FRUITS OF FOREIGN COUNTRIES.** Several varieties of fruit are mentioned as having been introduced into Italy, 70 B. C. *et seq.* Exotic fruits and flowers of various kinds, previously unknown in England, were brought thither in the reigns of Henry VII. and VIII., and of Mary and Elizabeth, between the years 1500 and 1578. See *Gardening*, and *Flowers*. Among others of less note, were musk-melons, plum-trees, and currant-plants of sundry sorts, the musk and damask roses, tulips, &c.; also saffron, woad, and other drugs for dyeing, but these last were attempted to be cultivated without success.—*Hackbuit*; *Lord Kaimes*. The following are among the fruits whose introduction into England has been traced:—

| FRUITS, ETC.                                  |   |            |
|-----------------------------------------------|---|------------|
| Almond-tree, Barbary                          | - | A. D. 1548 |
| Apples, Syria                                 | - | 1522       |
| Apple, the custard, North America             | - | 1736       |
| Apple, the Osage, ditto                       | - | 1818       |
| Apricots, Epirus                              | - | 1540       |
| Cherry-trees, Pontus                          | - | 100        |
| Cornelian cherry, Austria                     | - | 1596       |
| Currants, Zante                               | - | 1533       |
| Currant, the hawthorn, Canada                 | - | 1705       |
| Fig-tree, south of Europe, before             | - | 1548       |
| Fig, the Botany-bay, New South Wales          | - | 1789       |
| Gooseberries, Flanders, before                | - | 1540       |
| Grapes, Portugal                              | - | 1528       |
| Lemons, Spain                                 | - | 1554       |
| Limes, Portugal                               | - | 1554       |
| Lime, the American, before                    | - | 1752       |
| Melons, before                                | - | 1540       |
| Mock orange, south of Europe, before          | - | 1596       |
| Mulberry, Italy                               | - | 1520       |
| Mulberry, white, China, about                 | - | 1596       |
| Mulberry, the red, from North America, before | - | A. D. 1629 |
| Mulberry, the paper, from Japan, before       | - | 1754       |
| Nectarine, Persia                             | - | 1562       |
| Olive, the Cape, Cape                         | - | 1730       |
| Olive, the sweet-scented, China               | - | 1771       |
| Oranges                                       | - | 1595       |
| Peaches, Persia                               | - | 1562       |
| Pears, from various climes                    | - | ***        |
| Pine-apple, Brazils                           | - | 1568       |
| Pippins, Netherlands                          | - | 1525       |
| Plums, Italy                                  | - | 1522       |
| Plum, the date, Barbary                       | - | 1596       |
| Pomegranate, Spain, before                    | - | 1548       |
| Quince, Austria                               | - | 1573       |
| Quince, the Japan                             | - | 1796       |
| Raspberry, the flowering, N. America          | - | 1700       |
| Raspberry, the Virginian, ditto, before       | - | 1696       |
| Strawberry, Flanders                          | - | 1530       |
| Strawberry, the Oriental Levant               | - | 1724       |
| Walnut, the black, N. America, before         | - | 1629       |

**FUNDS** To the Venetians is ascribed the origin of the funding system, in A. D. 1171. Public funds were raised by the Medici family at Florence, in 1340. The English funding system, or the method of raising the supplies for the public service in England, by anticipations of the public revenues (the origin of the national debt), introduced at the Revolution, 1689.—*Mortimer's Broker*. The funding system is coeval with the commencement of the Bank of England.—*Anderson*. The Three *per cent.* annuities were created in 1726. The Three *per cent.* consols were created in 1731. The Three *per cent.* reduced, 1746. Three *per cent.* annuities, payable at the South Sea-house, 1751. Three and a-half *per cent.* annuities created, 1758. Long annuities, 1761. Four *per cent.* consols, 1762. Five *per cent.* annuities, 1797, and 1802. Five *per cent.* reduced to four, 1822. See *National Debt*.

**FUNERAL GAMES** are mentioned by most early writers. Among the Greeks they were chiefly horse races; and among the Romans, processions and the mortal combats of gladiators around the funeral pile. These games were abolished by the emperor Claudius, A. D. 47. Funeral orations have a heathen origin. Solon was the first who spoke one, 580 B. C. They were indispensable among the Romans; the custom of led horses took place A. D. 1266. A tax laid on funerals in England, 1793.

**FUNERAL ORATIONS.** The Romans pronounced harangues over their dead, when people of quality, and great deeds, and virtues. Theopompus obtained a prize for the best funeral oration in praise of Mausolus, 353 B. C. Popilia was the first Roman lady who had an oration pronounced at her funeral

which was done by her son Crassus; and it is observed by Cicero that Julius Cæsar did the like for his aunt Julia, and his wife Cornelia. In Greece, Solon was the first who pronounced a funeral oration, according to Herodotus, 580 B. C.

**FUR.** The refined nations of antiquity never used furs: in later times, as luxury advanced, they were used by princes as linings for their tents. They were worn by our first Henry, about A. D. 1125. Edward III. enacted that all such persons as could not spend 100*l.* a year, should be prohibited this species of finery, 1337.

### G.

**GALLEYS.** The ancient galleys with three rows of rowers, *tri-remes*, were invented by the Corinthians, 786 B. C.—*Blair*. They were built at Athens, 786 B. C. For an account of their construction and the method of fighting in them, see *Polybius*.

**GALVANISM.** The discovery of it is recent; it was first noticed in 1767, by Saltzer; but it was not till about 1789 that Mrs. Galvani, wife of Dr. Galvani of Bologna, accidentally discovered its extraordinary effects on animals; and from the name of the discoverer it was called galvanism. Mrs. Galvani having observed the convulsions produced in the muscles of frogs by the contact of metals, directed her husband's attention to the phenomenon: and in 1791, Galvani announced the result of his observations on this subject. Since that period a great many experiments have been made, and many curious facts observed, which have excited much attention among philosophers. See *Electro-Galvanism*. Bonaparte, after the discovery of the true principles of galvanic electricity by Volta, presented him with a gold medal, and 3000 livres, in 1808.—*Phillips*. See *Mesmerism*.

**GAME LAWS.** The laws restricting the killing of game are peculiar to the north of Europe, and partake of the nature of the forest laws imposed by William the Conqueror, who, to preserve his game, made it forfeiture of property to disable a wild beast, and loss of eyes for a stag, buck, or boar. Of these laws the clergy were zealous promoters: and they protested against ameliorations under Henry III. The first game act in England passed in 1496. Game certificates were first granted with a duty in 1784-5. Numerous statutes have been passed on this subject from time to time.

**GAMING, EXCESSIVE.** Introduced into England by the Saxons; the loser was often made slave to the winner, and sold in traffic like other merchandise.—*Camden*; *Stowe*. Act, prohibiting gaming to all gentlemen (and interdicting tennis, cards, dice, bowls, &c., to inferior people, except at Christmas time), 33 Henry VIII. 1541. Gaming-houses were licensed in London in 1620. Act to prevent excessive and fraudulent gaming, when all private lotteries, and the games of Faro, Basset, and Hazard were suppressed, 13 George II. 1739.—*Ruffhead's Statutes*. The profits of a well-known gaming house in London for one season have been estimated at 150,000*l.* In one night a million of money is said to have changed hands at this place.—*Leigh*.

**GAMES.** Those of Greece and Rome will be found under their respective heads. The candidates for athletic games in Greece used to be dieted on new cheese, dried figs, and boiled grain, with warm water, and no meat. The games were leaping, foot-races, darting, quoits, wrestling, and boxing. See the *Capitoline, Isthmian, Olympic, Pythian, Secular, and other Games*.

**GARDENING.** Gardening was one of the first arts that succeeded the art of building houses.—*Walpole*. Noah planted a vineyard, and drank of the wine of fruit, flower, and kitchen gardens, the garden of Eden was, no doubt

the prototype.—*Idem.* There wants nothing but the embroidery of a parterre to make a garden in the reign of Trajan serve for a description of one in that of our William III.—*Idem.* The art of gardening became better understood in England about A. D. 1500, before which time many of our vegetables were imported from Brabant. The era of the art was the reign of Elizabeth; but the modern mode of gardening was introduced about 1700. The following came from the countries respectively named:—

## ROOTS AND VEGETABLES.

|              |               |
|--------------|---------------|
| Rice, from   | - Ethiopia    |
| Buckwheat    | - Asia        |
| Borage       | - Syria       |
| Cresses      | - Crete       |
| Cauliflower  | - Cyprus      |
| Asparagus    | - Asia        |
| Lettuce      | - Brabant     |
| Artichokes   | - Holland     |
| Garlic       | - The East    |
| Shallots     | - Siberia     |
| Horse-radish | - China       |
| Kidney-beans | - East Indies |
| Gourds       | - Astracan    |
| Lentils      | - France      |
| Chervil      | - Italy       |
| Celery       | - Flanders    |
| Potatoes     | - Brazil      |
| Tobacco      | - America     |
| Cabbage      | - Holland     |
| Anise        | - Egypt       |
| Parsley      | - Egypt       |

|         |            |
|---------|------------|
| Carrots | - Flanders |
| Brocoli | - Cyprus   |
| Beans   | - Greece   |
| Peas    | - Spain    |

## FRUITS AND FLOWERS.

|               |              |
|---------------|--------------|
| Jasmine       | - Circassia  |
| Elder-tree    | - Persia     |
| Tulip         | - Cappadocia |
| Daffodil      | - Italy      |
| Lily          | - Syria      |
| Tuberose      | - Java, &c.  |
| Carnation     | - Italy, &c. |
| Ranunculus    | - Alps       |
| Apples        | - Syria      |
| Apricots      | - Epirus     |
| Currants      | - Zante      |
| Damask-rose   | - Damascus   |
| Hops          | - Artois     |
| Gooseberries  | - Flanders   |
| Gilly-flowers | - Toulouse   |
| Musk-rose     | - Damascus   |

|                |              |
|----------------|--------------|
| Plums          | - Damascus   |
| Oranges        | - Spain      |
| Lemons         | - Spain      |
| Pink           | - Italy      |
| Provence-rose  | - Marseilles |
| Convolvulus    | - Canaries   |
| Arctopus       | - Cape       |
| Bell-flower    | - Canaries   |
| Cherries       | - Pontus     |
| Figs           | - Italy      |
| Date-plum      | - Barbary    |
| Mulberry       | - Italy      |
| Nectarine      | - Persia     |
| Passion-flower | - Brazil     |
| Pomegranate    | - Spain      |
| Rosemary       | - Italy      |
| Laburnum       | - Hungary    |
| Laurel         | - Levant     |
| Lavender       | - Italy      |
| Peaches        | - Persia     |
| Quince         | - Austria    |
| Weep. Willow   | - Levant     |
| Fennel         | - Canaries   |

Musk-melons and other rich fruits that are now cultivated in England, and the pale gooseberry, together with salads, garden-roots, cabbages, &c., were brought from Flanders, and hops from Artois, in 1520. The damask-rose was brought hither by Dr. Linacre, physician to Henry VIII., about 1540. Pippins were brought to England by Leonard Mascall, of Plumstead, in Sussex, 1525. Currants or Corinthian grapes were first planted in England in 1533, brought from the Isle of Zante. The musk-rose and several sorts of plums were brought from Italy by lord Cromwell. Apricots came from Epirus, 1540. The tamarisk plant was brought from Germany, by archbishop Grindal, about 1570; and about Norwich, the Flemings planted flowers unknown in England, as gilly-flowers, carnations, the Provence rose, &c., 1567. Wood came originally from Toulouse, in France. Tulip roots from Vienna, 1578; also, beans, peas and lettuce, now in common use, 1600. See *Flowers*; *Fruits*.

**GARTER, ORDER OF THE.** This institution outvies all other similar institutions in the world. It owes its origin to Edward III., who conquered France and Scotland, and brought their kings prisoners to England. Edward, with a view of recovering France, which descended to him by right of his mother, was eager to draw the best soldiers of Europe into his interest, and thereupon projecting the revival of king Arthur's round table, he proclaimed a solemn tilting, to invite foreigners and others of quality and courage to the exercise. The king, upon New Year's day, 1344, published royal letters of protection for the safe coming and returning of such foreign knights as had a mind to venture their reputation at the jousts and tournaments about to be held. The place of the solemnity was Windsor; it was begun by a feast, and a table was erected in the castle of 200 feet diameter, in imitation of king Arthur's at Winchester, and the knights were entertained at the king's own expense of 100*l.* a week. In 1346, Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner; and Edward the Black Prince,

his son, having expelled the rebels in Castile, and enthroned the lawful sovereign, Don Pedro, he, in memory of these exploits, instituted this order. A. D. April 23, 1349-50. Edward gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French—" *Honi soit qui mal y pense* "—evil to him who evil thinks. The knights are always installed at Windsor; and were styled *Equites aureæ Periscelidis*, knights of the golden garter.—*Beatson*.

**GAS.** The inflammable aeriform fluid was first evolved from coal by Dr. Clayton, in 1739.—*Phil. Trans.* Its application to the purposes of illumination was first tried by Mr. Murdock, in Cornwall, in 1792. The first display of gas-lights was made at Boulton and Watt's foundry, in Birmingham, on the occasion of the rejoicings for peace in 1802. Gas was permanently used to the exclusion of lamps and candles at the cotton mills of Phillips and Lee, Manchester, where 1000 burners were lighted, 1805. Gas-lights were first introduced in London, at Golden-lane, August 16, 1807. They were used in lighting Pall Mall, in 1809; and were general through London in 1814. They were first used in Dublin in 1816, and the streets there generally lighted in October, 1825. The gas-pipes in and round London extend to 1100 miles. The streets in New York (the first in the United States) first lighted with gas, 1823-4.

**GAZETTE.** A paper of public intelligence and news of divers countries, first printed at Venice about the year 1620, and so called (some say) because *una gazetta*, a small piece of Venetian coin, was given to buy or read it. Others derive the name from *gaza*, Italian for magpie, *i. e.* chatterer.—*Trusler*. A gazette was printed in France in 1631; and one in Germany in 1715.—*Nouv. Dict. Hist.*

**GAZETTE, THE LONDON.** See *Newspapers*. The first English gazette was published at Oxford, the court being then there on account of the plague, Nov. 7, 1665. On the removal of the court to the capital, the title was changed to the *London Gazette*, Feb. 5, 1666. *London Gazettes Extraordinary* are used for the publication of extraordinary official news. One of these latter was forged with a view of affecting the funds, May 22, 1787. The fraud succeeded, but the planners of it were never discovered.—*Phillips*. The Dublin Gazette was first published in an official form about 1767.

**GENERAL ASSEMBLY OF SCOTLAND.** The first General Assembly of the church was held December 20, 1560. The General Assembly constitutes the highest ecclesiastical court in the kingdom; it meets annually in Edinburgh in May, and sits about ten days. It consists of a grand commissioner, appointed by the king, who represents his majesty, and delegates from presbyteries, royal boroughs, and universities, some being laymen. To this court all appeals from the inferior ecclesiastical courts lie, and its decision is final. See *Church of Scotland*.

**GENERALS.** This rank has been given to commanders from very remote times. Matthew de Montmorency was the first officer honored with the title of General of the French armies, A. D. 1203.—*Henault*. It is observed by M. Balzac that cardinal Richelieu first coined the word *Generalissimo*, upon his taking the supreme command of the French armies in Italy, in 1629.

**GENEVA.** Part of the empire of Charlemagne, about A. D. 800. The Republic was founded in 1512. It became allied to the Swiss Cantons in 1584. Memorable insurrection here, February 1781: about 1000 Genevans, in consequence of it, applied, in 1782, to earl Temple, lord lieutenant of Ireland, for permission to settle in that country: the Irish parliament voted 50,000*l.* to defray the expenses of their journey, and to purchase them lands near Waterford, called New Geneva. Many of the fugitives came to

Ireland in July 1783, but they soon after abandoned it: at this period many Genevan families settled in England. Another revolution, July 1794. Geneva was admitted by the diet into the Swiss Confederation, in 1813.

**GENOA.** Its ancient inhabitants were the Ligures, who submitted to the Romans, 115 B. C., and underwent the revolutions of the Roman empire till A. D. 950. The Genoese revolt against their count, choose a doge and other magistrates from among their nobility, and become an aristocratic Republic, 1030 to 1034. Several revolutions occurred up to 1528, when the celebrated Andrew Doria rescued his country from the dominion of foreign powers. Bombarded by the French in 1684, and by the British in 1688 and 1745. Genoa was taken by the Imperialists, Dec. 8, 1746; but their oppression of the people was such, that the latter suddenly rose, and expelled their conquerors, who again besieged the city the next year, August 17, without effect, Genoa lost Corsica 1730. The celebrated bank failed 1750. The city sustained a siege by a British fleet and Austrian army, until literally starved, and was evacuated by capitulation, May 1800; but it was surrendered to the French soon after their victory at Marengo. The Ligurian Republic was founded upon that of Genoa, in 1801, and the doge solemnly invested, August 10, 1802. Genoa annexed to the French empire, May 25, 1805. It surrendered to the combined English and Sicilian army, April 18, 1814; and was transferred to the king of Sardinia in 1816. Insurrection against Victor Emmanuel, April 1; subdued April 11, 1849.

**GENTLEMEN.** The Gauls observing that, during the empire of the Romans, the *Scutarii* and *Gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes*. This distinction of gentleman was much in use in England, and was given to the well descended, about A. D. 1430.—*Sidney*.

**GEOGRAPHY.** The first correct record we have of geographical knowledge is from Homer. He describes the shield of Achilles as representing the earth, surrounded by the sea.—*Iliad*. He accurately describes the countries of Greece, islands of the Archipelago, and site of Troy. The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B. C. Hipparchus attempted to reduce geography to mathematical bases, about 135 B. C. It was first brought to Europe by the Moors of Barbary and Spain, about A. D. 1201.—*Lenglet*. The invention of the mariner's compass is the important connecting link between ancient and modern geography. The modern maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, A. D. 1489.

**GEOLOGY.** The science of the earth has been the subject of philosophical speculation from the time of Homer; and this science is said to have been cultivated in China many ages before the Christian era. When the theories and discoveries of geologists were first propounded, they were condemned as being opposed to the statements of the Bible; but in this enlightened age the astronomer and geologist, in proportion as their minds are expanded by scientific investigation, see that there is no collision between the discoveries in the natural world, and the inspired record. We are not called upon by Scripture to admit, neither are we required to deny, the supposition that the matter without form and void, out of which this globe of earth was framed, may have consisted of the wrecks and relics of more ancient worlds, created and destroyed by the same Almighty power which called our world into being, and will one day cause it to pass away. Thus while the Bible reveals to us the moral history and destiny of our race, and teaches us that man and other living things have been placed but a few thousand years

upon the earth, the physical monuments of our globe bear witness to the same truth; and as astronomy unfolds to us myriads of worlds, not spoken of in the sacred records, geology in like manner proves, not by argument drawn from analogy, but by the incontrovertible evidence of physical phenomena, that there were former conditions of our planet, separated from each other by vast intervals of time, during which this world was teeming with life, ere man, and the animals which are his contemporaries, had been called into being.—*Dr. Mantell and Bishop Blomfield.*

**GEOMETRY.** Its origin is ascribed to the Egyptians; the annual inundations of the Nile having given rise to it by carrying away the landmarks, and the boundaries of farms. Thales introduced geometry into Greece about 600 B. C. Euclid's Elements were compiled about 280 B. C. The doctrine of curves originally attracted the attention of geometricians from the conic sections, which were introduced by Plato about 390 B. C. The conchoid curve was invented by Nicomedes, 220 B. C. The science of geometry was taught in Europe in the thirteenth century. Books on the subject of geometry and astronomy were destroyed in England, being regarded as infected with magic, 7 Edward VI., 1552.—*Stowe.*

**GEORGES' CONSPIRACY.** The memorable conspiracy in France; general Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 23, 1804. The conspirators were tried June 9, when seventeen were sentenced to death, and many to imprisonment. Moreau was suffered to leave France, and was escorted from the temple to embark for America, June 22. In 1813 he received his mortal wound before Dresden, *which see.*

**GEORGIA,** one of the United States, was granted by George II. to Gen. Oglethorpe, who, with forty followers, founded Savannah, Feb. 1, 1733. Savannah taken by the British in the revolutionary war, Dec. 29, 1778; the town and State evacuated by them in July 1782. The State unanimously adopted the Federal Constitution, Jan. 2, 1788. Population in 1790, 82,584; in 1840, 691,392, including 280,944 slaves. Staple commodities, cotton and rice.

**GERMANIC CONFEDERATION.** Napoleon had determined that the German, or Holy Roman Empire, as it was called, should no longer exist; but that instead thereof, a confederation of states should be formed; and this arrangement was adopted in 1815, by the allied sovereigns; and Germany is now governed by a diet, consisting of seventeen voices, and in case any alteration be requisite in the constitution, they are then to take a new division, and the general assembly then to be formed is to contain sixty-five, divided according to the relative consequence of the states. See *Addenda.*

**GERMANY.** From *Germani*, warlike men. First mentioned by the Roman historians about 211 B. C.: it was anciently divided into several independent states until 25 B. C., when the Germans withstood the attempt of the Romans to subdue them, although they conquered some parts; but by the repeated efforts of the Germans they were entirely expelled, about A. D. 290. In 432 the Huns, driven from China, conquered the greatest part of this extensive country; but it was not totally subdued till Charlemagne, the first emperor, became master of the whole, A. D. 802.

GERMANY, *continued.*

- Reign of Henry I. (king) surnamed the Fowler; he vanquishes the Huns, Danes, Vandals, and Bohemians - 919
- Otho I. extends his dominions, and is crowned emperor by the pope - 962
- Henry III. conquers Bohemia, wasting it with fire and sword - 1042
- Peter the Hermit leads the crusaders through Germany, where they massacre the Jews - 1095
- Henry IV. excommunicated by pope Pascal I. (Hildebrand) about - 1106
- Disputes relating to ecclesiastical investitures, with the pope - 1122
- The Guelph and Ghibeline feuds begin - 1140
- Conrad III. leads a large army to the holy wars, where it is destroyed by the treachery of the Greeks - 1147
- Teutonic order of knighthood - 1190
- Reign of Rodolph, count of Hapsburgh, chosen by the electors - 1273
- The famous edict, called the Golden Bull, by Charles IV. - 1356
- Sigismund, king of Bohemia, elected emperor. He betrays John Huss and Jerome of Prague, who are burned alive (see *Bohemia*) - 1414
- Sigismund being driven from the throne, Albert II., duke of Austria, succeeds. (In his family the crown resides for three centuries) - 1438
- The Pragmatic sanction (*which see*) - 1439
- The empire divided into circles - 1512
- Era of the Reformation (*Luther*) - 1517
- Abdication of Charles V. - 1556
- War of the two parties, the Evangelic union under Frederick, elector palatine, and the Catholic league, under the duke of Bavaria - 1618
- Battle of Prague, which lost the elector palatine the crown - 1620
- Treaty of Westphalia - 1648
- John Sobieski, king of Poland, defeats the Turks in many battles, and obliges them to raise the siege of Vienna - 1683
- The peace of Carlowitz - 1699
- The Pragmatic sanction (*which see*) - 1722
- The reign of Charles VI. is chiefly occupied with wars against the Turks, and in establishing the Pragmatic sanction, in favor of the succession of his daughter, Maria Theresa, married to the duke of Lorraine - 1711 to 1742
- Francis I., Duke of Lorraine, marries the heiress of Austria, the celebrated Maria Theresa, queen of Hungary; and is elected emperor - 1745
- Joseph II. extends his dominions by the dismemberment of Poland - 1772
- Again, by the final partition of that devoted kingdom - 1795
- [In the ruinous wars between Germany and France, the emperor loses the Netherlands, all his territories west of the Rhine, and his estates in Italy, 1793, *et seq.*]
- Francis I. assumes the title of emperor of Austria - Aug. 11, 1804
- Dissolution of the German empire; formation of the Confederation of the Rhine - July 12, 1806
- General agitation among the people, and demands for reform granted in various degrees by sovereigns of Prussia, Bavaria, &c.; and by those of the smaller principalities of Germany - Feb. and March, 1848
- A federal union of the German States demanded by Prussia - March, 1848
- Congress of deputies at Frankfurt—Mitter-Meyer, President - March 31, 1848
- German Parliament meets at Frankfurt - May 18, 1848
- The archduke, John of Austria, elected by the parliament as lord-lieutenant of the Empire - June 29, 1848
- He is installed at Frankfurt, and names his ministers - July 15, 1848
- Great excitement in Germany on account of the execution at Vienna of Robert Blum, a Leipzig publisher, for aiding the insurrection - Nov. 1848

## A. D. EMPERORS OF GERMANY.

800. Charlemagne the Great.
814. Louis the Debonnaire.
840. Lothaire.
855. Louis II.
875. Charles II., the Bald; poisoned.
878. Louis III., the Stammerer.
879. Charles III., the Gross.
887. Arnould.
899. Louis IV.
912. Otho, duke of Saxony; he refused the dignity on account of his age.
912. Conrad, duke of Franconia.
919. Henry I., the Fowler.
936. Otho I., the Great.
973. Otho II., the Bloody.
983. Otho III., the Red; poisoned.
1002. Henry II., duke of Bavaria; the Holy and Lame.
1024. Conrad II., the Salique.
1039. Henry III., the Black.
1055. Henry IV.; deposed.
1077. Rodolphus; killed in battle.
1080. Henry IV.; re-instated.
1105. Henry V.
1125. Lothaire II.
1138. Conrad III.
1152. Frederick Barbarossa; drowned in Bohemia.
1191. Henry VI., the Sharp.
1198. Philip; killed at Bamberg.
1208. Otho IV.; deposed.
1211. Frederic II.; deposed.
1245. Henry VII.; killed.
1246. William; killed in battle.
1273. Rodolphus, count of Hapsburg, the first of the Austrian family.
1291. Adolphus; deposed.
1298. Albert I.; killed by his nephew.
1308. Henry VIII.; poisoned by a priest, in the consecrated wafer.
1314. Louis IV., of Bavaria; killed by a fall from his horse.
1347. Charles IV., of Luxembourg.
1378. Wenceslaus, king of Bohemia.
1399. Frederick, Duke of Brunswick.
1400. Rupert, palatine of the Rhine.
1410. Sigismund, king of Hungary.
1437. Albert II., duke of Austria and king of Bohemia.
1440. Frederick III., archduke of Austria.

GERMANY, *continued.*

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

There are about 20 German principalities with territories equal to English counties. The free towns are Hamburg, Bremen, Frankfort on the Maine (one of the greatest trading places in Europe), and Lubeck, which was the head of the famous Hanseatic League, formed in that city in 1164.

**GHEENT.** Anciently the capital of the Nervii. Prince John, third son of Edward III. of England, was born here, and hence named *John of Gaint*. Pacification of Ghent, November 8, 1576. Ghent was taken by the duke of Marlborough in A. D. 1706, and several times taken and retaken by the contending armies during the late wars. The peace of Ghent between Great Britain and the United States, was signed here, December 24, 1814.

**GIANTS.** The emperor Maximus was eight feet and a half in height; he was also of great bulk, and used the bracelet of his wife as a ring for his thumb, and his shoe was longer by a foot than that of an ordinary man.—*Zwinglius*. "The tallest man that hath been seen in our age was one named Gabara, who in the days of Claudius the late emperor was brought out of Arabia. He was nine feet nine inches high."—*Pliny*. John Middleton, of Hale, in Lancashire, born in 1578, was nine feet three inches high. Patrick Cotter, the celebrated Irish giant, born in 1761, was eight feet seven inches in height; his hand, from the commencement of the palm to the extremity of the middle finger, measured twelve inches, and his shoe was seventeen inches long; he died in September 1806, in his 46th year. Giants' bones 17, 18, 20, and 30 feet high, were once reported to have been found; but there is now no doubt that they were organic remains of colossal quadrupeds.

**GIBRALTAR.** A fortress, whose immense strength excites wonder and admiration, and renders it impregnable: it is the ancient Calpe, which, with Abyla on the opposite shore of Africa, obtained the name of the Pillars of Hercules. The height of the rock, according to Cuvier, is 1437 English feet: it was taken by the Saracens under Tarik (*Gibel-Tarik*, Mountain of Tarik, whence its present name) in A. D. 712. In the year 1462 the king of Castile took Gibraltar from the Moors; and the English, under sir George Rooke, the prince of Hesse Darmstadt, sir John Leake, and admiral Byng, bravely won it, July 24, 1704. It was surrendered, after a dreadful cannonade, to the British, by the governor, the marquis de Salines; and it has since continued an appendage to the British crown.

- |                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                            |

\* The army amounted to 40,000 men. The duke of Crillon commanded 12,000 of the best troops of France. 1000 pieces of artillery were brought to bear against the fortress, besides which, there

**GILDING.** First practised at Rome, about 145 B. C. The capitol was the first building on which this enrichment was bestowed.—*Pliny*. Of gold leaf for gilding the Romans made but 750 leaves, four fingers square, out of a whole ounce.—*Pliny*. It consequently was more like our plating.—*Trusler*. A single grain of gold may now be stretched out under the hammer into a leaf that will cover a house.—*Dr. Halley*. Gilding with leaf gold on *bole ammoniac* was first introduced by Margaritone, in 1273. The art of gilding on wood, previously known, was improved in 1680.

**GISORS, BATTLE OF,** in France, between the armies of France and England, in which the former was signally defeated by Richard I., whose parole for the day was "*Dieu et mon droit*"—"God and my right;" and from this time it was made the motto to the royal arms of England, A. D. 1198.

**GLADIATORS.** They were originally malefactors who fought for their lives, or captives who fought for their freedom. They exhibited at the funeral ceremonies of the Romans, 263 B. C., probably following the Greek custom of sacrificing to the manes of deceased warriors the prisoners taken in battle. Gladiator fights afterwards exhibited at festivals, about 215 B. C. When Dacia was reduced by Trajan, 1000 gladiators fought at Rome in celebration of his triumph for 123 days, A. D. 103. Their combats on public theatres were suppressed in the East by Constantine the Great, A. D. 325. Finally suppressed by Theodorick, in the year 500.—*Lenglet*.

**GLASGOW.** Erected into a burgh in A. D. 1180. Its charter was obtained from James II., in 1451, at which period the university was founded. Its earliest commerce was in salmon, about 1420.

**GLASS.** The Egyptians are said to have been taught the art of making glass by Hermes. The discovery of glass took place in Syria.—*Pliny*. Glass-houses were erected in Tyre, where glass was a staple manufacture for many ages. This article is mentioned among the Romans in the time of Tiberius; and we know, from the ruins of Pompeii, that windows were formed of glass before A. D. 79. Italy had the first glass windows, next France, whence they came to England. Used for windows in private houses in the reign of Henry II., 1177, but imported.—*Anderson*. The manufacture was established in England at Crutched-friars, and in the Savoy, in 1557.—*Stowe*. It was improved in 1635, and was brought to great perfection in the reign of William III. The duties on glass in England were entirely remitted, 1845.

**GLASS, PAINTING ON.** This was a very early art. It was practised at Marseilles in a beautiful style, about A. D. 1500. It is said the art existed in England towards the 12th century. It reached to a state of great perfection about 1530.

**GLENCOE, MASSACRE OF.** This was the horrible massacre of the unoffending and unsuspecting inhabitants, the Macdonalds, merely for not surrendering in time to king William's proclamation. About 38 men were brutally slain; and women and children, their wives and offspring, were turned out naked

---

were 47 sail of the line, all three-deckers; 10 great floating batteries, esteemed invincible, carrying 212 guns; innumerable frigates, xebecs, bomb-ketches, cutters, and gun and mortar boats; while small craft for disembarking the forces covered the bay. For weeks together, 6000 shells were daily thrown into the town; and on a single occasion, 8000 barrels of gunpowder were expended by the enemy. Yet in one night, their floating batteries were destroyed with red-hot balls, and their whole line of works annihilated by a sortie from the garrison, commanded by general Elliot, Nov. 27, 1781. The enemy's loss in munitions of war, on this night alone, was estimated at upwards of 2,600,000*l.* sterling. But their grand defeat by a garrison of only 7000 British, occurred Sept. 13, 1782.

in a dark and freezing night, and perished by cold and hunger: this black deed was perpetrated by the earl of Argyle's regiment, May 9, 1691.

**GLOBE.** The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true cause of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B. C. Pythagoras demonstrated from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun, Venus, Mercury, Mars, Jupiter, Saturn, and the sphere of the stars, about 506 B. C. Aristarchus, of Samos, maintained that the earth turned on its own axis, and revolved about the sun; which doctrine was held by his contemporaries as so absurd, that the philosopher had nearly lost his life to his theory, 280 B. C. The first voyage round the globe was performed by Picaro, commanding a ship of Magellan's squadron, 1520–4. The first English navigator who performed the same enterprise was sir Francis Drake, 1577.—See *Circumnavigation*, and *Earth*.

**GLORY.** The glory or nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, were adopted from the Cæsars and their flatterers, by whom they were used in the first century. The doxology of the prayer *Gloria Patri* was ordained in the church of Rome, and was called doxology because it began with δόξα, glory, A. D. 382.

**GLOVES.** They were in use in very early times. In the middle ages, the giving of a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, A. D. 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves were introduced into England in 1580, and are presented to judges at maiden assizes to this day.

**GNOSTICS.** Ancient heretics, who were famous from the first rise of Christianity. The tenets of this sect were revived in Spain, in the fourth century, by the Priscillianists; but the name, which was once glorious, at length became infamous. The Gnostics were not so much a particular sect of heretics, as a complication of many sects; and were so called, because they pretended extraordinary illuminations and knowledge, one main branch of which consisted in their pretended genealogies or attributes of the Deity, in which they differed among themselves as much as they did from others.

**GOBELIN-TAPESTRY.** Tapestry so called from a noted house at Paris, in the suburb of St. Marcel, formerly possessed by famous wool-dyers, whereof the chief, called Giles Gobelin, who lived in the reign of Francis I., is said to have found the secret of dyeing scarlet, which was from him called the scarlet of the Gobelins; the house and river that runs by it also took the same name. This house was purchased by Louis XIV. for a manufactory in all manner of curious works for adorning the royal palaces, under the direction of Mons. Colbert, especially tapestry, designs for which were drawn by the celebrated Le Brun, by appointment of the king, A. D. 1666.—*Du Fresnoy*.

**GODFATHERS AND GODMOTHERS.** The Jews had godfathers in the circumcision of their sons. In the Christian church sponson in baptism arose in the desire of assuring that the child should be of the religion of Christ. It was first ordained to be used, according to some, by pope Alexander; according to others, by Sixtus, and others refer it to Telesphorus, about A. D.

130. In Catholic countries they have godfathers and godmothers in the baptism of their bells.

**GOLD.** The purest and most ductile of all the metals, for which reason it has, from the earliest ages, been considered by almost all nations as the most valuable. It is too soft to be used pure, and to harden it it is alloyed with copper or silver: in its pure state it is twenty-four carats; that used in our coin is twenty-two carats, and two parts of copper. In the early ages no metals were used but those found pure, as gold, silver, and copper. The smelting of ores was a comparatively late invention, and ascribed both to observations on volcanoes and to the burning of forests.

**GOLD MINES.** Gold is found in various parts of the earth, but is most abundant in Africa, Japan, and South America, in which last gold was discovered by the Spaniards in 1492, from which time to 1731, they imported into Europe 6000 millions of pieces of eight, in register gold and silver, exclusively of what were unregistered. In 1730, a piece of gold weighing ninety marks, equal to sixty pounds troy (the mark being eight ounces), was found near La Paz, a town of Peru. Gold was discovered in Malacca, in 1731; in New Andalusia in 1785; in Ceylon in 1800; in Virginia 1829; in North Carolina 1824; South Carolina 1829; in Georgia 1830: in California, April 1848.

**GOLD AND SILVER.** Quantity produced in forty years from 1790 to 1830, as stated in the *Mining Journal*:

|                        | <i>Gold.</i>  | <i>Silver.</i> |
|------------------------|---------------|----------------|
| Mexico . . . . .       | £6,436,453 =  | £139,818,032   |
| Chili . . . . .        | 2,768,488 =   | 1,822,924      |
| Buenos Ayres . . . . . | 4,024,895 =   | 27,182,673     |
| Russia . . . . .       | 3,703,743 =   | 1,502,981      |
|                        | £17,003,579 = | £170,326,610   |

The mines of North and South America had, in 1840, sent to Europe  $3\frac{1}{2}$  times more gold, and 12 times more silver, than those of the other hemisphere. The gold mines in Virginia, North and South Carolina, and Georgia, discovered 1824-30, had produced altogether up to 1835, \$4,377,500. Those of California, discovered in the spring of 1848, had produced up to Feb. 1850, at least 25 millions of dollars in value, a considerable part of which was sent to Europe. The amount of California gold coined at the U. S. mint in 1849 was about \$6,000,000. The total annual production of gold in the world was estimated in 1840 at about 36 tons, proportioned thus: North and South America 11, Europe and Asiatic Russia  $6\frac{1}{4}$ , Indian Archipelago,  $4\frac{1}{4}$ , Africa 14. See *Coin*.

**GOLDEN FLEECE.** Jason, the Argonaut, sailed with his companions from Iolchos to Colchis to avenge the death of his kinsman Phryxus, and to recover his treasures, which the perfidious Æetes, king of Colchis, had seized, after murdering their owner. The ship in which Phryxus had sailed to Colchis, was adorned with the figure of a ram on the poop; which gave occasion to the poets to pretend that the journey of Jason was for the recovery of the golden fleece, 1263 B. C.

**GOLDEN NUMBER.** The cycle of nineteen years, or number which shows the years of the moon's cycle; its invention is ascribed to Meton, of Athens, about 432 B. C.—*Pliny*. To find the golden number or year of the Lunar cycle, add one to the date and divide by nineteen, then the quotient is the number of cycles since Christ, and the remainder is the Golden number.

**GOOD FRIDAY.** From the earliest records of Christianity, this day has been held as a solemn fast, in remembrance of the crucifixion of our Saviour on Friday, April 3, A. D. 33. Its appellation of *good* appears to be peculiar to the Church of England: our Saxon forefathers denominated it *Long Fri-*

*day*, on account of the great length of the offices observed, and fastings enjoined on this day.

**GORDIAN KNOT.** The knot made of the thongs that served as harness to the wagon of Gordius, a husbandman, who was afterwards king of Phrygia. Whosoever loosed this knot, the ends of which were not discoverable, the oracle declared should be emperor of Persia. Alexander the Great cut away the knot with his sword until he found the ends of it, and thus, in a military sense at least, this "conqueror of the world" interpreted the oracle, 330 B. C.

**GORDON'S "NO POPERY" MOB:** occasioned by the zeal of lord George Gordon. It consisted of 40,000 persons who assembled in St. George's Fields, under the name of the Protestant Association, to carry up a petition to parliament for the repeal of the act which granted certain indulgences to the Roman Catholics. The mob once raised, could not be dispersed, but proceeded to the most daring outrages, pillaging, burning, and pulling down the chapels and private houses of the Catholics first, but afterwards of several other persons; breaking open prisons, setting the prisoners free, even attempting the Bank of England, and in a word totally overcoming the civil power for nearly six days. At length, by the aid of armed associations of the citizens, the horse and foot guards, and the militia of several counties, then embodied and marched to London, the riot was quelled. It commenced June 2; and on the 3d, the Catholic chapels, and numerous private mansions, were destroyed, the bank attempted, and the jails opened; among these were the King's Bench, Fleet, and Bridewell prisons; on the 5th, thirty-six fires were seen blazing at one time. In the end, 210 of the rioters were killed, and 248 were wounded, of whom 75 died afterwards in the hospitals. Many were tried, convicted, and executed. Lord George was tried the year after for high treason, but acquitted, June 2 to 7, 1780. —*Annual Register*.

**GOSPELS.** St. Mark wrote his gospel A. D. 44; St. Matthew in the same year; St. Luke in 55; and St. John in 96-7. The gospel of Matthew was found buried in the tomb of St. Barbus, and was conveyed to Constantinople in 485.—*Butler*. John wrote his gospel at Ephesus two years after he was thrown into a caldron of burning oil, from which he was taken out unhurt, and banished to the isle of Patmos.—*Idem*. The gospel is the glad tidings of the actual coming of the Messiah, and hence the evangelical history of Christ.—*Hammond*. Dr. Robert Bray was the author of the first plan for propagating the gospel in foreign parts. Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701.

**GOSPELLERS.** The name which was given to the followers of Wickliffe, who first attempted the reformation of the Church from the errors of popery: it was affixed to them by the Roman Catholics in derision, on account of their professing to follow and preach only the gospel, A. D. 1377.—*Bishop Burnet*.

**GOTHS.** A warlike nation that inhabited the space between the Caspian, Pontus, Euxine, and Baltic seas. They attacked the Roman empire A. D. 251. They were defeated by Claudius, and 320,000 slain, A. D. 269. After the destruction of the Roman empire by the Heruli, the Ostrogoths, under Theodoric, became masters of the greater part of Italy, where they retained their dominion till A. D. 553, when they were finally conquered by Narses, Justinian's general. The Visigoths settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

**GOVERNMENT, COST OF, IN EUROPE AND THE UNITED STATES.** In an elaborate article in the American Almanac, 1847, this result is reached, viz.:

|                                                                              |        |                                                                                                                                                                   |         |
|------------------------------------------------------------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| In the United States; aggregate of national expenditure, for each inhabitant | \$0 97 | loch, the average is equal, per head, to                                                                                                                          | \$12 33 |
| Aggregate of State expenditure, for each inhabitant                          | 0 50   | In France, according to Chevalier, in 1833, the cost was about 1,250 millions of francs, or 40 francs per head—say                                                | \$7 50  |
| Aggregate of town or city expenditure, for each inhabitant                   | 0 92   | Thus, France pays about three times, and Great Britain five times as much for Government as the United States. (See <i>Administrations</i> of the United States.) |         |
| Total cost of Government in the United States, per head                      | \$2 39 |                                                                                                                                                                   |         |
| or \$47,800,000 if the population is 20 millions.                            |        |                                                                                                                                                                   |         |
| In England, according to Maccul-                                             |        |                                                                                                                                                                   |         |

**GRACE AT MEAT.** The table was considered by the ancient Greeks as the altar of friendship, and held sacred upon that account. They would not partake of any meat until they had first offered part of it, as the first fruits, to their gods; and hence came the short prayer said before and after meat in all Christian countries from the earliest times.—*Lenglet*.

**GRAMMARIANS, OR CRITICS.** Anciently, the most eminent men in literature were denominated grammarians. A society of grammarians was formed at Rome so early as 276 B. C.—*Blair*. Apollodorus of Athens, Varro, Cicero, Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. Cobbett declared Mr. Canning to be the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's said, "We threw our whole grammatical mind upon it and could not discover one error."

**GRANARIES.** The Romans formed granaries in seasons of plenty, to secure food for the poorer citizens; and all who wanted it were provided with corn from these reservoirs, in necessitous times, at the cost of the public treasury. There were three hundred and twenty-seven granaries at Rome.—*Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two store-houses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearthness of these articles by the great increase of inhabitants, 7 James I., 1610.—*Stowe*.

**GRANICUS, BATTLE OF,** in which Alexander the Great signally defeated the Persians. The Macedonian troops crossed the Granicus in the face of the Persian army, although the former did not exceed 30,000 foot and 5000 horse, while the Persian army amounted to 600,000 foot, and 20,000 horse.—*Justin*. Yet the victors lost in this great battle but fifty-five foot soldiers, and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and numerous other great towns submitted to the conqueror, 334 B. C.—*Bossuet*.

**GRATES.** The hearths of the early Britons were fixed in the centre of their halls. The fire-place originally was perhaps nothing more than a large stone depressed below the level of the ground to receive the ashes. There were arched hearths among the Anglo-Saxons; and chafing dishes were most in use until the general introduction of chimneys, about A. D. 1200. See *Chimneys*.

**GRAVITATION.** This, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about A. D. 38. Kepler enlarged upon it, about A. D. 1615; and Hook published it as a system. The principles of gravity were proved by Galileo, at Florence, about 1633; and they were subsequently adopted by Newton, about 1687.

**GRÆCIA MAGNA.** That part of Italy where the Greeks planted colonies,

but its boundaries are very uncertain. Some say that it extended to the southern parts of Italy; and others suppose that Magna Græcia comprehended only Campania and Lucania. To these is added Sicily, which was likewise peopled by the Greek colonists.—*Lempriere*.

**GREECE.** The first inhabitants of this justly celebrated country of the ancient world, were the progeny of Javan, fourth son of Japheth. Greece was so called from a very ancient king named Græcus; and another king named Hellen, gave his subjects the appellation of Hellenists. Homer calls the inhabitants, indifferently, Myrmidions, Hellenists, and Achæins. For ancient Grecian history, see *Tabular Views*, p. 5 *et seq.*

|                                                                                                                                      |              |                                                                                                                                                                                                                                                                                             |             |

| The Provisional Government of Greece invites the protection of England                           | - July 24, 1825   | A bloodless revolution at Athens, to enforce ministerial responsibility and national representation, is consummated                                             | - Sept. 14, 1843       |
| Siege of Missolonghi: the besieging Turks are defeated in a formidable attack upon it            | - August 1, 1826  | The king accepts the new constitution                                                                                                                           | - March 16, 1844       |
| The Greeks disperse the Ottoman fleet                                                            | - Jan. 28, 1826   | [See <i>Athens, Macedon, Sparta, Thrace</i> , and other states of Greece.]                                                                                      |                        |

**GREEK CHURCH.** A difference arose in the eighth century between the eastern and western churches, which in the course of two centuries and a half terminated in a separation: this church is called *Greek* in contradistinction from the latter, or *Roman* church. The Greek church claims priority as using the language in which the Gospel was first promulgated, and many of its forms and ceremonies are similar to those of the Roman Catholics; but it disowns the supremacy of the pope. It is the established religion of Russia.

**GREEK FIRE.** A composition of combustible matter invented by one Callinicus, an ingenious engineer of Heliopolis, in Syria, in the seventh century,

\* The slaughter lasted 10 days; 40,000 of both sexes falling victims to the sword, or to the fire which raged until every house, save those of the foreign consuls, was burned to the ground. 7000 Greeks, who had fled to the mountains, were induced to surrender by a promise of amnesty, guaranteed by the consuls of England, France and Austria, yet even they were, every man of them, butchered! The only exception made during the massacre was in favor of the young and more beautiful women and boys, 30,000 of whom were reserved for the markets. The narrative of plunder, violation, and crime, while the infidel army was let loose upon the captured city, is too long and too shocking for transcription here.

in order to destroy the Saracens' ships, which was effected by the general of the emperor Pogonat's fleet; and 30,000 men were killed. The property of this fire was to burn briskest in water, to diffuse itself on all sides, according to the impression given it. Nothing but oil, or a mixture of vinegar, urine, and sand, could quench it. It was blown out of long tubes of copper, and shot out of cross-bows, and other spring instruments. The invention was kept a secret for many years by the court of Constantinople; but it is now lost.

**GREEK LANGUAGE.** The Greek language was first studied in Europe about A. D. 1450—in France, 1473. William Grocyn, or Grokeyn, a learned English professor of this language, travelled to acquire its true pronunciation, and introduced it at Oxford, where he had the honour to teach Erasmus, 1490.—*Wood's Athen. Oxon.*

**GREENLAND.** Discovered by some Norwegians from Iceland, about A. D. 980, and thus named on account of its superior verdure compared with the latter country. It was visited by Frobisher, in 1576. The first ship from England to Greenland was sent for the whale fishery by the Muscovy Company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, and suffered incredible hardships till the following year, when the company's ships brought them home.—*Tindal.* The Greenland Fishing Company was incorporated in 1693.

**GREENWICH OBSERVATORY.** Built at the solicitation of sir Jonas Moore and sir Christopher Wren, by Charles II., on the summit of Flamstead-hill, so called from the great astronomer of that name, who was the first astronomer-royal here. The English began to compute the longitude from the meridian of this place, 1675; some make the date 1679. This observatory contains a transept circle by Troughton; a transit instrument of eight feet by Bird; two mural quadrants of eight feet, and Bradley's zenith sector. The telescopes are forty and sixty inch achromatics, and a six-feet reflector; and among other fine instruments and objects is a famous camera obscura.

**GREGORIAN CALENDAR.** Ordained to be adopted by pope Gregory, XIII., from whom it derives its name, A. D. 1582; and introduced into the Catholic states of Europe in that year; into most other states in 1710; and adopted by England in 1752. To the time of Gregory, the deficiency in the Julian calendar had amounted to ten days; and in the year 1752 it had amounted to eleven days. See *Calendar*, and *New Style*.

**GRENADA.** Conquered by the Moors, A. D. 715; it was the last kingdom possessed by them, and was not annexed to the crown of Castile until 1491; the capital of this province is magnificent. New Grenada was conquered by the Spaniards in 1536. Grenada, in the West Indies, was settled by the French, 1650; it was taken from them by the English in 1762, and was ceded to England in 1763. The French possessed themselves of it again, in 1779; but it was restored to the English at the peace of 1783. In 1795 the French landed some troops, and caused an insurrection in this island, which was not finally quelled till June, 1796.

**GROCERS.** One of the oldest trades in England. The word anciently meant "ingrossers or monopolizers," as appears by a statute, 37 Edward III. The Grocers' Company is one of the twelve chief companies of the city of London, incorporated in 1429.

**GUADALOUPE.** Discovered by Columbus, A. D. 1493. It was colonized by the French in 1635. Taken by the English in 1759, and restored in 1763. Again taken by the English in 1779, 1794, and 1810; and in order to allure

the Swedes into the coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France in 1814.

**GUELPHS AND GHIBELINES.** These were party names, and are said to have been derived from Hiewelf and Hiegiblin, the names of towns. The designation began in Italy, A. D. 1139, and distinguished the contending armies during the civil wars in Germany; the Guelphs were for the pope, and the Ghibelines were for the emperor. Guelph is the name of the present royal family of England.—See *Brunswick*. The Guelphic order of knighthood was instituted for the kingdom of Hanover, by the prince regent, afterwards George IV., in 1816.

**GUILLOTINE.** An engine for decapitation, which has made an otherwise obscure name immortal. A similar instrument, but of ruder form, may be seen in an engraving accompanying the *Symbolica Questiones* of Achilles Bocchius, 4to, 1555 (see the Travels of Father Labat in Italy); it is there called the *Mamniaia*. In Scotland, also at Halifax, England (see *Halifax; Maiden*), soon after it was in use, and served to behead its introducer, the regent Morton. Dr. Guillotin, about 1785, recommended its use in France, from motives of humanity, as a substitute for the more cruel gibbet, and his name was applied to it, at first from mere waggishness. Its unwilling god-father was imprisoned during the revolutionary troubles, and ran some hazard of being subjected to its deadly operation; but he (contrary to a prevailing opinion) escaped, and lived to become one of the founders of the Academy of Medicine at Paris. He died May 26, 1814, aged seventy-six, enjoying to the last the esteem of all who knew him, for his mild virtues.

**GUINEAS.** An English gold coin, so named from their having been first coined of gold brought from the coast of Guinea, A. D. 1673. They were then valued at 30s. and were worth that sum in 1696. They were reduced in currency from 22s. to 21s. by parliament in 1717. Broad pieces were coined into guineas in 1732. The original guineas bore the impression of an elephant, on account of their having been coined of this African gold.

**GUNPOWDER.** The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about A. D. 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese possessed the art a number of centuries before. Its composition, moreover, is expressly mentioned by our own famous Roger Bacon, in his treatise *De Nullitate Magiæ*, which was published at Oxford, in 1216.

**GUNPOWDER PLOT IN ENGLAND.** The memorable conspiracy known by this name, for springing a mine under the houses of parliament, and destroying the three estates of the realm—king, lords, and commons—there assembled, was discovered on Nov. 5, 1605. This diabolical scheme was projected by Robert Catesby, and many high persons were leagued in the enterprise. Guy Faux was detected in the vaults under the House of Lords, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed; sir Everard Digby, Rockwood, Winter, Garnet, a Jesuit, and others, died by the hands of the executioner, as did Guy Faux, January 31, 1606. The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained in the late houses of parliament till 1825, when it was converted into offices.

**GUY'S HOSPITAL.** This celebrated London hospital is indebted for its origin to Thomas Guy, an eminent and wealthy bookseller, who, after having bestowed immense sums on St. Thomas's, determined to be the sole founder of another hospital. At the age of seventy-six, in 1721, he commenced the erection of the present building, and lived to see it nearly completed. It

cost him 18,793*l.*, in addition to which he left to endow it, the immense sum of 219,499*l.* A splendid bequest, amounting to 200,000*l.* was made to this hospital by Mr. Hunt, to provide additional accommodation for 100 patients; his will was proved Sept. 24, 1829.

**GYMNASIUM**, a place among the Greeks, where all the public exercises were performed, and where not only wrestlers and dancers exhibited, but also philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing, the athletes were often naked, whence the word *Gymnasium*—*gymnos, nudus*. They anointed themselves with oil to brace their limbs, and to render their bodies slippery, and more difficult to be grasped. The first modern treatise on the subject of Gymnastics was published in Germany in 1793. London society formed, 1826.

**GYPSIES, OR EGYPTIANS.** A strange commonwealth of wanderers and peculiar race of people, who made their appearance first in Germany, about A. D. 1517, having quitted Egypt when attacked by the Turks. They are the descendants of a great body of Egyptians who revolted from the Turkish yoke, and being defeated, dispersed in small parties all over the world, while their supposed skill in the black art gave them an universal reception in that age of credulity and superstition. Although expelled from France in 1560, and from most countries soon after, they are yet found in every part of Europe, as well as in Asia and Africa. Having recovered their footing, they have contrived to maintain it to this day. In England an act was made against their itinerancy, in 1580; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month, contrary to the statute. The gypsy settlement at Norwood, near London, was broken up, and they were treated as vagrants, May 1797. There were in Spain alone, previously to the year 1800, more than 120,000 gypsies, and many communities of them yet exist in England; and notwithstanding their intercourse with other nations, they are still, like the Jews, in their manners, customs, visage, and appearance, wholly unchanged.

## H.

**HABEAS CORPUS.** The subjects' *Writ of Right*, passed for the security and liberty of individuals, May 27, 1679. This act is next in importance to *Magna Charta*, for so long as the statute remains in force, no subject of England can be detained in prison, except in cases wherein the detention is shown to be justified by the law. The *Habeas Corpus* Act can alone be suspended by the authority of parliament, and then for a short time only, and when the emergency is extreme. In such a case, the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned.—*Blackstone*.

**HACKNEY COACHES** are of French origin. In France, a strong kind of cob-horse (*haquenée*) was let out on hire for short journeys: these were latterly harnessed (to accommodate several wayfarers at once) to a plain vehicle called *coche-à-haquenée*: hence the name. The legend that traces their origin to Hackney, near London, is a vulgar error. They were first licensed in 1662, and subjected to regulations, 6 William and Mary, 1694.—*Survey of London*. The number plying in London fixed at 1000, and their fares raised, 1771. The cabriolets are of Parisian origin; but the aristocratic taste of Englishmen suggested the propriety of obliging the driver to be seated on the outside of the vehicle.

**HAGUE.** Once called the finest *village* in Europe: the place of meeting of the States-General, and residence of the former earls of Holland, the princes of

Holland, &c. Here the States, in 1586, abrogated the authority of Philip II. of Spain, and held a conference in 1610, upon the five articles of the remonstrants, which occasioned the synod of Dort. Treaty of the Hague, entered into with a view to preserve the equilibrium of the North, signed by England, France, and Holland, May 21, 1659. De Witt was torn in pieces here, August 20, 1672. The French took possession of the Hague in January, 1795; favored by a hard frost, they marched into Holland, where the inhabitants and troops declared in their favor, a general revolution ensued, and the stadtholder and his family were compelled to leave the country and escape to England. The Hague was evacuated in November 1813, shortly after the battle of Leipsic, and the stadtholder returned to his dominions and arrived here in December, that year. Treaty of Commerce between England and Holland, December 16, 1837.

HAIR. By the northern nations, and in Gaul, hair was much esteemed, and hence the appellation *Gallia comata*; and cutting off the hair was inflicted as a punishment among them. The royal family of France had it as a particular mark and privilege of the kings and princes of the blood, to wear long hair, artfully dressed and curled. The clerical tonsure is of apostolic institution.—*Isidorus Hispalensis*. Pope Anicetus forbade the clergy to wear long hair, A. D. 155. Long hair was out of fashion during the Protectorate of Cromwell, and hence the term *Round-heads*. It was again out of fashion in 1795; and very short hair was the mode in 1801. Hair-powder came into use in 1590; and in 1795 a tax was laid upon persons using it in England, which yielded 20,000*l.* *per annum*.

HALCYON DAYS, in antiquity, implied seven days before and as many after the winter solstice, because the halcyon laid her eggs at this time of the year, and the weather during her incubation was always calm. The phrase was afterwards employed to express any season of transient prosperity, or of brief tranquillity, the *septem placidi dies* of human life.—*Butler*.

HALLIDON HILL, BATTLE OF, near Berwick, between the English and Scots, in which the latter were defeated with the loss of 13,000 slain, while a comparatively small number of the English suffered, reign of Edward III., July 19, 1333. After this victory, Edward placed Edward Baliol on the throne of Scotland.—*Robertson*.

HALIFAX, YORKSHIRE. Here prevailed a remarkable law. The woollen manufacture being very great, and prodigious quantities of cloths, kerseys, shalloons, &c. being continually on the tenters and liable to be stolen, the town, at its first incorporation, was empowered to punish capitally any criminal convicted of stealing to the value of upwards of thirteen pence halfpenny, by a peculiar engine, which beheaded the offender in a moment; but king James I. in the year 1620, took this power away: and the town is now under the ordinary course of justice. See *Maiden*.

HALLELUJAH AND AMEN. Hebrew expressions frequently used in the Jewish hymns: from the Jewish they came into the Christian church. The meaning of the first is *Praise the Lord*, and of the second *So be it*. They were first introduced by Haggai, the prophet, about 584 B. C.; and their introduction from the Jewish into the Christian church is ascribed to St. Jerome, one of the primitive Latin fathers, about A. D. 390.—*Cave's Hist. Lit.*

HAMBURGH. The company of Hambro' merchants was incorporated in 1296. France declared war upon Hamburgh for its treachery in giving up Napper Tandy, (see *Napper Tandy*.) October 1799. British property sequestered, March 1801. Hamburgh taken by the French after the battle of Jena in 1806. Incorporated with France, January 1810. Evacuated by the French on the advance of the Russians into Germany in 1813; and restored to its

independence by the allied sovereigns, May 1814. Awful fire here, which destroyed numerous churches and public buildings, and 2000 houses; it continued for three days, May 4, 1842.

**HAMPTON-COURT PALACE.** Built by cardinal Wolsey on the site of the manor-house of the knights-hospitallers. In 1526, the cardinal presented it to his royal master, Henry VIII. Here Edward VI. was born, and his mother, Jane Seymour, died; and Mary, Elizabeth, Charles, and others of our sovereigns, resided. Most of the old apartments were pulled down, and the grand inner court built, by William III. in 1694. In this palace was held, in 1604, the celebrated conference between the Presbyterians and the members of the Established Church, which led to a new translation of the Bible. See *Conference*.

**HANGED, DRAWN, AND QUARTERED.** The first infliction of this barbarous punishment took place upon a pirate, named William Marise, a nobleman's son, 25 Henry III., 1241. Five gentlemen attached to the duke of Gloucester were arraigned and condemned for treason, and at the place of execution were hanged, cut down alive instantly, then stripped naked, and their bodies marked for quartering, and then pardoned, 25 Henry VI. 1447. —*Stowe*. The punishment of death by hanging has been abolished in numerous cases by various statutes. See *Death, punishment of*. Hanging in chains was abolished 4 William IV., 1834.

**HANOVER.** This country had no great rank, although a duchy, until George I. got possession of Zell, Saxe, Bremen, Verden, and other duchies and principalities. Hanover became the ninth electorate, A. D. 1692. It was seized by Prussia, April 3, 1801; was occupied by the French, June 5, 1803; and annexed to Westphalia, March 1, 1810. Regained to England by the crown prince of Sweden, November 6, 1813, and erected into a kingdom, Oct. 13, 1814. The duke of Cambridge appointed lieutenant governor, in November, 1816. Visited by George IV. in October, 1821. Ernest, duke of Cumberland, succeeded to the throne, June 20, 1837; he granted freedom of the press and other concessions, March 17, 1848.

**HANOVERIAN SUCCESSION,** established by law, June 12, 1701, when an act passed limiting the succession of the crown of England, after the demise of William III. and of queen Anne (without issue), to the princess Sophia, of Hanover, and the heirs of her body, being protestants, she being the granddaughter of James I. George I. the son of Ernest Augustus, duke of Brunswick Lüneburgh, elector of Hanover, and of Sophia, ascended the throne, to the exclusion of the exiled family of the Stuarts, August 1, 1714.

**HANSE TOWNS.** A commercial union called the Hanseatic league, was formed by a number of port towns in Germany, in support of each other against the piracies of the Swedes and Danes: this association began in 1164, and the league was signed in 1241. At first it consisted only of towns situate on the coasts of the Baltic Sea, but its strength and reputation increasing, there was scarce any trading city in Europe but desired to be admitted into it, and in process of time it consisted of sixty-six cities. They grew so formidable as to proclaim war on Waldemar, king of Denmark, about the year 1348, and against Erick in 1428, with forty ships, and 12,000 regular troops besides seamen. This gave umbrage to several princes, who ordered the merchants of their respective kingdoms to withdraw their effects, and so broke up the greatest part and strength of the association. In 1630, the only towns of note of this once powerful league retaining the name, were Lubeck, Hamburg, and Bremen.

**HAPSBURGH, HOUSE OF.** One of the most illustrious families in Europe. Hapsburgh was an ancient castle of Switzerland, on a lofty eminence, near Schintznach. This castle was the cradle, as it were, of the house of Austria.

whose ancestors may be traced back to the beginning of the 13th century, when Rodolph, count of Hapsburgh, was elevated to the empire of Germany and archduchy of Austria, A. D. 1273. See *Germany*.

**HARLEQUIN.** This term is derived from a famous and droll comedian, who so much frequented Mr. Harley's house, that his friends and acquaintance used to call him *Harlequino*, little Harley.—*Menage*. Originally the name implied a merry andrew, or buffoon; but it now means an expert dancer at a play-house.

**HARLOTS.** Women who were called by synonyma conveying the meaning of harlot, were tolerated among the Jews, Greeks, and Romans. The celebrated Lais of Corinth, a beautiful courtesan, but remarkable for her vicious amours, was assassinated in the temple of Venus, by the women of Thesaly, in order to prevent her corrupting the fidelity of their husbands, about 350 B. C. It is affirmed that the mother of William I., of England, a furrier's daughter of Falaise, whose name was Arlotta, was of so infamous a character, that our odious term harlot is derived from her name.—*Dr. Johnson*. In England, harlots were obliged to wear striped hoods of party colors, and their garments the wrong side outwards, by statute 27 Edward III., 1352.

**HARMONIC STRINGS.** Pythagoras is said to have invented harmonic strings, in consequence of hearing four blacksmiths working with hammers in harmony, whose weights he found to be six, eight, nine, and twelve; or rather by squares, as thirty-six, sixty-four, eighty-one, and one hundred and forty-four. The harmonica, or musical glasses, airs from the tones of them were first formed by an Irish gentleman named Puckeridge.—*Franklin*. The invention was improved by Dr. Franklin in 1760.

**HARP.** It is traced to the earliest nations. David played on the harp before Saul.—1 *Sam.* xvi. 23. The lyre of the Greeks is the harp of the moderns. The Romans had their harp; so had the Jews, but it had very few strings. The Cimbri or English Saxons had this instrument. The celebrated Welch harp was strung with gut; and the Irish harp, like the more ancient harps, with wire.

**HARRISON'S TIME-PIECE.** Mr. Harrison's first instrument was invented in 1735; his second in 1739; his third in 1749; and his fourth, which procured him the reward of 20,000*l.*, advertised 13th Anne by the Board of Longitude, was produced a few years after. His celebrated time-piece was perfected in 1772.

**HARTFORD CONVENTION.** The celebrated convention of delegates from the New England States opposed to the war and to the administration of Madison, met Dec. 15, 1814.

**HASTINGS, BATTLE OF.** one of the most memorable and bloody, and in which more than thirty thousand were slain, fought between Harold II. of England, and William, duke of Normandy, in which the former lost his life and kingdom. William, hence surnamed the Conqueror, was soon after crowned king of England, and introduced a memorable epoch, known as the Conquest, in the annals of the country, Oct. 14, 1066.

**HASTINGS, WARREN, TRIAL OF.** Mr. Hastings, governor-general of India, tried by the peers of Great Britain for high crimes and misdemeanors, but acquitted, although he had committed many acts during his government which, it was thought, ought to have led to a different result. Among other charges against him, was his acceptance of a present of 100,000*l.* from the nabob of Oude, and this was not a solitary instance of his irregular means of accumulating wealth. The trial lasted seven years and three months,

1788-95. Sheridan's celebrated speech, on the impeachment of Mr. Hastings, attracted universal admiration.

**HATS.** See article *Caps*. First made by a Swiss at Paris, A. D. 1404. They are mentioned in history at the period when Charles VII. made his triumphal entry into Rouen, in 1449. He wore a hat lined with red velvet, and surmounted with a rich plume of feathers. It is from this reign that the use of hats and caps is to be dated, which henceforward began to take place of the chaperons and hoods that had been worn before in France. Hats were first manufactured in England by Spaniards, in 1510: before this time both men and women wore close-knit woollen caps.—*Stowe*. Very high crowned hats were worn by queen Elizabeth's courtiers; and high crowns were again introduced in 1783. A stamp-duty was laid upon hats in England in 1784, and again in 1796; it was repealed in 1811.

**HAVRE-DE-GRAVE.** This place was defended for the Huguenots by the English, in 1562. It has been bombarded several times by the British navy, in 1759, in 1794, in 1795 and in 1798. Declared to be in a state of blockade, Sept. 6, 1803. The attempts to burn the shipping here failed, August 7, 1804.

**HAYTI, OR HAITI,** the Indian name of St. Domingo, discovered by Columbus in 1492. Before the Spaniards finally conquered it, they are said to have destroyed in battle or cold blood, 3,000,000 of its inhabitants, including women and children. Toussaint established an independent republic in St. Domingo, July 22, 1801. He surrendered to the French, May 7, 1802. Dessalines made a proclamation for the massacre of all the whites, March 29, 1804. See *St. Domingo*. Dessalines was crowned king, by the title of Jacques I., Oct. 8, 1804. He died Sept. 21, 1805. Henry Christophe, a man of color, became president in Feb. 1807, and was crowned emperor by the title of Henry I., in March 1811; while Petion ruled as president at Port-au-Prince. Numerous black nobility and prelates were created same year. Petion died, and Boyer was elected in his room, in May 1818. Christophe committed suicide in Oct. 1820. Independence declared at St. Domingo, in Dec. 1821. Decree of the king of France confirming it, April 1825. Souloque elected president, March 2, 1847; proclaimed emperor of Hayti, August 24, 1849.

**HEBRIDES, NEW,** discovered by the navigator Quiros, A. D. 1606. Bourgainville visited them in 1768, and found that the land was not connected, but composed of islands, which he called the Great Cyclades. Cook, in 1774, ascertained the extent and situation of the whole group, and gave them the name they now bear.

**HECATOMB.** This was a sacrifice among the ancients of a hundred oxen; but it was more particularly observed by the Lacedemonians when they possessed a hundred capital cities. In the course of time this sacrifice was reduced to twenty-three oxen; and in the end, to lessen the expense, goats and lambs were substituted for oxen.—*Potter*.

**HECLA.** Its first eruption is recorded as having occurred A. D. 1004. About twenty-two eruptions have taken place, according to Olsson and Paulson. The most dreadful and multiplied convulsions of this great volcanic mountain occurred in 1783. See *Iceland*.

**HEGIRA, ERA OF THE,** dates from the flight of Mahomet from Mecca to Medina, which event took place in the night of Thursday the 15th July, A. D. 622; the era commences on the following day, viz.:—the 16th of July. Many chronologists have computed this era from the 15th July; but Cantemir has given examples proving that, in most ancient times, the 16th was the first day of the era; and there is now no doubt it is so. See *Mahometism* and *Medina*.

**HEIDELBERG, AND HEIDELBERG TUN.** Heidelberg, in Germany, on the river Neckar, was formerly the capital of the Palatinate: the protestant electoral house becoming extinct in 1693, a bloody war ensued, in which the famous castle was ruined, and the elector removed his residence to Mannheim. Here was the celebrated Heildelberg Tun, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine. The University of Heidelberg, one of the most celebrated in Europe, was founded in 1346, contained in 1840, 622 students.

**HELEN, RAPE OF,** which caused the Trojan war, 1204 B.C. Helen was the most beautiful woman in the world, and even in her childhood was so very lovely, that Theseus stole her away in her tenth year. From him, however, she was released, yet innocent, by her brothers; and after her return to the court of Sparta she was eagerly sought in marriage by the princes of Greece, and Ulysses persuaded the suitors to bind themselves on oath to abide by the uninfluenced choice of Helen, and to defend her person and character from that time. The princes took the oath, and Helen then made choice of Menelaus. Paris coming soon after to the court of this king, abused his hospitality by corrupting the fidelity of Helen: carrying her away, though not an unwilling captive, to Asia Minor. At Troy, the father of Paris, Priam, received her in his palace without difficulty; and Menelaus, assembling the princes of Greece, reminded them of their oath: and the siege and destruction of Troy followed, 1184 B.C. Paris was previously married, his wife being Cœnone, who lived with him in happiness on Mount Ida; and at his death by one of the arrows of Hercules, then in the possession of Philoctetes, he desired in his dying moments to be carried to Cœnone, whom he had so basely deserted; but he expired on the way. The nymph, however, still mindful of their former happiness, threw herself upon the body, bathed it with her tears, and then plunged a dagger in her heart.

**HELENA. Sr.** This island was discovered by the Portuguese, on the festival of St. Helena, A.D. 1502. The Dutch were afterwards in possession of it until 1600, when they were expelled by the English. The British East India company settled here in 1651; and the island was alternately possessed by the English and Dutch, until 1673, when Charles II. on Dec. 12, assigned it to the company once more. St. Helena was made the place of Napoleon's captivity, Oct. 16, 1815, and it became the scene of his death, May 5, 1821.

**HELIGOLAND.** This island formerly belonged to the Danes, from whom it was taken by the British, Sept. 5, 1807, and formed a depôt for British merchandise intended for the Continent during the war. Confirmed to England by the treaty of Kiel, Jan. 14, 1814, the same treaty by which Norway was ceded to Sweden. Though a mere rock, this is an important possession of the British crown.

**HELIOMETER.** A valuable scientific instrument for measuring the stars, invented by M. Bouguer, in 1774. The helioscope was invented by Christopher Scheiner in 1625.

**HELMETS.** They were worn, it is said, by the most savage tribes. Among the Romans the helmet was provided with a vizor of grated bars, to raise above the eyes, and a bever to lower for eating; the helmet of the Greeks was round, and that of the Romans square. Richard I. of England wore a plain round helmet; and after this monarch's reign most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306.—*Gwillim.*

**HELOTS.** The people of Helos, against whom the Spartans bore desperate

resentment for refusing to pay tribute, 883 B. C. The Spartans, not satisfied with the ruin of their city, reduced the Helots to the most debasing slavery; and to complete their infamy, they called all the slaves of the state, and the prisoners of war, by the degrading name of *Helotæ*, and further exposed them to every species of contempt and ridicule, 669 B. C. But in the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with their liberty, 431 B. C. But this act of justice did not last long; and the sudden disappearance of 2000 manumitted slaves was attributed to the Lacedemonians.—*Herodotus*.

**HEMP AND FLAX.** Flax was first planted in England, when it was directed to be sown for fishing-nets, A. D. 1533. Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia in British ships, 17,695 tons of hemp and flax.—*Sir John Sinclair*. The annual importations of these articles now amount to about 100,000 tons. More than 180,000 lbs. of rough hemp are used in the cordage of a first-rate man-of-war, including rigging and sails.

**HEPTARCHY.** The Heptarchy (or government of seven kings) in England was gradually formed from A. D. 455, when Hengist became the king of Kent, and that kingdom was erected. The Heptarchy terminated in A. D. 828, when Egbert reduced the other kingdoms, and became sole monarch of England. For the several kingdoms of the Heptarchy, see *Britain*.

**HERACLIDÆ, THE,** or the return of the Heraclidæ into the Peloponnesus: a famous epoch in chronology that constitutes the beginning of profane history, all the time preceding that period being accounted fabulous. This return happened 100 years after they were expelled, and eighty years after the destruction of Troy, 1104 B. C.

**HERALDRY.** Signs and marks of honor were made use of in the first ages of the world.—*Nisbet*. The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French, a lion, and afterwards the fleur-de-lis, *which see*. Heraldry, as digested into an art, and subjected to rules, may be ascribed in the first instance to Charlemagne, about the year 800; and in the next, to Frederick Barbarossa, about the year 1152; it began and grew with the feudal law.—*Sir George Mackenzie*. It was at length methodized and perfected by the crusades and tournaments, the former commencing in 1095.

**HERCULANEUM.** An ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of Vesuvius, Aug. 24, A. D. 79. Herculaneum was buried under streams of lava, and successive eruptions laid it still deeper under the surface. All traces of them were lost until A. D. 1711, from which year many curiosities, works of art, and monuments and memorials of civilized life have been discovered to the present time. 150 volumes of MSS. were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and re-purchased by the trustees of the British museum, where they are deposited; but the principal antiquities are preserved in the museum of Portici.

**HERETICS.** Formerly the term heresy denoted a particular sect; now heretics are those who propagate their private opinions in opposition to the Catholic church.—*Bacon*. Tens of thousands of them have suffered death by torture in Roman Catholic countries.—*Burnet*. See *Inquisition*. Simon Magus was the first heretic; he came to Rome A. D. 41. Thirty heretics came from Germany to England to propagate their opinions, and were

branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where, none daring to relieve them, they died of hunger and cold, 1160.—*Speed*. In the reign of Henry VIII. to be in possession of Tindal's Bible constituted heresy. The laws against heretics were repealed, 25 Henry VIII., 1534-5.

**HERMITS.** The name first given to those that retired to desert places, to avoid persecution, where they gave themselves up to prayers, fasting, and meditation. They were also called anchorets; and commonly lodged in dark caves, where their food was such roots as nature bestowed freely without culture. From these came the monks, and almost all the sorts of religious assemblies that live in monasteries. In the seventh persecution of the Christians, one Paul, to avoid the enemies of his faith, retired into Thebais, and became the first example of a monastic life, about A. D. 250.

**HERO AND LEANDER:** their amour. The fidelity of these lovers was so great, and their attachment to each other so strong, that Leander in the night frequently swam across the Hellespont, from Abydos to Sestos, to have secret interviews with Hero, a beautiful priestess of Venus, she directing his course by a burning flambeaux. After many stolen interviews, Leander was drowned in a tempestuous night, and Hero threw herself from her tower, and perished in the sea, 627 B. C.—*Livy*, *Herodotus*.

**HERRING-FISHERY.** It was largely encouraged by the Scotch so early as the ninth century. The herring statute was passed in 1357. The mode of preserving herrings by pickling was discovered about 1390, and gave rise to the herring fishery as a branch of commerce.—*Anderson*. The British Herring Fishery Company was instituted Sept. 2, 1750.

**HERSCHEL TELESCOPE, THE.** Herchel's seven, ten, and twenty-foot reflectors were made about 1779. He discovers the Georgium Sidus (*which see*), March 21, 1781. He discovers a volcanic mountain in the moon, in 1783; and about this time laid the plan of his great forty-foot telescope, which he completed in 1787, when he discovered two other volcanic mountains, emitting fire from their summits. In 1802, he by means of his telescopes, was enabled to lay before the Royal Society a catalogue of 5000 new nebulae, nebulous stars, planetary nebulae, and clusters of stars which he had discovered.

**HESSE, HOUSE OF.** Its various branches derive their origin from Gerberge, daughter of Charles of Lorraine, uncle of Louis V. of France, who was descended from Louis the Courteous. She was married to Lambert II. earl of Louvain, from whom the present landgraves of Hesse-Cassel, by Henry V., first of the family who bore the title of landgrave, are descended. There is no family in Germany more noble by their alliances than this; and it gives place to none for the heroes and statesmen it has produced. Six thousand Hessian troops arrived in England, in consequence of an invasion being expected, in 1756. The sum of 471,000*l.* three per cent. stock, was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again hired by England, and served in Ireland during the memorable rebellion there in 1798.

**HIEROGLYPHICS.** The first writing men used was only the single pictures and engravings of the things they would represent.—*Woodward*. Hieroglyphic characters were invented by Athotes, 2112 B. C.—*Usher*. The earliest records of them were the Egyptian, the first step towards letters, and some monuments whose objects were described by exaggerated tradition, or when forgotten, imagined.—*Phillips*.

**HIGH CHURCH AND LOW CHURCH PARTIES.** These were occasioned by

the prosecution of Dr. Sacheverel, preacher at St. Saviour's Southwark, for two seditious sermons, the object of which was to rouse the apprehensions of the people for the safety of the Church, and to excite hostility against the dissenters. His friends were called High Church, and his opponents Low Church, or moderate men, 8 Anne, 1710. The queen, who favored Sacheverel, presented him with the valuable rectory of St. Andrew's, Holborn. He died in 1724.

**HIGH TREASON.** The highest offence known to the law, and in regulating the trials for which was enacted the memorable statute, so favorable to British liberty, the 25th of Edward III. 1552. By this statute two living witnesses are required in cases of high treason; and it arose in the refusal of parliament to sanction the sentence of death against the duke of Somerset—it is that which regulates indictments for treason at the present day. By the 40th George III. 1800, it was enacted that where there was a trial for high treason in which the overt act was a direct attempt upon the life of the sovereign, such trial should be conducted in the same manner as the case of an indictment for murder. See *Trials*.

**HIGHNESS.** The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter mentioned king, the title of Highness and "Your Grace" were absorbed in that of Majesty.

**HINDOO ERA,** or Era of the Caliyug, began 3101 B. C. or 756 before the Deluge, in 2348: and the Hindoos count their months by the progress of the sun through the zodiac. The Samoat era begins 57 B. C.: and the Saca era, A. D. 77: they are all used by the Hindoo nations.

**HISTORY.** Previously to the invention of letters the records of history are vague, traditionary, and erroneous. The chronicles of the Jews, the Parian Chronicle, the histories of Herodotus and Ctesias, and the poems of Homer, are the foundations of early ancient history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, A. D. 476; and modern history dates from the age of Charlemagne, about A. D. 800. There was not a professorship of modern history in either of the English universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II. A professorship of history founded at Harvard College, was filled by Jared Sparks, who was succeeded by Francis Bowen, 1850.

**HOHENLINDEN, BATTLE OF,** between the Austrian and French armies, the latter commanded by general Moreau. The Imperialists were defeated with great loss, their killed and wounded amounting to 10,000 men, and their loss in prisoners to 10,000 more, November 3, 1800.

**HOLLAND.** The original inhabitants of this country were the Batavians, who derived their origin from the Catti, a people of Germany. Having been obliged to abandon their country on account of civil wars, they came and established themselves in a morass, formed by the waters of the Rhine and the Waal, which they named Bettuive, or Batavia, from Batton, the son of their chieftain. To these have since been added a pretty large proportion of Francs and Frisians.

| Cromwell declares war against Holland, and many naval battles are fought; Blake signally defeats Van Tromp                                                     | - 1653         | He receives the oath of allegiance from his subjects                                              | March 30, 1814 |
| William, prince of Orange, having married Mary, daughter of James II., is called to the British throne                                                         | - 1688         | And takes the title of king as William I.                                                         | March 15, 1815 |
| The office of Stadtholder is made hereditary in the Orange family                                                                                              | - 1747         | The revolution in Belgium ( <i>which see</i> ) commenced                                          | Aug. 25, 1830  |
| Era of the civil war                                                                                                                                           | - 1787         | The Belgians take the city of Antwerp ( <i>which see</i> )                                        | Oct. 27, 1830  |
| The French Republican army march into Holland; the people declare in their favor                                                                               | - 1793         | Belgium is separated from Holland, and Leopold of Cobourg is elected king                         | July 12, 1831  |
| The Stadtholder expelled                                                                                                                                       | Jan. 15, 1795  | Holland renews the war against Belgium                                                            | Aug. 3, 1831   |
| He arrives in England                                                                                                                                          | Jan. 21, 1795  | Conference in London on the affairs of Holland and the Netherlands terminates, <i>see Belgium</i> | Nov. 15, 1831  |
| Battle of Camperdown, Duncan signally defeats the Dutch                                                                                                        | Oct. 11, 1797  | Treaty between Holland and Belgium, signed in London                                              | April 19, 1839 |
| The Texel fleet, of twelve ships of the line, with thirteen Indiamen, surrendered to the British admiral Duncan, without firing a gun                          | Aug. 28, 1799  | Abdication of William I. in favor of his son                                                      | Oct. 8, 1840   |
| A new constitution is given to the Batavian republic; the chief officer (R. J. Schimmelpennick) takes the title of Grand Pensionary                            | April 26, 1805 | Death of the ex-king                                                                              | Dec. 12, 1844  |
|                                                                                                                                                                |                | The king promises his assent to all reforms passed by the chambers                                | March 14, 1848 |
|                                                                                                                                                                |                | New constitution appears                                                                          | April 17, 1848 |
|                                                                                                                                                                |                | Death of William II.                                                                              | March 17, 1849 |

## STADTHOLDERS, ETC.

- |                                                                                                                                                                     |                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| A.D. 1554 William the Great succeeds his cousin Rene, to whom the United Provinces owe their foundation and glory: killed by an assassin, hired by Philip of Spain. | 1702 John William Frizo, drowned in passing a ferry in Holland. |
| 1584 Henry Philip William.                                                                                                                                          | 1711 Charles Henry Frizo.                                       |
| 1618 Maurice, a consummate general.                                                                                                                                 | 1747 William IV., first hereditary stadtholder.                 |
| 1625 Frederick Henry.                                                                                                                                               | 1751 William V.                                                 |
| 1647 William II.                                                                                                                                                    | KINGS.                                                          |
| 1650 William III. made stadtholder in 1672, and king of England in 1689.                                                                                            | 1813 William I.                                                 |
|                                                                                                                                                                     | 1840 William II.                                                |
|                                                                                                                                                                     | 1849 William III., present king, (1852.)                        |
|                                                                                                                                                                     | <i>See Belgium.</i>                                             |

**HOLLAND, NEW.** It is not clearly ascertained when this country was first discovered. In 1605, *et seq.*, various parts of the coast were traced by the Spanish, Portuguese, Dutch, and English. What was deemed till lately the south extremity, was discovered by Tasman, in 1642. The eastern coast, called New South Wales, was taken possession of, in his Britannic majesty's name, by captain Cook, in 1770. *See Botany Bay, New South Wales, and Van Diemen's Land.*

**HOLY ALLIANCE.** A league so called between the emperors of Russia and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions. This alliance was ratified at Paris, September 26, 1815.

**HOLY WATER** is said to have been used in churches as early as A. D. 120.—*Ashe.*

**HOMER'S ILIAD AND ODYSSEY.** The misfortunes of Troy furnish the two most perfect Epic\* poems in the world, written by the greatest poet that has ever lived; about 915 B. C. The subject of the first is the wrath of Achilles; the second recounts the voyages and adventures of Ulysses after the destruction of Troy. Among the thousands of volumes burnt at Constantinople, A. D. 477, were the works of Homer, said to have been written in golden letters on the great gut of a dragon, 120 feet long.—*Univ. Hist.* The works of Homer are supposed by some to have done great injury to mankind, by inspiring the love of military glory. Alexander was said to sleep with them always on his pillow.—*Darwin.*

**HOMICIDE.** This crime was tried at Athens by the Areopagites, 1507 B. C. He that killed another at any public exercise of skill, or who killed another that lay perdue to do a person mischief of a grievous nature, was not deemed guilty. He who killed a man taken with another's wife, sister, daughter, or concubine, or he who killed a man who, without just grounds, assaulted another violently, was not deemed a homicide. Among the Jews, wilful murder was capital; but for chance-medley, the offender should fly to one of the cities of refuge, and there continue till the death of the high priest. In the primitive church, before the Christians had the civil power, wilful homicide was punished with a twenty years' penance. Our laws distinguish between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness. See *Murder.*

**HONEY-MOON.** Among the ancients, a beverage prepared with honey, such as that known as mead, and as metheglin, in England, was a luxurious drink. It was a custom to drink of diluted honey for thirty days or a moon's age, after a wedding-feast, and hence arose the term *honey-moon*, of Teutonic origin. Attila, the devastating Hun, who ravaged nearly all Europe, drank, it is said, so freely of *hydromel* on his marriage-day, that he died in the night from suffocation, 453 A. D. His death is, however, ascribed to another cause. See *Attila.*

**"HONI SOIT QUI MAL Y PENSE."** It is said that the countess of Salisbury, at a ball at court, happening to drop her garter, the king, Edward III., took it up, and presented it to her with these words: "*Honi soit qui mal y pense*," "evil be to him who evil thinks." They afterwards became the motto of the Garter; but this statement of the origin of the motto is unsupported by sufficient authority.—*Goldsmith.*

**HONOR.** Honor was a virtue highly venerated by the ancients, particularly among the Romans, and temples were ultimately erected to Honor by that people as a divinity. The first temple was built by Scipio Africanus, about B. C. 197; and others were raised to her worship by C. Marius, about 102 B. C. These temples were so constructed that it was impossible to enter that to Honor without going through the temple of Virtue; and Marius ordered his edifices not to be built too much elevated or too lofty, thereby to intimate to the worshippers that humility was the true way to honor.

**HOPS.** Introduced from the Netherlands into England, A. D. 1524, and were used in brewing; but the physicians having represented that they were unwholesome, parliament was petitioned against them as being a wicked weed, and their use was prohibited in 1528.—*Anderson.* At present there are between fifty and sixty thousand acres, on an average, annually under the

---

\* The epic poems of HOMER and VIRGIL, the *Gierusalemme* of TASSO, the *Paradise Lost* of MILTON, and the *Henriade* of VOLTAIRE, are the noblest that exist; and MILTON'S is considered to rank next to HOMER'S. "*Paradise Lost* is not the greatest of epic poems," observes Dr. JOHNSON, "only because it is not the first."—*Butler.*

culture of hops in England. They are grown chiefly in Hereford, Kent, and Worcestershire.

**HORATII AND CURATII, THE COMBAT OF THE, 669 B. C.** The Romans and the Albans contesting for superiority, agreed to choose three champions on each side to determine to which it belonged; and the three Horatii, Roman knights, and the three Curatii, Albans, being elected by their respective countries, engaged in the celebrated combat which, by the victory of the Horatii, united Alba to Rome.

**HORSE.** The people of Thessaly were excellent equestrians, and probably were the first, among the Greeks at least, who rode upon horses, and broke them in for service in war; whence arose the fable that Thessaly was originally inhabited by centaurs. And Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen.—1 *Kings*, iv. 26. The power of the horse is equal to that of five men.—*Smeaton*. A horse can perform the work of six men.—*Bossuet*. The Greeks and Romans had some covering to secure their horses' hoofs from injury. In the ninth century, horses were only shod in the time of frost. The practice of shoeing was introduced into England by William I., 1066. In England there are two millions of draught and pleasure horses, and one hundred thousand agricultural horses, which consume the produce of seven millions of acres. The horse-tax was imposed in 1784, and was then levied on all saddle and coach horses in England. The existing duty upon "horses for riding" only in England, amounts to about 350,000*l.* per year. See *Race Horses*.

**HOSPITALLERS.** Military knights of the order of St. John, of Jerusalem, who were under religious vows; instituted by opening a hospital for the reception of pilgrims at Jerusalem, in A. D. 1048. They became a monastic order in 1092; and a military order in 1118. See *Malla*.

**HOSPITALS OF LONDON.** Several of these most valuable and merciful institutions are of ancient date, and richly endowed. One of the most magnificent erections by a single individual is that of Guy's Hospital, Southwark, a London bookseller of that name having built it at the cost of 18,793*l.*, and endowed it, in 1724, by a bequest of 219,499*l.* See *Infirmaries*.

**HOST, ELEVATION OF THE.** Introduced in Roman Catholic worship, and prostration enjoined, in A. D. 1201. Pope Gregory IX. was the first pontiff who decreed a bell to be rung as a signal for the people to betake themselves to the adoration of the host, which is done to this day.—*Dr. A. Rees*.

**HOURS.** The day began to be divided into hours from the year 293 B. C., when L. Papirius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*), 158 B. C., the time was called at Rome by public criers. The Chinese divide the day into twelve parts of two hours each. The Italians reckon twenty-four hours round, instead of two divisions of twelve hours each, as we do. In England, the measurement of time was alike uncertain and difficult: one expedient was by wax candles, three inches burning an hour, and six wax-candles burning twenty-four hours: these candles were invented by Alfred, clocks and hour-glasses not being then known in England, A. D. 886.

**HUDSON'S BAY.** Discovered by captain Henry Hudson, when in search of a North-West passage to the Pacific Ocean, A. D. 1610; but in fact, this part of North America may more properly be said to have been discovered by Frobisher in the reign of Elizabeth, although Hudson ventured further north. The latter, passing the winter in this bay on his fourth voyage, was, with four others, thrown by his sailors into a boat, and left to perish. The Hudson-Bay Company obtained chartered possessions here, in 1670. The forts were destroyed by the French in 1686 and 1782.

**HUE AND CRY.** The old common-law process of pursuing "with horn and with voice," from hundred to hundred, and county to county, all robbers and felons. Formerly the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies.

**HUGUENOTS.** This word is of uncertain derivation. It was used, as a term of reproach, by the French Catholics, to nickname their countrymen of the reformed churches, or Protestants of France, and had its rise in 1560. The memorable massacre of the Huguenots of France, on the festival of St. Bartholomew, took place on Aug. 24, 1572.—See *Bartholomew, St.* A considerable number of Huguenots emigrated after that event to North America, and settled on the Delaware, and in the Carolinas.

**HUMILIATI.** A congregation of religious in the church of Rome, which was formed by some Milanese who had been imprisoned under Frederick I., 1162. This order had ninety monasteries; but it was abolished for luxury and cruelty by pope Pius V., and their houses were given to the Dominicans and Cordeliers, in 1570.

**HUNGARY.** The Pannonia of the ancients, and subject to the Romans, 11 B. C., and kept possession of by them until, in the fourth century of the Christian era, the Vandals drove them out of it. About forty years afterwards, the Vandals migrated towards Gaul, and their deserted settlements were occupied by the Goths, who in the beginning of the fifth century were expelled by the Huns, a ferocious tribe of Scythians, headed by Attila, whose dreadful ravages obtained him the appellation of "The Scourge of God."—In more recent times, the Hungarians have been much intermixed with Slavonic nations, as Bohemians, Croats, Russians, and Vandals; besides German settlers, as Austrians, Styrians, Bavarians, Franks, Swabians, Saxons, &c. Hungary was annexed to the empire of Germany under Charlemagne, but it became an independent kingdom in 920.

|                                                                                                                                                                                                        |             |                                                                                                                                               |        |

| Stephen receives the title of <i>Apostolic king</i> from the pope                                                                                                                                      | - A. D. 997 | He obtains the crown of Bohemia, and is elected emperor of Germany                                                                            | - 1410 |
| The Poles overrun Hungary                                                                                                                                                                              | - 1061      | Albert of Austria succeeds to the throne of Hungary, thus laying the foundation of the subsequent power and greatness of the house of Austria | - 1437 |
| Dreadful ravages of the Tartars under the sons of Jenghis Khan, throughout Hungary, Bohemia, and Russia, 1226 <i>et seq.</i>                                                                           |             | It passes to the king of Poland                                                                                                               | - 1439 |
| Victories of Louis the Great in Bulgaria, Servia, and Dalmatia                                                                                                                                         | - 1342      | Solyman II., emperor of the Turks, invades Hungary, and takes Buda; battle of Mohatz ( <i>which see</i> )                                     | - 1526 |
| Louis carries his arms into Italy                                                                                                                                                                      | - 1342      | Buda sacked a second time by the Turks, and all the inhabitants put to the sword                                                              | - 1540 |
| He dies, and the history of Hungary now presents a frightful catalogue of crimes                                                                                                                       | - 1378      | Slavonia taken by the Turks                                                                                                                   | - 1540 |
| Charles Duras is murdered; Elizabeth, queen of Louis, is drowned, and <i>king</i> Mary, their daughter, marries Sigismund, marquis of Brandenburg, and causes the rivers of Hungary to flow with blood | - 1378      | Temeswar taken by them                                                                                                                        | - 1552 |
| The unhappy Hungarians call the Turks to their assistance                                                                                                                                              | - 1380      | Transylvania seized by Solyman                                                                                                                | - 1556 |
| Sultan Bajazet vanquishes Sigismund in battle                                                                                                                                                          | - 1389      | The duke of Lorraine loses 30,000 men in a fruitless attempt to take Buda from the Turks                                                      | - 1681 |
| Sigismund recovers from this blow, and makes Wallachia and Moldavia tributary to him                                                                                                                   | - 1390      | He at length carries Buda by storm, and delivers up the Mahometans to the fury of the soldiers                                                | - 1686 |
|                                                                                                                                                                                                        |             | Temeswar wrested from the Turks by prince Eugene                                                                                              | - 1716 |

\* The Hungarian people have an irreconcilable aversion to the name of *queen*; and consequently, whenever a female succeeds to the throne of Hungary, she reigns with the title of *king*. Thus, in 1383, when Mary, the daughter of Charles Duras, came to the crown, she was styled *King Mary*.

HUNGARY, *continued.*

Servia and Wallachia ceded to Turkey at the peace of Belgrade - 1739  
 Temeswar incorporated with the kingdom of Hungary - 1778  
 The struggle for independence commenced in - 1848  
 Count Lomburg, Austrian commissioner, murdered at Pesth Sept. 27,  
 The Hungarian Diet dissolved by the emperor of Austria; martial law proclaimed; Jellachich, Ban of Croatia, appointed to the supreme government, - Oct. 3, 1848  
 Kossuth appointed by the Diet president of the defence committee and dictator - Oct. 1848  
 [Insurrection of Vienna, Oct. 6.]  
 Hungarian army advances within six

miles of Vienna; Jellachich also advances there, October 11; Kossuth retreats to Hungarian territory, 17th,  
 Hungary declares itself an independent republic - Dec. 1848  
 Raab (Dec.) and Buda Pesth, entered by Windisgratz - Jan. 5, 1849  
 Ukase of Russian emperor Nicholas, declaring his purpose of aiding Austria against Hungary - April 26,  
 Görgey, commander-in-chief, surrenders the Hungarian army to the Austrians at Villargos - Aug. 11, 1849  
 The war ended by the complete subjugation of Hungary, and the flight or execution of her leaders.  
*See Germany.*

## KINGS OF HUNGARY.

A. D. 997 Stephen, duke, assumes the title of king.  
 1038 Peter I., deposed.  
 1041 Otto, killed in battle.  
 1044 Peter again ascends the throne; is again deposed, and has his eyes put out.  
 1047 Andrew, assassinated by his brother Bela.  
 1059 Bela, killed by the fall of a ruinous tower.  
 1063 Solomon, deposed by his son.  
 1073 Geiga I.  
 1076 St. Ladislaus.  
 1095 Coloman.  
 1114 Stephen II., surnamed Thunder; turned monk.  
 1131 Bela II.; he had his eyes put out by his uncle Coloman, so that his queen ruled the kingdom.  
 1141 Geiga II.  
 1161 Stephen III.  
 1173 Bela III.  
 1191 Emeric.  
 1200 Ladislaus II.  
 1201 Andrew II.  
 1235 Bela IV.  
 1275 Stephen IV.  
 1278 Ladislaus III., murdered.  
 1291 Andrew III.  
 1301 Wenceslaus.  
 1304 Otho.

1309 Charles Robert.  
 1342 Louis I. the Great.  
 1383 Mary.  
 1389 Mary, and her husband Sigismund.  
 1437 Albert; he died of a surfeit of melons.  
 1440 Ladislaus IV., killed in battle with the Turks.  
 1444 Ladislaus V., poisoned while an infant.  
 1458 Matthias I., son of Huniades, late regent.  
 1490 Ladislaus VI.  
 1516 Louis II. drowned whilst fighting the Turks.  
 1526 John Sepusius, deposed.  
 1527 Ferdinand, king of Bohemia.  
 1534 John Sepusius, again.  
 1539 John II.  
 1561 Maximilian, afterwards emperor of Germany.  
 1573 Rodolphus.  
 1609 Matthias II.  
 1618 Ferdinand II., emperor of Germany.  
 1625 Ferdinand III., ditto.  
 1647 Ferdinand IV.  
 1656 Leopold, emperor of Germany.  
 1687 Joseph, ditto.  
 1711 Charles VI., ditto.  
 1740 Maria Theresa.  
 1780 Joseph, her son, emperor of Germany.  
*See Germany.*

On the death of Charles VI., in 1740, his daughter, Maria Theresa, who had married into the house of Lorraine, was in danger of being deprived of her father's hereditary dominions by France, and also by Bavaria; but at length overcoming all difficulties, her husband was elected emperor, and Hungary, Austria, and Bohemia are at this time governed by their descendants. *See Germany.*

**HUNS.** A fierce and warlike nation, occupying eastern Tartary nearly 1200 years; they were almost wholly exterminated by the Chinese, in A. D. 93, and the remnants settled on the Volga, and attacked the Roman allies on the Danube, in 376; but having been subsidized under Attila, they turned their arms towards Germany. The latter country and Scythia were conquered by them, about A. D. 433. 100,000 of them were slain on the plains of Champagne in 447. They were defeated by Charles the Great in several battles during eight years, and were almost extirpated, and soon ceased to appear as

a distinct nation after 780. When they settled in Pannonia, they gave it the name of Hungary, *which see*; see also *Attila*.

**HUSS, JOHN; HIS MARTYRDOM.** The clergy having instigated the pope to issue a bull against heretics, Huss, who had been zealous to promote a reformation, was cited to appear before a council of divines at Constance to give an account of his doctrines. To encourage him to do so, the emperor Sigismund sent him a safe conduct, and engaged for his security. On the strength of this pledge he presented himself accordingly, but was soon thrown into prison, and after some months' confinement was adjudged to be burned alive. He endured this dreadful death with magnanimity and resignation, July 6, 1415. The same unhappy fate was borne with the same fortitude and constancy of mind by **JEROME OF PRAGUE**, the intimate companion of Huss, who came to this council with the generous design of supporting and seconding his persecuted friend: he, too, suffered, May 30, 1416. See *Cranmer*, and *Martyrs*.

**HUSSARS.** This species of force originated in Poland and Hungary; and as they were more fitted for a hasty enterprise than a set battle, they are supposed to have taken their names from the *huzzas* or shout they made at their first onset. They were generally opposed to the Turkish horse, "and were oddly clothed, having the skins of tigers and other wild beasts hanging on their backs, against bad weather, and wore fur caps, with a cock's feather;" — *Pardon*.

**HYDROMETER.** The oldest mention of the Hydrometer occurs in the fifth century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found.—*Beckmann*. Hypatia was torn to pieces, 415 A. D., and Archimedes was killed 212 B. C. Hydraulic chemistry became a science in 1746.

**HYDROSTATICS** were probably first studied in the Alexandrian school, about 300 B. C. The pressure of fluids was discovered by Archimedes, about 250 B. C. The forcing-pump and air-fountain were invented by Hero, about 120 B. C. Water-mills were known about the time of the birth of Christ. The science was revived by Galileo, about A. D. 1600. The theory of rivers was scientifically understood in 1697. The correct theory of fluids and oscillation of waves, explained by Newton, in 1714. A scientific form was given to hydrodynamics, by Bernoulli, 1738.

**HYMNS.** Religious songs, or odes, were at first used by the heathens in praise of their false deities, and afterwards introduced both into the Jewish and Christian churches. St. Hilary, the bishop of Arles, in France, is said to have been the first who composed hymns to be sung in Christian churches, about A. D. 431. The hymns of the Jews are usually accompanied with trumpets, drums, and cymbals.

## I.

**IAMBIC VERSE.** Iambe, an attendant of Metanira, wife of Celeus, king of Sparta, when trying to exhilarate Ceres, while the latter was travelling over Attica in quest of her daughter Proserpine, entertained her with jokes, stories, and poetical effusions; and from her free and satirical verses have been called *Iambics*.—*Apollodorus*. Iambic verses were first written, about 700 B. C., by Archilochus, who had courted Neobule, the daughter of Lycambes; but after a promise of marriage, the father preferred another suitor, richer than the poet; whereupon Archilochus wrote so bitter a satire on the old man's avarice, that he hanged himself.—*Herodotus*.

**ICE.** Galileo was the first who observed ice to be lighter than the water which composed it, and hence ice floats, about 1597. Ice produced in summer by means of chemical mixtures, prepared by Mr. Walker and others, in 1782. Leslie froze water under the receiver of an air-pump by placing under it a vessel full of oil of vitriol. One part of sal-ammonia and two of common salt, with five of snow, produce a degree of cold twelve degrees below the zero of Fahrenheit. Five parts of muriate of lime and four of snow freeze mercury; and mercury can be solidified by preparations of sulphuric acid, so as to bear the stroke of a hammer. See *Cold*.

**ICE TRADE, THE,** in the United States, was commenced by Frederick Tudor, of Boston, in 1805, who shipped the first cargo to Martinique and the first to Calcutta, 1833. The ice-houses of the dealers near Boston at present are capable of containing 141,332 tons.

**ICELAND.** Discovered by some Norwegian chiefs who were compelled to leave their native country, A. D. 871; according to some accounts, it had been previously visited by a Scandinavian pirate. It was peopled by the Norwegians, in 874. In 1783, there occurred here the most tremendous volcanic eruption on record; it was accompanied by violent wind and rain, and a darkness of the heavens; and it was feared that the island would fall to pieces. Three fire spouts broke out of Mount Skapta, which, after rising to a considerable height in the air, formed a torrent of red-hot lava that flowed for six weeks, and ran a distance of 60 miles to the sea, in a broken breadth of nearly 12 miles: 12 rivers were dried up; 21 villages totally overwhelmed by fire or water; and 34 others were materially injured.

**ICELANDIC LITERATURE, ROYAL SOCIETY OF,** in Copenhagen. Their library, containing 2000 Icelandic MSS. and many books, burnt, September 26, 1847.

**ICONOLOGY.** The science that describes men and deities, distinguished by some peculiar characteristic, and the doctrine of picture or image representation. Thus, Saturn is represented as an old man with a scythe; Jupiter with a thunderbolt, and an eagle by his side; Neptune with a trident, in a chariot drawn by sea-horses; Mercury, with wings on his hat and at his heels; Bacchus, crowned with ivy; Pallas, leaning on her ægis; Venus, drawn by Swans or pigeons; Juno, riding in a cloud, &c. Heathen mythology gave rise to the later worship of the sun, moon, stars, and other objects; and to the representation of the true God in various forms; and to images. The Iconoclastic schism rent asunder the Roman Catholic church in the early part of the eighth century. See *Idols*.

**IDES.** In the Roman calendar, the ides meant the thirteenth day of each month except in March, May, July, and October, in which months it was the fifteenth day, because in these four it was six days before the nones, and in the other months four days. The ides of March was the day on which Julius Cæsar was assassinated in the senate house by Casca and other conspirators, 44 B. C.

**IDIOTS.** It is shown by the latest returns, that exclusive of lunatics (see *Insanity*), there are in England, pauper idiots, or idiots protected by national institutions, males, 3372; females, 3893; total, 7265. In England there is one lunatic or idiot in every 1033 individuals; in Wales, there is one in every 807; in Scotland, one in 731; and in Ireland, one in 812.

**IDOLS, AND IDOLATRY.** The public worship of idols was introduced by Ninus, king of Assyria, 2059 B. C.—*Vossius*. Idols are supposed to have originated in the pillar set up by Jacob, at Bethel, about 1800 B. C.—*Dufresnoy*. Constantine, emperor of Rome, ordered all the heathen temples to be destroyed, and all sacrifices to cease, 330 A. D.—*Dufresnoy*. In Britain, the

religion of the Druids gave way to the more gross and barbarous superstitions of the Saxons, who had their idols, altars, and temples, and they soon overspread the country with them: they had a god for every day in the week. See *Week*. The idolatry of the Saxons yielded to Christianity after the coming of St. Augustin. See *Christianity*.

**ILIUM.** A city was built here by Dardanus, and called Dardania, 1480 B. C. Troy (*which see*), another city, was founded by Troas, about 1341 B. C.; and Ilius, his successor, called the country Ilium. This kingdom existed 296 years from the reign of Dardanus, Priam being the sixth and last king. The Trojan war was undertaken by the united states of Greece to recover Helen, whom Paris, son of Priam, had borne away from her husband, Menelaus, king of Sparta, 1204 B. C. See *Helen*. More than 100,000 warriors engaged in this expedition; and the invaders, having wasted many defenceless towns and villages, laid siege to the capital, 1193 B. C. Troy was taken after ten years' war by stratagem, and burnt to ashes by the conquerors, who put the inhabitants to the sword, or carried them off as slaves, 1184 B. C.—*Apolodorus*.

**ILLINOIS.** One of the United States, first settled on the Kaskaskia and Cahokia by the French from Canada. Ceded to Great Britain at the peace of 1763. Chiefly settled by emigrants from other states since 1800. In 1787; was part of the North-West territory. In 1809 it was made a separate territory, and in 1818 admitted into the Union, being the 23d state. Population in 1810, 12,282; in 1830, 157,575; in 1840, 476,183. It is a free state and has always been so. The chief products are grain and Indian corn; it has inexhaustible lead-mines. New constitution adopted August 31, 1847.

**ILLUMINATI.** These were heretics who sprang up in Spain, where they were called Alumbrados, about A. D. 1575; and after their suppression in Spain they appeared in France. One of their leaders was the friar Anthony Bouchet. The chief doctrine of this sect was, that they obtained grace, an attained perfection, by their own sublime manner of prayer. A secret society bearing this name was founded by Dr. Adam Weishaupt, in May 1776.

**ILLUMINATED BOOKS AND PAGES.** The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity; and illuminated pages are, many of them, exquisitely painted. Varro wrote the lives of 700 illustrious Romans, which he embellished with their likenesses, about 70 B. C.—*Plin. Hist. Nat.*

**IMPEACHMENT.** The first impeachment by the commons house of parliament, and the first of a lord chancellor, was in 1386. By statute of the 12th and 13th of William and Mary, it was enacted, that no pardon under the great seal shall be pleaded to an impeachment by the commons in parliament, 1699 and 1700. Memorable impeachment of Warren Hastings, Feb. 13, 1788; the trial lasted seven years, ending April 25, 1795, in an acquittal. Impeachment of lord Melville, April 29, and his acquittal, June 12, 1801. Inquiry into the charges preferred by colonel Wardle against the duke of York, commenced Jan. 26, and ended March 20, 1809, in his acquittal. Trial of Caroline, queen of George IV., by bill of pains and penalties, before the house of lords, commenced Aug. 16; Mr. Brougham entered for her majesty's defence, Oct. 3; and the last debate on the bill took place Nov. 10, 1820. See *Queen of George IV.*

**IMPERIAL PARLIAMENT.** By the Union with Ireland, the parliament of Great Britain became Imperial; and the first Imperial parliament, admitting 100 Irish members into the commons, and 28 temporal and 4 spiritual peers into the house of lords, was held at Westminster, January 22, 1801.

The Imperial parliament is now constituted thus: in the Commons, since the passing of the Reform Bill (*which see*), in 1832, there are 471 English; 29 Welsh; 105 Irish; and 53 Scotch members—in all 658. In the Lords, 459 members, of whom 28 are temporal, and 4 spiritual representative peers of Ireland; and 16 representative peers of Scotland. See *Commons, Lords, Parliament, and Reform*.

IMPORTS OF MERCHANDISE IN THE UNITED STATES. See *Exports, &c.* Table, p. 317.

VALUE OF IMPORTS INTO GREAT BRITAIN, FROM ALL PARTS OF THE WORLD.

|         |   |            |         |   |             |         |   |             |
|---------|---|------------|---------|---|-------------|---------|---|-------------|
| In 1710 | - | £4,753,777 | In 1800 | - | £30,570,605 | In 1830 | - | £46,215,241 |
| 1750    | - | 7,289,582  | 1810    | - | 41,136,135  | 1840    | - | 62,004,000  |
| 1775    | - | 14,816,855 | 1820    | - | 36,514,564  | 1845    | - | 85,281,958  |

IMPOSTORS. The names and pretensions of religious, political, and other impostors, would fill a volume; they have been, of course, found in every country, and have existed in every age. The following are selected from various authorities, as being among the most extraordinary:—

Aldebert, who, in the eighth century, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and deserts, and to live in imitation of John the Baptist.

Gonsalvo Martin, a Spaniard, pretended to be the angel Michael; he was burnt by the inquisition of Spain, in 1360.

George David, son of a waterman at Ghent, styled himself the nephew of God, sent into the world to adopt children worthy of heaven; he denied the resurrection, preached against marriage, in favor of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Basle, 1556.

Demetrius Griska Eutropeia, a friar, pretended to be the son of Basilowitz, czar of Muscovy, whom the usurper Boris had put to death; but he maintained that another child had been substituted in his place: he was supported by the arms of Poland; his success astonished the Russians, who invited him to the throne, and delivered into his hands Fedor, the reigning czar, and all his family, whom he cruelly put to death: his imposition being discovered, he was assassinated in his palace, 1606.—*D'Alembert's Revolutions of Russia*.

Sabbata Levi, a Jew of Smyrna, amused the Turks and Jews a long time at Constantinople and other places, by personating our Saviour, 1666.

IMPOSTORS EXTRAORDINARY IN BRITISH HISTORY.

Two men crucified, both pretending to be the Messiah; and two women executed for assuming the characters of the Virgin Mary and Mary Magdalen, 5 Henry III., 1221.

Elizabeth Barton, styled the Holy maid of Kent, spirited up to hinder the Reformation, by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain, and married Anne

Boleyn. She and her confederates were hanged at Tyburn, 24 Henry VIII., 1534.—*Rapin*.

In the first year of Mary's reign, after her marriage with Philip of Spain, Elizabeth Croft, a girl of 18 years of age, was secreted in a wall, and with a whistle, made for the purpose, uttered many seditious speeches against the queen and the prince, and also against the mass and confession, for which she was sentenced to stand upon a scaffold at St. Paul's cross, during sermon-time, and make public confession of her imposture, 1553: she was called the Spirit of the Wall.—*Baker's Chron*.

William Hacket, a fanatic, personated our Saviour, and was executed for blasphemy, 34 Eliz., 1591.

James Naylor, personated our Saviour; he was convicted of blasphemy, scourged, and his tongue bored through with a hot iron on the pillory, by sentence of the House of Commons, under Cromwell's administration, 1656.

Valentine Greatrakes, an Irish impostor, who pretended to cure all diseases by stroking the patient; his imposture deceived the credulous, and occasioned very warm disputes in Ireland, in 1665, and in England, where it fell into disrepute, in 1666, upon his examination before the Royal Society, after which we hear no more of him. *Birch's Memoirs of the Roy. Society*.

Dr. Titus Oates. See *Conspiracies*.

Mary Tofts, of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr. St. Andre, surgeon to the king), that they espoused her cause, 1726.

The Cock-lane ghost imposture by William Parsons, his wife, and daughter, 1762.

Johanna Southcote, who proclaimed her conception of the Messiah, and had a multitude of followers; she died in Dec. 1814.

IN THE UNITED STATES.

Matthias, *alias* Matthews, who professed to be the Messiah, New-York, 1830-31.

Joseph Smith. See article *Mormons*.

IMPRESSMENT OF SEAMEN. Affirmed by Sir M. Foster to be of ancient

practice. The statute 2 Richard II. speaks of impressment as a matter well known, 1378. The first commission for it was issued 29 Edward III. 1355. Pressing, either for the sea or land service, declared to be illegal by the British parliament, Dec. 1641. None can be pressed into the king's naval service above 55, nor under 18. No apprentice nor landsmen who have not served at sea for 3 or 2 years. No masters of merchants' ships, first-mates of 50 tons, and boatswains and carpenters of 100 tons. No men employed by the public boards, and none except by an officer with a press-warrant.

**INCENDIARIES.** The punishment for arson was death by the Saxon laws and Gothic constitutions. In the reign of Edward I. incendiaries were burnt to death. This crime was made high treason by statute 8 Henry VI., 1429; and it was denied benefit of clergy, 21 Henry VIII., 1528.

**INCEST.** It has been looked upon with horror by most nations, but Persia and Egypt are exceptions. The history of the latter country abounds with instances of incestuous marriages among its sovereigns. Physcon married his brother's queen, then repudiated her, and married her daughter by his brother, and murdered his children by both wives, 129 B. C. See *Egypt*. In our own country, Vortigern, a king of South Britain, married his own daughter, A. D. 446. The instances are numerous in Portugal. Maria, queen of Portugal, married her uncle, the prince of Brazil, June, 1760; and the son of that incestuous marriage, Joseph, then in his sixteenth year, married his aunt, the princess Mary, Feb., 1777. The present Don Miguel of Portugal was betrothed to his niece, Donna Maria, by procuration at Vienna, in Oct. 1826, she being then only seven years of age. In England, incest was early punished with death; and was again made capital by a law of the Commonwealth, in 1650.

**INCOME TAX IN ENGLAND.** This is not, as some suppose, a new impost. In 1512, parliament granted a subsidy of two fifteenths from the commons, and two tenths from the clergy, to enable the king to enter on a war with France.—*Rapin*. This tax was attempted in 1793, and 1799: and again in 1802; but was abandoned. In 1803, it was revived, at the rate of 5 per cent. on all incomes above 150*l.*, and lower rates on smaller incomes. In 1805, it was increased to 6½ per cent.; and in 1806 was raised to 10 per cent. embracing the dividends at the bank. It produced—

|                                           |   |            |                                      |   |             |
|-------------------------------------------|---|------------|--------------------------------------|---|-------------|
| In 1804, at 1 <i>s.</i> in the pound      | - | £4,650,000 | In 1806, at 2 <i>s.</i> in the pound | - | £11,500,000 |
| In 1805, at 1 <i>s.</i> 3 <i>d.</i> ditto | - | 5,937,500  | And subsequently                     | - | 16,548,981  |

The tax produced from lands, houses, rentages, &c., 8,657,937*l.*; from funded and stock properties, 2,885,505*l.*; the profits and gains of trade, 3,831,081*l.*; and salaries and pensions, 1,174,456*l.*; total, sixteen millions and a half. Repealed in March, 1816. Sir Robert Peel's bill, imposing the present *tax* of 2*l.* 18*s.* 4*d.* per cent. *per ann.*, to subsist for three years, passed June 22 1842; it produced about 5,350,000*l.* a year. This tax was renewed for three years more, in March, 1845.

**INDEPENDENTS.** Sects of Protestants, chiefly in England and Holland. They are such as hold the independency of the church, or that each congregation may govern itself in religious matters. They say there is no absolute occasion for synods or councils, whose resolutions may be taken to be wise and prudent advice, but not as decisions to be peremptorily obeyed; they affirm that one church may advise or reprove another, but has no authority to excommunicate or censure. Their first meeting-house founded in England was that by Henry Jacobs, 1616.

**INDEX EXPURGATORY.** A catalogue of prohibited books in the Church of Rome, first made by the inquisitors, and approved by the council of Trent.

The index of heretical books, by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595. It enumerated most of the celebrated works of France, Spain, Germany, and England, and which are still prohibited.—*Ashe.*

INDIA. Known to the ancients, many of whose nations, particularly the Tyrians and Egyptians, carried on much commerce with it. It was conquered by Alexander, 327 B. C., and subsequently the intercourse between India and the Roman empire was very great. The authentic history of Hindoostan is reckoned to commence with the conquests of Mahmud Gazni, A. D. 1000.—*Rennel.*

- Irruption of the Mahometans, under Mahmud Gazni - A. D. 1000  
 Patna, or Afghan empire founded - 1205  
 Reign of Jenghis Khan, one of the most bloody conquerors of the world; 14,000,000 of the human race perish by his sword, under the pretence of establishing the worship of one god; he died - 1237  
 The Mogul Tartars, under the conduct of the celebrated Timour, or Tamerlane, invade Hindostan - 1398  
 Tamerlane takes the city of Delhi; defeats the Indian army, makes a conquest of Hindostan, and butchers 100,000 of its people - 1399  
 The passage to India discovered by Vasco da Gama - 1497  
 Conquest of the country completed by the sultan Baber, founder of the Mogul empire - 1525  
 Reign of the illustrious Acbar, the greatest prince of Hindostan - 1555  
 Reign of Aurungzebe; his dominions extending from 10 to 35 degrees in latitude, and nearly as much in longitude, and his revenue amounting to 32,000,000*l.* sterling - 1600  
 Invasion of the Persian, Nadir Shah, or Ouli Khan - 1738  
 Delhi he orders a general massacre, and 150,000 persons perish - 1738  
 He carries away treasure amounting to 125,000,000*l.* sterling - 1739  
 Defeat of the last imperial army by the Rohillas - 1749  
 [The Mogul empire now became merely nominal, distinct and independent sovereignties being formed by numerous petty princes. The emperors were of no political consequence from this period.]
- BRITISH POWER IN INDIA.  
 Attempt made to reach India by the north-east and north-west passages - 1523  
 Sir Francis Drake's expeditions - 1579  
 Levant company make a land expedition to India - 1589  
 First adventure from England - 1591  
 First charter to the London company of merchants - 1600  
 Second charter to the East India company - 1609  
 Calcutta purchased - 1693  
 Capture of Calcutta by Serajah Dowla. See *Calcutta.* - 1756  
 He imprisons 146 British subjects, of whom 123 perish in one night. See *Blackhole.* - May 19, 1756  
 Calcutta retaken by colonel, afterwards lord Clive; he defeats the soubah, at Plassey - June 20, 1757  
 Warren Hastings becomes governor of Bengal - April 13, 1772  
 India Bill. See *India Bill* - June 16, 1773  
 Supreme court established - 1773  
 Pondicherry taken - Oct. 11, 1778  
 The strong fortress of Gualior taken by major Popham - Aug. 4, 1778  
 Hyder Ali overruns the Carnatic, and defeats the British - Sept. 10, 1780  
 He takes Arcot - Oct. 31, 1780  
 Lord Macartney arrives as governor of Madras - June 22, 1781  
 Hyder Ali signally defeated by Sir Eyre Coote - July 1, 1781  
 Death of Hyder, and accession of his son, Tippoo Saib - Dec. 11, 1782  
 Trial of Warren Hastings. See *Hastings, Trial of* - Feb. 13, 1783  
 Definitive treaty with Tippoo; his two sons hostages - March 19, 1792  
 Government of lord Mornington, afterwards marquis Wellesley - May 17, 1798  
 Seringapatam stormed, and Tippoo Saib killed - May 4, 1799  
 Victories of the British; the Carnatic conquered - 1800  
 Victories of Sir Arthur Wellesley - 1803  
 Marquis Cornwallis resumes the government - July 30, 1805  
 Act by which the trade to India was thrown open; that to China remaining with the company - July 31, 1813  
 Lord Amherst's government - Aug. 1, 1823  
 Lord William Bentinck arrives as governor-general - July 4, 1838  
 Act opening the trade to India, and tea trade, &c. to China, forming a new era in British commerce - Aug. 28, 1833  
 Lord Auckland, governor-general; he leaves England - Sept. 1835  
 Battle of Ghizny; victory of Sir John, now Lord Keane. (See *Ghizny*) - July 23, 1839  
 Shah Soujah restored to his sovereignty, and he and the British army enter Cabul - Aug. 7, 1839  
 English defeat Dost Mahomed, - Oct. 18, 1840  
 Kurrock Singe, king of Lahore, dies; at his funeral his successor is killed by accident, and Dost Mahomed, next heir, surrenders to England - Nov. 5, 1840  
 General rising against the British at

INDIA, *continued.*

Cabul; Sir Alexander Burnes and other officers murdered - Nov. 2, 1841  
 Lord Ellenborough appointed governor-general - Oct. 13, 1841  
 Sir William Macnaghten treacherously assassinated - Dec. 25, 1841  
 The British, under a convention, evacuate Cabul, placing Lady Sale, &c., as hostages in the hands of Akbar Khan; a dreadful massacre ensues - Jan. 6, 1842

Ameers of Scinde defeated by Sir Charles Napier; Scinde is afterwards annexed to the British empire - Feb. 17, 1843  
 Battles of Maharajpore and Punniar; the strong fort of Gwalior, the "Gibraltar of the East," taken - Dec. 29, 1843  
 Sir Henry Hardinge appointed governor-general - May 2, 1844

## THE LATE WAR BETWEEN THE SIKHS AND THE BRITISH.

The Sikh troops cross the Sutlej river, and attack the British post at Ferozepore, which was held by Sir John Littler - Dec. 14, 1845  
 Battle of Aliwal; the Sikhs defeated - Jan. 28, 1846  
 Battle of Soobraon; the enemy defeated with immense loss in killed and drowned - Feb. 10, 1846  
 [The Sikhs lost 10,000 men; the British 2,338 in killed and wounded.]

The citadel of Lahore is occupied by the British under Sir Hugh Gough; and the war terminates - Feb. 20, 1846  
 Great battle between the British under Lord Gough, and the Sikhs under Sheere Singh, at Ramluggar, Nov. 28, 1848  
 Moulton taken, after a long siege, Jan. 3, 1849  
 Sheere Sing defeated by Lord Gough - Feb. 21, 1849  
 The Punjab formally annexed to the British crown - March 29, 1849

**INDIA COMPANY, THE EAST.** The first commercial intercourse of the English with the East Indies, was a private adventure with three ships fitted out in 1591; only one of them reached India, and after a voyage of three years, the commander, captain Lancaster, was brought home in another ship, the sailors having seized on his own; but his information gave rise to a capital mercantile voyage, and the Company's first charter, in Dec. 1300. Their stock then consisted of 72,000*l.*, and they fitted out four ships, and meeting with success, have continued to trade ever since. India stock sold at 500*l.* for a share of 100*l.*, in 1683. A new company was formed in 1698, and both were united in 1702. The India-house was built in 1726, and enlarged in 1799. Board of control instituted 1784.

**INDIA BILL.** The bill placing the company's affairs under the control of the British government, and re-organizing the various departments in India passed June 16, 1773. See *East India Bill*. Mr. Fox's celebrated bill passed in the commons, but was thrown out in the lords' house, 1783. Mr. Pitt's bill constituting the Board of Control passed August 13, 1784.

**INDIA RUBBER.** Also called Caoutchouc, first brought to Europe from South America, about the beginning of the eighteenth century. Several plants produce various kinds of elastic gum; but that in commerce is chiefly the juice of the *Siphonia Elastica*, or syringe tree. Incisions in the bark of this tree give vent to a liquid which forms India rubber. No substance is yet known which is so pliable, and at the same time so exceedingly elastic; it oozes out under the form of a vegetable milk, from incision made in the tree, and is gathered chiefly in the time of rain, because it flows then most abundantly.—*M. Macquer.*

**INDIANA,** one of the western United States, first settled at Vincennes by the French; ceded to England at the peace of 1763, but no settlement made by them until 1787. Was part of the N. W. Territory in 1801. Suffered much during the war of 1812. See battle of *Tippecanoe*. Admitted into the Union in 1816. Population in 1800, 5,641; in 1820, 147,178; in 1840, 685,866.

**INDIANS, NORTH AMERICAN.** The origin of the aborigines of this continent continues to be a matter of speculation among the ethnologists. They have gradually but now almost entirely disappeared before the track of the white man east of the Mississippi, and even in the far west their number

are yearly becoming smaller. King Philip's Indian war in New England, 1675. Indians joined the French against the English colonies, 1690. Attacked by Capt. Church, 1704; burned Deerfield, Mass., 1704; and Haverhill, N. H., 1708; Indian war in South Carolina, 1715; again joined the French, 1754-9; Cherokees subdued, 1761; Indians besieged Detroit, 1763. [During the revolutionary war the Indians were employed at times on both sides, but chiefly by the British.] Treaty with the Choctaws, 1786; with the Creeks, 1790; Gen. Harmer defeated by the Indians near Chillicothe, 1790; Gen. Butler defeated by the Indians on the Miami, 1791; treaty with Six Nations, &c., 1794; with the Delawares, 1804; Gov. Harrison defeated hostile Indians on the Wabash, May 16, 1811; Creek war in Florida, Gen. Jackson, 1813; treaty with Choctaws, Cherokees, &c., by Gen. Jackson, 1816; Indian land in Ohio ceded to the United States, 1816; war with Seminoles, 1817; bill for removing the Indians west of Mississippi, passed May 27, 1832; war with Winnebagoes, 1832; Black Hawk captured, Aug. 27, 1832; Winnebagoes subdued by Gen. Scott, 1832; war against the Indians in Florida, Alabama, and Georgia, conducted by Gens. Scott, Gaines, Jessup, &c., 1835-40. In 1836 the Secretary of War reported as follows:

|                                                                                                             |         |
|-------------------------------------------------------------------------------------------------------------|---------|
| Number of Indians emigrated from the Atlantic States to the lands provided for them west of the Mississippi | 31,357  |
| Number yet to be removed                                                                                    | 72,181  |
| Number of Indians of indigenous tribes, between the Mississippi and the Rocky Mountains                     | 150,341 |
| Total within the territory of the United States                                                             | 352,879 |

Treaty with the Sioux, they relinquishing 5,000,000 acres west of Mississippi for \$1,000,000, Sept. 29, 1837; with Winnebagoes, Oct. 1, 1837; Powell *alias* Osceola, the Seminole chief, with 50 warriors, taken prisoners in Florida, Oct. 20, 1837; great mortality from small-pox among the Mandans, Mintarees, Blackfeet, and other Indians in Missouri territory—the Mandans tribe entirely destroyed—Nov., Dec., 1837; fight in Arkansas between the Ross and Ridge parties and Cherokees—Ross and about 40 others killed, June 28, 1839; 150 Chippewas treacherously massacred by the Sioux, at a meeting for a treaty at the Falls of St. Anthony, July 1, 1839; Cayuse Indians in Oregon having attacked and murdered 15 persons, and carried off 64 prisoners from a missionary station, are chastised by the settlers in a severe engagement, Nov. 29, 1847.

**INDIGO.** Before the American colonies were established, all the indigo used in Europe came from the East Indies; and until the discovery of a passage round the Cape of Good Hope, it was conveyed like other Indian products, partly through the Persian Gulf, and partly by land to Babylon, or through Arabia and up the Red Sea to Egypt. The real nature of indigo was so little known in Europe, that it was classed among minerals, as appears by letters-patent for erecting works to obtain it from mines in the principality of Halberstadt, dated Dec. 23, 1705; yet what Vitruvius and Pliny call *indicum* is supposed to have been our indigo.—*Beckmann*. The first mention of indigo occurs in English statutes in 1581. The first brought to Europe was procured from Mexico. Its cultivation was begun in Carolina, in 1747. The quantity imported into Great Britain in 1840, was 5,831,269lb., and in 1845, it was 10,127,488lb.

**INDULGENCES.** They were commenced by Leo. III., about A. D. 800; were much used by Urban II. 1090; and were subsequently conferred by the Roman pontiffs in the twelfth century as rewards to the crusaders. Clement V. was the first pope who made public sale of indulgences, 1313. In 1517, Leo. X. published general indulgences throughout Europe, when the practice led to the Reformation in Germany, in 1517, and to the Reformation in

England, in 1534.—*Bower's Lives of the Popes.* Indulgences were for the pardon of sins, and were sometimes so extensive as to be for the past, present, and to come. They were written upon parchment, and sealed and signed by the pope or his delegates.—*Ashe.*

**INFIRMARIES.** Ancient Rome had no houses for the cure of the sick. Diseased persons, however, were carried to the temple of Æsculapius for a cure, as Christian believers were taken to churches which contained wonder-working images. Benevolent institutions for the accommodation of travellers, the indigent, and sick, were first introduced with Christianity, and the first infirmaries or hospitals were built close to cathedrals and monasteries. The emperor Louis II. caused infirmaries situated on mountains to be visited, A. D. 855. In Jerusalem the knights and brothers attended on the sick. There were hospitals for the sick at Constantinople, in the 11th century. The oldest mention of physicians and surgeons established in infirmaries, occurs in 1437.—*Beckmann.* See *Hospitals.*

**INFORMERS.** This tribe was once very numerous in Greece and Rome, they being countenanced by wicked princes. The emperor Titus punished informers by banishment, and sometimes death; and Pliny gives praise to Trajan for the like good policy. In England, and particularly in London, numbers of unprincipled men obtain large gains as informers against persons whose slightest infractions of the law, often unconsciously committed, subject them to the power and exactions of this despised class.

**INK.** The ancient black inks were composed of soot and ivory-black, and Vitruvius and Pliny mention lamp-black; but they had likewise various colors, as red, gold, silver, and purple. Red ink was made by them of vermilion and various kinds of gum. INDIAN INK is brought from China, and must have been in use by the people of the east from the earliest ages, most of the artificial Chinese productions being of very great antiquity. It is usually brought to Europe in small quadrangular cakes, and is composed of a fine black and animal glue.—*Beckmann.*

**INNS or COURT.** A number of inns of court were established at different periods, in some degree as colleges for teaching the law. The Temple (of which there were three societies, namely, the Inner, the Middle and the Outer) was originally founded in the Temple church, built by the knights Templars, 32 Henry II. 1185. The inner and Middle Temple were made inns of law in the reign of Edward III., about 1340; the Outer not until the reign of Elizabeth, about 1560.—*Stowe's Survey.*

**INOCULATION.** Lady Mary Wortley Montague introduced inoculation in England from Turkey. In 1718 she had her own son inoculated at Adrianople, with perfect success; and she was allowed to have it tried, for the first time in England, on seven condemned criminals, 7 George I. 1721. The practice was preached against by many of the bishops and other clergy from that period until 1760.\* Vaccine inoculation was introduced by Dr. Jenner, January 21, 1799; he had discovered its virtue in 1796, and had been making experiments during the intermediate three years. He was voted 10,000*l.* as a reward by parliament, June 2, 1802. The emperor Napoleon valued this service of Dr. Jenner to mankind so highly that he liberated Dr. Wickham, when a prisoner of war, at Jenner's request, and subsequently the emperor liberated whole families of English, making it a

---

\* Inoculation was deemed a very precarious affair by our grandfathers. The *London Daily Advertiser* (Nov. 7, 1751) has this paragraph:—"We hear that the son and daughter of Thomas Davison, esq., of Blakestone, have been inoculated in this town (Newcastle), and that they are both well recovered." Dr. Mead practised inoculation very successfully up to 1754, and Dr. Dimsdale of London inoculated Catharine II., empress of Russia, in 1768. See *Small Pox.*

point to refuse him nothing that he asked. Innoculation introduced in the United States by Dr. B. Waterhouse, 1800. See *Small Pox* and *Vaccination*.

**INQUISITION.** Before the conversion of Constantine the Great, the bishops only examined into doctrines, and punished heresy with excommunication; but after the emperors became Christians, they ordained that such as were excommunicated should be also banished and forfeit their estates. This continued till about the year 800, when the western bishops' power was enlarged to the authority of citing persons to their courts, both to convict and punish them by imprisonment, penances, or death. In the twelfth century, heresy, as it was then called, was much increased; and the inquisition arose in the persecution of the Albigenses and Waldenses. It was instituted by pope Innocent III., in 1203; and Gregory IX. in a council held at Toulouse in 1229, gave it its final form, committing the management of it to the bishops; but afterwards thinking these too indulgent, he gave the direction of his inquisition to the Dominicans. It was established in France, by St. Louis, in 1226; and in the four Christian kingdoms of Spain. It was established in Portugal in 1536. The last great Auto da Fe was celebrated in 1781; and although the rack and faggot are not now employed in the work of torture and death, yet the power of the Holy office is still exercised in encouraging vexations; enjoining ridiculous penances and privations; prohibiting liberal institutions; and interdicting useful books.

**INSANITY.** In England within twenty years, insanity has more than tripled. In France it is more extensive in proportion to its population than it is in most other countries. The total number of lunatics and idiots in England is as follows: lunatics 6806—idiots 5741—together 12,547; but allowing for defective returns, the number may be taken at 14,000—an average of *one* to every *thousand* of the population. In Wales: lunatics 133—idiots 763—total 896; and adding for parishes that have made no returns, they may be set down at 1000—a proportion of *one* to *eight hundred*. Scotland has 3652 insane persons—or *one* to about *seven hundred*. In Ireland the number of lunatics and idiots exceeds 8000, as shown by returns, which, however, were not completed.—*Sir Andrew Halliday*. The number of insane persons and idiots in the United States, in 1840, was 17,434. There were 23 asylums capable of containing 2840 patients. Great advances have been made of late years in the treatment of insanity. The late Dr. A. Brigham of Utica, formerly of Hartford, was an able and successful philanthropist in this cause.

**INSOLVENCY IN THE UNITED STATES.** In May, 1837, a 'commercial crisis' was at its height. The 'heavy' failures, in two months, in New York alone amounted to 260, besides countless smaller ones. Failures in New Orleans to the amount of \$27,000,000 in two days. In Boston 168 failures from Nov. 1, 1836, to May 12, 1837. New York city Banks all suspended specie payments May 10, 1837. The New England Banks generally; immediately after.

**INSOLVENCY.** The first Insolvent Act in England was passed in 1649, but it was of limited operation; a number of acts of more extensive operation were passed at various periods, and particularly in the reign of George III. The benefit of the act known as the Great Insolvent Act, was taken in England, by 50,733 insolvents, from the time of its passing in 1814, to March 1827, a period of thirteen years. Since then, the acts relating to insolvency have been several times amended. Persons not traders, or, being traders, whose debts are less than 300*l.*, may petition the Court of Bankruptcy, and propose compositions, and have *pro tem.* protection from all process against his person and property, 6 Vict., 1842. Act amended, 8 Vict., Aug., 1844.

**INSURANCE ON SHIPS AND MERCHANDISE.** Suetonius conjectures that

Claudius was the first contriver of it, A. D. 43. Insurance was in general use in Italy in 1194, and in England in 1560. Insurance policies were first used in Florence in 1523. The first law relating to insurance was enacted in 1601. Insurance of houses and goods in London began in 1667. This was the year following that of the great fire of London. An office was then set up for insuring houses and buildings, principally contrived by Dr. Barton, one of the first and most extensive builders of the city of London. The first regular office set up in London was the *Hand-in-Hand*, in 1696. A duty was laid on insurances of 1s. 6d. per hundred pounds insured, in 1782: this duty was increased in 1797, and was variously altered since. The date of the first insurance office in the United States, has not been ascertained.

**INSURRECTIONS IN THE UNITED STATES.** Shay's Insurrection in Massachusetts (caused by the scarcity of money and heavy taxes), 1786. Insurrection in Pennsylvania, caused by duties on spirits, 1794. See the accounts of *Conspiracies, Massacres, Rebellions, Riots, &c.*

**INTEREST OF MONEY.** It was twenty *per cent.* in Europe in the twelfth century. Fixed at twelve *per cent.* in Spain, Germany and Flanders, by Charles V. in 1560.—*Robertson.* Till the fifteenth century, no Christians were allowed to receive interest of money, and Jews were the only usurers, and, therefore, often banished and persecuted. Interest was first settled by law in England at ten *per cent.*, 37 Henry VIII., 1546. This law was repealed by Edward VI.; but it was restored by Elizabeth. In those days the monarch could not borrow without the collateral security of the metropolis. Interest was reduced to eight *per cent.*, and the word first used instead of usury, 21 James I., 1624. Reduced by the Rump-parliament to six *per cent.*; and so confirmed at the Restoration. Reduced to five *per cent.*, 13 Anne, 1714, at which rate it remains. The rate in Ireland is six *per cent.*; regulated 14 George III., 1773. All interest above the legal standard of Britain is usury, and punishable by the statute.—*Blackstone.* The law does not now apply to bills having only 60 days to run. See *Usury Laws.*

**INTEREST OF MONEY IN THE UNITED STATES.** The rates vary in different States, viz:—In La. five *per cent.*, in Maine, N. H., Vt., Mass., R. I., Conn., N. J., Pa., Del., Md., Va., N. Ca., Tenn. Kent., Ohio, Ind., Illin., Misso., Ark., and the United States government claims, the rate is six *per cent.* In N. Y., S. Ca., Mich., and Wisc., seven *per cent.* In Geo., Ala., Mississ., and Flor., eight *per cent.* Laws against usury, with penalty of forfeiting the whole debt, in Me., Conn., N. Y., N. J., Penn., Del. Forfeit of the usury, and double, treble, the usury, in 14 other States. Usurious contracts void in Md., N. Ca., Geo., Tenn., Ohio, Ark.

**INUNDATIONS.** It would be impossible to record in this volume the numerous catastrophes which class under this head; the following are among the most remarkable:—

An inundation at Glasgow, which drowned more than 400 families, 738.—*Fordun.*

Flanders inundated by the sea, and the town and harbor of Ostend totally immersed, 1108. The present city was built above a league from the channel where the old one lies submerged.—*Histoire de Flandre.*

At the Texel, which first raised the commerce of Amsterdam, 1400.

The sea broke in at Dort, and drowned 72 villages, and 100,000 people, and formed the Zuyder Sea (see *Dort*), April 17, 1446.

The Severn overflowed during ten days, and carried away men, women, and children, in their beds, and covered the tops of many mountains; the waters settled upon the

lands, and were called The Great Waters for 100 years after, 1 Richard III. 1483.—*Hollinshead.*

A general inundation by the failure of the dikes in Holland, 1530; the number of drowned said to have been 400,000.

At Catalonia, where 50,000 persons perished, 1617.

An inundation at Yorkshire, when a rock opened, and poured out water to the height of a church steeple, 1686.—*Vide Phil. Trans.*

Part of Zealand overflowed, 1300 inhabitants were drowned, and incredible damage was done at Hamburg, 1717.

At Madrid, several of the Spanish nobility

INUNDATIONS, *continued.*

and other persons of distinction perished, 1723.—*Du Fresnoy.*

In Navarre, where 2000 persons lost their lives by the torrents from the mountains, Sept. 1787.

At Pest, near Presburg, the overflow of the Danube, by which 24 villages and their inhabitants were swept away, April 1811.

By the overflow of the Danube, a Turkish corps of 2000 men, on a small island near Widdin, were surprised, and met instant death, Sept. 14, 1813.

In Silesia, 6000 inhabitants perished, and the ruin of the French army under Macdonald was accelerated by the floods; also in Poland 4000 lives were supposed to have been lost, same year.

In Germany, 119 villages were laid under water, and great loss of life and property was sustained, in March 1816.

Awful inundation at Dantzic, occasioned by the Visula breaking through some of its dikes, by which 10,000 head of cattle and 4000 houses were destroyed, and numerous lives lost, April 9, 1829.

At Vienna, the dwellings of 50,000 of its inhabitants laid under water, Feb. 1830.

10,000 houses swept away, and about 1000 persons perished, at Canton, in China, in consequence of an inundation, occasioned by incessant rains. Equal or greater calamity was produced by the same cause in other parts of China, Oct. 1833.

Awful inundation in France; the Saone poured its waters into the Rhone, broke through its banks, and covered 60,000 acres; Lyons was inundated, in Avignon 100 houses were swept away; 218 houses were carried away at La Guillotiere; and upwards of 300 at Vaise, Marseilles, and Nismes; the Saone had not attained such a height for 233 years, Oct. 31 to Nov. 4, 1840.

Inundation of the Mississippi at New Orleans, 160 squares and 1600 houses flooded, May 12, 1849.

The inundations of the Ohio, Mississippi, &c., at different times, have caused great destruction of property, and (at times) of life.

**INVOCATION OF THE VIRGIN AND SAINTS.** The practice of the Romish church of invoking the intercession of saints with God, particularly the prayers to the Virgin, has been traced to the time of Gregory the Great, about A. D. 593.—*Ashe.* The Eastern church begun (in the fifth century) by calling upon the dead, and demanding their suffrage as present in the divine offices; but the Western church carried it so far as frequently to canonize those they had any regard for, though the wickedness of their lives gave them no title to any such honor, to make processions, masses, litanies, prayers and oblations for and to them.

**IODINE.** This most important substance was discovered by M. de Courtois, a manufacturer of saltpetre at Paris, in 1812; the discovery was pursued with great advantage by M. Clement, in 1813. Iodine is very active; it is of a violet hue, easily evaporates, and melts at 220 degrees; changes vegetable blues to yellow, and a seven-thousandth part converts water to a deep yellow color, and starch into a purple. Five volumes of oxygen and one of iodine form iodic acid.

**IONIAN ISLANDS.** They were subject to Venice until ceded by the treaty of Campo-Formio to France, in 1797. By a treaty between Russia and Great Britain they were placed under the protection of the latter power, November 5, 1815. A constitution was ratified by the prince regent of England for the government of these islands in 1818. The Ionian Islands are now among the free states of Europe. Corfu is the principal, and the seat of government.

**IONIC ORDER OF ARCHITECTURE.** This order which is an improvement on the Doric, was founded by the Ionians, about 1350 B. C.—*Vitruvius by Perrault.*

**IONIC SECT OF PHILOSOPHERS.** Founded by Thales of Miletus, 570 B. C. This sect distinguished itself for its deep and abstruse speculations, under the successors and pupils of the Milesian philosopher, Anaximander, Anaximenes, Anaxagoras, and Archelaus, the master of Socrates.

**IOWA,** now one of the United States, once formed part of the French possessions, and was included in the vast tract of country purchased in 1803 under the general name of Louisiana. First purchase of land from the Indians in Iowa was made in 1832. Iowa separated from Wisconsin as a territory, 1838. Admitted into the Union, Dec. 1846. Population in 1840, 43,111.

**IPSUS, BATTLE OF**, by which Seleucus is confirmed in his kingdom by the defeat and death of Antigonos, king of Asia. On the one side were Antigonos and his son; on the other Seleucus, Ptolemy, Lysimachus, and Cassander. The former led into the field an army of above 70,000 foot, and 10,000 horse, with 75 elephants. The latter's forces consisted of 64,000 infantry, besides 10,500 horse, 400 elephants, and 120 armed chariots. Antigonos and his son were defeated, 301 B. C.—*Plutarch*.

**IRELAND**. It is disputed by historians from what nation this country was originally peopled. It seems, however, to be satisfactorily shown that the first colonists were Phœnicians. The Partholani landed in Ireland about 2048 B. C. The descent of the Damnonii was made about 1463 B. C. This was followed by the descent of Heber and Heremon, Milesian princes, from Galicia, in Spain, who conquered Ireland, and gave to its throne a race of 171 kings.

|                                                                                                                                                                                                                    |              |

|                                                                                                                          |                  |
|--------------------------------------------------------------------------------------------------------------------------|------------------|
| sacre the Protestant settlers in Ulster, to the number of 40,000 persons, commenced on St. Ignatius's day, Oct. 23, 1641 |                  |
| Cromwell and Ireton reduce the whole island to obedience between 1649 and 1656                                           |                  |
| Landing of king William III. at Carrickfergus                                                                            | - June 14, 1690  |
| Battle of the Boyne; the Duke of Schomberg killed                                                                        | - July 1, 1690   |
| Memorable Irish rebellion commenced May 4, 1798, and was not finally suppressed until the next year                      | - 1799           |
| Legislative Union of Great Britain and Ireland                                                                           | - Jan. 1, 1801   |
| Emmett's insurrection                                                                                                    | - July 23, 1803  |
| Roman Catholic emancipation. (See <i>Roman Catholics</i> )                                                               | - April 13, 1829 |
| Great repeal movement; meeting at Trim. (See <i>Repeal</i> )                                                             | - March 19, 1843 |
| O'Connell's trial. (See <i>Trials</i> )                                                                                  | - Jan. 13, 1844  |
| O'Connell died at Genoa, æt. 72, May 15, 1847                                                                            |                  |
| Famine and great distress in Ireland throughout                                                                          | - 1847           |
| Relieved by England, and by voluntary gifts from the United States.                                                      |                  |
| Bill for suppression of crime in Ireland passed parliament                                                               | - Dec. 20, 1847  |
| Mitchell convicted of treason                                                                                            | - May 26, 1848   |
| Habeas Corpus act suspended, July 25, 1848                                                                               |                  |
| Smith O'Brien arrested, and the rebellion put down                                                                       | - Aug. 5, 1848   |

**IRON**. It was found on Mount Ida by the Dactyles, owing to the forests of the mount having been burnt by lightning, 1432 B. C.—*Arundelian Marbles*. The Greeks ascribed the discovery of iron to themselves and referred glass to the Phœnicians; but Moses relates that iron was wrought by Tubal-Cain. Iron furnaces among the Romans were unprovided with bellows, but were placed on eminences with the grate in the direction of the prevailing winds. Swedish iron is very celebrated, and Dannemora is the greatest mine of Sweden. British iron was cast by Ralph Page and Peter Baude, in Sussex in 1543.—*Rymer's Fœdera*. Iron-mills were first used for slitting iron into bars for smiths by Godfrey Bochs, in 1590. Tinning of iron was first introduced from Bohemia in 1681. There are upwards of 800,000 tons of iron produced annually in England.\* For iron vessels, iron war-steamers, &c., see *Steamers*.

\* There is iron enough in the blood of forty-two men to make a ploughshare weighing twenty-four pounds.—*Anon*.

**IRON-MASK, THE MAN OF THE.** A mysterious prisoner in France, wearing a mask, and closely confined, under M. de St. Mars, at Pignerol, Sainte Marguerite, and afterwards at the Bastille. He was of noble mien, and was treated with profound respect; but his keepers had orders to dispatch him if he uncovered. M. de St. Mars himself always placed the dishes on his table, and stood in his presence. Some conjecture him to have been an Armenian patriarch forcibly carried from Constantinople, although he died ten years before the mask; others that he was the count de Vermandois, son of Louis XIV., although he was reported to have perished in the camp before Dixmude. More believe him to have been the celebrated duke of Beaufort, whose head is recorded to have been taken off before Candia; while still more assert that he was the unfortunate James, duke of Monmouth, who, in the imagination of the Londoners, at least, was executed on Tower-hill. But there are two better conjectures; he is said to have been a son of Anne of Austria, queen of Louis XIII., his father being the duke of Buckingham; or the twin-brother of Louis XIV., whose birth was concealed to prevent civil dissensions in France, which it might one day have caused. The mask died after a long imprisonment, Nov. 19, 1703.

**ISLAMISM.** The religion of Mahomet, planned by him in a cave near Mecca, where he employed a Persian Jew, well versed in history and laws, and two Christians, to assist him. One of these latter was of the Jacobite, and the other of the Nestorian sect. With the help of these men he framed his Koran, or the book which he pretended to have received at different times from heaven by the hands of the angel Gabriel. At the age of forty he publicly assumed the prophetic character, calling himself the apostle of God, A. D. 604. See *Koran*, *Mecca*, &c.

**ISLE OF FRANCE.** Discovered by the Portuguese in 1500; but the Dutch were the first settlers in 1598. The French formed their establishment at Port Louis in 1715. This island, together with six French frigates and many Indianmen was taken by the British, Dec. 2, 1810. They retain possession of it, and it is now a fixed British colony. See *Mauritius*.

**ISMAEL, SIEGE OF, in Bessarabia.** After a long siege by the Russians, who lost 20,000 men before the place, the town was taken by storm, December 22, 1790; when the Russian general, Suwarrow, the most merciless and savage warrior of modern times, put the brave Turkish garrison, consisting of 30,000 men, to the sword; every man was butchered; and Suwarrow, not satisfied with this vengeance, delivered up Ismael to the pillage of his ferocious soldiery, and ordered the massacre of 6000 women, who were murdered in cold blood.

**ISSUS, BATTLE OF.** Alexander defeats Darius in this, his second great battle with him; Darius loses 100,000 men, and his queen and family are captured, 333 B. C.—*Plutarch*. The Persians lost 100,000 foot and 10,000 horse in the field; and the Macedonians only 300 foot and 150 horse.—*Diodorus Siculus*. The Persian army, according to Justin, consisted of 400,000 foot and 100,000 horse, and 61,000 of the former, and 10,000 of the latter, were left dead on the spot, and 40,000 were taken prisoners.—*Justin*.

**ISTHMIAN GAMES.** These were combats among the Greeks, and received their name from the isthmus of Corinth, where they were observed, instituted in honor of Melicerta, 1326 B. C.—*Lenglet*. They were re-instituted in honor of Neptune by Theseus, and their celebration was held so sacred and inviolable that even a public calamity could not prevent it, 1259 B. C.—*Arundelian Marbles*.

**ITALY.** The garden of Europe, and the nurse of arts as well as arms. It received its name from *Italus*, a king of the country, or from *Italos*, a Greek word signifying an ox. The aborigines of Italy were the progeny of

Meshech, the sixth son of Japheth. In process of time, the Gomerites or Celts, who inhabited the greatest part of Gaul, sent several colonies into Italy, while other colonists arrived from Greece, and the country was divided into three grand parts, viz.—Cisalpine Gaul, the settlement of the Celts; Italia Propria, the residence of the first inhabitants; and Magna Græcia, the seat of the Grecian colonists. The modern inhabitants of Italy may be derived from the Goths and Lombards, who contributed so largely to the overthrow of the Roman empire, and who founded on its ruins the kingdoms of Italy and Lombardy. For Roman empire, see *Tabular Views*.

|                                                                                                                                                                                                                          |            |                                                                                                                                                        |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Rome taken and plundered by the Visigoths under Alaric. See <i>Rome</i> A. D.                                                                                                                                            | 410        | The papal seat removed for seventy years to Avignon, in France                                                                                         | - 1308 |
| The Huns ravage the Roman empire under Attila, " <i>the Scourge of God</i> "                                                                                                                                             | 447        | The cardinals not agreeing in the election of a pope, they set fire to the conclave, and separate, and the papal chair is left vacant for two years    | - 1314 |
| The Western Roman empire is destroyed by the Heruli, whose leader, Odoacer, erects the kingdom of Italy                                                                                                                  | 476        | Louis Gonzaga makes himself master of Mantua, with the title of imperial vicar                                                                         | - 1323 |
| The reign of Totila, who twice pillages Rome, and reduces the inhabitants to such distress, that the ladies and people of quality are obliged to beg for bread at the doors of the Goths                                 | 541 to 552 | Lucca becomes an independent republic                                                                                                                  | - 1370 |
| The power of the Goths destroyed, and their kingdom overthrown by the generals of the Eastern empire                                                                                                                     | - 553      | Naples conquered by Charles VIII.                                                                                                                      | - 1492 |
| Narses, governor of Italy, invites the Lombards from Germany into this country                                                                                                                                           | - 568      | The republic of Venice loses all its Italian provinces in a single campaign, assailed by the pope, the emperor, and the kings of Spain and France      | - 1509 |
| The Lombards overrun Italy                                                                                                                                                                                               | - 596      | Leo X. having exhausted all his finances, opens the sale of indulgences and absolutions, which soon replenishes his treasury                           | - 1517 |
| Venice first governed by a doge                                                                                                                                                                                          | - 697      | Parma and Piacentia made a duchy                                                                                                                       | - 1545 |
| Charlemagne invades Italy                                                                                                                                                                                                | - 774      | Cosmo de Medicis made grand-duke of Tuscany by Pius V.                                                                                                 | - 1569 |
| He repairs to Rome, and is crowned emperor of the West                                                                                                                                                                   | - 800      | Pope Gregory XIII. reforms the calendar. See <i>Calendar</i>                                                                                           | - 1582 |
| [During the reign of Charlemagne, the pope of Rome, who had hitherto been merely a spiritual minister, finds means to assume a temporal power, not only independent of, but superior to all others.]                     |            | Ambassadors from Japan to the pope. See <i>Jeddo</i>                                                                                                   | - 1613 |
| Pope Damasus II. is the first who causes himself to be crowned with a tiara                                                                                                                                              | 1053       | The Corsicans revolt from the Genoese, and choose Theodore for their king. See <i>Corsica</i>                                                          | - 1736 |
| Pope Gregory VII., surnamed Hildebrand, pretends to universal sovereignty, in which he is assisted by the countess Matilda, mistress of the greater part of Italy, who makes a donation of all her estates to the Church | 1076       | Milan vested in the house of Austria by the treaty of Aix-la-Chapelle                                                                                  | - 1748 |
| Disputes between the popes and emperors, relative to the appointment of bishops, begin about 1106, and agitate Italy and Germany during several centuries.                                                               |            | Division of the Venetian states by France and Austria                                                                                                  | - 1797 |
| The Venetians obtain many victories over the Eastern emperors                                                                                                                                                            | - 1125     | Italy overrun, and Pius VI. deposed by Bonaparte                                                                                                       | - 1798 |
| Tuscany becomes independent                                                                                                                                                                                              | - 1208     | The Italian republic                                                                                                                                   | - 1802 |
| The duchies of Ferrara, Modena, and Reggio are created                                                                                                                                                                   | - 1228     | Italy formed into a kingdom, and Napoleon crowned                                                                                                      | - 1865 |
| Milan erected into a duchy                                                                                                                                                                                               | - 1277     | Eugene Beauharnois made Viceroy of Italy                                                                                                               | - 1805 |
|                                                                                                                                                                                                                          |            | The kingdom ceases on the overthrow of Napoleon                                                                                                        | - 1814 |
|                                                                                                                                                                                                                          |            | [The various other events relating to Italy will be found under the respective heads of <i>Genoa, Lombardy, Milan, Naples, Rome, Venice, &amp;c.</i> ] |        |

The population of the whole of Italy proper now amounts to 23,677,000.—*Alm, de Gotha.*

## J.

J. Introduced into the alphabet by Giles Beys, printer, of Paris, 1660.—*Du Fresnoy.*

JACOBINS. The name given to one of the principal parties in the French revolution. The Jacobin club originated from a small and secret association of about forty gentlemen and men of letters, who had united to disseminate

political and other opinions; the members were called Jacobins from their meeting in the hall of the Jacobin friars at Paris. The club became numerous and popular, and fraternal societies were instituted in all the principal towns of the kingdom. From its institution, one principal object was, to discuss such political questions as seemed likely to be agitated in the national assembly, in order that the members might act in concert. They are represented as having been determined enemies of monarchy, aristocracy, and the Christian religion, and may be regarded as the first grand spring of the revolution. They were suppressed October 18, 1794. The religious sect called Jacobins are those of both sexes who follow the rules of St. Dominick. See *Dominicans*.

**JACOBITES.** A sect among the eastern Christians, so called from Jacob Baradaeus, a Syrian, whose heresy spread to a great extent in the sixth and seventh centuries. In England existed a political party called Jacobites. They were the partisans of James II., and were so named after his expulsion in 1688. Those who openly appeared in arms for, or who expressed their wishes to restore the abdicated family, were called Jacobites; the distinction is now entirely lost.

**JAFFA.** Celebrated in Scripture as Joppa, the port whence Jonah embarked, and the place where Peter raised Tabitha from the dead. In profane history, the place whence Perseus delivered Andromeda. Jaffa was taken by Bonaparte in February 1799; and the French were driven out by the British in June, same year. Here, according to sir Robert Wilson, were massacred 3800 prisoners by Bonaparte: but this is reasonably doubted.

**JAMAICA.** Discovered by Columbus, May 3, 1495. It was conquered from the Spaniards by admiral Penn, and the land forces commanded by Venables in 1655; the expedition had been planned by Oliver Cromwell against St. Domingo. An awful earthquake occurred here in 1692; and the island was desolated by a furious hurricane in 1722; and again 1734 and 1751. In June 1795, the Maroons, or original natives, who inhabit the mountains, rose against the English, and were not quelled till March 1796. Tremendous hurricane, by which the whole island was deluged, hundreds of houses washed away, vessels wrecked, and a thousand persons drowned, October 1815. An alarming insurrection, commenced by the negro slaves, in which numerous plantations were burned, and property of immense value destroyed. Before they were overpowered, the governor, lord Belmore, declared the island under martial law, Dec. 22, 1831. Awful fire here, Aug. 26, 1843. The Cholera in 1850.

**JANISSARIES.** This order of infantry in the Turkish army was formerly reputed to be the grand seignor's foot guards. They were first raised by Amurath I. in 1361; and have several times deposed the sultan. Owing to an insurrection of these troops on the 14th June, 1826, when 3000 of them were killed on the spot, the Ottoman army was reorganized, and a firman was issued declaring the abolition of the Janissaries two days afterwards.

**JANSENISM.** This sect was founded by Cornelius Jansen, bishop of Ypres, about 1625. Jansen was a prelate of piety and morals, but his "*Augustinus*," a book in which he maintained the Augustine doctrine of free grace, and recommended it as the true orthodox belief, kindled a fierce controversy on its publication in 1640, and was condemned by a bull of pope Urban VIII.

**JANUARY.** This month, the first in our year, derives its name from Janus, a divinity among the early Romans. See *next article*. January was added to the Roman calendar by Numa, 713 B. C. He placed it about the winter solstice, and made it the first month, because Janus was supposed to preside over the beginning of all business. This god was painted with two faces,

because, as some persons have it, on the one side the first of January looked towards the new year, and on the other towards the old one. On the first day, it was customary for friends and acquaintances to make each other presents, from whence the custom of new year's gifts, still retained among us, was originally taken.

**JANUS, TEMPLE OF,** at Rome. Was erected by Romulus, and kept open in the time of war and closed in time of peace. It was shut only twice, during above 700 years, viz:—under Numa, 714 B. C. and under Augustus, 5 B. C.; and during that long period of time, the Romans were continually employed in war.

**JANVILLIERS, BATTLE OF,** between the French and Prussians, in which, after an obstinate engagement, Blucher, who commanded the latter army, was driven back to Chalons with considerable loss, February 14, 1814. About this period there were many battles fought between Napoleon and Blucher, and Napoleon and prince Schwartzenberg, until the capitulation of Paris, March 31, 1814.

**JAPAN.** This island was first made known to Europe by Marco Paulo; and was visited by the Portuguese about 1535. The Japanese are as fabulous as the Chinese in the antiquity of their empire, but the certain period begins with the hereditary succession of the ecclesiastical emperors, from the year 660 B. C. The English visited Japan in 1612. There was once a great number of Christians in different parts of the empire; but, in 1622, they underwent great persecutions, insomuch that they were all extirpated. See *Jeddo*.

**JAVA.** The atrocious massacre of 20,000 of the unarmed natives by the Dutch, sparing neither women nor children, to possess their effects, took place in 1740, and for its cruelty and cowardice fixes an indelible stain not only upon their nation, but upon man. The island capitulated to the British, August 8, 1811. The sultan was dethroned by the English, and the hereditary prince raised to the throne, in June, 1813. Java was restored to Holland in 1814.

**JEDDO.** The capital of Japan, containing about 1,680,000 inhabitants, a number nearly equal to London. In 1619, ambassadors from Japan arrived at the court of Paul V. to do him homage as the head of the Christian religion, which their master had embraced through the preaching of the Jesuit missionaries; but the misconduct of the Jesuits, who were endeavoring to overturn the Japanese government, caused them to be expelled in 1622, and the inhabitants relapsed into their former idolatry. The emperor's palace is of indescribable magnificence; its hall of audience is supported by many pillars of massive gold and plates of gold cover its three towers, each nine stories high. Several other costly palaces, belonging to the emperor, empress, concubines, and vassal kings, enrich this great eastern city.

**JEMMAPES, BATTLE OF,** one of the most obstinate and bloody of modern times; 40,000 French troops forced 28,000 Austrians, who were intrenched in woods and mountains, defended by forty redoubts, and an immense number of cannon; the revolutionary general Dumouriez was the victor in this battle, which lasted four days. According to the most authentic accounts, the number of killed on the side of the Austrians amounted to 10,000, on that of the French to 12,000, Nov. 5, 1792.

**JENA, BATTLE OF,** one of the most sanguinary of modern times, between the French and Prussian armies; the one commanded by the emperor Napoleon, and the other by the Prussian king, who was signally defeated, with the loss of 30,000 slain, and nearly as many thousands made prisoners. In

this battle the Prussians lost 200 field-pieces, and Napoleon advanced to Berlin, Oct. 14, 1806.

**JERSEY, GUERNSEY, SARK, AND ALDERNEY**, appendages to the duchy of Normandy, were united to the crown of England, by William the Conqueror, in 1066. Jersey was attempted by the French in 1779 and 1781. A body of French troops surprised the governor, made him prisoner, and compelled him to sign a capitulation; but major Pierson, the commander of the English troops, refusing to abide by this forced capitulation, attacked the French, and compelled them to surrender prisoners of war; but he was killed in the moment of victory, Jan. 6, 1781.

**JERUSALEM**. Built 1800 B. C. The first and most famed Temple was founded by Solomon, 1015 B. C.; and was solemnly dedicated on Friday, October 30, 1004 B. C., being one thousand years before the birth of Christ.—*Blair; Usher; Bible*. Jerusalem was taken by the Israelites, 1048 B. C. and by Nebuchadnezzar, 587 B. C. Razed to the ground by Titus, A. D. 70, after one of the most remarkable sieges in history. More than 1,100,000 of the Jews perished on this occasion. A city was built on the ruins of the former by the emperor Adrian, A. D. 130. The walls were rebuilt by the empress Eudoxia in 437. Jerusalem was taken by the Persians in 614; by the Saracens in 636; and by the crusaders, when 70,000 infidels were put to the sword, 1099. A new kingdom was founded, which lasted 88 years. Taken from the Christians by Saladin, in 1187; and by the Turks, who drove away the Saracens in 1217. Jerusalem was taken by the French under Bonaparte in February 1799. See *Jews*.

**JESTER**. In some ancient works, a jester is described as "a witty and jocose person, kept by princes to inform them of their faults, and those of other men, under the disguise of a waggish story." Several of the early English kings kept jesters, and particularly the Tudors. There was a jester at court in the reign of James I., but we hear of no licensed jester afterwards.

**JESUITS**. The order was founded by Ignatius Loyola (who was canonized), a page to Ferdinand V. of Spain, and subsequently an officer of his army. Loyola having been wounded at the siege of Pampeluna, in both legs, A. D. 1521, devoted himself to theology while under cure, and renounced the military for the ecclesiastical profession. His first devout exercise was to dedicate his life to the Blessed Virgin as her knight; he next made a pilgrimage to the Holy Land, and on his return laid the foundation for his new order in France. He presented the institutes of it in 1539, to pope Paul III. who made many objections to them; but Ignatius adding to the three vows of chastity, poverty, and obedience, a fourth of implicit submission to the holy see, the institution was confirmed by a bull, September 27, 1540, by which their number was not to exceed 60. That clog, however, was taken off by another bull, March 14, 1543; and popes Julius III., Pius V., and Gregory XIII., granted them such great privileges as rendered them powerful and numerous. But though François Xavier, and other missionaries, the first brothers of the order, carried it to the extremities of the habitable globe, it met with great opposition in Europe, particularly at Paris. The Sorbonne issued a decree in 1554, by which they condemned the institution, as being calculated rather for the ruin than the edification of the faithful. Even in Romish countries, the intrigues and seditious writings of this order, have occasioned it to be discountenanced. The Jesuits were expelled England by proclamation, 2 James I. 1604, and Venice 1606. They were put down in France by an edict from the king, and their revenues confiscated, 1764; and were banished Spain 1767. Suppressed by pope Clement XIV. in 1773. Restored by Pius VII. in 1814; and since tolerated in other states,

and even where not tolerated, the body, as now in England, possesses a secret and extensive existence.

**JESUS CHRIST.** Born on Monday, December 25, A. M. 4004, in the year of Rome 752; but this event should be dated four years before the commencement of the common era. See *Nativity*. Christ's baptism by John, and his first ministry, A. D. 30. He celebrated the last passover, and instituted the sacrament in its room, on Thursday, April 2. He was crucified on Friday, April 3, at three o'clock in the afternoon. He arose, April 5; ascended to heaven from Mount Olivet, on Thursday, May 14, following: and his Spirit descended on his disciples on Sunday, the day of Pentecost, May 24, A. D. 33.

**JEWELRY.** Worn by most of the early nations. So prodigious was the extravagance of the Roman ladies, that Pliny the elder says, he saw Lollia Paulina wearing ornaments which were valued at 322,916 $\frac{1}{2}$  sterling. Jewels were worn in France by Agnes Sorel, in 1434. The manufacture was extensively encouraged in England in 1685. See article *Dress*.

**JEWISH ERA.** The Jews usually employed the era of the Seleucidæ until the fifteenth century, when a new mode of computing was adopted by them. They date from the creation, which they consider to have been 3760 years and three months before the commencement of our era. To reduce Jewish time to ours, subtract 3761 years.

**JEWS.** A people universally known both in ancient and modern times. They derive their origin from Abraham, with whom, according to the Old Testament and the Jewish writers, God made a covenant, 1921 B. C. See *Tabular Views*, p. 6 to p. 42.

#### JEWS, MODERN HISTORY OF.

Titus takes Jerusalem; the city and temple are sacked and burnt, and 1,100,000 of the Jews perish, multitudes destroying themselves A. D. 70  
100,000 Greeks and Romans are murdered by the Jews about Cyrene 115  
Adrian rebuilds Jerusalem, and erects a temple to Jupiter 130  
More than 580,000 of the Jews are slain by the Romans, in 135 and 136  
[They are now banished from Judea by an edict of the emperor, and are forbidden to return, or even to look back upon their once flourishing and beloved city, on pain of death. From this period, the Jews have been scattered among all other nations.]

#### GENERAL HISTORY.

Jews first arrive in England 1078  
Thinking to invoke the divine mercy, at a solemnization of the Passover, they sacrifice a youth, the son of a rich tradesman at Paris, for which the criminals are executed, and all Jews banished France 1080  
The Jews massacred in London, on the coronation-day of Richard I., at the instigation of the priests 1089  
500 being besieged in York castle by the mob, they cut each other's throats to avoid their fury 1190  
Jews of both sexes imprisoned; their eyes or teeth plucked out, and numbers inhumanly butchered, by king John 1204  
They circumcise and attempt to crucify a child at Norwich; the offenders

are condemned in a fine of 20,000 marks 1235  
They crucify a child at Lincoln, for which eighteen are hanged 1255  
700 Jews are slain in London, a Jew having forced a Christian to pay him more than 2s. per week as interest upon a loan of 20s.—*Stave* 1262  
Statute that no Jew should enjoy a freehold, passed 1269  
Every Jew lending money on interest compelled to wear a plate on his breast signifying that he was a usurer, or to quit the realm 1274  
267 Jews hanged and quartered for clipping coin 1277  
They crucify a child at Northampton, for which fifty are drawn at horses' tails and hanged 1282  
15,660 Jews are apprehended in one day, and are all banished England.—*Rapin* 1287  
Massacre of the Jews at Verdun by the peasantry; 500 defend themselves in a castle, where, for want of weapons, they throw their children at their enemies, and then destroy one another 1317  
A fatal distemper raging in Europe, they are suspected of having poisoned the springs, and 1,500,000 are massacred.—*Lenglet* 1348  
500,000 Jews are banished Spain, and 150,000 from Portugal 1492  
They are banished France 1494  
After having been banished England 365 years, they are re-admitted by Cromwell, in virtue of a treaty with Manasseh Ben Israel 1552

JEWS, *continued.*

|                                                                                      |               |                                                                                                                                                       |              |

**JOAN OF ARC, or MAID OF ORLEANS.** The young and celebrated heroine of France. The English under Bedford closely besieging Orleans, Joan of Arc pretended she had a divine commission to expel them, and Charles VII. intrusted her with the command of the French troops. She raised the siege, and entered Orleans with supplies, April 29, 1429, and the English who were before the place from October 12, preceding, abandoned the enterprise, May 8, following. She captured several towns in the possession of the English, whom she defeated in a battle near Patay, June 10, 1429. In her various achievements no unfeminine cruelty ever stained her conduct. She was wounded several times herself, but never killed any one, or shed any blood with her own hand. She was taken at the siege of Compiègne, May 25, 1431; and to the great disgrace of the English, was burnt for a witch five days afterwards at Rouen, in the 22d (some say 29th) year of her age.—*Voltaire's Pucelle d'Orleans.*

**JOHN DOE AND RICHARD ROE.** Names, as pledges to prosecute, well known in the law. *Magna Charta* demanded witnesses before trial, and since the reign of Edward III. the fictitious names of John Doe and Richard Roe are put into writs, as pretended witnesses.

**JUBILEE.** By Mosaic institution the Jews celebrate a Jubilee every fifty years. Among the Christians a jubilee every century was instituted by pope Boniface VIII., in the year 1300. It was celebrated every fifty years by command of pope Clement VI.; and was afterwards reduced by Urban VI. to every thirty-third year; and Sixtus V. to every twenty-fifth year, at which period it is now fixed.

**JUDGES.** On the Norman conquest the judges had the style of *Justiciarius Angliæ*: these judges continued until the erection of the Courts of King's Bench and Common Pleas. The last who had the office of *Justiciarius Angliæ* was Phillip Basset, in 1261. Judges punished for bribery, 17 Edward I. 1288, when Thomas de Weyland was banished the land; and in 1351, William de Thorp was hanged. John de Cavendish was beheaded by the Kentish rebels, 1382. Tresilian, chief justice, was executed for favoring despotism, and other judges were seized and condemned, 1388. The prince of Wales was committed by Judge Gascoigne for assaulting him on the bench, 1412. Sir Thomas More, lord chancellor, was beheaded, July 6, 1535. Judges threatened with impeachment, and Berkeley taken off the bench and committed by the commons, 1641. Three impeached, 1680. Most of them dismissed for not allowing the legality of a dispensing power in the crown, 3 James II. 1687. The celebrated Judge Jefferies was committed by the lord mayor to the Tower, where he died, 1689. The independence of the judges in England was established by making their appointments patents for life, 1761. Judges were sent to India, 1773. Three additional judges,

one to each court, were appointed, 1784. A new judge took his seat as vice-chancellor, May 5, 1813.

**JUDGES IN THE UNITED STATES.** Those of the Supreme Court, eight in number, are appointed for life or during good conduct, by the President and Senate. The chief justices of the Supreme Court of the United States have been John Jay, appointed, 1789; William Cushing, of Mass., 1796; Oliver Ellsworth, 1796; John Marshall, 1801; Roger B. Taney, 1836. U. S. Circuit Judges were first appointed 1801. The judges of the several States are thus appointed :—

By the *Governor and Legislature*, or Senate, or Council, in Maine, New Hampshire, Massachusetts, Maryland, Louisiana, Missouri, Indiana, and Michigan.

By the *Legislature alone*, in Vermont, Rhode Island, Connecticut, New Jersey, Virginia, North Carolina, South Carolina, Georgia, Alabama, Arkansas, Tennessee, Ohio, and Illinois.

By the Governor alone in Pennsylvania, Delaware, and Kentucky.

By *popular vote*, in Mississippi and in New York.\*

THE TERM OF OFFICE of the superior judges, is *for life* (or “during good behavior”) in Massachusetts, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Louisiana, Kentucky and Illinois.

Until seventy years of age, in Maine, New Hampshire, Connecticut.

Until sixty-five years of age, in Missouri.

For periods varying from *two to twelve years*, in New Jersey, Georgia, Alabama, Mississippi, Arkansas, Tennessee, Ohio, Indiana, Michigan; and for one year in Rhode Island, and Vermont.

THEY ARE REMOVABLE—

By impeachment in fourteen States. By conviction of misconduct in a court of law, in Maryland. By joint resolution of Senate, and two-thirds of Assembly, in New York.

**JUDICIAL COMMITTEE OF THE PRIVY COUNCIL**, in lieu of the Court of Delegates, for appeals from the Lord Chancellors of England and Ireland in cases of lunacy—from the Ecclesiastical and Admiralty Courts of England, and Vice Admiralty Courts abroad—from the Courts of the Isle of Man, the Colonial Courts, &c., fixed by statute 3 and 4 William IV. 1833.

**JUGGERNAUT**, or “Lord of the world.” The first object of Hindoo veneration, is a celebrated idol of an irregular pyramidal black stone, with two rich diamonds to represent eyes; the nose and mouth are painted vermilion, and the visage is frightful. The number of pilgrims that visit the god is stated at 1,200,000 annually: of these a great many never return, and to the distance of fifty miles the way is strewn with human bones: the temple of Juggernaut has existed above 800 years.

**JUGURTHA, THE WAR WITH.** A memorable war against the Numidian to reduce his kingdom, commenced 111 B. C. and continued five years. Cæcilius Metellus was first sent against him, and defeated him in two battles; and afterwards Sylla and Marius; the latter of whom dragged him in chains to Rome to adorn his triumph. The name and wars of Jugurtha have been immortalized by the pen of Sallust.

**JULIAN PERIOD.** A term of years produced by the multiplication of the lunar cycle 19, solar cycle 28, and Roman indiction 15. It consists of 7980

---

\* The election of judges by the people, in New York, was first provided for by the new constitution of 1846.

years, and began 4713 years before our era. It has been employed in computing time, to avoid the puzzling ambiguity attendant on reckoning any period antecedent to our era, an advantage which it has in common with the mundane eras used at different times. By subtracting 4713 from the Julian period, our year is found; if before Christ, subtract the Julian period from 4714. For Julian year, see *Calendar* and *Year*.

**JULY.** The seventh month of the year, from the Latin *Julius*, the surname of C. Caesar, the dictator of Rome, who was born in it. It was the fifth month in the Roman calendar until Numa added January and February to the year, 713 B. C. See *those months severally*, and article *Year*.

**JUNE.** The sixth month, but originally the fourth month of the Roman year. It had its name *Junius*, which some derive à *Junone*, and others à *Junioribus*, this being for the young, as the month of May was for aged persons. When Numa added two months before March, this month became, as it is now, the sixth of the calendar, 713 B. C. See *Year*.

**JUNIUS'S LETTERS.** Junius was the assumed name of a concealed political writer, who published his letters in the *Public Advertiser*, in 1769. They were written in a nervous, sarcastic, and clear style, and produced a powerful impression, and the volume is now one of the most admired in British literature. These letters have been ascribed to Mr. Burke, Mr. William Gerard Hamilton, commonly called single-speech Hamilton, John Wilkes, Mr. Dunning (afterwards lord Ashburton), Mr. serjeant Adair, the rev. J. Rosenhagen, John Roberts, esq., Mr. Charles Lloyd, Mr. Samuel Dyer, general Lee, Hugh Boyd, esq., and sir Philip Francis; but the matter is still hidden in obscurity. "I am the depositary of my own secret, and it shall perish with me."—*Junius*.

**JUPITER.** Known as a planet to the Chinese and the Chaldeans: to the former, it is said 3000, B. C.; and correctly inserted in a chart of the heavens, made about 600 B. C., and in which 1460 stars are accurately described; this chart is said to be in the royal library at Paris. The satellites of Jupiter were discovered by Galileo, A. D. 1610; but Jansen, it is affirmed, claimed some acquaintance with them about twenty years before.

**JURIES.** Trial by jury was introduced into England during the Saxon Heptarchy, mention being made of six Welsh and six Anglo-Saxon freemen appointed to try causes between the English and Welsh men of property, and made responsible with their whole estates, real and personal, for false verdicts.—*Lambard*. But by most authorities their institution is ascribed to Alfred. In *Magna Charta*, juries are insisted on as the great bulwark of the people's liberty. When either party is an alien born, the jury shall be one-half denizens, and the other half aliens, statute 28 Edward III. 1353. By the common law a prisoner upon indictment or appeal, might challenge peremptorily thirty-five, being under three juries; but a lord of parliament, and a peer of the realm that is to be tried by his peers, cannot challenge any of his peers.

**JURIES, COERCION OF.** About the year 927, the plaintiff and defendant used to feed the jury empanelled in their action, and hence arose the common law of denying sustenance to a jury after the hearing of the evidence. A jury may be detained during the pleasure of the judge if they cannot agree upon a verdict; and may be confined without meat, drink, or candle, till they are unanimous. Some jurors have been fined for having fruit in their pockets, when they were withdrawn to consider of their verdict, though they did not eat it.—*Leon. Dyer*, 137. A jury at Sudbury not being able to agree, and having been some time under duress, forcibly broke from the court where they were locked up, and went home, October 9, 1791.—*Phillips*.

**JUSTICES OF THE PEACE.** These are local magistrates, invested with extensive powers in minor cases, but subject to supercession and punishment by the king's bench for an abuse of their authority. Justices of the peace in every county first nominated by William the Conqueror, in 1076.—*Stowe*. In the United States the office is held by special appointment, and the tenure is different in different States; it is usually for seven years.

**JUSTINIAN CODE.** Wherein was written what may be termed the statute law, scattered through 2000 volumes, reduced to fifty, completed A. D. 529. To this code of laws Justinian added the Pandects, the Institutes, and Novels. These compilations have since been called, collectively, the body of civil law (*corpus juris civilis*). A digest was made in 533.—*Blair*.

## K.

**KALEIDOSCOPE.** This optical instrument, which combines mirrors, and produces a symmetrical reflection of beautiful images, was invented by Dr. Brewster of Edinburgh; it was first suggested in 1814, and the instrument perfected in 1817, when it found its way into every body's hands. It is intended to assist jewellers, glass-painters, and other ornamental artists, in the formation of patterns, of which it produces an infinite number.

**KAMTSCHATKA.** The peninsula on the eastern coast of Asia. It was discovered by Morosco, a Cossack chief, A. D. 1690; and was taken possession of by Russia in 1697; it was not ascertained to be a peninsula until visited by Behring, in 1728. Four months, commencing at our midsummer, may be considered as the spring, summer, and autumn here, the rest of the year being dreary winter.

**KENILWORTH CASTLE.** Built in 1120, but much of the pile was erected subsequently by John of Gaunt; and its remains now form one of the most picturesque objects in the kingdom. This celebrated castle was conferred on Dudley, earl of Leicester, by queen Elizabeth, whom he afterwards entertained within its walls for seventeen days. His sumptuous entertainment of the queen commenced July 19, 1575, and cost the earl daily 1000*l.* a vast expenditure in those times.

**KENTUCKY,** one of the United States, was first explored by Daniel Boone, an enterprising hunter, in 1770. First white settlement near Lexington, 1775. Was a part of Virginia until 1782, when it was made a separate district. Admitted into the Union 1792. Population in 1790, 73,677; in 1810, 406,511 in 1830, 688,844; in 1840, 779,828, including 182,258 slaves.

**KEYS.** The invention of them is ascribed to Theodore, of Samos, by Pliny, about 730 B. C. But this is an error, as keys are mentioned in the siege of Troy, 1193 B. C. Keys were originally made of wood, and the earliest form was a simple crook similar to the common picklock now in use. The ancient keys now to be found in the cabinets of the curious are mostly of bronze. The late Francis Douce, esq., had some of remarkable shapes, the shaft terminating on one side by the works, on the other by a ring. Keys of this description were presented by husbands to wives, and were returned again upon divorce or separation.

**KIEL, TREATY OF.** Between Great Britain, Sweden, and Denmark, signed January 14, 1814. By this treaty Norway was ceded to Sweden. Previously the Norwegians had been deserted by the king of Denmark, and had sent a deputation to England, to interest that country in their favor. The mission was fruitless. On the contrary, the English blockaded the ports of Norway, and the Swedes entered by land. The Norwegians fought some brave actions, but they were defeated. The prince of Denmark quitted Norway, and the diet elected the king of Sweden to be their king.

**KING.** The Latin *Rex*, the Scythian *Reis*, the Spanish *Rey*, the French *Roi*, all come from the Hebrew *Rosch*, chief, or head. Nimrod was the first founder of a kingdom, 2245 B. C.—*Du Fresnoy*. Misraim built cities in Egypt, and was the first who assumed the title of king in that division of the earth. Saul was the first king of Israel, 1095 B. C. Most of the Grecian states were governed by kings; and kings first ruled in Rome. The Egyptians understood the only just principle of government, namely, to make the people happy; and although among them the monarchy was hereditary, the sovereign was as much bound by the laws as his meanest subject: there was a peculiar code for his direction in the most minute particulars of public and private life. The king's hour of rising, the portion of time he should devote each day to the services of religion, the administration of justice, the quality of his food, and the rank of persons by whom he was served, were all prescribed.

**KING OF ENGLAND.** The style "king of England," was first used by Egbert A. D. 828; but the title *Rex gentis Anglorum*, king of the English nation, existed during the Heptarchy. See *Britain*. The plural phraseology of we, us, our, was first adopted by king John, in 1207. The title of "king of Ireland," by British sovereigns, was not assumed until 1542, when Henry VIII. changed *lord* of Ireland into king. The style "Great Britain" was adopted at the union of England and Scotland, 6 Anne, 1707; and of the "United Kingdom of Great Britain and Ireland" at the union of these countries, January 1, 1801, when the royal style and title was appointed to run thus:—"Georgius Tertius, Dei Gratia Britanniarum Rex, Fidei Defensor," "George the third, by the Grace of God of the United Kingdom of Great Britain and Ireland King, Defender of the Faith."

**KING OF THE FRENCH.** Decreed by the National Assembly that the title of "king of France" should be changed in the person of Louis XVI. to that of "king of the French," October 16, 1789. The royal title was abolished in 1792; but restored in the Bourbon family, in 1814. Louis-Philippe I. was invited to the monarchy under the style of the "king of the French," August 9, 1830. See *France*.

**KING OF HUNGARY.** The averseness of the Hungarian people to the term *queen*, has led to the custom among them, that whenever a female succeeds to the throne, she shall be called *king*. Thus it will be seen in the annals of Hungary, that the daughter of Louis I. reigned as *king Mary*, in 1383. See *Hungary*.

**KING OF THE ROMANS.** The emperors of Germany, in order that their eldest sons might be chosen their successors, in their own lifetime politically obtained them the title of "king of the Romans," this people being comprehended in that sovereignty. The first emperor so elected was Henry IV., in 1055. Richard, brother of Henry III. of England, was induced to go to Germany, where he disbursed vast sums under the promise of being elected next emperor; he obtained the title of "king of the Romans," but failed in succeeding to the Imperial crown. The style "king of Rome" was revived by Bonaparte, who conferred it on his son, upon his birth, in April, 1811; but the title ceased with the extinction of the dynasty of Napoleon, April 5, 1814.

**KING'S BENCH, COURT OF, IN ENGLAND.** Obtained its name from the king sometimes sitting here on a high bench, and the judges, to whom the judicature belongs in his absence, on a low bench at his feet. The jurisdiction of this court extends all over England, and is not so subject to control as others, because the law presumes the king to be here in person. The name of this court has been altered to that of *Queen's Bench*, since the

accession of Victoria, in June, 1837, as is the case with all institutions in immediate connection with, or dependent upon the sovereign.

**KING'S EVIL.** Supposed to be cured by the touch of the kings of England. The first who touched for it was Edward the Confessor, 1058. This vulgar credulity had in the age of Charles II. arisen to such a height, that in fourteen years, 92,107 persons were touched; and, according to Wiseman, the king's physician, they were nearly all cured! Queen Anne officially announced in the *London Gazette*, March 12, 1712, her royal intention to touch publicly for the cure of the evil; and touching for it continued a custom until it was wisely discouraged, and ultimately dropped by George I., 1714.

**KING'S SPEECH.** The first royal speech from the throne was delivered by Henry I., in 1107. A late celebrated writer, after remarking with his accustomed harshness upon Mr. Canning, who had just then (April 1827) become chief of a new administration, said—"Canning being now minister, of one thing, and one thing only, we are certain, we shall have no more grammatical blunders in king's speeches; these things will still be written in the same meagre way, in point of matter, as before; but we shall have them in a perspicuous and pure style."—*Cobbett*.

**KINGDOMS.** The origin of kingdoms may be referred to Belus, supposed to have been the Nimrod of Holy Writ; he was the founder of the Babylonian monarchy, 2245 B. C.—*Usher*. Menes, or Misraim, makes his son Atholais, surnamed the first Mercury, king of Upper Egypt; and another son, Toseuthrus, he establishes at Memphis, 2188 B. C.—*Blair*. Ninus founds the Assyrian monarchy, 2059 B. C.—*Lenglet*.

**KISSING.** Kissing the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, as we may collect from Judas approaching his master with a kiss; it was also customary in Rome. Kissing the pope's foot took its rise from the custom of kneeling to sovereigns, and began with Adrian I. or Leo III. at the close of the eighth century. From kneeling to sovereigns came also the ceremony of a vassal kneeling to his lord in homage, first practised, A. D. 709.

**KIT-KAT CLUB.** A society which consisted of about thirty noblemen and gentlemen of distinguished abilities, instituted in 1703, for the purpose of promoting the Protestant succession in the house of Hanover, which they effected by spirited publications as well as other measures. Addison, Steele, and Dr. Garth were members, and made several epigrams upon the toasts of the club. The club took its name from one Christopher Kat, a pastry-cook who lived near the tavern where they met, in King-street, Westminster, and who served them with pastry.—*Bonney's Life of Queen Anne*.

**KNIGHT.** The origin of this title as a military honor is said to be derived from the siege of Troy, but this solely depends upon a passage or two in Homer. With certainty we may trace the distinction to the Romans, who, after their union with the Sabines, created three centuries of knights, about 750 B. C.—*Livy*.

**KNIGHT-ERRANDRY.** Took its rise in the combats of the Celtic nations, particularly the judicial combats, and much prevailed in Spain, France, &c. Germany. Tilts and tournaments commenced with the return of the crusaders from the holy wars, and for about 300 years they were the chief amusements of courts, and the successful combatants acquired knighthood, and the favor of the ladies. When public combats declined, the knights travelled in search of adventures, to correct injustice, and fight in the cause of the fair; and the consequent follies gave rise to the novel of Don Quixote.

**KNIGHTHOOD.** Was conferred in England by the priest at the altar, after

confession and consecration of the sword, during the Saxon Heptarchy. The first knight made by the sovereign with the sword of state was Athelstan, on whom Alfred bestowed this new dignity, A. D. 900.—*Spelman*. The custom of ecclesiastics conferring the honor of knighthood was suppressed in a synod held at Westminster in 1100.—*Ashmole's Institutes*. All persons having ten pounds yearly income were obliged to be knighted, or pay a fine, 38 Henry III. 1254.—*Salmon*.

**KNIGHTHOOD IN EUROPE.** As a system, under the denomination of chivalry, knighthood is to be dated from the eleventh century. On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, and to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. The first knights being men of the highest rank and largest possessions, admission into the order was deemed a great honor.

#### MILITARY, RELIGIOUS, AND HONORARY ORDERS OF KNIGHTHOOD.

**KNIGHTS, FEMALE.** The title of knight, which was given to men of superior worth, ability, and fortune, in former times, was sometimes given to women also. As an instance, it was conferred on the women who preserved the city of Tortosa from falling into the hands of the Moors in 1149, by their stout resistance and vigorous attack of the besiegers, by which means the Moors were forced to raise the siege. Large immunities and favors were granted to them and their descendants for their heroism on this occasion.

**KNIGHTS OF THE ROUND TABLE.** Instituted by king Arthur, about A. D. 528.—*Asser's Life of Alfred.* This ancient order was revived by Edward III. at Windsor, upon New Year's day, 1344. The king, with a view to the recovery of France, which descended to him in right of his mother, became anxious to draw the best soldiers of Europe into his interest, and thereupon projecting and setting up king Arthur's Round Table, he proclaimed a solemn tilting, to invite foreigners of quality and courage to the exercise. He published his royal letters of protection, for the safe coming and return of such foreign knights as had a mind to venture their reputation at those jousts and tournaments.—*Bealson.*

**KNIGHTS OF THE SHIRE.** The barons, or tenants in chief, or freeholders by Domesday-book, were 700 in number, but being split into small parts, were greater and lesser, all of whom were entitled to sit in parliament; but the latter, or lesser barons, were allowed to choose two representatives, hence called knights of the shire, A. D. 1307.

**KNIGHTS TEMPLARS.** A religious and military order, instituted A. D. 1111. They came to England early in Stephen's reign, and settled at the Temple in London; and at other places in the reign of Henry II. All the knights were arrested in France in one day, being charged with great crimes, and possessing great riches; fifty-nine of them were burnt alive at Paris in Oc-

1307. Those in England were all seized the same year. Their order was abolished by Philip the Fair of France, at the council of Vienne, in 1312; and many thousands were subsequently massacred, their wealth being given to the knights of Malta. See *Malta*.

KNIVES. First made in England in 1563. They were the earliest branch of cutlery, and were first manufactured by one Mathews, of Fleet-Bridge, London, 5th Eliz., 1563.—*Chamberlain's England*, edit. 1683. See *Forks*.

KORAN, or ALKORAN or MAHOMET, written about A. D. 610. Its general aim was, to unite the professions of Idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet. It was written in the Koreish Arabic, and this language, which certainly possessed every fine quality, was said to be that of paradise. Mahomet asserted that the Koran was revealed to him, during a period of twenty-three years, by the angel Gabriel. The style of this volume is beautiful, fluent, and concise, and where the majesty and attributes of God are described, it is sublime and magnificent. Mahomet admitted the divine mission both of Moses and Jesus Christ.—*Dr. Jortin*. The leading article of faith which this impostor preached, is compounded of an eternal truth, and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God.—*Gibbon*. The Koran was translated into Latin in 1143; and into English and other European languages about 1763, *et seq.* It is a rhapsody of 3000 verses, divided into 114 sections. See *Alcoran*; *Islamism*; *Mecca*; *Mahometism*, &c.

## L.

LA HOGUE, BATTLE OF, between the English and Dutch combined fleets, under admirals Russel and Rooke, and the French fleet commanded by admiral Tourville. The English attacked the French near La Hogue, gaining a splendid victory, burning thirteen of the enemy's ships, destroying eight more, forcing the rest to fly, and thus preventing a threatened descent upon England, May 19, 1692.

LA PEROUSE'S VOYAGE. It was commenced in 1785, when Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command. The last direct intelligence received from him was from Botany Bay, in March 1788. Several expeditions were subsequently dispatched in search of Perouse, but no certain information was had until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on two different islands of the New Hebrides—a fate authenticated by various articles of the wreck of these vessels, which capt. Dillon brought with him to Calcutta, April 9, 1828, 40 years afterwards.

LA VENDEE, WAR OF. The French Royalists here took to arms, and were successful in a number of battles with the Republican armies, fought between July 12, 1793, and January 1, 1794, when they experienced a severe reverse. Numerous other engagements were fought, with various success, until this war terminated, Jan. 10, 1800.

LABYRINTH. There were four most famous in history: the first was built by Dædalus, in the island of Crete, to secure the Minotaur, about 1210 B. C.; the second in Egypt in the isle of Moeris, by Psammeticus, king of that place, 683 B. C.; and the fourth in Italy, erected by Porsenna, king of the Etrurians, about 520 B. C.—*Pliny*. The beauty and art of the labyrinth of Egypt were almost beyond belief; it had 12 halls and 3000 chambers, with pillars, was encrusted with marble, and adorned with sculpture.—*Herodotus*. The labyrinth of Woodstock is famous from its connection with the story of

Fair Rosamond, mistress of Henry II.; there is a curious Maze at Hampton Court that is much visited.

**LACE.** Mention is made of it as being of very delicate texture in France and Flanders in 1320; and fine laces were much in use for ruffles and frills for the men, and headdresses for the women, in the fifteenth century. Lace was general in the court costume of Elizabeth's reign. Dresden, Valenciennes, Mechlin, and Brussels, have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London, and its value when manufactured has been increased to forty pounds, ten times the price of standard gold.

**LACEDÆMON.** See *Sparta*. Lelez begins the kingdom of Lelegia, in Læconia, 1516 B. C. Eurotas gives his daughter Sparta in marriage to Lacedæmon, and makes him partner on the throne, 1490 B. C. The city of Sparta was built about this time, and hence the name by which the country is most known. The Lacedæmon republic became famous in history after 700 B. C. particularly by the conquest of Athens. It was made a Roman province 71 B. C. The territory now belongs to the Turks.—*Thucydides*; *Priestley*.

**LADIES.** The mistresses of manor-houses, in former times, served out to the poor weekly with their own hands certain quantities of bread, and were therefore called *Lef-days*—two Saxon words signifying *bread-giver*, and the words were at length corrupted, and the mistress is called to this day *Lady*, that is, *Lef-day*. The introduction of ladies to court, was first to that of Louis XII. of France in 1499. As a title of honor, the title of lady properly belongs only to the daughters of earls, and all of higher rank; but custom has made it a term of complaisance for the wives of knights, and all women of eminence or gentility. See *Lord*.

**LADRONE ISLES.** Discovered by Magellan, in 1520; they are eleven in number; at the island of Guam he first touched. Here, some of the natives having stolen some of his goods, and showing a great disposition to theft, he named the islands the *Ladrones*, or Islands of Thieves, which they are called to this day.

**LADY DAY.** This festival, the 25th March, was instituted about A. D. 350, according to some authorities, and not before the seventh century according to others. On this day, the 25th of March, the angel Gabriel brought to the Virgin Mary the message concerning her son Jesus; hence it is called the Annunciation, and is celebrated in the Catholic church as one of its chief feasts; and in the Reformed church also, on account of the connection between the circumstance commemorated and the Incarnation. In England, before the alteration of the style, the new year began on the 25th of March.

**LA FAYETTE'S** first visit to the United States, to aid the cause of American independence; he arrived at Charleston, April 25, 1777, being then nineteen years old. He raised a corps at his own expense; was wounded at Brandywine; employed in Rhode Island, 1778; visited France, promoting new reinforcements for the United States, and returned 1779. His triumphal reception in the United States on a visit of pleasure, Aug. 13, 1824; received from Congress the sum of \$200,000 and a township of land in reward for his services; returned to France in the frigate Brandywine, September 7, 1825.

**LAMPS.** See *Lanterns*. Lamps are mentioned in all the early ages; they were in use in Egypt, Greece, and Rome. The earthen lamp which Epicetus the philosopher had in his study sold, after his death, for 300 drachmas, A. D. 161. Lamps with horn sides were the invention of Alfred. Lamps were in general use through the streets of London up to the el

of the 18th century, as were flambeaux which were carried by link-boys. London streets were first lighted by oil-lamps in 1681; and with gas lamps in 1814. The domestic lamp is now of elegant manufacture; of this kind is the Argand lamp, brought into general use in England in 1785, *et seq.* See *Safety Lamp*.

**LANCASTERIAN SCHOOLS.** On a system of education by means of mutual instruction, propagated by Joseph Lancaster and Dr. Bell; they were not much patronized till about 1808, when Lancaster's system attracted general attention, notwithstanding the prejudices that existed against the founder, who had been laboring to introduce schools upon his economic plan from 1798. They became general in 1818, and there are now some hundreds of them in England, and in London more than forty. They were founded in Senegal, and were extensively instituted in Russia, in 1819.

**LAND.** Was let generally in England for 1s. per acre, 36 Henry VIII. 1544. The whole rental of the kingdom was about 6,000,000*l.* in 1600. It was about 14,000,000*l.* in 1688. In 1798 Mr. Pitt proposed his Income Tax of 10 *per cent.* on an estimate of 100 millions, taking the rent of land at 50 millions, the rent of houses at 10 millions, and the profits of trade at 40 millions; but in this estimate were exempted much land and the inferior class of houses. See *Income Tax*. The rental of the United Kingdom has been recently estimated in parliament at 127 millions, but authorities vary much on the amount. See *Public Lands, U. S.*

**LANDGRAVE.** This is from *land*, and *grave* a count, a German title of dominion, which appears to have commenced in the eleventh century; it became the title of the house of Hesse Cassel, about the year 1300; and the rank was subsequently assumed by the branches of Hesse Homburg, Hesse Philipstal, Hesse Darmstadt, &c. See *Hesse*.

**LANGSIDE, BATTLE OF;** between the forces of the regent of Scotland, the earl of Murray, and the army of Mary queen of Scots, in which the latter suffered a complete defeat, May 15, 1568. Immediately after this last fatal battle, the unfortunate Mary fled to England, and landed at Workington, in Cumberland, on May 16; and was soon afterwards imprisoned by Elizabeth.

**LANGUAGE.** Language must either have been revealed originally from heaven, or it is the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former opinion by the great majority of the Jews and Christians, and the profoundest philosophers of France and England. It has been affirmed that Hebrew was the language spoken by Adam; but others deny this, and say that the Hebrew, Chaldee, and Arabic, are only dialects of the original, which has for many ages been lost and unknown. Psammeticus the Powerful, desiring to know the most ancient people and language on the earth, caused two children to be kept from all knowledge of the use of speech, until they were two years old; they were then brought into his presence, and they both pronounced the sound *beccos*, the Phœnician term for *bread*. He therefore gave the Phœnician the precedence, in point of antiquity, to all other nations, 647 B. C.—*Herodotus, Polyæn., Strabo*.

**LANGUAGES.** Of the Hebrew, the Chaldee and Syriac are dialects. The original European ones are thirteen, viz: Greek, Latin, Dutch, Slavonian, spoken in the east; Welsh, Biscayan, spoken in Spain; Irish, Albanian, in the mountains of Epirus, Tartarian, the old Illyrian, the Jazygian, remaining yet in Liburnia; the Chaucia, in the north of Hungary; and the Finnic, in East Friesland. Arabic is the mother tongue of Africa. From the Latin sprung the Italian, French and Spanish; and from the Spanish the Portuguese. The Turkish is a mixed dialect of the Tartarian. From the High Dutch, or Teutonic, sprang the Danish, Swedish, Norwegian, English, Scotch,

&c. There are 3664 known languages now used in the world. Of these, 937 are Asiatic; 587 European; 276 African; and 1624 American languages and dialects.—*Professor Adelung*.

**LANTERNS.** In general use from a very early date. Those of scraped horn were invented in England, it is said by Alfred, and it is supposed that horn was used for window-lights also, as glass was not known in Alfred's reign, A. D. 872-901.—*Stowe's Chron.* London was lighted by suspended lanterns, with glass sides, A. D. 1415. The pellucid laminæ of the ox horn has served for ages for the sides of lanterns instead of glass, and for many uses are preferred. See article, *Lamps*.

**LAOCOON.** This exquisite work of art, executed in marble, is universally allowed to be the triumph of Grecian sculpture. It was modelled by Agesander, Athenodorus, and Polydorus, all of Rhodes, and of great eminence as statuary; and in all ages, and by all nations, this beautiful group is allowed to be the greatest victory of art that has ever been achieved by human hands.

**LATERAN, COUNCILS OF THE.** They were held in the Basilica of the Lateran, at Rome. Of these councils there were five: by the first, the right of investitures was settled between pope Calixtus II. and the emperor Henry V., 1122; by the second council was secured the temporalities of ecclesiastics, 1139; the third was to denounce schismatics, 1179; the fourth on church affairs, attended by 400 bishops and 1000 abbots; and the fifth was the famous council of Julius II., 1512.

**LATHE,** for turning ivory, wood, iron, and other substances, so as to shape them to the views of the artist, was originally an instrument of rude construction, invented by Talus, a grandson of Dædalus, about 1240 B. C. Pliny ascribes the invention to Theodore of Samos. Modern lathe engine frequently cost thousands of pounds.

**LATIN LANGUAGE.** One of the thirteen original languages of Europe; and from which sprang the Italian, French, and Spanish. It is named after the Latini, and the Latini from Latinus, their king. A vast portion of our most beautiful and expressive words are derived from the Latin. It ceased to be spoken in Italy, about A. D. 581; and was first taught in England by Adelmus, brother of Ina, in the seventh century. During six or seven hundred years the Latin tongue prevailed in all public proceedings from the Tweed to the Euphrates, and from the Danube to Mount Atlas, and has been more or less retained even to this day. In England it was ordered to be discontinued in conveyancing, and in courts of law, in 1731.

**LATITUDE.** First determined by Hipparchus of Nice, about 170 B. C. It is the extent of the earth, or of the heavens, reckoned from the equator to either pole. Maupertuis, in latitude 66.20, measured a degree of latitude, and made it 69.493; he measured it in 1737. Swanberg, in 1803, made it 69.292. At the equator, in 1744, four astronomers made it 68.732; and Lambton, in latitude 12, made it 68.743. Mudge, in England, made it 69.148. Cassini, in France, in 1718 and 1740, made it 69.12; and Biot 68.769; while a recent measure in Spain makes it but 68.63—less than at the equator; and contradicts all the others, proving the earth to be a prolate spheroid, which was the opinion of Cassini, Bernouilli, Euler, and others, while it has more generally been regarded as an oblate spheroid.

**LATIUM.** Now the city of Romania; built by Latinus, king of Janiculum who gave his name to the country, calling his subjects Latines, 904 B. C. Laurentum was the capital of the country in the reign of Latinus, Lavinium under Æneas, and Alba under Ascanius. The Latins, though originally known only among their neighbors, soon rose in rank when Romulus<sup>†</sup> founded the city of Rome in their country.

**LATTER-DAY SAINTS.** A new sect, whose principles are variously represented. By some we are told that their tenets do not vary much from those of the Church of England, the Scriptures, without mysticism, being the foundation of them. By others it is said that they assume the power of curing the sick, resisting the operations of the deadliest poisons, and working miracles of several kinds; and maintain that this is the last generation of men. They have appeared in Hertfordshire, Lancashire, and Yorkshire; and an address was published by them at Manchester, in May, 1840. Great numbers of these fanatics have lately emigrated to the United States.

**LAWS, ANCIENT.** The laws of Phoroneus, in the kingdom of Argos, 1807 B. C., were the first Attic laws, reduced to a system by Draco, for the Athenians, 623 B. C.; but the latter code was afterwards superseded by that of Solon, 578 B. C. The Spartan laws of Lycurgus were made 884 B. C.; they remained in full force for 700 years, and are calculated to raise our admiration, as well by their singularity, as by the effect they had in forming a race of men totally different from all others living in civilized society. The Roman laws were founded on those of Phoroneus. The Gregorian and Hermoginian codes were published in A. D. 290. The Theodosian code in 435. The Justinian code, in 529, and the digest, in 533.—*Blair*. See *Civil Law*.

**LAWS, BRITISH.** The British laws of earliest date were translated into the Saxon, in A. D. 590. The Saxon laws of Ina were published in 709. Alfred's code of laws, which is the foundation of the common law of England, was compiled in 887, but in use previously. Edward the Confessor promulgated his laws, in 1065. Stephen's charter of general liberties, 1136; Henry II.'s confirmation of it, 1154 and 1175. The maritime laws of Richard I., 1194. See article *Oleron*. Magna Charta, by king John, 1215. Its confirmation by Henry III., 1216, *et seq.* See *Magna Charta* and *Forests*, *Charter of the*. Celebrated declaration made by the lord chief justice of the King's Bench, "That no fiction of law shall ever so far prevail against the real truth of the fact as to prevent the execution of justice," May 21, 1784.—*Lord Mansfield*.

**LAW'S BUBBLE.** The most ruinous speculation of modern times. The projector, John Law, of Edinburgh, raised himself to the dignity of comptroller-general of the finances of France, upon the strength of a scheme for establishing a bank, an East India, and a Mississippi company, by the profits of which the national debt of France was to be paid off. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it in 1710; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France; and most of the people of property of every rank in that kingdom, seduced by the prospect of immense gains, subscribed both in the bank and the companies. In 1718 Law's was declared a Royal bank, and the shares rose to upwards of twenty-fold the original value, so that in 1719, they were worth more than eighty times the amount of all the current specie in France. But the following year this great fabric of false credit fell to the ground, and almost overthrew the French government, ruining tens of thousands of families. It is remarkable that the same desperate game was played by the South Sea directors in England, in the same fatal year, 1720.—*Hist. of France, Nouv. Dict.*

**LAWYERS.** The pleaders of the bar, called barristers, are said to have been first appointed by Edward I. or in his reign, 1291. Serjeants, the highest members of the bar, are alone permitted to plead in the court of Common Pleas. The first king's counsel under the degree of serjeant was sir Francis Bacon, in 1604. There are about 1200 barristers in England: and the number of lawyers in England and Wales, counting London and country attorneys, solicitors, &c., is about 14,000. A list of 19,527 practising lawyers in the United States, was published in New-York, 1850.

**LEAD.** Is found in various countries, and is abundant in various parts of Britain, and in some places richly mixed with silver ore. The famous Clydesdale mines were discovered in 1513. The lead mines of Cumberland and Derbyshire yield about 15,000 tons *per annum*. The finest sort of black lead, that most fit for pencils, is produced only at Borrowdale, but there in great quantities. Leaden pipes for the conveyance of water were brought into use in 1236.

**LEAGUES, POLITICAL AND RELIGIOUS.** The League of the Public Good, was one between the dukes of Burgundy, Brittany, and Bourbon, and other princes against Louis XI. of France, in 1464. The League of Cambray was entered into in 1508. The Holy League against Louis XII., 1510. The League of Smalcald, 1529. The League of the Beggars (the Protestants so called, though Catholics joined the league) to oppose the institution of the Inquisition in Flanders, 1560. The League, so denominated by way of eminence, to prevent the accession of Henry IV. of France, who was then of the reformed religion, was commenced in 1576. The League of Wurtzburg, 1610. League against the emperor, 1626. Solemn League and Covenant in Scotland, against the episcopal government of the church, and the regal authority, 13 Charles I., 1638. League of Augsburg, 1686.

**LEAP-YEAR, OR BISSEXTILE.** The Leap-year originated with the astronomers of Julius Cæsar, 45 B. C. They fixed the solar year at 365 days 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was added to February. See *Bissextile*. This almost perfect arrangement was denominated the Julian style, and prevailed throughout the Christian world till the time of pope Gregory XIII., in 1582, when the calendar was altered to its present state. See *Calendar*. The difference between 365 days 6 hours, and 365 days 5 hours, 48 minutes, 51 seconds, and 6 decimals, which last is the true length of the astronomical year, in the course of years caused 1700 and 1808 not to be leap-years, nor will 1900 be a leap-year; but the year 2000 will be one. See *Julian Year*, *Gregorian Calendar*, &c.

**LEARNING AND THE ARTS.** These were carried to their height among the Greeks during the fourth century B. C.; and with the Romans with the commencement of the Christian era. On the death of Augustus they declined until the refugees from Greece caused them to revive in Italy, about A. D. 1250. Learning had been found so to obstruct the tyranny of the emperors, that mathematicians and philosophers were, by several decrees, banished from Rome, A. D. 16, and 89, *et seq.* After the dark ages, came Brunetto, Latini, and numerous enlightened men; and Leo X., about 1513, gave vast encouragement to literature and the arts.

The illustrious Medici family greatly promoted learning in Italy, about 1550. —*Fontana*. And about this time literature began to flourish in France, Germany, and England. The reign of Anne has been called by some the "golden," by others, the "Augustan age" of English literature.

**LEATHER.** It was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, &c., by all ancient nations. The Gordian knot was made of leather thongs, 330 B. C. The ancients understood the art of tanning leather, and it was practised early in England, and great improvements made in it up to 1795. Leather is converted into many uses: a leathern cannon was proved at Edinburgh, fired three times, and found to answer, Oct. 23, 1788. —*Phillips*. The duty on leather produced annually in England, 450,000*l.*, and in Ireland, about 50,000*l.* It was abolished in both countries, May 29, 1830.

**LEGHORN.** *Livorno.* This city suffered dreadfully by an earthquake in 1741. It was entered by the French army in the revolutionary war, July 17, 1796, but the immense amount of British property then there had been previously removed. Leghorn was evacuated by the French in 1799, and was retaken the following year. It was unsuccessfully attacked by the British and Italian allied forces, in Dec. 1813.

**LEGION.** The *Legio* was a corps of soldiers in the Roman armies, and was first formed by Romulus, under whom it consisted of 3000 foot and 300 horse, about 750 B. C. When Hannibal was in Italy, 216 B. C., the legion consisted of 5000 soldiers; and under Marius, in 88 B. C. it was 6200 soldiers, besides 700 horse. There were ten and sometimes as many as eighteen legions kept at Rome. Augustus maintained a standing army of twenty-five legions, about 5 B. C.; and the peace-establishment of Adrian was thirty of these formidable brigades. The peace of Britain was protected by three legions, A legion was divided into 10 cohorts, and every cohort into 6 centuries, with a vexillum, or standard guarded by 10 men.

**LEGION OF HONOR.** A military order in France, embracing all distinctions in the army, and including in its incorporation civil officers, and all such individuals as have eminently distinguished themselves for services to the state, military deeds, and for public virtue; instituted by Napoleon Bonaparte, when first consul, May 18, 1802. On the restoration of the Bourbon family, Louis XVIII. confirmed this order, April 1814.

**LEIPSI.** Famous for its university and its fair. Here Gustavus Adolphus, king of Sweden, defeated the Imperialists, Sept. 7, 1631. The siege of Leipzig was sustained in 1637. Leipzig was taken by the Prussian army, 1756. In the same year, the Austrians laid siege to Leipzig in vain, but they took it two years afterwards, though they did not retain it long. In the late wars it has frequently fallen into adverse hands. See next article.

**LEIPSI, BATTLE OF.** One of the greatest, most sanguinary, and decisive of modern times, between the French army, commanded by Napoleon, on the one side, and the Austrian, Russian, and Prussian armies on the other; the former 160,000, and the latter 240,000 strong. This great battle was lost by the French, chiefly owing to 17 German battalions, their Saxon allies, turning upon them in the heat of the engagement. 80,000 men perished in the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery, and many standards. The victory of the allies was followed by the capture, next day, of Leipzig, and of the rear-guard of the French army. The king of Saxony and his family were also made prisoners; and the emperor of Austria and Russia, the king of Prussia, and crown prince of Sweden, entered Leipzig immediately after the battle, Oct. 16 and 18, 1813.

**LENT.** The quadragesimal fast observed in the Catholic church, from Ash-Wednesday (*which see*) to Easter-day, and supposed to be of apostolic institution. The primitive Christians did not commence their Lent until the Sunday which is now called the first Sunday of Lent: and the four days beginning were added by pope Felix III., in the year 487, in order that the number of fasting days should amount to forty. Lent was first observed in England by command of Ercombert, king of Kent, in 640. *Baker's Chron.*

**LEPANTO. BATTLE OF.** The great naval engagement between the combined fleets of Spain, Venice, and Pius V., and the whole maritime force of the Turks. Don John of Austria commanded the Christian fleet, which consisted of 206 galleys, and 30,000 men, while the Turks had 250 galleys, of which, after a dreadful conflict, they saved but 100, losing 30,000 men in killed and prisoners; and thus was prostrated for a time the naval power of Turkey, Oct. 7, 1571.—*Voltaire.*

**LETTERS.** Those of the alphabet were invented by Memnon, the Egyptian, 1822 B. C.—*Usher, Blair*. The first letter of the Phœnician and Hebrew alphabet was *aleph*, called by the Greeks *alpha*, and abbreviated by other nations to A. The letters, both in the ancient and modern languages, so vary in number and sound, that a volume might be written in describing the alphabets which are known. See *Alphabet*.

**LETTERS OF MARQUE AND REPRISAL.** These are licenses, first issued in England by Edward I., for the seizure of the enemy's vessels, and for reprisal and retaliation upon the enemy on the sea.—*Rymer's Fœdera*. They were first granted in 1295.—*Baker's Chron.* They are usually granted in time of war to private armed ships, and do great mischief to the commerce of belligerent nations.—*Powel*.

**LETTERS DE CACHET.** These instruments of oppression were so much in use by the French government previously to the Revolution, that one of the earliest acts of the National Assembly was to denounce them, and decree their abolition. and the abolition of arbitrary imprisonment, Nov. 1, 1789.—*Hist. of the French Revol.*

**LEUCTRA, BATTLE OF.** One of the most famous of ancient history, fought at the village of Leuctra, between Plataea and Thespia, between the Thebans, under Epaminondas, and the superior force of Cleombrotus, king of Sparta, the victory being with the former. In this battle, 4000 Spartans, with their king, were slain, and not more than 300 Thebans; July 8, 371 B. C. From this day the Spartans lost their preponderance in Greece, which they had maintained for about 500 years, and it passed to the Thebans.—*Plutarch*.

**LEVELLERS.** Men whose purpose is to destroy superiority, and bring all things to a level or equality.—*Collier*. There were various associations of this kind. The most extraordinary was that of which Muncer and Storck were the chiefs. These two began by pulling down all the images in the churches which Luther had left standing; and then, finding an army in their followers, they became levellers, and Muncer openly taught that all distinctions of rank were usurpations on the rights of mankind. At the head of 40,000 men, he wrote to the sovereign princes in Germany and to the magistrates of cities to resign their authority; and on his march to enforce these principles of equality and reformation, his followers ravaged the country. The landgrave of Hesse at length defeated him; 7000 of the enthusiasts fell in battle, and the rest, with their leader, fled; he was taken and beheaded at Mulhausen, in 1525.—*Nouv. Dict. Hist.* At the period of the French Revolution some knots of persons styled levellers appeared in England.

**LEWES, BATTLE OF.** Between Henry III., king of England, and Montfort, earl of Leicester, and the rebellious barons, fought May 14, 1264. In this battle the royal army was overthrown, and the king, his brother, Richard king of the Romans, his son, and prince Edward, afterwards Edward I., were taken prisoners. One division of four of Montfort's army, a body of Londoners, gave way to the furious attack of prince Edward, who pursuing the fugitives too far, caused the battle to be lost. From this time Montfort used his power so despotically as to be in the end the cause of his own destruction. See *Evesham*.

**LEXICOGRAPHY.** Morrison mentions a standard dictionary in the Chinese language of 40,000 hieroglyphic characters, as having been compiled 1100 B. C. Numerous dictionaries appeared in Europe about the close of the fifteenth and beginning of the sixteenth century. Calpini's dictionary appeared about A. D. 1500. The Lexicon Heptaglotton was published in 1759. See article, *Dictionary*.

**LEXINGTON, BATTLE OF.** This battle claims distinction as being the first fought between Great Britain and the United States of America, in the war

of independence. The British troops, under Major Pitcairn, sent from Boston to destroy the American stores at Lexington, were attacked by the Americans and 273 of them were killed and wounded, April 19, 1775.

**LEYDEN, SIEGE OF.** A memorable siege sustained against the armies of Spain, and during which 6000 of the inhabitants died of famine and pestilence, A. D. 1574. In commemoration of this long siege, a university was founded, celebrated for its colleges and medicinal garden, and valuable library, 1575. The university was almost destroyed by the catastrophe of a vessel laden with 10,000 lbs. weight of gunpowder blowing up, and demolishing a large part of the town, and killing numbers of people, Jan. 1807.

**LIBEL.** By the laws of Rome (those of the XII. Tables), libels which affected the reputation of another, were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion or esteem of the world, is deemed a libel. "The greater the truth, the greater the libel," the well-known law maxim of a high authority, is now disputed. Among the most remarkable cases of libel were, viz.: Lord George Gordon's libel on the queen of France, for which he was sentenced to imprisonment for five years and fined 500*l.*, Jan. 28, 1788. The *Times'* libel on the prince of Wales, afterwards George IV., Feb. 1790. The *Morning Post's* libel on lady Elizabeth Lambert, damages 4000*l.* July 9, 1792. Peltier's libel on Napoleon Bonaparte, in *L'Ambigu*, of which he was found guilty, Feb. 21, 1803. Act against blasphemous and seditious libels, punishing the offender by banishment for the second offence, passed in England, 1820. Act regulating the law of libel in England, July 1830. By statute in New York and Massachusetts, the truth may be a justification, if the publication was made with good motives and for justifiable ends.

**LIBERIA.** Colony in West Africa, founded by colored people sent out by American Colonization Society, 1822; Jehudi Ashmun was the first superintendent of the colony; new Constitution—Roberts elected president—Oct. 5, 1847; ratification of a treaty of commerce with Great Britain, August 1, 1849.

**LIBERTINES.** A sect distinguished by its monstrous doctrines. Its heads were persons named Quintin and Corin. They maintained that whatever was done by men was done by the Spirit of God, and that there was no sin but to those who thought so; that to live without any doubt or scruple was to return to the state of innocence; that the soul died with the body; that heaven was a dream, and hell a phantom; religion a mere state trick; with many other monstrous opinions. This sect arose in A. D. 1525; and the term libertine has been held in a bad sense ever since.

**LIBRARY.** The first public library of which we have any certain account in history was founded at Athens, by Pisistratus, 544 B. C. The second of any note was founded by Ptolemy Philadelphus, 284 B. C. It was nearly destroyed when Julius Cæsar set fire to Alexandria, 47 B. C. 400,000 valuable books in MS. are said to have been lost by this catastrophe.—*Blair*. The first private library was the property of Aristotle, 334 B. C.—*Strabo*. The first library at Rome was instituted 167 B. C.: it was brought from Macedonia. The library of Apellicon was sent to Rome, by Sylla, from Athens, 86 B. C. This library was enriched by the original manuscripts of Aristotle's works. A library was founded at Constantinople by Constantine the Great, about A. D. 335; it was destroyed in 477. A second library was formed from the remains of the first, at Alexandria, by Ptolemy's successors, consisting of 700,000 volumes, which was totally destroyed by the Saracens, who heated the water of their baths for six months, by burning books instead of wood, by command of Omar, caliph of the Saracens, in 642.—*Nouv. Dict. Hist.* Pope Gregory I. ordered that the library of the Palatine

Apollo should be committed to the flames, under the notion of confining the clergy to the attention of the Scriptures. From that time, all ancient learning which was not sanctioned by the authority of the church, has been emphatically distinguished as profane in opposition to sacred. The early Chinese literature suffered a similar misfortune to that of the west in the destruction of the Alexandrian library; their emperor, Chee-whang-tee, ordered all writings to be destroyed, that every thing might begin anew as from his reign; and books and records were afterwards recovered by succeeding emperors with great difficulty.

**LIBRARIES IN EUROPE.** There are in Europe 883 public libraries, containing over 10,000 volumes each. The number of books which are thus publicly accessible are in this proportion, viz.: in Saxony, for every 100 inhabitants, there are 417 books; in Denmark, 412; in Bavaria, 339; in Tuscany, 261; in Prussia, 200; in Austria 167; in France, 129; in Belgium, 95; in Great Britain, 53. The first public library in Europe, before the invention of printing is said to have been founded by Richard de Bury, chancellor of England, as early as 1341. The first in Italy was founded by Nicholas Niccoli, one of the great restorers of learning; at his death he left his library for the use of the public, A. D. 1436. It was enlarged by Cosmo de Medici. The first permanent libraries were, Turin Univ., 1436; Vienna, (imperial,) 1440; Vatican, 1465; &c. See *table*, below.

In the following tables, the libraries containing less than 10,000 volumes each (of which there are, in France alone, at least seventy or eighty,) are not taken into the account:

|                           |                 |                         |              |
|---------------------------|-----------------|-------------------------|--------------|
| France has 107 Public Li- |                 | Saxony has 6 containing | 554,000 vols |
| braries, containing       | 4,000,000 vols. | Bavaria " 17 do.        | 1,267,000 "  |
| Belgium has 14 do.        | 538,000 "       | Denmark " 5 do.         | 645,000 "    |
| Prussia " 44 do.          | 2,400,000 "     | Tuscany " 9 do.         | 411,000 "    |
| Austria " 48 do.          | 2,400,000 "     | G. Britain " 33 do.     | 1,771,493 "  |

Taking the capital cities we find the following results:—

|                        |                 |                          |               |
|------------------------|-----------------|--------------------------|---------------|
| Paris has 9 Public Li- |                 | Dresden has 4 containing | 340,500 vols. |
| braries, containing    | 1,474,000 vols. | Munich " 2 do.           | 800,000 "     |
| Brussels has 2 do.     | 143,500 "       | Copenhagen " 3 do.       | 557,000 "     |
| Berlin " 2 do.         | 530,000 "       | Florence " 6 do.         | 318,000 "     |
| Vienna " 3 do.         | 453,000 "       | London " 4 do.           | 490,500 "     |
| Milan " 2 do.          | 230,000 "       |                          |               |

Arranging these libraries according to their extent, they would stand as follows:—

|                           | <i>Founded.</i> | <i>Vols.</i> |                           | <i>Founded.</i> | <i>Vols.</i> |
|---------------------------|-----------------|--------------|---------------------------|-----------------|--------------|
| Paris (1) National Lib.,  | 1595            | 824,000      | Milan, Brera Lib.,        | 1797            | 170,000      |
| Munich, Royal Lib.,       | 1550            | 600,000      | Paris (3), St. Genevieve, | 1624            | 150,000      |
| Petersburg Imperial Lib., |                 | 446,000      | Darmstadt, Grand Ducal,   | 1760            | 150,000      |
| London, British Museum,   | 1753            | 435,000      | Florence, Magliabecchian, | 1714            | 150,000      |
| Copenhagen, Royal Lib.,   | 1550            | 412,000      | Naples, Royal Lib.,       |                 | 150,000      |
| Berlin, Royal Lib.,       | 1650            | 410,000      | Brussels, Royal Lib.,     | 1839            | 133,500      |
| Vienna, Imperial Lib.,    | 1440            | 313,000      | Rome (1), Casanate Lib.   | 1760            | 120,000      |
| Dresden, Royal Lib.,      | 1656            | 300,000      | Hague, Royal Lib.,        |                 | 100,000      |
| Madrid National Lib.,     | 1712            | 200,000      | Paris (4), Mazarine Lib., | 1661            | 100,000      |
| Wolfenbützel, Ducal Lib., | 1604            | 200,000      | Rome (2), Vatican Lib.,   | 1465            | 100,000      |
| Stuttgart, Royal Lib.,    | 1765            | 187,000      | Parma, Ducal Lib.,        | 1760            | 100,000      |
| Paris (2) Arsenal Lib.,   | 1781            | 180,000      |                           |                 |              |

The chief University Libraries may be ranked in the following order:—

|                              | <i>Founded.</i> | <i>Vols.</i> |                               | <i>Founded.</i> | <i>Vols.</i> |
|------------------------------|-----------------|--------------|-------------------------------|-----------------|--------------|
| Göttingen, University Lib.,  | 1736            | 360,000      | Vienna, University Lib.,      | 1777            | 115,000      |
| Breslau, University Lib.,    | 1811            | 250,000      | Leipsic, University Lib.,     | 1544            | 112,000      |
| Oxford, Bodleian Lib.,       | 1597            | 220,000      | Copenhagen, University Lib.,  | 1730            | 110,000      |
| Tübingen, University Lib.,   | 1562            | 200,000      | Turin, University Lib.,       | 1436            | 110,000      |
| Munich, University Lib.,     |                 | 200,000      | Louvain University Lib.,      | 1639            | 105,000      |
| Heidelberg, University Lib., | 1703            | 200,000      | Dublin, Trinity College Lib., |                 | 104,200      |
| Cambridge, Public Lib.,      | 1484            | 166,724      | Upsal, University Lib.,       | 1621            | 100,000      |
| Bologna, University Lib.,    | 1690            | 150,000      | Erlangen, University Lib.,    | 1743            | 100,000      |
| Prague, University Lib.,     | 1777            | 130,000      | Edinburgh, Univ. Lib.,        | 1582            | 90,354       |

The largest Libraries in Great Britain are those of the

|                            | <i>Founded.</i> | <i>Vols.</i> |                            | <i>Founded.</i> | <i>Vols.</i> |
|----------------------------|-----------------|--------------|----------------------------|-----------------|--------------|
| 1 British Museum, London,  | 1753            | 435,000      | Royal Institution, London, |                 |              |
| 2 Bodleian, Oxford,        | 1598            | 220,000      | London Institution,        |                 |              |
| 3 University, Cambridge,   | 1484            | 166,724      | London Library,            |                 |              |

**LIBRARIES IN THE UNITED STATES.** The number of volumes in the chief public and college libraries of the United States in 1849, was stated to be 1,294,000. The number of libraries is 182. Of these, 43 contain over 10,000 volumes each; 9 over 20,000; and only 2 over 50,000. In 1849 the precedence of the largest as to numbers stood thus:

|                                                       | <i>Vols.</i> |                                | <i>Vols.</i> |
|-------------------------------------------------------|--------------|--------------------------------|--------------|
| 1 Harvard College, including Divinity and Law Schools | - 72,000     | 6 Mercantile Library, New York | - 32,000     |
| 2 Philadelphia and Loganian Library                   | 60,000       | 7 Georgetown College, D. C.    | - 25,000     |
| 3 Boston Athenæum                                     | - 50,000     | 8 Brown University             | - 24,000     |
| 4 Library of Congress                                 | - 50,000     | 9 New York State Library       | - 24,000     |
| 5 New York Society Library                            | - 32,000     | 10 Yale College                | - 21,000     |
|                                                       |              | 11 Astor Library, New York     | - 20,000     |

The Astor Library is scarcely yet opened, and the building is not yet erected. The Smithsonian Institute at Washington has not yet commenced collecting its library. The number of volumes in the School District libraries of the State of New York, in 1849, was 1,338,848. There are 10,621 school districts, and 1,785 incorporated or private schools. The mercantile libraries, chiefly for merchants' clerks, in the large cities, are of comparatively recent date and of great utility. That in New York was founded in 1820, and contains 32,000 volumes; in Boston, founded 1820, contains 7,637 volumes; in Philadelphia, founded 1822, contains 12,200 volumes. There are similar ones in Baltimore, Cincinnati, St. Louis, Troy, &c.

The public libraries containing over 5000 volumes, were distributed (according to evidence in the British Museum Report in 1849) thus:—

|                                  | <i>Vols.</i>       |                         | <i>Vols.</i>   |
|----------------------------------|--------------------|-------------------------|----------------|
| 1 Alabama, has 1 Public Library, | 6,000              | Brought up,             | 34, 454,366    |
| 2 Columbia, Dist. of, has        | 2, 53,000          | has                     | 3, 28,500      |
| 3 Connecticut, " 6,              | 81,449             | 13 New York, " 12,      | 157,411        |
| 4 Georgia, " 1,                  | 13,000             | 14 North Carolina, " 1, | 10,000         |
| 5 Kentucky, " 1,                 | 7,000              | 15 Ohio, " 1,           | 30,497         |
| 6 Louisiana, " 1,                | 5,500              | 16 Pennsylvania, " 14,  | 159,200        |
| 7 Maine, " 3,                    | 38,860             | 17 Rhode Island, " 3,   | 37,185         |
| 8 Maryland, " 1,                 | 12,000             | 18 South Carolina, " 2, | 30,000         |
| 9 Massachusetts, " 14,           | 200,000            | 19 Tennessee, " 2,      | 16,000         |
| 10 Missouri, " 2,                | 14,300             | 20 Vermont, " 2,        | 16,254         |
| 11 New Hampshire, " 2,           | 22,500             | 21 Virginia, " 4,       | 41,000         |
|                                  | <u>34, 454,366</u> | Total - - - 81,         | <u>980,134</u> |

The above estimate is perhaps below the mark, and does not include school, parish and town libraries, which are numerous, but of moderate extent. The city of Paris alone has 1,474,000 volumes, in large public libraries; i. e. half as many again as the whole of the United States. See *Parl. Rep. Brit. Mus.*; *Prof. Jewett's Rep. Smithsonian Inst.*; *G. Livermore in N. Amer. Rev.*, July 1850, &c.

**LIEGE.** Formerly called, on account of the number of its churches and convents, "the paradise of priests, the purgatory of men, and the hell of women." In the time of Louis XI. of France, A. D. 1461, Liege was a large and wealthy place, and the prince bishop was a prelate of almost sovereign power. Taken by the English under the duke of Marlborough, in 1702; and by the French and other powers, at various times, up to 1796, when it was annexed to France. Liege was incorporated with the Netherlands, in 1814.

**LIGHT-HOUSES.** They were erected by all the ancient commercial people, and called *Tors*, or pillars, as those of Hercules, near Gibraltar; that of Pharos, at Alexandria, 550 feet high, and visible forty-two miles; the Pharos of Messina; the Colossus of Rhodes, &c. There are forty-two round the coasts of England, fifteen on the east coast, thirteen in the English channel, and fourteen in the Irish channel. There are seventeen on the Scottish coasts, and twenty-six on the Irish coasts.

**LIGURIAN REPUBLIC.** Founded in June, 1802, upon the ruins of that of Genoa. The doge of this new republic was solemnly invested at Genoa, August 10, 1802. The Ligurian republic was incorporated with France, it having demanded a union with the latter country, May 25, 1805. It merged into the kingdom of Italy.

**LIMA.** See *America and Columbia*. In 1524, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded a city, and gave it the name of *Ciudad de los Reyes*, or City of the Kings. This Spanish name it retains in all legal deeds, but it is better known as Lima. Awful earthquakes occurred here, since solemnly commemorated by annual festivals, A. D. 1586, 1630, 1687, and October 28, 1746. In the last it was almost totally destroyed, as well as Callao, *which see*.

**LINEN.** A fabric of very remote antiquity. Pharaoh arrayed Joseph in vestures of fine linen.—*Gen.* xli. 42. This article was first manufactured in England by Flemish weavers, under the protection of Henry III., 1253. Before this period woollen shirts were generally worn. A company of linen weavers established itself in London, in 1368; and the art of staining linen became known in 1579. A colony of Scots in the reign of James I., and other Presbyterians who fled from persecution in that country in the succeeding inglorious reigns, planted themselves in the northeast part of Ireland, and there established the linen manufacture. It was liberally encouraged by the lord deputy Wentworth, in 1634. Hemp, flax, linen, thread, and yarn, from Ireland, were permitted to be exported duty free, 1696. This law gave rise to the subsequently improved state of the manufacture there. The Irish Linen Board was established in 1711; the Linen-hall, Dublin, was opened, 1728; the board was abolished in 1828. Dunfermline in Fifeshire, Dundee in Angusshire, and Barnsley in Yorkshire, are, in Great Britain, chief seats of the linen manufacture.

**LINNÆAN SYSTEM.** The system of Botany of the eminent Linné, a Swede, or, as his name is Latinized, Linnæus, was commenced about 1725–30; and his first great work was a dictionary of 7300 plants arranged in classes, orders and genera; he classed the plants according to the number and situation of the sexual parts, and made the flower and fruit the test of his various genera. The Linnæan Society in London was instituted in 1788, and was incorporated March 26, 1802.

**LISBON.** The Moors are said to have given the name of Lisboa to this city when they conquered it, A. D. 716. It was made the capital of Portugal by Emanuel, 1506. Lisbon was almost destroyed by an earthquake, November 1, 1755. See *Earthquakes*. It became a point of the late war, and the court fled to the Brazils, November, 1807, in which month (the 30th) the French army under Junot entered Lisbon, and held possession of it until the battle of Vimeira, in which they were defeated by the British, under sir Arthur Wellesley, August 21, 1808. Insurrection at Lisbon, August 21, 1831. Massacre at Lisbon, June 9, 1834. See *Portugal*.

**LISLE, SIEGE OF.** Lisle was besieged by the duke of Marlborough and the allies; and though its immense fortifications were deemed impregnable, it was taken after a three months' siege, in 1708. It was restored by the treaty of Utrecht, in 1713, in consideration of the demolition of the fortifications

of Dunkirk: this siege is reckoned one of the most famous of modern history. In the Revolutionary war, Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, Oct. 7, 1792.

**LITANIES.** They were first used in processions and other devotions, about A. D. 400. Litanies to the Virgin Mary were first introduced by pope Gregory I., in or about 595.—*Newton on the Prophecies.* The first English litany was commanded to be used in the Reformed Churches by Henry VIII., in 1543.—*Collier's Ecc. Hist.*

**LITERARY PROPERTY, IN ENGLAND.** See *Copyright.* The statute of queen Anne, 1709-10, securing literary property, was confirmed by a memorable decision at the bar of the House of Lords, and the claim of perpetual copyright was overruled Feb. 22, 1774. The statute declared the author to have an exclusive right for 14 years, and if at the end of that term he were living, the right to again return to him for the same term of years. The later acts extended the author's right to 28 years, and if living at the end of that time, then to the remainder of his life. By the 5th and 6th of Victoria, the right is to endure for the life of the author, and for seven years after his death; but if that time expire earlier than 42 years, the right is still to endure for 42 years, for which term also any work published after the author's death is to continue the property of the owners of the manuscript; act passed July 1, 1842. The Dramatic Authors' Protection act, passed June 10, 1833. The International Copyright bill, passed July 31, 1838; this act secures protection in England to works of authors of any country which concedes the same protection to English authors.

**LITERARY SOCIETIES, CLUB, FUND, &c.** The various societies connected with literature in London, will be found in their respective places through the volume. The celebrated Literary Club was instituted by Dr. Johnson, and included many of the illustrious men in literature of the age, 1765. The Literary Fund, in Lincoln's-Inn Fields, was founded in 1790, to relieve authors and literary men who by age or infirmities are reduced to poverty: this society was incorporated in 1818. The Royal Society of Literature was established Sept. 15, 1825.

**LITHOGRAPHY.** The invention of it is ascribed to Alois Sennefelder, whose first essays were executed about 1796; and shortly afterwards the art was announced in Germany, and was known as polyautography. It became partially known in England in 1801 *et seq.*, but its general introduction may be referred to Mr. Ackermann, of London, about 1817. Sennefelder died in 1841.

**LITURGY.** In the ancient Greek and Roman churches the word Liturgy was restrained to signify the mass only. The present ENGLISH LITURGY was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them, but other parts were different. Upon the solicitation of Calvin and others, the liturgy was reviewed and altered to very nearly its present state, 1551. It was first read in Ireland, in the English language in 1550, and in Scotland, where it occasioned a tumult, in 1637. Again altered in 1661. The liturgy was revised by Whitehead, formerly chaplain to Anna Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, and dean May, and secretary Smith.

**LIVERIES.** In England they originated with our ancestors, who clothed their vassals in uniform, thereby to distinguish families; they were originally a single article of dress, or a particular color used on a part of some one garment; and in the end they became rich suits and gaudy trappings.—*Ashe.*

**LIVERPOOL.** This town, which within the last century has, by a progressive

increase in extent, population, and commercial importance, obtained the first rank after the metropolis, in England, is supposed to be noticed in Domesday-book under the name *Esmedune*, or, *Smedune*. In other ancient records its various appellations are, *Litherpul*, and *Lyrrpul*, signifying probably, in the ancient dialect of the county, the lower pool; though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Liver," or from a sea-weed of that name; it was but a small fishing place, until, in 1172, its favorable situation, and the convenience of its port, attracted the notice of Henry II., who made it the place of rendezvous and embarkation of his troops for the conquest of Ireland. In 1843, the number of ships which entered the port of Liverpool was as follows; British, 2,615, of the aggregate burthen of 691,707 tons; foreign, 1,014, burthen, 417,621 tons. The amount of duties paid at the custom-house for the year ending 5th January, 1844, was £4,121,522.—*Parl. Ret.*

**LLOYD'S, LONDON.** The coffee-house in connection with the Royal Exchange, and held previously to the late fire (see *Exchange*) on the northern side of that building. Lloyd's was established in 1772, and is the resort of eminent merchants, underwriters, insurance brokers, &c.; and here are effected insurances for all the world on ships and merchandise. The books kept here contain an account of the arrival and sailing of vessels, and are remarkable for their early intelligence of maritime affairs.

**LOADSTONE.** One of the most wonderful productions of the earth. Its virtues were but indistinctly known to the ancients, yet its attractive quality had been taken notice of from very remote times.—*Sturmius*. Aristotle assures us that Thales made mention of it, and Hippocrates speaks of it under the name of stone that attracts iron, and Pliny was struck with its attractive power. The polar attraction of the loadstone was, it is said, known in France before A. D. 1180; but this honor is accorded to Roger Bacon about 1267. The Italians discovered that it could communicate its virtues to steel or iron; and Flavio Giojo of Amalfi, was the inventor of the mariner's compass. See *Compass*.

**LOANS.** Those for the service of the crown of England were generally borrowed at Antwerp until after the reign of Elizabeth. In 1559, that queen borrowed 200,000*l.* of the city of Antwerp, to enable her to reform her own coin, and sir Thomas Gresham and the city of London joined in the security.—*Rapin*. The amount of the English loans, during four late memorable periods, was, viz :

|                                    |                         |             |
|------------------------------------|-------------------------|-------------|
| Seven years' war - - - - -         | from 1755 to 1763 - - - | £52,100,000 |
| American war - - - - -             | from 1776 to 1784 - - - | 75,500,000  |
| French revolutionary war - - - - - | from 1793 to 1802 - - - | 168,500,000 |
| War against Bonaparte - - - - -    | from 1803 to 1814 - - - | 206,300,000 |

Besides the property tax. In 1818, were raised two loans of twenty-one millions and twenty-two millions; and it deserves to be recorded that a subscription loan to carry on the war against France was filled up in London in fifteen hours and twenty minutes, to the amount of eighteen millions, Dec. 5, 1796.

**LOCHLEVEN CASTLE, KINROSS.** Built on an island in the celebrated lake of Loch Leven, in 1257, and was a royal residence when Alexander III. and his queen were forcibly taken from it to Stirling. It was besieged by the English in 1301, and again in 1335. Patrick Graham, first archbishop of St. Andrew's, was imprisoned and died within its walls, 1447. The earl of Northumberland was confined in it in 1569. It is, however, chiefly remarkable as the place of the unfortunate Queen Mary's imprisonment, in 1567, and of her escape, on Sunday, May 2, 1568. In this castle Mary was compelled to sign her abdication of the throne of Scotland, of which an interesting account is given by sir Walter Scott, in *The Abbot*; and of which

also, some new and affecting particulars are given by Mr. Tytler, in the 7th volume of his *History of Scotland*, published in August, 1840.

**LOCKS.** Those of the Egyptians, Greeks, and Romans, were clumsy contrivances. Denon has engraved an Egyptian lock of wood. Du Cange mentions locks and padlocks as early as A.D. 1381. The French are accounted the worst locksmiths in Europe and the English the best. Brahmah's celebrated patent locks were registered in 1784. Locks have been made at Wolverhampton in suits of eight, ten, or more, of exquisite workmanship, all with different keys, so that none of them can open any but its own lock, yet a master key will open all. See *Keys*.

**LOCUSTS.** The visits of these animals in Eastern countries have frequently superinduced pestilence and death, and many instances are recorded of these consequences. Owing to the putrefaction of vast swarms in Egypt and Lybia, upwards of 800,000 persons perished, 128 B. C. The country of Palestine was infested with such swarms that they darkened the air, and after devouring the fruits of the earth they died, and their intolerable stench caused a pestilential fever, A. D. 406. A similar catastrophe occurred in France in 873. "A remarkable swarm of locusts settled upon the ground about London, and consumed the vegetables; great numbers fell in the streets, and were preserved by the curious; they resembled grasshoppers, but were three times the size, and their colors more variegated, Aug. 4, 1748. They infested Germany in 1749, Poland in 1750, and Warsaw in June 1816.

**LODI, BATTLE OF THE BRIDGE OF.** One of the great early achievements in Italy of Bonaparte. He commanded the French army, which was opposed to the Austrians commanded by general Beaulieu, and obtained a brilliant and decisive victory after a bloody engagement in which several thousands of the Imperialists perished on the field, and many thousands were made prisoners, May 10, 1796. The conqueror pursued his advantage with wonderful rapidity, as after this battle all Lombardy lay open to his army, and the republican flag floated in Milan a few days afterwards.

**LOG-LINE,** used in navigation, A. D. 1570; and first mentioned by Bourne in 1577. The log-line is divided into spaces of fifty feet, and the way which the ship makes is measured by a half-minute sand glass, which bears nearly the same proportion to an hour that fifty feet bear to a mile: the line used in the royal navy is forty-eight feet.

**LOGARITHMS,** so useful in mathematics, are the indexes of the ratio of numbers one to another. They were invented by baron Merchiston, an eminent Scotchman (sir John Napier) in 1614. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's bones*. The invention was afterwards completed by Mr. Briggs, at Oxford.

**LOLLARDS.** The name given to the first reformers of the Roman Catholic religion in England, and a reproachful appellation of the followers of Wickliffe.—*Chaucer*. The original sect was founded by Walter Lollard in 1315; he was burned for heresy at Cologne in 1322. After his death the disciples of Wickliffe were called Lollards. The first martyr in England on account of religious opinions was William Sawtree, the parish priest of St. Osith, London, Feb. 19, 1401, reign of Henry IV. The Lollards were proscribed by the English parliament in 1416, and about 1414, numbers of them, or persons to whom the name was given, were burnt alive.—*Moreri*; *Carte*.

**LOMBARD MERCHANTS.** In England they were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice.—*Anderson on Commerce*. Lombard usurers were sent to England

by pope Gregory IX. to lend money to convents, communities, and private persons, who were not able to pay down the tenths which were collected throughout the kingdom with great rigor that year, 13 Henry III., 1229. They had offices in Lombard-street, which great banking street is called after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

**LOMBARDY.** The Lombards were a detachment of Alemanni from the marches of Brandenburg, famous for their bravery. They were invited into Italy by Justinian, to serve against the Goths. To reward their services, the emperor gave them part of Upper Pannonia, A. D. 548. They passed into Italy, and their chief was proclaimed king by his army at Milan, in 570. The kingdom of Lombardy supported itself and made considerable conquests till 772, when Charlemagne took Desiderius, the last king, and annexed his territories to the German empire.—*La Combe.* See *Milan*, &c.

**LONDON.** The greatest and richest city in the world. Some will have it that a city existed on the spot 1107 years before the birth of Christ, and 354 years before the foundation of Rome. It was the capital of the Trinobantes 54 B. C. and long previously the royal seat of their kings. In A. D. 61, it was known to the Romans as *Lundinium*. *Lundinium* or *Colonia Augusta* was the chief residence of merchants at that period, and the great mart of trade and commerce, though not dignified with the name of a colony.—*Tacitus.* It is said, but not truly, to have derived its name from *Lud*, an old British king, who was buried near where Ludgate formerly stood; but its name is from *Llyn-Din*, the "town on the lake." See *Fires*, *Plague*, &c.

**LONGEVITY.** In Great Britain the instances of it are remarkable, though rare. Golour McCrain, of the Isle of Jura, one of the Hebrides, is said to have kept 180 Christmasses in his own house, and died in the reign of Charles I., being the oldest man on any thing approaching to authentic record for upwards of 3000 years.—*Greig.* Thomas Parr, a laboring man of Shropshire, was brought to London by the earl of Arundel, in 1635, and considered the wonder of his time, being then in his 153d year, and in perfect health; but the journey and change of air and diet killed him, Nov. 15, the same year. Henry Jenkins, of Yorkshire, died in 1670, and was buried in Bolton church-yard, Dec. 6, in that year, aged 169 years. There are some extraordinary instances of great age in Russia; and at Dantzic a man is said to have died at 184; and another to be living in Wallachia, aged 186 years. In Holy Writ, Methuselah is stated to have lived 969 years, the greatest age of any on record, according to the reckoning before the Flood; but the length of the years of that time is not ascertained; hence there is no fixed principle to determine the real ages of that epoch.

**LONGITUDE,** determined by Hipparchus at Nice, who fixed the first degree in the Canaries, 162 B. C. Harrison made a time-keeper in A. D. 1759, which in two voyages was found to correct the longitude within the limits required by the act of parliament, 12th Anne, 1714; and in 1763, he applied for the reward of 20,000*l.* offered by that act, which he received. The celebrated Le Roi of Paris, in 1776, invented a watch that keeps time better; and the chronometers of Arnold, Earnshaw, and Bréguet bring the longitude almost to the truth. Philosophers have sought the longitude in vain; but Newton has said it will yet be discovered by a fool.

**LOOKING-GLASSES.** Made only at Venice in 1300. They were made in England, by Venetian artists, some of whom took up their abode in Lambeth, in 1673.—*Salmon.* The French excelled in their manufacture of them in the last century; but the English have brought their factories to great perfection of late years, and now make looking-glasses to cover, in a single plate, the walls of large rooms.

**LOOM-ENGINE.** The weaver's, otherwise called the Dutch loom, was brought into use in London from Holland, in or about the year 1676, since when the general principal of the loom has been infinitely varied by mechanical ingenuity. There are about 250,000 hand-loom in Great Britain, and 75,000 power-loom, each being equal to three hand looms, making twenty-two yards each per day. The steam-loom was introduced in 1807.

**LORD.** In the Old and New Testament, Lord is a particular appellation for the supreme majesty of God and CHRIST, and in that sense cannot be applied to any other being. With us, it is a term of nobility.—See *Lords* and *Baron*. The word lord is abbreviated from two syllables: it was originally *Hlaford*, which, by dropping the aspirate became *Lafor*d, and afterwards by contraction *Lord*. "The etymology of this word," a writer observes, "is worth observing, for it was composed of *hla*f, a loaf of bread, and *ford*, to give or afford; so that *Hlafor*d, now *Lord*, implies a giver of bread; because in those ages, such great men kept extraordinary houses, and fed the poor; for which reason they were called *givers of bread*."—See *Ladies*. The nickname of "My Lord," given by vulgar people to hunchbacked persons, is from the Greek word *lordos*, crooked.—*Haydn*.

**LORDS.** The now recognized nobility of England take their creation from the 1st of William the Conqueror, 1066, when William Fitzosborne, the first peer, was made earl of Hereford; Walter Devereux made earl of Salisbury; Copsi, earl of Northumberland; Henry de Ferrers made earl of Derby, and Gerbodus (a Fleming) made earl of Chester. Twenty-two other peers were made in this sovereign's reign. Peers of England are free from all arrests for debts, as being the king's hereditary counsellors. Therefore a peer cannot be outlawed in any civil action, and no attachment lies against his person; but execution may be taken upon his lands and goods. For the same reason, they are free from all attendance at courts leet or sheriff's turns; or, in case of a riot, from attending the *posse comitatus*. See *Baron*; *Earl*; *Marquess*, &c.

**LORDS, HOUSE OF.** The peers of England were summoned *ad consulendum*, to consult, in early reigns, and were summoned by writ 6 and 7 John, 1205. The commons did not form a part of the great council of the nation until some ages after the conquest.—*Hume*. Deputies from certain boroughs were returned to meet the barons and the clergy in 1258.—*Goldsmith*. And writs are extant of the date of Jan. 23, 1265; but several historians maintain that the first regular parliament of the three estates, as now constituted, was held 22 Edward I., 1293–4. The house of lords includes the spiritual as well as temporal peers of England. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. The temporal lords consist of the several degrees of nobility: some sit by descent, as do all ancient peers; some by creation, as all new-made peers; and others by election, since the union with Scotland in 1707, and with Ireland in 1801. Scotland elects 16 representative peers, and Ireland 4 spiritual lords by rotation in sessions, and 28 temporal peers for life. The house of lords now consists of 3 princes, 20 dukes, 21 marquesses, 115 earls, 22 viscounts, 201 barons, 16 Scotch lords, 28 Irish lords, 26 English prelates, and 4 Irish bishops—in all 456 peers.

**LOTTERY, STATE.** The first mentioned in English history began drawing at the western door of St. Paul's cathedral, January 11, 1569, and continued day and knight until May 6 following. Its profits were for repairing the fortifications on the coast of England, and the prizes were pieces of plate. The first lottery mentioned for sums of money took place in 1630. Lotteries were established in 1693, and for more than 130 years yielded a large annual revenue to the crown. The Irish state lottery was drawn in Dublin

in 1780. All lotteries were suppressed in France by a decree of the national convention, Nov. 15, 1793. They were abolished in England, 1826; and an act was passed imposing a penalty of 50*l.* for advertising foreign or any lotteries in the British newspapers, 1836. Abolished in Bavaria by unanimous vote of the deputies, Oct. 19, 1847. They have long been abolished in New England; in New York they were prohibited about 1830. In nearly all the states there is a penalty against lotteries not specially authorized by the legislatures.

**LOUISIANA, ONE OF THE UNITED STATES.** First explored by the French, and received its name in 1682, from M. La Salle, in honor of Louis XIV., and a settlement was attempted in 1684, but failed. In 1699, a more successful attempt was made by M. Iberville, who entered the Miss., and founded a colony. His efforts were followed up by one Crozat, a man of wealth, who held the exclusive trade of the country for a number of years. About the year 1717, he transferred his interest in the province to a chartered company, at the head of which was the notorious John Law, whose national bank and Mississippi speculation involved the ruin of half the French nobility. In 1731, the company resigned the concern to the crown, who, in 1762, ceded the whole of Louisiana to Spain. In 1800, Spain reconveyed the province to the French, of whom it was purchased by the United States, in 1803, for \$15,000,000. The purchase included the territory of the United States W. of the Mississippi. In 1812, the present State of Louisiana formed a constitution, and was admitted into the Union. Population in 1810, 76,556; in 1820, 153,407; in 1830, 215,575; in 1840, 352,411, including 168,452 slaves.

**LOUVRE.** This renowned edifice in Paris was a royal residence in the reign of Dagobert, A. D. 628; but Francis I. laid the foundation of what is now called the Old Louvre, 1522. Here were deposited the finest collection of paintings, of statues, and treasures of art known in the world. The chief of them were brought from Italy during the triumph of Bonaparte's arms, but most of them have since been restored to the rightful possessors.

**LUCCA, THE DUCHY OF,** adjoining Tuscany. On the fall of the Lombard kingdom, A. D. 774, it was annexed to the German empire. In 1815 it was occupied by the Austrians and granted to Maria Louisa, daughter of Charles IV. of Spain. The duke retires to Massa, but returns and yields to his people's demand for reforms, Sept. 3, 1847: appointed a regency and again fled, Sept. 15. The duchy sold by the duke to Tuscany for an annuity of \$215,000, until he should succeed to the duchy of Parma, on the death of Maria Louisa, present duchess, Oct. 10, 1847.

**LUCIA, St.** First settled by the French in 1650. Taken by the British several times in the subsequent wars. Memorable insurrection of the French negroes, April 1795. In this year Guadaloupe, St. Vincent, Grenada, Dominica, St. Eustatia, and St. Lucie, were taken by the British. St. Lucia was restored to France at the peace of 1802; but was again seized on by England the next year, and confirmed to her by the treaty of Paris in 1814. See *Colonies*.

**LUNEVILLE, PEACE OF,** concluded between the French republic and the emperor of Germany, confirming the cessions made by the treaty of Campo Formio, stipulating that the Rhine, to the Dutch territories, should form the boundary of France, and recognizing the independence of the Batavian, Helvetic, Ligurian, and Cisalpine republics, Feb. 9, 1801.

**LUSTRUM.** An expiatory sacrifice made for the whole body of the Roman people, at the end of every five years, after the census had been taken, 572 B. C. Every five years were called a *lustrum*; and ten, fifteen, or twenty years were commonly expressed by two, three, or four *lustra*.

**LUTHERANISM.** Sprung up in Germany in 1517, in which year Leo X. published his indulgences for money; and Icelius, a Dominican friar, who was

deputed with others of his order to collect in Saxony, carried his zeal to such a height as to declare his commission unbounded; that no crime could be committed too great to be pardoned: and that by purchasing indulgences, not only past sins, but those which were intended, were to be forgiven. Against these practices Luther openly preached with wonderful success, and thus began the Reformation in Germany.—*Melchior Adam, in Vita Lutheri.*

**LUTZEN, BATTLE OF**, between the French army commanded by Napoleon on the one side, and the combined armies of Russia and Prussia, commanded by general Wittgenstein, fought May 2, 1813. This sanguinary battle opened the campaign of that year; and though each of the adversaries claimed the victory, it was manifestly on the side of France; but in this engagement marshal Duroc was mortally wounded. The battles of Bautzen and Wurtzen immediately followed (May 20 and 26), both in favor of Napoleon, when the allies were compelled to pass the Oder, and an armistice was agreed to, and afterwards prolonged, but unfortunately for the French emperor it did not produce peace.

**LUTZENGEN, or LUTZEN, BATTLE OF**; Gustavus Adolphus, king of Sweden, against the emperor. In this sanguinary and memorable battle, Gustavus, the most illustrious hero of his time, and the chief support of the Protestant religion in Germany, and in alliance with Charles I. of England, was foully killed in the moment of victory, Nov. 6, 1632. This is also called the battle of Lippstadt.

**LUXEMBURG**. Considered the strongest fortress in the world. It was taken and pillaged by the French in 1543; was taken by the Spaniards in 1544; by the French in 1684; and restored to Spain in 1697. It was again taken by the French in 1701; and afterwards given to the Dutch as a barrier town, and ceded to the emperor at the peace in 1713. These are among the chief occurrences. Luxembourg withstood several sieges in the last century; it surrendered to the French after a long and memorable siege, June 7, 1795. The garrison, on their capitulation, took an oath not to serve against the republic of France until exchanged, and were conducted to the right side of the Rhine immediately after.

**LUXURY**. The instances of extravagance and luxury are numerous in the history of almost all countries, ancient and modern, and many laws have been enforced to repress them. Horace mentions fowls dressed in Falernian wine, muscles and oysters from the Lucrine lake and Circean promontory, and black game from the Umbrian forests.—*Lardner*. Lucullus, at Rome, was distinguished for the immoderate expenses of his meals; his halls were named from the different gods; and when Cicero and Pompey attempted to surprise him, they were amazed by the costliness of a supper which had been prepared upon the word of Lucullus, who merely ordered his attendants to serve it in the hall of Apollo: this feast for three persons casually met, would have sufficed for three hundred nobles specially invited. In England, luxury was restricted by a law wherein the prelates and nobility were confined to two courses every meal, and two kinds of food in every course, except on great festivals. The law also prohibited all who did not enjoy a free estate of 100*l. per annum*, from wearing furs (see *Furs*), skins, or silk; and the use of foreign cloth was confined to the royal family alone; to all others it was prohibited, A. D. 1337. An edict was issued by Charles VI. of France, which said, "Let no man presume to treat with more than a soup and two dishes," 1340.

**LYCEUM**. The Lyceum took its name from its having been originally a temple of Apollo Lyceus; or rather, a portico, or gallery, built by Lyceus, son of Apollo. The Lyceum was a celebrated spot near the banks of the Ilissus in Attica, where Aristotle taught philosophy; and as he generally taught

his pupils while he walked, hence they were called *peripatetics*, and his philosophy was called from this place, the philosophy of the Lyceum, 342 B. C.—*Stanley*.

**LYDIA.** A very ancient kingdom under a long dynasty of kings, the last of whom was Cræsus, whose riches became a proverb: he was conquered by Cyrus, 548 B. C. The coinage of money of gold and silver (together with many other useful inventions, and the encouragement of commerce) is ascribed to the Lydians. A number of illustrious men flourished here.—*Hærodotus*.

|                                                                                                                                                                                      |             |

| [This eclipse had been predicted many years before by Thales, of Miletus.— <i>Blair</i> .]                                                                                           |             |

|                                                                                                                                                                                                  |           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Cræsus, son of Alyattes, succeeds to the throne, and becomes celebrated for his victories and conquests                                                                                          | B. C. 566 |
| Ephesus falls into his hands; the Ionians, Æolians, and other parts of Asia Minor are subjected to his dominion                                                                                  | 554       |
| All the nations west of the Halys are conquered, and that river becomes the boundary of the kingdom.— <i>Blair</i>                                                                               | 550       |
| Cræsus, dreading the power of Cyrus, whose conquests had reached to the borders of Lydia, crosses the Halys to attack the Medes, with an army of 420,000 men and 60,000 horse                    | 548       |
| He is defeated by Cyrus, pursued, besieged in his capital, and taken                                                                                                                             | 548       |
| The conqueror orders Cræsus to be burned alive, and the pile is already on fire, when he calls on the name of <i>Solon</i> in agony of mind, and Cyrus hearing him pronounce it, spares his life | 548       |
| Lydia, the kingdom of the "richest of mankind," is made a province of the Persian empire                                                                                                         | 548       |

Æsop, the Phrygian fabulist, Alcman, the first Greek poet who wrote in a style of gallantry, Thales of Miletus, Anaximenes, Xenophanes, Anacreon of Teos, Heraclitus of Ephesus, &c., flourished in Lydia. The country remained subject to the Persian empire until the latter was conquered by Alexander, about 330 B. C. It next became part of the new kingdom of Pergamus, founded by Philæterus, the eunuch; Attalus afterwards bequeathed it to the Romans, and finally the Turks conquered it from the Eastern Empire, A. D. 1326.—*Priestley*.

**LYONS.** Founded by L. Plancus, 43 B. C. The city was reduced to ashes in a single night by lightning, and was rebuilt in the reign of Nero. Two general councils were held here in the 13th and 14th centuries. The silk manufacture commenced in the reign of Francis I., 1515. Lyons was besieged in 1793 by the convention army of 60,000 men, and surrendered Oct. 7, when awful scenes of blood and rapine followed. The National Convention decreed the demolition of the city, Oct. 12, same year. It capitulated to the Austrians, March 1814, and July 1815. An insurrection among the artisans, which led to great popular excesses for many days, broke out, Nov. 21, 1831. Dreadful riots, April 15, 1834. A dreadful inundation occurred at Lyons, Nov 4, 1840. See *Inundations*.

**LYRE.** Its invention is ascribed to the Grecian Mercury, who, according to Homer, gave it to Apollo, the first that played upon it with method, and accompanied it with poetry. The invention of the primitive lyre with three strings, is due to the first Egyptian Hermes. Terpander added several strings to the lyre, making the number seven, 673 B. C. Phrynis, a musician of Mitylene, added two more, making nine, 438 B. C.

## M.

**MACEDON.** The first kingdom was founded by Caranus, about 814 B. C. It was an inconsiderable country, sometimes under the protection of Athens, sometimes of Thebes, and sometimes of Sparta, until the reign of Philip, the father of Alexander the Great, who by his wisdom as a politician, and exploits as a general, made it a powerful kingdom, and paved the way to his son's greatness. Macedon had twenty-one kings, from Caranus to Alexander inclusive: after the conqueror's death, when his dominions were divided among his generals, Cassander seized Macedon, and established a new kingdom. See *Tabular Views*, p. 15 to p. 37.

| Reign of Alexander and Antipater -                                     | -     | 298 | His war against the Rhodians -                                       | -     | 202 |
| Demetrius murders Alexander, and seizes the crown of Macedon -         | -     | 294 | Philip is defeated by the Romans -                                   | -     | 198 |
| Irruption of the Gauls -                                               | -     | 279 | He is totally subdued -                                              | -     | 196 |
|                                                                        |       |     | The reign of Perseus -                                               | -     | 179 |
|                                                                        |       |     | Perseus defeated by the Romans -                                     | -     | 172 |

The consul Æmilius Paulus enters Macedon, and pronounces it a Roman province. Perseus and his sons are made prisoners, 168 B. C., and next year walk in chains before the chariot of Æmilius in his triumph for the conquest of Macedon. The country is finally conquered by the Turks under Amurath II. in A. D. 1429. *Priestley.*

**MACHIAVELIAN PRINCIPLES.** These are principles laid down by Nicholas Machiavel, of Florence, in his *Practice of Politics*, and *The Prince*. By some they are stigmatized as "the most pernicious maxims of government, founded on the vilest policy;" and by others as "sound doctrines, notwithstanding the prejudice erroneously raised against them." The work appeared in 1517; and was translated into English in 1761.\*

**MADAGASCAR.** One of the largest islands in the world, discovered by Lorenzo Almeida A. D. 1506. In the centre of the island is said to exist a race of dwarfs, with a strange peculiarity of form; but this rests on the unsupported statement of a French traveller who was in possession of a preserved pigmy which he had brought from Madagascar. A paper describing the pigmy was presented to the Royal Society by an eminent physician, in 1806.

**MADEIRA.** So called on account of its woods; it was discovered, it is said, by Mr. Macham, an English gentleman, or mariner, who fled from England for an illicit amor. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Arragon, which occasioned the report that the island was discovered by a Portuguese, A. D. 1345. But it is maintained that the Portuguese did not visit this island until 1419, nor did they colonize it until 1431. It was taken possession of by the British in July 1801. And again, by admiral Hood and general (now viscount) Beresford, Dec. 24, 1807, and retained in trust for the royal family of Portugal, which had just then emigrated to the Brazils. It was subsequently restored to the Portuguese crown.

**MADRAS.** Colonized by the English, and Fort George built by permission of the king of Golconda, 17 James I., 1620. Madras was taken by the French in 1746, and was restored in 1749, immediately after the peace of Aix-la-Chapelle.

**MADRID.** Mentioned in history as a castle belonging to the Moors. It was sacked A. D. 1109. It was made the seat of the Spanish court in 1516. The Escorial was built in 1557, *et seq.* The old palace was burnt down in 1734. The French took possession of this city in March 1808, after the royal family had retired into France; and on May 2, the citizens rose up in arms to

\* The writings of this celebrated politician countenanced (another commentator says) "the doing of any act to compass or bring about those things which are neither honorable nor just, whereby ambitious sovereigns or evil ministers may accomplish what their extravagant desires prompt them to, at the expense of their subjects' peace, or their country's safety."—*Ferguson.*

expel them, when a dreadful conflict and carnage took place. Joseph Bonaparte entered Madrid as king of Spain, July 20, 1808; but soon retired. Retaken by the French Dec. 2, same year; and retained till Aug. 12, 1812, when Madrid was entered by the British army. Ferdinand VII. was restored May 14, 1814. Madrid was the scene of various occurrences during the late civil war, for which see *Spain*.

**MAESTRICHT.** This city revolted from Spain 1570, and was taken by the prince of Parma in 1579. In 1632, the prince of Orange reduced it after a memorable siege, and it was confirmed to the Dutch in 1648. Lewis XIV. took it in 1673; William prince of Orange invested it in vain, in 1676; but, in 1678, it was restored to the Dutch. In 1748, it was besieged by the French, who were permitted to take possession of the city on condition of its being restored at the peace then negotiating. At the commencement of 1793, Maestricht was unsuccessfully attacked by the French, but they became masters of it toward the end of the following year. In 1814, it was delivered up to the allied forces.

**MAGDALENS AND MAGDALENETTES.** Communities of nuns and women, the latter class consisting chiefly of penitent courtesans. The convent of Naples was endowed by queen Sancha A. D. 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Léo X., in 1515; and Clement VIII. settled a revenue on the nuns, and further ordained that the effects of all public prostitutes who died without will should fall to them, and that those who made wills should not have their bequests sanctioned by the law unless they bequeathed a part of their effects to the Magdalen institution, which part was to be at least one-fifth, 1594. The Magdalen hospital, London, was founded in 1758, principally under the direction of Dr. Dodd. In New-York a similar institution called "a Home for the friendless," was founded, 1846.

**MAGELLAN, STRAITS OF.** They were passed by Ferdinand Magellan (Fernando de Magelhaens) a Portuguese, with a fleet of discovery fitted out by the emperor Charles V., in 1519. The first voyage round the world was undertaken by this illustrious navigator; and his vessel performed the enterprise although the commander perished. The Spaniards had a fort here, since called cape Famine, because the garrison had all perished for want of food.

**MAGI, OR WORSHIPPERS OF FIRE.** The prime object of the adoration of the Persians was the invisible and incomprehensible God, whom, not knowing, they worshipped as the principle of all good, and they paid particular homage to fire, as the emblem of his power and purity. They built no altars nor temples, as they deemed it absurd to pretend to confine an omnipresent God within walls; accordingly their sacred fires blazed in the open air, and their offerings were made upon the earth. The Magi were their priests, and their skill in astronomy rendered the secrets of nature familiar to them, so that the term Magi was at length applied to all learned men, till they were finally confounded with the magicians. Zoroaster, king of Bactria, was the reformer of the sect of the Magi: he flourished 1080 B. C.—*Du Fresnoy*.

**MAGIC LANTERN.** This was the invention of the illustrious Roger Bacon, England's great philosopher, about A. D. 1260. Bacon first invented the convex magnifying glasses in 1252; and he afterwards, in his many experiments, applied them to this use.

**MAGNA CHARTA.** The great charter of English liberty may be said to have been derived from Edward the Confessor, continued by Henry I. and his successors, Stephen, Henry II., and John. But the Charter more particularly meant, was a body of laws, the great charter of our rights granted by John,

and signed at Runnymede, near Windsor, June 15, 1215. The barons took arms to enforce this sacred possession, which was many times confirmed, and as frequently violated, by Henry III. This last king's grand charter was granted in the 9th year of his reign, 1224, and was assured by Edward I. It is remarked, that when Henry III. granted it, he swore on the word and faith of a king, a Christian, and a knight, to observe it. For this grant a fifteenth of all moveable goods were given to the king, whether they were temporals or spirituals; yet sir Edward Coke says that even in his days it had been confirmed above thirty times.

**MAGNET.** Sturmius, in his *Epistola*, dated at Altorf, 1682, observes that the attractive quality of the magnet has been taken notice of from time immemorial; but, that it was our countryman, Roger Bacon, of Ilchester, in Somersetshire (he died the 17th June, 1294), who first discovered its property of pointing to the north pole. The Italians discovered that it could communicate its virtue to steel or iron. The variation not being always the same was taken notice of by Hevelius, Petil, and others. Flavio Gioja, of Naples, invented or improved the mariner's compass, in 1302. The important discovery of the inclination or dip of the magnetic needle was made about 1576 (published 1580) by Robert Norman, of London. Dr. Gilbert's experiment was made in 1600. Artificial magnets were invented, or rather improved, in 1751. A magnetic clock, invented by Dr. Locke, of Ohio, announced at Washington, Jan. 5, 1849.

**MAHOMETISM.** See *Alcoran* and *Koran*. The creed of Mahomet was promulgated A. D. 604, by Mahomet, styled by some writers as a renowned general and politician; and by others as a successful impostor and tyrant. Mahomet asserted that the Koran was revealed to him by the angel Gabriel during a period of twenty-three years. It was written in the Koreish Arabic, which he asserted was the language of Paradise, and it is considered as possessing every fine quality of a language. It has 1000 terms for sword, 500 for lion, 200 for serpent, and 80 for honey. It is spoken and written in various parts of Asia and Africa. Mahomet died in 631, of the effects, it is said, of a slow poison, given to him in a piece of mutton three years before, by a Jew, who took this method to discover if he was a true prophet, and immortal, as he had declared himself to be.—*Prideaux*.

**MAIL-COACHES IN ENGLAND.** Were first set up at Bristol in 1784; and were extended to other routes in 1785, at the end of which year they became general in England. This plan for the conveyance of letters was the invention of Mr. Palmer of Bath; the mails had been previously conveyed by carts with a single horse, or by boys on horseback.

**MAINE**, one of the United States; first permanent settlement in, at Bristol. The district was granted in 1635 to sir Ferdinand Gorges, who appointed a governor and council. It was purchased of the heirs of Gorges in 1652 by the State of Massachusetts, for \$5,334; annexed to Massachusetts, under charter from William & Mary, in 1691: became a separate State in 1820. Population in 1790 was 96,540; in 1810, 228,705; in 1840, 501,793.

**MAJESTY.** Among the Romans, the emperor and imperial family were addressed by this title, which was previously given to their great officers of state. Popes also had the title of majesty. The emperors of Germany took the title, and endeavored to keep it and the closed crown to themselves. It was first given to Louis XI. of France, in 1461.—*Voltaire*. Upon Charles V. being chosen emperor of Germany in 1519, the kings of Spain took the style of Majesty. Francis I. of France, at the interview with Henry VIII. of England on the Field of the Cloth of Gold, addressed the latter as Your Majesty, 1520.—See *Field of the Cloth of Gold*. James I. coupled this title with the term "Sacred," and "Most Excellent Majesty." See *Titles*.

**MAJORCA AND MINORCA.** For occurrences relating to these islands, see *Minorca*.

**MALPLAQUET, BATTLE OF.** The allies under the duke of Marlborough and prince Eugene, against the arms of France commanded by marshal Villars. The armies consisted on each side of nearly 120,000 choice soldiers, and the victory was with the allies; but this action was attended with great slaughter on both sides, the allies losing 18,000 men, which loss was but ill repaid by the capture of Mons; fought Sept. 11, 1709.

**MALTA, KNIGHTS OF.** A military-religious order, called also Hospitallers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Melphis, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, A. D. 1048. They afterwards founded a hospital for the sick, from whence they were called Hospitallers. This foundation was laid in A. D. 1104, in the reign of Baldwin, and they now became a military order in 1118, into which many persons of quality entered, and changed their name into knights. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Margett, and then to Acre, which they defended valiantly in 1290; then they followed John, king of Cyprus, who gave them Limisson in his dominions, where they staid till 1310, and that same year they took Rhodes, under the grand master Foulques de Vallaret, and next year defended it under the duke of Savoy, against an army of Saracens; since when, his successors have used F. E. R. T. for their device, that is, *Fortitudo ejus Rhodum tenuit*, or, he kept Rhodes by his valor; from this they were called knights of Rhodes; but Rhodes being taken by Solymán in 1522, they retired into Candia, thence into Sicily. Pope Adrián VI. granted them the city of Viterbo for their retreat; and in 1530, the emperor Charles V. gave them the isle of Malta. The emperor Paul of Russia declared himself grand-master of the order in June, 1799.

**MALTA.** The memorable siege by the Turks, who were obliged to abandon the enterprise after the loss of 30,000 men, 1566. The island was taken by general Bonaparte in the outset of his expedition to Egypt, June 12, 1798. He found in it 1200 cannons, 200,000 lbs. of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets: besides an immense treasure collected by superstition; and 4500 Turkish prisoners, whom he set at liberty. Malta was blockaded by the British from the autumn of 1798, and was taken by major-general Pigot, Sept. 5, 1800; but, at the peace of Amiens, it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations: but by the treaty of Paris, in 1814, the island was guaranteed to Great Britain.

**MAMELUKES.** The name of a dynasty which reigned a considerable time in Egypt. They were originally Turkish and Circassian slaves, and were established by the sultan Saladin as a kind of body-guard, A. D. 1246. They advanced one of their own corps to the throne, and continued to do so until Egypt became a Turkish province in 1517, when the beys took them into pay, and filled up their ranks with renegades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia. Assisted by the Arnauts, who were introduced into the country in the war, the Mamelukes once more wrested Egypt from the Turkish government. In 1811 they were decoyed into the power of the Turkish pacha, and slain.

**MANNHEIM.** First built in A. D. 1606; and became the court residence in 1719; but the extinction of the palatinate family in 1777 caused the re-

removal of the court to Munich. Battle of Mannheim, between the armies of the allies and the French, fought May 30, 1793. Mannheim surrendered to the French, under command of general Pichegru, Sept. 20, 1795. On the 25th of the same month, the Austrians under general Wurmser, defeated the French near the city. Several battles were fought with various success in the neighborhood during the late wars. Kotzebue, the popular dramatist, was assassinated at Mannheim, by a student of Wurtzburg, named Sandt, April 2, 1819.

**MANICHEANS.** An ancient sect, founded by Manes, which began to infest the East, about A. D. 277. It spread into Egypt, Arabia, and Africa, and particularly into Persia. A rich widow, whose servant Manes had been, left him a store of wealth, after which he assumed the title of apostle, or envoy of Jesus Christ, and announced that he was the paraclete or comforter that Christ had promised to send. He maintained two principles, the one good, and the other bad; the first he called light, which did nothing but good, and the second he called darkness, which did nothing but evil. Several other sects sprung from the Manicheans. Manes was put to death by Sapor, king of Persia, in 290. His offence against this prince was, his having dismissed the physicians of the court, pretending he could cure one of the royal family by his prayers, instead of which the patient died in his arms.—*Nouv. Dict. Hist.*

**MANILLA.** Capital of the Philippine Isles; a great mart of Spanish commerce. 3000 persons perished here by an earthquake in 1645. Manilla was taken by the English in 1757; and again in Oct. 1762, by storm. The captors humanely suffered the archbishop to ransom it for about a million sterling; but great part of the ransom never was paid. Since the establishment of a free trade in the Spanish colonies, which took place in 1783, the usual Acapulco ships and other government traders have been discontinued; and the commerce to the Manillas and other parts, is carried on in private bottoms by free companies of merchants.—*Butler.*

**MANTINEA, BATTLE OF,** between Epaminondas, at the head of the Thebans, and the combined forces of Lacedæmon, Achaia, Elis, Athens, and Arcadia. The Theban general was killed in the engagement, and from that time Thebes lost its power and consequence among the Grecian states, 363 B. C.—*Strabo.*

**MANTUA.** Virgil was born at a village near this city. Mantua surrendered to the French, Jan 7, 1797, after a siege of eight months; and it was attacked by the Austrian and Russian army, July 30, 1799, to which it surrendered after a short siege. In 1800, after the battle of Marengo, the French again obtained possession of it; but they delivered it up to the Austrians in 1814.

**MAPS AND CHARTS.** They were invented by Anaximander, the Milesian philosopher, a disciple of Thales, and the earliest philosophical astronomer on record, 570 B. C. He was also the first who constructed spheres. A celestial chart was, it is said, constructed in China, in the sixth century.—*Freret.* And sea-charts were first brought to England, by Bartholomew Columbus, to illustrate his brother's theory respecting a western continent. A. D. 1489. The earliest map of England was drawn by George Lily in 1520. Mercator's chart, in which the world was taken as a plane, was invented in 1556. A map of the moon's surface was first drawn at Dantzic, in 1647. See *Charts.*

**MARATHON, BATTLE OF.** One of the most extraordinary in ancient history. The Greeks were only 10,000 strong, and the Persians amounted to 500,000. The former were commanded by Miltiades, Aristides, and Themistocles, who defeated the Persians, leaving 200,000 dead upon the field. Among the

number of the slain was Hippias, the instigator of the war; the remainder of the Persian army were forced to re-embark for Asia, Sept. 28, 490 B. C.

**MARBLE.** Dipænus and Scyllis, statuarys of Crete, were the first artists who sculptured marble, and polished their works; all statues previously to their time being of wood, 568 B. C.—*Pliny*. Marble afterwards came into use for statues, and the columns and ornaments of fine buildings, and the edifices and monuments of Rome, were constructed of, or ornamented with, fine marble. The ruins of Palmyra prove that its magnificent structures, which were chiefly of white marble, were far more extensive and splendid than those of even Rome itself. These latter were discovered by some English travellers from Aleppo, A. D. 1678. See *Palmyra*.

**MARCH.** This was the first month of the year, until Numa added January and February, 713 B. C. Romulus, who divided the year into months, gave to this month the name of his supposed father Mars; though Ovid observes, that the people of Italy had the month of March before the time of Romulus, but that they placed it very differently in the calendar. The year formerly commenced on the 25th day of this month. See *Year*.

**MARENGO, BATTLE OF.** In this ever-memorable engagement the French army was commanded by Bonaparte, against the Austrians, and after prodigies of valor, his army was retreating, when the timely arrival of general Dessaix (who was afterwards mortally wounded in this battle) turned the fortunes of the day. The slaughter on both sides was dreadful: the Austrians lost 6000 in killed, 12,000 in prisoners, and 45 pieces of cannon; and though the French boasted that the loss on their side did not much exceed 3000 men, it was afterwards known to be vastly more, June 14, 1800. By a treaty between the Austrian general Melas and the conqueror, Bonaparte, signed on the next day, twelve of the strongest fortresses in Italy were put into possession of the latter: and he became, in fact, the master of Italy.

**MARESCHAL, or MARSHAL.** In France, marshals were the ancient esquires of the king; and by their first institution they had the command of the vanguard, to observe the enemy, and to choose proper places for its encampment. Till the time of Francis I., in A. D. 1515, there were but two French marshals, who had 500 livres *per annum* in war, but no stipend in time of peace. The rank afterwards became of the highest military importance, the number was without limit, and the command supreme. During the empire of Napoleon, the marshals of France filled the world with their renown. See *Marshal, Field*.

**MARIGNAN, BATTLE OF,** near Milan, in Italy, one of the most furious engagements of modern times. In this sanguinary conflict, which happened between the heroic Swiss and the French under Francis the First, upwards of twenty thousand men were slain; the former, after losing all their bravest troops, were compelled to retire, September 13, 1515.

**MARINER'S COMPASS.** The Chinese ascribe the invention of the compass to their emperor Hong-Ti, who they say was a grandson of Noah; and some of their historians refer the invention of it to a later date, 1115 B. C. See *Compass*. The honor of its discovery, though much disputed, is generally given to Flavio de Gioja. or Giovia, a native of Amalfi, an ancient commercial city of Naples, A. D. 1302. The variation of the needle was first discovered by Columbus in his voyages of discovery, 1492; and it was observed in London in 1580. The dipping-needle was invented by Robert Norman, a compass-maker of Ratcliffe, in that year.

**MARQUE, LETTERS OF.** Instruments authorizing the subjects of one prince to make reprisals upon, and capture the ships, property, and subjects of another prince or country. Some such instruments are said to have been first used

by the Venetian government. The first letters of marque granted in England were in the reign of Edward I., against the Portuguese, A. D. 1295.—*Rymer's Fœdera*.

**MARQUESS.** This dignity, called by the Saxons Markin-Reve, and by the Germans Markgrave, took its original from Mark or March, which, in the language of the northern nations, is a limit or bound, and their office was to guard or govern the frontiers of a province. It has the next place of honor to a duke, and was introduced several years after that title had been established, in England. The first on whom it was conferred, was the great favorite of king Richard II., Robert de Vere, earl of Oxford, who was created marquess of Dublin, and by him placed in parliament between the dukes and earls, A. D. 1385. Alexander Stewart, second son of James III. of Scotland, was made marquess of that kingdom, as marquess of Ormond, in 1480.

**MARRIAGE.** The first institution of this union between man and woman for life, with certain ceremonies of a binding and solemn nature, is ascribed to Cecrops, king of Athens, 1554 B. C.—*Eusebius Pref. to Chron.* The prevailing ceremony in most countries was that of a man leading home his bride after a solemn contract with her friends. To render this contract the more sacred, it was made the work of the priest, instead of being that of a civil magistrate adopted by several civilized nations. The celebration of marriage in churches was ordained by pope Innocent III., about A. D. 1199. Marriage was forbidden in Lent, A. D. 364. It was forbidden to bishops in 692, and to priests in 1015; and these latter were obliged to take the vow of celibacy in 1073. Marriages were solemnized by justices of the peace under an act of the Commons in Oliver Cromwell's administration, 1653. A tax was laid on marriages, viz.: on the marriage of a duke 50*l.*, of a common person 2*s.* 6*d.*, the 8th of William III., 1695. Marriages were again taxed in 1784.

**MARRIAGES BY SALE.** Among the Babylonians at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder, by the public crier. The richest citizens purchased such as pleased them at a high price; and the money thus obtained was used to portion off those females to whom nature had been less liberal of personal charm. When the beauties were disposed of, the crier put up the more ordinary lot beginning with the most ill-favored among those that remained, announcing a premium to the purchaser of each: the bidders were to name a sum below the given premium, at which they would be willing to take the maid; and he who bid lowest was declared the purchaser. By these means every female was provided for. This custom originated with Atossa, daughter of Belochus, about 1433 B. C.

**MARSEILLES.** Is supposed to have been founded by the Phœceans, about 600 B. C.—*Univ. Hist.* Cicero styled it the Athens of Gaul. It was taken by Julius Cæsar after a long and terrible siege; and it was sacked by the Saracens, A. D. 473. Marseilles became a republic in 1214. It was subjected to the counts of Provence in 1251; and was again united to the crown of France in 1482. In 1649 the plague raged with great violence in Marseilles, and with still greater in 1720, when it carried off 50,000 of the inhabitants.

**MARSHALS, FIELD,** in the British army. The rank is of modern date, and was preceded by that of captain-general, and that also of commander-in-chief. The duke of Marlborough was captain-general, 1702. The first military chiefs bearing the rank of marshal were those of France. George I. first conferred the rank upon John, duke of Argyle, and George, earl of Orkney in 1736. See *Mareschal*.

**MARSTON MOOR, BATTLE OF.** This battle was the beginning of the misfortunes and disgrace of the unfortunate Charles I. of England. The Scots and

parliamentarian army had joined, and were besieging York, when prince Rupert, joined by the marquis of Newcastle, determined to raise the siege. Both sides drew up on Marston Moor, to the number of fifty thousand, and the victory seemed long undecided between them. Rupert, who commanded the right wing of the royalists, was opposed by Oliver Cromwell, who now first came into notice, at the head of a body of troops whom he had taken care to levy and discipline. Cromwell was victorious; he pushed his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's whole train of artillery was taken, and the royalists never afterwards recovered the blow; fought July 3, 1644.

**MARTINIQUE.** This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in February 1762. They were restored to France at the peace of the following year. They were again taken March 16, 1794; were restored at the peace of Amiens in 1802; and were again captured February 23, 1809. A revolution took place in this island in favor of Napoleon, but it was finally suppressed by the British, June 1, 1815; and Martinique reverted to its French masters at the late general peace, 1815.

**MARTYRS.** The Christian Church, Catholic and Protestant, has abounded in martyrs, and history is filled with accounts of their wonderful constancy to their faith. The festivals of the martyrs are, many of them, of very ancient date, and took their rise about the time of Polycarp, who suffered martyrdom A. D. 168. England has had its Christian martyrs; and the accounts of those who suffered for their adherence to the Protestant religion would fill volumes. The following documents in connection with the fate of Cranmer, Latimer, and Ridley, are of melancholy interest. They are taken from a "*Book of the Joint Diet, Dinner, and Supper, and the charge thereof, for Cranmer, Latimer, and Ridley,*" kept by the bailiffs of Oxford, while they were in the custody of those officers, previously to their being burnt alive:—

| 1st. OCTOBER, 1554.—DINNER.        |        |                                              |
|------------------------------------|--------|----------------------------------------------|
| Bread and ale                      | £0 0 2 | Item, a post - - - - £0 1 4                  |
| Oysters - - - - -                  | 0 0 1  | Item, 2 chains - - - - 0 3 4                 |
| Butter - - - - -                   | 0 0 2  | Item, 2 staples - - - - 0 0 6                |
| Eggs - - - - -                     | 0 0 2  | Item, 4 laborers - - - - 0 2 8               |
| Lyng - - - - -                     | 0 0 8  |                                              |
| A piece of fresh Salmon            | 0 0 10 | £1 5 8                                       |
| Wine - - - - -                     | 0 0 3  | [They were burnt on October the 16th, 1555.] |
| Cheese and pears - - -             | 0 0 2  |                                              |
|                                    |        |                                              |
| The three dinners - -              | £0 2 6 |                                              |
|                                    |        |                                              |
| TO BURN LATIMER AND RIDLEY.        |        |                                              |
| For 3 load of wood faggots to burn |        | CHARGE FOR THE BURNING OF THE BODY           |
| Latimer and Ridley - -             | 0 12 0 | OF CRANMER.                                  |
| Item, 1 load of furze faggots - -  | 0 3 4  | For 100 of wood faggots for the fire 0 6 0   |
| Item, for the carriage of these 4  |        | For 100 and ½ of furze - - 0 3 4             |
| loads - - - - -                    | 0 2 6  | For the carriage of them - - 0 0 8           |
|                                    |        | For two laborers - - - - 0 2 8               |
|                                    |        | £0 12 8                                      |
|                                    |        | He was burnt on March the 21st, in 1556.]    |

**MARTYRS, ERA OF.** This is also called the era of Diocletian, and was used by the writers of ecclesiastical history until the Christian era was introduced in the sixth century; and it still continued to be the era of some nations, particularly the Abyssinians and Copts. It commences from the day upon which Diocletian was proclaimed emperor, August 29, A. D. 284; and the persecutions of the Christians in his reign caused it to be so called.

**MARYLAND,** one of the middle United States, was originally included in the patent of Virginia, granted under charter to Calvert, lord Baltimore, in 1632; named in honor of Henrietta Maria, queen of Charles I.; first colony were Catholics who settled at St. Mary's, on the Potomac, 1634; free toleration of all religions and creeds granted by lord Baltimore; Constitution settled

in 1650, and again in 1776; the State bore an active part in the revolution; adopted the Federal Constitution April 28, 1788, by 63 to 12. Population in 1790 was 319,728; in 1810, 380,546; in 1840, 469,232, including 89,485 slaves. Maryland resumed the payment of interest on her debt, March, 1847.

**MASKS.** Poppæa, the wife of Nero, is said to have invented the mask to guard her complexion from the sun. But theatrical masks were in use among the Greeks and Romans. Horace attributes them to Æschylus; yet Aristotle says the real inventor and time of their introduction were unknown. Modern masks and muffs, fans, and false hair for the women, were devised by the harlots of Italy, and brought to England from France in 1572.—*Stowe's Chron.*

**MASQUERADES.** They were in fashion in the court of Edward III. 1340; and in the reign of Charles, 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 George I. 1723. [No less than six masquerades were subscribed for in a month at this time.] They were revived, and carried to shameful excess by connivance of the government, and in direct violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776.—*Mortimer.*

**MASS.** In the Romish church, mass is the office or prayers used at the celebration of the eucharist, and is in general believed to be a representation of the passion of our Saviour. Hence every part of the service is supposed to allude to the particular circumstances of his passion and death. The general division of masses consists in high and low: the first is that sung by the choristers, and celebrated with the assistance of a deacon and sub-deacon; low masses are those in which the prayers are barely rehearsed without singing. Mass was first celebrated in Latin, about A. D. 394. Its celebration was first introduced into England in the seventh century. Prostration was enjoined at the elevation of the host in 1201.

**MASSACHUSETTS,** one of the United States. First settled at Plymouth by a colony of English Puritans from Holland, who landed Dec. 22, 1620. This was called the Plymouth colony. The Massachusetts colony at Salem and Charlestown, in 1628, and Boston, 1630. These colonies united in 1692. The American revolution originated here, at Boston and vicinity, and this State bore an important and honorable part in the contest. See *Boston, Bunker Hill, Lexington, &c.* Present State Constitution formed in 1780; revised and altered in 1820; slavery abolished in 1783; Shay's rebellion in this State in 1786; Federal Constitution adopted Feb. 6, 1788, by 187 against 168. Population in 1721, 94,000; in 1790, 388,727; in 1810, 472,040; in 1820, 523,287; in 1840, 737,699.

**MASSACRES.** Ancient and modern history abound with events which class under this head; and perhaps the most frightful and unprovoked enormities of this kind have been perpetrated by opposing Christian sects, one upon another, in vindication of the Christian religion! The following are among the most remarkable massacres recorded by various authors:—

BEFORE CHRIST.

Of all the Carthaginians in Sicily, which took place 397 B. C.

2000 Tyrians crucified, and 8000 put to the sword for not surrendering Tyre to Alexander, 331 B. C.

The Jews of Antioch fall upon the other inhabitants, and massacre 100,000 of them, for refusing to surrender their arms to Demetrius Nicanor, tyrant of Syria, 154 B. C.

A dreadful slaughter of the Teutones and Ambrones, near Aix, by Marius, the Roman general, 200,000 being left dead on the spot, 102, B. C.

The Romans, throughout Asia, women and children not excepted, cruelly massacred in one day, by order of Mithridates, king of Pontus, 88 B. C.

A great number of Roman senators massacred by Cinna, Marius, and Sertorius.

MASSACRES, *continued.*

Many patricians dispatch themselves to avoid their horrid butcheries, 86 a. c.  
Again, under Sylla, and Catiline, his minister of vengeance, 82 and 79 n. c.  
At Præneste, Octavianus Cæsar ordered 300 Roman senators and other persons of distinction, to be sacrificed to the manes of Julius Cæsar, 41 b. c.

AFTER CHRIST.

At the destruction of Jerusalem, 1,100,000 of Jews were put to the sword, A. d. 70.  
The Jews, headed by one Andræ, put to death 100,000 Greeks and Romans, in and near Cyrene, A. d. 115.  
Cassius, a Roman general under the emperor M. Aurelius, put to death 400,000 of the inhabitants of Seleucia, A. d. 167.  
At Alexandria, many thousands of citizens are massacred, by an order of Antoninus, A. d. 213.  
The emperor Probus put to death 700,000 of the inhabitants upon his reduction of Gaul, A. d. 277.  
Of eighty Christian fathers, by order of the emperor Gratian, at Nicomedia; they were put into a ship which was set on fire, and then driven out to sea, A. d. 370.  
Of Thessalonica, when 7000 persons, invited into the circus, were put to the sword, by order of Theodosius, A. d. 390.  
Belisarius put to death above 30,000 citizens of Constantinople for a revolt, to which they were impelled by the tyranny and exactions of two rapacious ministers set over them, A. d. 552.  
Massacre of the Latins at Constantinople, by order of Andronicus, A. d. 1184.  
Of the Albigenses and Waldenses, commenced of Toulouse, A. d. 1209. Tens of thousands perished by means of the sword and gibbet.  
The Sicilians massacre the French throughout the whole island of Sicily, without distinction of sex or age, on Easter-day, the first bell for vespers being the signal. This horrid affair is known in history by the name of the Sicilian vespers, A. d. 1282.—*Du Fresnoy.*  
A general massacre of the Jews at Verdun, by the peasants, who, from a pretended prophecy, conceived the Holy Land was to be recovered from the infidels by them. 500 of these Jews took shelter in a castle, and defended themselves to the last extremity, when, for want of weapons, they threw their children at the enemy, and then killed each other, A. d. 1317.  
At Paris, of several thousand persons, at the instance of John, duke of Burgundy, A. d. 1418.  
Of the Swedish nobility, at a feast, by order of Christian II., A. d. 1520.  
Of 70,000 Huguenots, or French Protestants throughout the kingdom of France, attended with circumstances of the most horrid treachery and cruelty. It began at Paris, in the night of the festival of St. Bartholomew, Aug 24, 1572, by secret orders from Charles IX., king of France, at the instigation of the queen dowager, Catherine de

Medicis, his mother. It is styled in history, the Massacre of St. Bartholomew.  
Of the Christians in Croatia, by the Turks, when 65,000 were slain, A. d. 1592.  
Of Protestants, at Thorn, put to death under a pretended legal sentence of the chancellor of Poland, for being concerned in a tumult occasioned by a Roman Catholic procession, A. d. 1724. All the Protestant powers in Europe interceded to have this unjust sentence revoked, but unavailingly.  
At Batavia, 12,000 Chinese were massacred by the natives, October 1740, under the pretext of an intended insurrection.  
At the taking of Ismael by the Russians, 30,000 old and young were slain, December, 1790.—*See Ismael.*  
In St. Domingo, where Dessalines made proclamation for the massacre of all the whites, March 29, 1804, and many thousands perished.  
Insurrection at Madrid, and massacre of the French, May 2, 1808.  
Massacre of the Mamelukes, in the citadel of Cairo, March 1, 1811.  
Massacre at Nismes, perpetrated by the Catholics, May 1815.  
Massacre of vast numbers of the inhabitants of Cadiz, by the soldiery, whose ferocious disorders continue for some days, March 6, 1820.

MASSACRES IN BRITISH HISTORY.

Of 300 English nobles on Salisbury Plain, May 1, A. d. 474.  
Of the monks of Bangor, to the number of 1200, by Ethelfrid, king of Northumberland, A. d. 580.  
Of the Danes in the southern counties of England, in the night of November 13, 1002, and the 23d Ethelfred II. At London it was most bloody, the churches being no sanctuary. Amongst the rest was Gunildr, sister of Swein, king of Denmark, left in hostage for the performance of a treaty but newly concluded.—*Baker's Chronicle.*  
Of the Jews in England. Some few pressing into Westminster Hall at Richard I.'s coronation, were put to death by the people; and a false alarm being given that the king had ordered a general massacre of them, the people in many parts of England, from an aversion to them, slew all they met. In York, 500, who had taken shelter in the castle, killed themselves, rather than fall into the hands of the multitude, A. d. 1189.  
Of the Bristol colonists, at Cullen's Wood, Ireland (see *Cullen's Wood*), A. d. 1203.  
Of the English factory at Amboyna, in order to dispossess its members of the Spice Islands, A. d. 1623.  
Massacre of the Protestants in Ireland, in O'Neill's rebellion, Oct. 23, 1641. Upwards of 30,000 Britons were killed in the commencement of this rebellion.—*Sir William Petty.* In the first two or three days of it, forty or fifty thousand of the Protestants were destroyed.—*Lord Clarendon.* Before the rebellion was entirely

MASSACRES, *continued.*

suppressed, 154,000 Protestants were massacred.—*Sir W. Temple.*  
 Of the unoffending Macdonalds of Glencoe, May 9, 1691.—See *Glencoe.*  
 Of 184 men, women, and children, chiefly Protestants, burnt, shot, or pierced to

death by pikes, perpetrated by the insurgent Irish, at the barn of Scullabogue, Ireland, in 1798.—*Sir Richard Musgrave.*  
 Massacre of 64 American prisoners at Dartmoor, England, (disowned by British Government.) April 6, 1815.

**MASTER OF THE CEREMONIES.** An officer in several of the principal courts of Europe. Following the usage in other countries, a master of the ceremonies was instituted in England for the more honorable reception of the ambassadors and persons of quality at court, 1 James I. 1603.—*Baker.*

**MASTER IN CHANCERY.** Owing to the extreme ignorance of Sir Christopher Hatton, lord Chancellor of England, the first reference in a cause was made to a master, A. D. 1588; and the masters have been since chosen from among the most learned equity members of the bar.

**MASTER OF THE ROLLS IN ENGLAND.** An equity judge, so called from his having the custody of all charters, patents, commissions, deeds, and recognizances, which being made into rolls of parchment, gave occasion for that name.

**MATHEMATICS.** With the ancients they meant all sorts of learning and discipline; but even then, as now, in a more particular manner, mathematics were restrained to those arts that more immediately related to numbers and quantity. They were first taught to the Jews, and by them to the Egyptians, so early as 1950 B. C.—*Josephus de Antiq. Jud.*

**MATINS.** The service or prayers first performed in the morning or beginning of the day in the Catholic church. Emphatically, the *French Matins* imply the massacre of St. Bartholomew, August 24, 1572. The *Matins of Moscow*, the massacre of prince Demetrius, and all the Poles his adherents at six o'clock in the morning of May 27, 1600.

**MAURITIUS.** The Isle of France was discovered by the Portuguese, A. D. 1500; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadtholder, but on their acquisition of the Cape of Good Hope they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France. This island was taken by the British in 1810, and confirmed to them by the treaty of Paris in 1814.

**MAUSOLEUM.** Artemisia, sister and wife of Mausolus, married her own brother, famous for his personal beauty. She was so fond of her husband, that at his death she drank in her liquor his ashes after his body had been burned, and erected to his memory a monument, which, for its grandeur and magnificence, was called one of the seven wonders of the world. This monument she called *Mausoleum*, a name which has been given to all monuments of unusual splendor. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B. C.

**MAY.** The fifth month of the year, and the confine of spring and summer, received its name, say some, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *maiores*; though others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day of it. Numa Pompilius, by adding January and February to the year, made this month the fifth, which before was the third, 713 B. C.

**MAY-DAY.** The ancient Romans used to go in procession to the grotto of Egeria on May-day. May-day has also been immemorially observed in

England as a rural festival; and high poles, denominated May-poles, are in many places profusely decorated with garlands wreathed in honor of the day. The late benevolent Mrs. Montague gave, for many years, on May-day, an entertainment at her house in Portman-square, to that unfortunate class the chimney-sweepers of London. They were regaled with the good English fare of roast-beef and plum-pudding, and a dance succeeded. Upon their departure, each guest received the donation of a shilling from the mistress of the feast.

**MAYNOOTH COLLEGE, IRELAND.** Founded by act of parliament, and endowed by a yearly grant voted for its support, and the education of students who are designed for the priesthood of the Roman Catholic church in Ireland, 35 Geo. III., 1795. It contains 500 students. Permanent endowment of this college, at the instance of government, to which 30,000*l.* for the enlargement of the buildings, and 26,000*l.* annually, were granted by parliament, June, 1845. This endowment occasioned much excitement and controversy in England.

**MAYOR.** The office of mayor arose out of the immunities granted to free cities by the emperors, and in some towns they had considerable power. Mayor of the palace was a high office in France. In this quality Charles Martel ruled with despotic sway, A. D. 735, *et seq.*, under the last kings of the Merovingian dynasty; his father had previously held this office, and had it made hereditary in his family. Mayors are the chief magistrates of corporate towns, before whose institution in England, towns were generally governed by portreeves. The office of mayor may be properly said to date from the reign of Richard I.

**MEASURES AND WEIGHTS.** They were invented by Phidion of Argos, 869 B. C.—*Arund. Marbles.* They became general in most countries soon afterwards; and were very early known in England. Standards of weights and measures were provided for the whole kingdom by the sheriffs of London, 8 Richard I., A. D. 1197. Standards were again fixed in England, 1257. They were equalized for the United Kingdom in 1825.

**MECCA.** This city is famous as being the birthplace of Mahomet, A. D. 571. The temple is a gorgeous structure, much visited by pilgrims. On one of the neighboring hills is a cave, where it is pretended Mahomet usually retired to perform his devotions; and where the greatest part of the Koran was brought to him by the angel Gabriel, A. D. 604. Two miles from the town is the hill where they say Abraham went to offer up Isaac, 1871 B. C.

**MECHANICS.** The time when the simple mechanical powers were first introduced is so uncertain, and perhaps so little known, that they have been ascribed to the Grecian and other deities of the heathen mythology—for instance, the axe, the wedge, wimble, &c., are said to be the invention of Dædalus. We know nothing of the machinery by which the immense masses of stone which are found in some of the ancient edifices were moved and elevated.

|                                                                                                |       |     |
|------------------------------------------------------------------------------------------------|-------|-----|
| The first writing on mechanics, was by Aristotle, about                                        | B. C. | 320 |
| The <i>Statera Romana</i> invented                                                             |       | " " |
| The fundamental property of the lever and other instruments was demonstrated by Archimedes     |       | 205 |
| The hand-mill, or quern, was very early in use; the Romans found one in Yorkshire              |       | " " |
| Cattle mills, <i>mola jumentariae</i> , were also in use by the Romans, and in parts of Europe |       | " " |

|                                                                                                                         |       |      |
|-------------------------------------------------------------------------------------------------------------------------|-------|------|
| The water-mill was probably invented in Asia; the first that was described was near one of the dwellings of Mithridates | B. C. | 70   |
| A water-mill is said to have been erected on the river Tiber, at Rome                                                   | A. D. | 50   |
| Floating mills on the Tiber                                                                                             | A. D. | 536  |
| Tide-mills were, many of them, in use in Venice about                                                                   |       | 1078 |
| Wind-mills were in very general use in the twelfth century                                                              |       | " "  |

MECHANICS, *continued.*

|                                                            |              |                                                                                           |        |
|------------------------------------------------------------|--------------|-------------------------------------------------------------------------------------------|--------|

| Theory of the inclined plane investigated by Cardan, about | - 1540       | Problem of the catenary with the analysis, Dr. Gregory                                    | - 1697 |
| Work on statics, by Stevinus                               | - 1586       | Spirit level (and many other inventions), by Dr. Hooke, from 1660 to                      | - 1702 |
| Theory of falling bodies, Galileo                          | - 1638       | The Mechanics' Institute in London was formed in                                          | - 1823 |
| Theory of oscillation, Huygens                             | - 1647       | Mechanics' Institute in New York formed                                                   | - 1833 |
| Laws of collision, Wallis, Wren                            | - 1662       |                                                                                           |        |
| Epicycloidal form of the teeth of wheels, Roemer           | - 1675       |                                                                                           |        |
| Percussion and animal mechanics, Borelli; he died          | - 1679       |                                                                                           |        |

Mechanics' institutions are now very numerous in the United States and in England.

**MEDIA.** In ancient times Media was a province of the Assyrian empire. It revolted from Arbaces 820 B. C., and afterwards became an independent kingdom, and conquered Persia; but Cyrus having vanquished Darius the Mede, 536 B. C., Media was from that time united to the Persian empire, and shared its fate.—*Blair; Priestley.*

|                                                                                                                                      |             |                                                                                                                                                |             |

| War with the Lydians; the hostile armies meet; but an eclipse of the sun so alarms them, they conclude peace without striking a blow | - 585       | By the death of Astyages, Cyrus becomes master of all Persia; and this era is properly the commencement of the Persian empire.— <i>Lenglet</i> | - 357       |
| The reign of Astyages.— <i>Blair</i>                                                                                                 | - 585       |                                                                                                                                                |             |

The Medes were a brave people, but they degenerated, and introduced luxury into Persia. They admitted polygamy, and a man was deemed infamous who had less than seven wives, as was also a woman who could not boast of at least five husbands.—*Aspin.*

**MEDICAL LITERATURE IN THE UNITED STATES.** The Medical Repository, commenced at New York, 1797, was the first work of the kind. It was conducted by Dr. S. L. Mitchell.

**MEDICINE.** The art of preparing simples was brought into Europe from the East, about A. D. 1150. In the early stages of the practice, the preparation was principally confined to ecclesiastics in Europe generally, until the close of the fifteenth century, or the beginning of the sixteenth. The practice of medicine is now one of the highest sciences, and in most countries is in the hands of the most learned and distinguished men; and various statutes have been enacted to discourage pretenders to the healing art.

**MEDINA, IN ARABIA DESERTA,** famous for the tomb of Mahomet, contained in a large mosque, closed with rich curtains and lighted by a vast number of rich lamps. Medina was called the City of the Prophet, because here Mahomet was protected when he fled from Mecca, July 16, A. D. 622. This flight gave rise to the remarkable epocha in chronology called the *Hegira*, a word that, in Arabic, denotes, *to flee, or quit one's country or friends.*

**MEMORY.** That faculty of the mind or soul whereby past things are represented to us as if they were present.—*Pardon.* Simonides, grandson of Simonides the elder, of Cos, poet and historian, obtained a prize at Olympia, for teaching artificial memory, of which he was the inventor, 477 B. C.—*Arundelian Marbles.* The science of mnemonics was made known in Germany in 1807. See *Mnemonics.*

**MENDICANT FRIARS.** The term was applied to several orders of religious

who commenced their alms-begging in the thirteenth century, in the pontificate of Innocent III. They were confined by a general council, held by Gregory X. at Lyons, in 1272, to the following four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and other orders subsequently branched from them.

**MENSURATION.** The art of measuring geometrical superficies and solids is of very early date. The various properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, &c., about 218 B. C.

**MERCATOR'S CHARTS.** The true inventor of these charts is said to have been a Mr. Wright, who made several voyages; and in his absence Mercator published the charts in his own name, 1556.—*Pardon.* They are, however, now confidently ascribed to Mercator's own ingenuity. In these charts the meridians and parallels of latitude cut each other at right angles, and are both represented by straight lines, enlarging the degrees of latitude as they recede from the equator.

**MERCHANT**—from *mercans*. The name given to high commercial citizens who trade abroad. The merchants of London and Amsterdam were accounted the most enterprising and richest in the world. An attempt was made by queen Anne's ministry to exclude merchants from sitting in the House of Commons, in 1711; but it failed. The Merchant Adventurer's society (see *Adventurers, Merchant*) was established by the duke of Brabant, in 1296; it extended to England in Edward III.'s reign; and was formed into an English corporation in 1564.—*Haydn.*

**MERCURY.** This substance was known to the ancients, and has been found in vast quantities in various countries. The mines in Carniola in Germany are the most productive in Europe, and have yielded in some years 1200 tons; they were discovered by accident in 1497. The anti-venereal virtues of mercury were found by James Carpus, an Italian surgeon, A. D. 1512.—*Nouv. Dict.* The compound termed calomel was first mentioned by Crollius early in the seventeenth century; the first directions for its preparation were given by Beguin, 1608. It was given to patients under inoculation for the small-pox in 1745. Pallas congealed mercury by artificial cold in 1762. Its malleable qualities were discovered by M. Orbelin, of Vienna, 1785.

**MERRY ANDREW.** The name was first given to a droll and eccentric physician, whose name was Andrew Borde, who lived in the reign of Henry VIII., and who, on some occasions, on account of his facetious manners and good humor, appeared at court, 1547. He used to attend markets and fairs, and harangue the people, by whom he was called Merry Andrew. The name is now given to a buffoon, a zany, or jack-pudding.—*L'Estrange, Johnson.*

**MESSALIANS.** A sect whose religious error consisted in adhering to the letter of the gospel, interpreting the words to justify and excuse their worst propensities and vices. Amongst other absurdities they refused to work, quoting this passage, "Labor not for the food that perisheth;" about A. D. 310.—*Baronius, Annal.*

**MESSENIA**, now *Mavra-Matra*, a country of the Peloponnesus. This kingdom was commenced by Policaon, 1499 B. C. It is celebrated for its long and sanguinary wars against Sparta (see *next article*), and once contained a hundred cities, most of whose names even are now unknown. Messenia joined the Achæan league 216 B. C.

**MESSENIAN WARS.** The celebrated wars between Lacedemon and Messenia. The first began 743 B. C., and was occasioned by violence having been offered

to some Spartan women who had assembled in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. This dreadful war raged for nineteen years, and at one period made so great a carnage, that the Spartan army sent orders home for all the unmarried women to prostitute themselves to recruit the population. In the end Ithome was taken, and the Messenians became slaves to the conquerors. The *second* war was commenced 685 B. C. to throw off the galling Spartan yoke, and lasted fourteen years, ending in the defeat of the Messenians who fled to Sicily. The *third* took place 465 B. C., it endured ten years, when the whole nation abandoned the Peloponnesus.

**MESSINA, IN SICILY.** So named by the Messinese, who seized this city, then called Zancle, 671 B. C. It belonged for many ages to the Roman empire, but fell to the Saracens A. D. 829.—*Priestley*. In the eleventh century Roger the Norman took it by surprise, and delivered it from the Mahometan oppression. Great Messinian conspiracy, 1282. The memorable revolt took place 1672. Almost ruined by an earthquake 1693; and nearly depopulated by a plague in 1743. In 1780 Messina suffered much by an earthquake; and in Feb. and March, 1783, was half destroyed by the same calamity; since which it has been handsomely rebuilt.

**METALLURGY.** In the fourth chapter of Genesis, Tubal Cain is mentioned as "an instructor of every artificer in brass and iron." The seven metals are mentioned by Moses and Homer. Virgil mentions the melting of steel in furnaces. The Phœnicians had an extraordinary skill in working metals.

**METAPHYSICS.** This term, literally denoting "after physics," originated with Aristotle. What may be denoted the modern metaphysics, cannot be traced farther back than the fifteenth century—the period when an extraordinary impulse was given in Europe to the human mind, and commonly called the revival of learning.

**METEMPSYCHOSIS.** A doctrine supposing the transmigration of the soul from one body to another. The first belief in it is ascribed to the Egyptians, who would eat no animal food, lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea, that so long as the body of the deceased was kept entire, the soul would not transmigrate; which accounts for the extraordinary pains they were at in embalming the dead; a doctrine of Pythagoras, 528 B. C.

**METHODISTS.** A large and increasing body of religionists, whose tenets, discipline, and designs, are often misunderstood, and of course misrepresented. "Our end," says Mr. Benson, in his *Apology*, "is not to form a sect, or to bring people to this or the other speculative opinion, mode of worship, or form of church-government, but simply to make them Christians—Christians in heart and life, in temper, word, and work—such as lived in the early days of Christianity, and such as we conceive may still live." The methodists may be said to have appeared formally, if not originally at Oxford A. D. 1729; the reverend John Wesley being the first who there introduced methodism. John and Charles Wesley, and Mr. Whitfield, commenced their career by teaching in 1734. The term appears to have been brought forward in the days of Puritanism, being suggested by the Latin appellation *Metho-distæ*, given to a college of physicians in ancient Rome, in consequence of the strict regimen under which they placed their patients. The methodist missions were commenced and superintended by Mr. Wesley and Dr. Coke in 1769, when two missionaries were sent out to North America. But these missions were not reduced to a system, nor were societies regularly organized for their support, until 1817.

**MEXICO.** Discovered in A. D. 1518. It was conquered by the Spaniards under Cortes, whose name is infamous on account of his cruelties to the vanquished, A. D. 1521. The mint of Mexico, the richest in the world, was begun in 1535. This country, like other states in the new world, has recovered its independence. Iturbide made emperor, May, 1822. Mexican constitution proclaimed by the president Victoria, Oct. 1823. Iturbide shot July 19, 1824. Treaty of commerce with Great Britain ratified, April 1825. Titles suppressed, May 1826. The expulsion of the Spaniards decreed, March, 1829. Spanish expedition against Mexico surrendered, Sept. 26, same year. Mexican revolution; the president Guerrero deposed Dec. 23, same year. The independence of Mexico, previously recognized by the great European powers, also recognized by the emperor of Brazil, June 1830. Civil war between Bustamante and Santa Anna, 1832. Santa Anna elected president, March 1834. Declaration of war against France, Nov. 30, 1838. Castle of San Juan de Ulloa taken by the French, Nov. 27, 1838. This war terminated, March 9, 1839. Civil war with change of leaders at various times. Santa Anna displaced Bustamante again, Oct. 6, 1841. Insurrection of general Paredes against Santa Anna, Nov. 5, 1844, succeeds without bloodshed, and Herrera made president, Dec., 1844. Paredes overturns Herrera, Dec. 1845. War with the United States, 1846: Mexicans defeated at Palo Alto, May 8, 1846; and subsequently at Matamoras. Santa Fe captured, Aug. 23, and Monterey, Sept. 24, 1846. Mexican congress authorized their government to raise \$15,000,000 for the war against the United States, upon the mortgage or sale of church property, Jan. 8, 1847. Battle of Buena Vista, Feb. 22, 1847. Vera Cruz surrendered to general Scott, March 29, 1847. Battle of Cerro Gordo, April 18. General Paredes landed at Vera Cruz in disguise, Aug. 14, 1847. Battles of Contreras and Churubusco, Aug. 20, 1847; of Chapultepec, Sept. 12. Surrender of city of Mexico to American general Scott, Sept. 14, 1847. Treaty of peace with the United States, ratified at Queretaro, May 30, 1848. Paredes excites a revolt at Guanajuato, June 15. Mexico evacuated by the American troops, June 12. Herrera becomes president, July 6. Bustamante defeats Paredes, July 18. Vera Cruz surrendered by the United States, Aug. 1. See *War of the United States and Mexico*. Signor de la Rosa first Mexican minister to the United States after the war, presented his credentials, Dec. 2, 1848.

**MEZZOTINTO.** A peculiar manner of engraving representing figures on copper, received its name from its resemblance to painting. The invention of it is generally ascribed to prince Rupert, A. D. 1648; but baron Heinikin states that colonel de Siegen engraved a large and admirable print of Amelia Elizabeth of Hesse in mezzotinto in 1643. See *Engraving*.

**MICHIGAN,** one of the United States, first settled by the French at Detroit in 1647. Many of the Hurons, a native tribe in this region, were converted to the Catholic faith by the Jesuits. The territory ceded to England by the peace of 1763; made a separate territory of the United States, in 1805; admitted into the Union as a State in 1836. During the war of 1812-13 the territory was gained for a time by the British, but it was recovered by general Harrison. Population in 1810, was 4,528; in 1820, 9,048; in 1830, 31,639; in 1840, 212,267.

**MICROSCOPES.** Invented nearly at the same time in Italy and Holland, A. D. 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. The honor of this invention is awarded to Drebel and Torricelli. Solar microscopes were invented by Dr. Hooke. In England, great improvements were made in the microscope by Henry Baker, F. R. S., who wrote two treatises upon it, about 1763.—*Biog. Dict.*

**OWIFERY.** Women were the only practitioners of this art among the He-

brews and Egyptians. Hippocrates, who practised medicine in Greece, 460 B. C. is styled by some the father of midwifery, as well as of physic.\* It advanced under Celsus, who flourished A. D. 37, and of Galen, who lived A. D. 131. In England midwifery became a science about the period of the institution of the College of Physicians, 10 Henry VII., 1518. The celebrated Dr. Harvey personally engaged in the practice of it, about 1603; and after his example the calling in of men in all difficult cases followed. Astruc affirms that the epoch of the employment of men-midwives goes no farther back than the first lying-in of Madame de la Vallière, mistress of Louis XIV., 1663. She sent for Julian Clement, an eminent surgeon, who was conducted with great secrecy to the house. The same surgeon was employed in the subsequent labors of this lady, and he being very successful, men-midwives after came into repute, the name of accoucheur being given to them.

**MILAN.** The capital of this celebrated dukedom, the ancient Liguria, is reputed to have been built by the Gauls about 408 B. C. It submitted to the Romans 222 B. C.; was formed into a republic A. D. 1221; and lastly was governed by dukes from A. D. 1395, until 1505, when it was conquered by Louis XII. John Galeazzo was the first who took the title of duke of Milan, about 1390. The French were expelled from Milan, by Charles V. of Germany, about 1525; and this emperor gave it to his son, Philip II. Milan was given to Austria, upon Naples and Sicily being ceded to Spain, 1748. Seized by the French, June 30, 1796. Retaken by the Austrians in 1799; but regained by the French May 31, the next year. This city was made the capital of the late kingdom of Italy, and Napoleon Bonaparte was crowned with the Iron crown at Milan, May 26, 1805. The celebrated Milan decree of Napoleon against all Continental intercourse with England, declaring England in a state of blockade, was issued from this city, Dec. 17, 1807. Put under military occupation in consequence of disturbances, Sept. 8, 1847. Collision of the Milanese with the Austrian soldiers, Jan. 1, 1848; followed by conciliations. Martial law proclaimed in Lombardy, Feb. 1848; the government threatens the people with the fate of the Poles. The people revolted and expelled the Austrians, and Charles Albert of Sardinia entered Milan in the popular cause, March 23, 1848. A vote taken in Lombardy on proposed union with Piedmont:—561,002 in favor of it; 681 for postponing it till the end of the war, June 9, 1848. Vicenza surrenders to the Austrians under Radetsky, June 10. The duke of Genoa repulses the Austrians at Rivoli, July 1. Milan capitulates to the Austrians, Aug. 4, 1848.

**MILITARY or MARTIAL LAW.** This is a law built on no settled principle, but entirely arbitrary, and in truth, no law; but sometimes indulged, rather than allowed, as law.—*Sir Matthew Hale.* Martial law was several times proclaimed in Great Britain during rebellions. It was almost general throughout Ireland in 1798. The last proclamation of martial law was in that country, July 26, 1803. Paris was under martial law for several weeks after the insurrection of June, 1848.

**MILITIA.** The standing national militia of Great Britain is traced by most historians to king Alfred, who, by his prudent discipline, made all his subjects soldiers, A. D. 872 to 901. The feudal military tenures became involved in this force. The first commission of array to raise a militia in England was in 1422. In the United States the laws relating to the militia and the

---

\* Agnodice, an Athenian virgin, disguised her sex to learn medicine. She was taught by Hieropholus, her father, the art of Midwifery, and when employed, always discovered her sex to her patients. This brought her into so much practice, that the males of her profession, who were not out of employment, accused her, before the Areopagus, of corruption. She confessed her sex to judges, and a law was made to empower all free-born women to learn midwifery.—*Hyg. fa. 27*

appointment of officers are different in the different States. See *Encyclopedia Americana*. The aggregate militia force of the United States, as reported in 1848, was 1,888,538, but as the returns in some instances were for former years, the number probably reached, in 1850, at least to 2,100,000. As the regular army has always been small (in time of peace about 8000) the republic has relied chiefly on the militia in time of war.

**MILKY WAY.** Ancient poets and philosophers speak of the galaxy as the road by which heroes went to heaven. The Greeks supposed that Juno accidentally gave suck to Mercury when an infant, or to the infant Hercules, who, while she slept, was laid by her side; but perceiving who he was, she threw him from her, and the heavens were thus marked by the wasted milk. Democritus was the first who taught that the *via lactea* was occasioned by a confused multitude of stars, about 428 B. C.

**MILLENNIUM.** This doctrine supposed that the world would end at the expiration of the seven thousandth year from the creation; and that during the last thousand years Christ and the saints would reign upon earth. It was generally inculcated as early as the second and third centuries. It was propagated by Papias, Justin-Martyr, and many others. The Millennium was grounded upon a doubtful text in the Apocalypse, to the effect that our blessed Saviour should reign with the faithful upon earth after the resurrection, before the final completion of beatitude.—*Burnet*.

**MILLINER.** Defined by Shakspeare and Johnson as a seller of ribands and dresses for women, a very ancient occupation; the term is supposed to be derived from Milan. There are men-milliners in England, and the adoption of such a trade by the male sex has been strongly and justly censured. In 1810, men-milliners and other classes of an epicene character were very strongly censured in the Society of Arts. Young females are employed at all seasons, and in all weathers, to carry handboxes through the streets, exposed to the insolence of libertines, and the perils of vicious example, while the perfumed coxcomb ["He was perfumed like a milliner."—*Shakspeare*.] measures ribands safely at home, or folds gauzes, and lisps the while in lady phrases to females of distinction.\*—*Butler*.

**MILLS.** The earliest instrument for grinding manna and corn, was the mortar. Moses forbade them to be taken in pawn, because that, he says, would be like taking a man's life to pledge. The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. See article *Mechanics*.

**MINES.** Those of Great Britain are very numerous, rich, and of various kinds. Strabo and Tacitus enumerate gold and silver as among the products of England. The earliest instance of a claim to a mine royal being enforced, occurs 47 Henry III., 1262.—*Ruding*. It related to mines containing gold, together with copper, in Devonshire. In the United States, iron, coal, lime, and salt exist in great abundance, in various States: lead mines in Missouri are very productive. Gold mines have been found in Virginia, North Carolina, and Georgia, but their supply is but moderate. See *Coal, Copper, Tin, Gold, &c.*

**MINNESOTA.** A territory of the United States lying between 40° 30' north lat., and between 91° 10' and 102° west long., inhabited chiefly by the Sioux Indians. First explored by the French; began to be settled by emigrants from the United States about 1845-6.

---

\* I look upon a man-milliner not only as one of the most unworthy members of society, but as of the most injurious. When I hear one of these persons haranguing upon the merits of muslin, a becoming color of a riband, anger will mingle itself with the feeling of contempt; for the coyment that degrades this man might have preserved a woman from prostitution.—*Dr.*

- MINORCA.** This island and Majorca were called by the Greeks, Balearide. Minorca was captured by lieutenant-general Stanhope and sir John Leake in August 1708, and was confirmed to the British by the treaty of Utrecht in 1713. It was retaken by the Spanish and French in June 1756. Admiral Byng fell a victim to the exasperation of the public mind, and to the safety of ministers, for not relieving it with a force greatly inferior to that of the enemy. See *Byng*. It was restored to the British at the peace in 1763. Besieged by the Spaniards, and taken, Feb. 5, 1782. It was again captured by the British, without the loss of a man, Nov. 15, 1798; but was given up at the peace of 1802.
- MINSTRELS.** They were originally pipers appointed by lords of manors to divert their copyholders while at work. They owed their origin to the gleemen or harpers of the Saxons, and continued till about A. D. 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even at the houses of the nobility. In Elizabeth's reign they had, however, sunk into neglect.
- MINT OF THE UNITED STATES** established at Philadelphia, 1792. Branch at New Orleans, 1838; at Charlotte, N. C., 1837; at Dahlonega, 1838. See *Coining*.
- MIRRORS.** In ancient times mirrors were made of metal; and from a passage in the Mosaic writings we learn that the mirrors used by the Jewish women were made of brass. Mirrors in silver were introduced by Praxiteles, 328 B. C. See *Looking Glasses*.
- MISS.** In the seventeenth century, the epithet Miss applied to females was considered a term of reproach. Miss Cross who is particularly noticed in Hayne's epilogue to Farquhar's *Love in a Bottle*, about 1782, was the first actress announced as Miss.—*Gall's Lives of the Players*.
- MISSIONS.** Among the Romanists, the religious orders of St. Dominick, St. Francis, St. Augustin, &c., had missions to the Levant and to America. The Jesuits had missions to China (*which see*), and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV., in 1706. But the Moravian Brethren may be said to have led the way to the new Christian missions, about 1732. The London Missionary Society held their first meeting, Nov. 4, 1794; and it has since been the parent of many benevolent institutions. The American Board of Commissioners for Foreign Missions, formed 1810; first mission at Bombay, 1813; at Ceylon, 1816; to Choctaws, 1817; Cherokees, 1820. The Board has an annual income from voluntary contributions of about \$200,000. The statistics of its operations in various parts of the world are given in its annual reports. The contributions of this Board and its missionaries to the fund of geographical and ethnographical science, to say nothing of religion and civilization, have been very important. The missions of the Baptists, Episcopalians, Methodists, &c., are also numerous. American Baptist Board of Missions, founded 1814. Board of Missions of General Assembly (Presbyterian), 1818. Methodist Missionary Society, 1819. American Home Missionary Society, 1826. See *Benevolent Societies*.
- MISSISSIPPI,** one of the United States. First settled by the French at Natchez, and claimed as part of Louisiana, 1716. Colony destroyed by the Indians. The country ceded to Great Britain by the peace of 1763. Part of it belonged to Georgia, and the southern part to Florida. The territory, together with Alabama, constituted the "Mississippi Territory" until 1817, when it was admitted into the Union as a State. Population in 1816, 45,929; in 1830, 136,806; in 1840, 375,651, including 195,211 slaves.

**MISSOURI**, one of the United States. Was included with Louisiana in the purchase from the French in 1803. Town of St. Louis settled by the French in 1764, but was little more than a trading post until 1804, when the territorial government was formed. Missouri admitted into the Union as a State in 1821, after a long debate on slavery, ending in the *Missouri Compromise*, which prohibits slavery north and west of Arkansas, but tolerates it in Missouri. Population in 1810, 19,833; in 1830, 140,074; in 1840, 383,702, including 58,240 slaves.

**MISSISSIPPI TRADE**. This trade was begun in November, 1716. The celebrated Mississippi scheme or bubble in France, which was commenced about that period, exploded in 1720; at which time, the nominal capital is said to have amounted to 100,000,000*l.* See *Lavo's Bubble*.

**MITHRIDATE**. A physical preparation in the form of an electuary, supposed to be the oldest compound known to us at the present day. It was invented by Mithridates II. the king of Pontus, about 70 B. C. It was formerly thought to be a great antidote against poison; but though it is now out of date for that purpose, it is still used as an opiate, and is one of the capital medicines of our shops.

**MITHRIDATIC WAR**. Caused by the massacre of 100,000 Romans, 86 B. C. and remarkable for its duration, its many battles, the devastation of human life it occasioned, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He ultimately dispatched him, by ordering melted gold to be poured down his throat, which was done in derision of his avarice, 85 B. C.—*Lenglet*.

**MITRE**. The cleft cap or mitre is of very ancient use, having been worn by the high-priest among the Jews. Among the primitive Christians, young women who professed a state of virginity, and solemnly consecrated thereto, wore a purple or golden mitre. The pope has four mitres, which according to the solemnity to be performed, or festival day it is worn on, is more or less magnificent. Anciently the cardinals wore mitres, but at the council of Lyons, in 1245, they were appointed to wear hats, which remains to this day.

**MNEMONICS**. Artificial memory had its professors in the ancient world. The art of assisting memory, by getting by heart, was introduced by Simonides the younger, 477 B. C.—*Arund. Marbles*. In modern times, mnemonics have been elaborately treated; and the *Memoria Technica* of Dr. Grey is an esteemed work on the subject. The science of mnemonics, as we now have it, was announced in Germany, in 1806-7; but it had been previously noticed in the London monthly periodicals.

**MODENA**. Erected into a duchy in 1451. The duke was expelled by the French, 1796. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797. The archduke Francis of Este was restored in 1814. Insurrection here, Feb. 5, 1831. The archduke escaped; but the Austrian troops soon afterwards entered and restored the deposed authorities. The people revolt and imprison the duke, March 20, 1848. The troops of Tuscany occupy Modena, March 24; Provisional government appointed, April 9, 1848.

**MOGULS**. They deduce their origin from Japhet, son of Noah. His son, Turk, they say, was the first king or khan of those nations afterwards known as Turks, Tartars, and Moguls. The first conqueror of the Mogul empire was Jenghis Khan, a Tartarian prince, who died A. D. 1236. Timour Beg became Great Mogul by conquest, 1399. Khouli Khan, the famous sophi of Persia, considerably diminished the power of the moguls, carried away immense treasures from Delhi, and since that event many of the nabobs have made themselves independent. See *India*.

**MONARCHY.** The most ancient was that of the Assyrians, founded soon after the Deluge. See *Assyria*. Historians reckon four grand, or almost universal monarchies,—the Assyrian, Persian, Grecian, and Roman. See *them respectively*.

**MONASTERIES.** The first founded was, according to some authorities, in A. D. 270; and according to others, in A. D. 305. The suppression of monastic houses has been frequent, even in Catholic countries; and many religious communities have bowed to the variable notions of mankind regarding religion, and to the altered state of the world. Constantine IV., among other persecutors, commanded a vast number of friars and nuns to appear at Ephesus: he there ordered them to change their black habits for white, and to destroy their images. They explained that this, on account of the vows they had taken, was impossible; whereupon he directed that their eyes should be put out, and that they should be banished, forfeiting their various monasteries, which he sold for the uses of the state. When St. Austin arrived in England A. D. 596, Ethelbert of Kent gave him an idol temple without the walls of his capital, as a burial-place for him and his successors, which was converted into the first monastery. Various monastic houses were suppressed in England in various reigns; and a vast number in 1515. But the general dissolution took place in the reign of Henry VIII. 1534–9. The abbey lands were afterwards granted to numerous courtiers, whose descendants enjoy them to this day.

**MONEY.** It is mentioned as a medium of commerce in the 23d chapter of Genesis, when Abraham purchased a field as a sepulchre for Sarah, in the year of the world 2139. In profane history, the coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B. C. Money was made of different ores, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574. Silver has increased more than thirty times its value since the Norman conquest, viz. a pound in that age was three times the quantity that it is at present, and twelve times its value in purchasing any commodity. See articles, *Coin; Gold; Silver; Copper; Mint, &c.*

**MONK.** The first is said to have been Paul of Thebais, who fled into the deserts to avoid the Decian persecution about A. D. 250. St. Anthony is supposed by other authorities to have been the first example of a regular monastic life, A. D. 305, soon after which time monks began to associate. St. Athanasius introduced the monastic life into Rome in 341. See *Abbeys*.

**MONMOUTH'S REBELLION.** James, duke of Monmouth, a natural son of Charles II. was banished England for a conspiracy in 1683. He invaded England at Lyme, June 11, 1685. He was proclaimed king at Taunton on the 20th of the same month. Was defeated at Bridgewater, July 5; and was beheaded on Tower-hill, July 15, 1685. The county of Monmouth, from which he was named, was made an English county by Henry VIII. about 1535.

**MONOPOLIES.** Commercial monopolies reached to such a height in England, that parliament petitioned against them, and they were in consequence mostly abolished about the close of Elizabeth's reign, 1602. They were further suppressed, as being contrary to law, 19 James I., 1622; and were totally abolished, and it was decreed that none should be in future created, as was previously the custom, by royal patent, 16 Charles I., 1640.—*Anderson's History of Commerce*.

**MONTANISTS.** A sect founded by Montanus, of Ardaba, in Mysia, an extra-

ordinary enthusiast, about A. D. 171. He was reputed to have the gift of prophecy, and proclaimed himself the comforter promised by Christ, condemned second marriages as fornication, permitted the dissolution of marriage, forbade to avoid martyrdom, and ordered a severe fast of three lents; he hanged himself with Maximilla, one of his women-scholars, before the close of the second century.—*Cave's Hist. Lit.*

**MONTREAL.** Surrendered to the English by the French in 1760. It was taken by the Provincials in the American war of Independence, November 12, 1775, and was retaken by the British, June 15, 1776. The church, Jesuits' college, prison, and many buildings burnt down, June 6, 1803. Great military affray, Sept. 29, 1833. Riot about the "Rebellion Losses" Act; the parliament house burnt by the mob, 1849.

**MOON.** The full moon was held favorable for any undertaking by the Spartans, and the Greeks generally looked upon full moons, or the times of conjunction of the sun or moon, as seasons most favorable to marriage. Opacity of the moon, and true causes of lunar eclipses, was taught by Thales, 640 B. C. Posidonius accounted for the tides from the motion of the moon, 79 B. C.—*Diog. Laert.* A map of the moon was first taken at Dantzic, A. D. 1647. The strength of moon-light at the full moon is 90,000 times less than the light of the sun.—*Dr. Smith.* It is 300,000 times less.—*Bouguer.*

**MOORS.** They first invaded Spain, A. D. 173.—*Univ. Hist.* The Saracens in Spain beset by the Christians, called in the assistance of the Moors, who seized the dominions they came to protect, and subdued the Saracens, A. D. 1091. Alphonsus I. of Navarre, defeated them in many battles, 1118, *et seq.* The Moors began the kingdom of Granada, being their last refuge from the power of the Christians, 1238. Alphonsus XI. of Leon and Castile, slew 200,000 Moors in one battle; three leagues round the country was covered with the dead, 1327. The power of this people was overthrown by Ferdinand V., who conquered Granada, 1492. Philip III. banished them to the number of 900,000, confiscating their property, 1610.—*Priestley.*

**MORAL PHILOSOPHY.** The knowledge of our duty and felicity, the science of ethics, or art of being virtuous and happy. Socrates is universally regarded as the father of moral philosophy, about 430 B. C. And Grotius is esteemed by many writers as the father of moral philosophy in modern times, about A. D. 1623.—*Bate, &c.*

**MORAVIANS.** UNITED BRETHREN. A sect which took its rise in Moravia, in, it is said, the fifteenth century, which some doubt; while the Brethren say that their sect is derived from the Greek church in the ninth century. They appeared in England about 1737, introduced by count Zinzendorf, who died at Chelsea, in June 1760. They settled at Bethlehem, Penn., 1741. In order to the conversion of the heathen world, these persevering brethren formed settlements also in Greenland, the Cape, East and West Indies, and other climes. The Moravians led the way to the Scriptural missions now so general.

**MORGARTEN, BATTLE OF,** the most memorable, as well as extraordinary and glorious in the annals of Switzerland; 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated. They seized upon the heights of Morgarten, which overlooked the defile through which the enemy was to enter their territory from Zug, and thus achieved their victory, Nov. 15, 1315.

**MORMONS.** The pretended revelation of the Mormon Scriptures to "Joe Smith" is said to have been made in the state of New York, about 1835. Surrender of a body of 700 Mormons under arms, with their leaders, Joe

Smith, Rigdon, &c., to the Missouri militia, under Gen. Atchinson, Oct. 28, 1838. Joe Smith and his brother murdered in jail by a mob, June 27, 1844. The Mormon temple at Nauvoo, Illinois, sold to the Icarians, or Socialists, and the Mormons emigrated to Desseret and California, 1848-9.

**MOROCCO.** Anciently *Mauritania*. From its early possession by the Romans it underwent various revolutions. About A. D. 1116, Abdallah, a leader of a sect of Mahometans, founded a dynasty which ended in the last sovereign's defeat in Spain. About this period, 1202, Fez and other provinces shook off their dependence; but the descendants of Mahomet, about 1650, subdued them, and formed the empire of Morocco. Hostilities with France provoked by Abdel-Kader, the heroic and indomitable ameer of Algiers, commence May, 1844; Tangier bombarded, Aug. 6, 1844; peace concluded, and the French forces evacuate Mogador, Sept. 16, 1844. Abdel-Kader taken prisoner by the French and carried to France, 1846.

**MORTARS,** A short gun with an extraordinary large bore, and close chamber. used for throwing bombs, first made in England in 1543. The celebrated mortar left by Soult in Spain, was fixed in St. James's park in August, 1816.

**MOSCOW.** One of the largest cities in Europe. It was founded in 1156; was taken by Tamerlane 1382; and subsequently it fell into the hands of the Tartars, whose last attack upon it was in 1571, when they set it on fire. This city was entered by the French, Sept. 14, 1812, and the Russian governor, Rostochin, ordered that it should be set on fire in five hundred places at once. In this memorable conflagration, 11,840 houses were burnt to the ground, besides palaces and churches. The French, thus deprived of quarters, evacuated Moscow Oct. 19, and it was re-entered by the Russians Oct. 22, following. This city has been since rebuilt.

**MOSKWA, BATTLE OF,** between the French and Russians. See *Borodino*.

**MOSS-TROOPERS.** These were a desperate sort of plunderers, secreting themselves in the mosses on the borders of Scotland, defiling women, and perpetrating the most savage enormities, as well as minor mischiefs, extirpated A. D. 1609.

**MOST CHRISTIAN KING.** The title given to Louis XI. by pope Paul II., 1469. It has been justly remarked, that never was the title or name of Christian given to a prince more unworthily bestowed, or less deserved.

**MOTTOES, ROYAL.** *Dieu et mon Droit* was first used by Richard I., A. D. 1193. The Bohemian crest, viz. three ostrich feathers, and the motto *Ich dien*, "I serve," was adopted by Edward the Black Prince, at the battle of Cressy, the king of Bohemia being slain in the battle, 1346. *Honi soit qui mal y pense*, was made the motto of the Garter, 1349-50. *Je maintiendrai*, "I will maintain," was adopted by William III., 1688. And *Semper eadem* was ordered by queen Anne to be used as her motto.

**MOURNING FOR THE DEAD.** The practice of the Israelites was, neither to wash nor anoint themselves during the time of mourning. The exhibition of grief for a friend lasted for seven days; and upon extraordinary occasions it lasted a month. The Greeks and Romans also exhibited their grief for the dead by many public abstinences. The ordinary color for mourning in Europe is black; in China it is white; in Turkey, violet; in Ethiopia, brown; and it was white in Spain, until A. D. 1498.—*Herrera*.

**MUNSTER, TREATY OF,** between France, the Emperor, and Sweden; Spain continuing the war against the former kingdom. By this peace, the principle of a balance of power in Europe was first recognized. Signed at Munster, Oct. 24, 1648.

**MURDER.** The highest offence against the law of nature. A court of Ephetae was established by Ithomphoon for the trial of murder, 1179 B. C. The Persians did not punish the first offence. In England, during a period of the Heptarchy, murder was punished by fines only. So late as Henry VIII.'s time, the crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder, or *petit treason*, may happen in three ways; by a servant killing his master; a wife her husband; and an ecclesiastical person his superior, statute 25 Edward III., 1350. The enactments relating to this crime are very numerous, and its wilful commission has been excepted from mercy by our sovereigns in every instance. The act whereby the murderer should be executed on the day next but one after his conviction, was repealed 7 William IV., July 1836.—*Haydn*.

**MUSEUM.** Originally a quarter of the palace of Alexandria, like the Prytæum of Athens, where learned men of extraordinary merit were maintained by the public, because of their considerable services to the commonwealth. The foundation of this establishment is attributed to Ptolemy Philadelphus, who here placed his library, about 284 B. C. See *British Museum*, &c.

**MUSIC.** Lucretius ascribes its invention to the whistling of the winds in hollow reeds. Frankinus to the various sounds produced by the hammers of Tubal Cain. Cameleon Pontique and others to the singing of birds. And Zarlino to the sound of water. It is, however, agreed that music was first reduced to rules by Jubal, 1800 B. C. The flute, and harmony or concord in music was invented by Hyagnis, 1506.—*Arund. Marbles*. Vocal choruses of men are first mentioned 556 B. C.—*Du Fresnoy*. Pythagoras maintained that the motions of the twelve spheres must produce delightful sounds inaudible to mortal ears, which he called "the music of the spheres." St. Cecilia, a Roman lady, is said to have excelled so eminently in music, that an angel was enticed from the celestial regions by the fascinating charms of her melody: and this hyperbolical tradition has been deemed sufficient authority to make her the patroness of music and musicians. She died in the third century.

**MUSICAL NOTES.** The first six are said to have been invented by Guido Aretin, a Benedictine monk of Arezzo, A. D. 1025.—*Blair*. The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1515. Gaffurius of Lodi read lectures on musical composition in the sixteenth century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1616.

**MUSICAL INSTITUTIONS, ENGLAND.** The Ancient Academy of Music was instituted in 1710. It originated with numerous eminent performers and gentlemen to promote the study of vocal harmony. The Madrigal Society was established in 1741, and other musical societies followed. The Royal Society of Music arose from the principal nobility and gentry uniting to promote the performance of operas composed by Handel, 1785. Royal Academy of Music established 1822.

**MUSKETS.** They were first used at the siege of Arras in 1414. The Spanish historians state that Spain was the first power that armed the foot-soldier with these weapons. They were used at the siege of Rhegen in 1521. Introduced generally into the English army, and bows and arrows laid aside, 12 Henry VIII. 1521.—*Carte*. It was the duke of Alva who first brought the musket into use in the Low countries, 1569.—*Branstone*.

**MUSLIN.** A fine cloth, made wholly of cotton. According to some, it is so called as not being bare, but having a downy nap on its surface resembling moss, which the French call *mousse*. According to others, it was first brought

from Mousol, in India, whence the name. Muslins were first worn in England in 1670.—*Anderson*. They were manufactured in great perfection in England in 1778.

**MUTE.** A prisoner is said to stand mute when, being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Anciently, a mute was taken back to prison, placed in a dark dungeon, naked, on his back, on the bare ground, and a great weight of iron placed upon his body; in this situation he was fed with three morsels of bad bread one day, and three draughts of stagnant water the next, and so on alternately until he died. For a very memorable instance of this punishment in A. D. 1605, see article *Pressing to Death*. By statute 12 George III. judgment is awarded against mutes, in the same manner as if they were convicted or confessed. A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778. Another on a charge of burglary, at Wells, 1792. At Shrewsbury a man tried and convicted notwithstanding, Aug. 21, 1801.—*Phillips*.

**MUTINY ON BOARD U. S. BRIG SOMERS**, commander A. S. Mackenzie: midshipman Spencer and two seamen hung, Dec. 1. 1842.

**MUTINY OF THE BOUNTY**, April 28, 1789. For particulars see *Bounty*.

**MYCALE, BATTLE OF**, fought September 22, 479 B. C., between the Greeks and Persians; being the identical day on which Mardonius was defeated and slain at Platea. The Persians consisted of about 100,000 men, who had just returned from an unsuccessful expedition of Xerxes in Greece. They were completely defeated, some thousands of them slaughtered, their camp burnt, and the Greeks triumphantly embarked their troops and sailed back to Samos with an immense booty.

**MYCENÆ.** A division of the kingdom of the Argives. It stood about fifty stadia from Argos, and flourished till the invasion of the Heraclidæ. Perseus removes from Argos to Mycenæ, and reigns, 1313 B. C. Mycenæ destroyed by the Argives, 568 B. C.

**MYSTERIES.** They originated in Egypt, the land of idolatry, and were an institution of the priesthood to extend their own influence; so that all maxims in morality, tenets in theology, and dogmas in philosophy, were wrapt up in a veil of allegory and mystery. From the Egyptian mysteries of Isis and Osiris sprung those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B. C. The laws were—1. To honor parents; 2. To honor the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilization of mankind one of the beneficial effects of the Eleusinian mysteries. They were abolished by the emperor Theodosius, A. D. 389.

**MYTHOLOGY.** Fable usurped the place of historical truth as soon as the authentic tradition concerning the Creation had been lost or adulterated; and persons who had rendered themselves renowned as kings or leaders in this life, and whose achievements had dazzled the benighted understanding of men living in a state of nature, were supposed to be more than mortal, and therefore after death the multitude were easily taught to reverence them with divine honors. The Egyptians and Babylonians, after forgetting the invisible and true God, worshipped positive objects, as the sun and moon; and then transferred their adoration to the operations of nature and the passions of their own minds, which they embodied under symbolical representations, and ultimately worshipped the symbols themselves. Thoth is supposed to have introduced mythology among the Egyptians, 1521 B. C.; and Cadmus, the worship of the Egyptian and Phœnician deities, among the Greeks, 1493 B. C.

## N.

**NABONASSER, ERA OF.** This era received its name from the celebrated prince of Babylon, and began Feb. 26, 747 B. C. To find the Julian year on which the year of Nabonasser begins, subtract the year, if before Christ, from 747; if after Christ, add to it 748.

**NAMES.** Originally every person had but one name. Plato recommended it to parents to give happy names to their children; and the Pythagoreans taught that the minds, actions, and successes of men were according to their names, genius, and fate. The popes changed their names at their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was Swine-snout, A. D. 687."—*Platina*. Onuphrius refers it to John XII., 956; and gives as a reason, that it was done in imitation of Sts. Peter and Paul, who were first called Simon and Saul. In France it was usual to change the name given at baptism, as was done in the case of two sons of Henry II. of France. They were christened Alexander and Hercules; but at their confirmation, these names were changed to Henry and Francis. It is usual for the religious at their entrance into monasteries to assume new names, to show they are about to lead a new life, and have renounced the world, their family, and themselves. See *Surnames*.

**NAMUR.** Ceded to the house of Austria by the peace of Utrecht. It was garrisoned by the Dutch as a barrier town to the United Provinces in 1715. Namur was taken by the French in 1746, but was restored in 1748. In 1781, the emperor Joseph expelled the Dutch garrison. In 1792, it was again taken by the French, who were compelled to evacuate it the following year; but they regained possession of it in 1794. The French, however, delivered it up to the Allies, in 1814.

**NANTES, EDICT OF.** See *Edict*.

**NAPLES.** The continental division of the kingdom of the two Sicilies. Naples was a part of the Roman territory at a very early period. In the fifth century it became a prey to the Goths, and afterwards to the Lombards; and the Saracens, Normans, and French, also successively had possession of this country.

|                                                                                                                                                                               |                |                                                                                                                                              |               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|----------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| The Goths having become masters of Naples and of Sicily, are expelled by Belisarius, general of the Eastern empire                                                            | A. D. 537      | Taken from the French and annexed to Spain                                                                                                   | 1504          |
| The Lombards next get possession of Naples, and are dispossessed by Charlemagne                                                                                               | 800            | The tyranny of the Spaniards leads to an insurrection, excited by Masaniello, a fisherman, who in fifteen days raises an army of 200,000 men | 1647          |
| Charles of Anjou, brother of St. Louis, king of France, obtains the crown from the pope, to the exclusion of the rightful heir, Conradin, who is beheaded, aged sixteen years | 1266           | This insurrection subsides, and Masaniello is murdered                                                                                       | 1647          |
| The French becoming hated by the Sicilians, a general massacre of the invaders takes place, one Frenchman only escaping. See <i>Sicilian Vespers</i>                          | March 30, 1282 | Attempt of the duke of Guise to possess the crown                                                                                            | 1647          |
| Peter of Arragon reigns                                                                                                                                                       | 1282           | The kingdom completely conquered by prince Eugene                                                                                            | 1707          |
| The two crowns disjoined                                                                                                                                                      | 1303           | Discovery of the ruins of Herculaneum. See <i>Herculaneum</i>                                                                                | 1711          |
| Charles Durazzo, becoming king of Hungary, is murdered there by order of the queen regent, in her presence                                                                    | 1386           | Naples ceded to the emperor by the treaty of Radstadt, 1714; Sicily                                                                          | 1720          |
| For this murder she is taken out of her carriage, and drowned in the river Boseth                                                                                             | 1386           | Both kingdoms are recovered by the crown of Spain                                                                                            | 1734          |
| Sicily again united to Naples, and the kings ever since called king of the Two Sicilies                                                                                       | 1442           | And Charles, the son of Philip of Spain, reigns                                                                                              | 1735          |
|                                                                                                                                                                               |                | Reign of Ferdinand IV.                                                                                                                       | 1759          |
|                                                                                                                                                                               |                | His flight on the approach of the French republicans                                                                                         | Jan. 14, 1799 |

**NARVA, BATTLE OF**, in which Peter the Great of Russia was totally defeated by the renowned Charles XII. of Sweden, then in his nineteenth year. The army of Peter is said to have amounted to 100,000 men, while the Swedish army did not much exceed 20,000: fought Nov. 30, 1700.

**NASEBY, BATTLE OF**, between Charles I. and the parliament army under Fairfax and Cromwell. The main body of the royal army was commanded by lord Astley; prince Rupert led the right wing, sir Marmaduke Langdale the left, and the king himself headed the body of reserve. The victory was with the parliament forces, and was decisive of the fate of the unfortunate Charles, who was obliged to abandon the field to his enemies, losing all his cannon and baggage, and 5000 of his army were made prisoners, June 14, 1645.

**NATIONAL DEBT OF ENGLAND.** The first mention of parliamentary security for a debt of the nation, occurs in the reign of Henry VI. The present national debt commenced in the reign of William III. It had amounted, in the year 1697, to about five millions sterling, and the debt was then thought to be of alarming magnitude.

|                                                               |             |                                                                  |              |
|---------------------------------------------------------------|-------------|------------------------------------------------------------------|--------------|
| In 1702, On the accession of queen Anne, the debt amounted to | £14,000,000 | In 1802, Close of the French Revolutionary war, it amounted to   | £571,000,000 |
| In 1714, On the accession of Geo. I. it amounted to           | 54,000,000  | In 1814, Close of the war against Bonaparte                      | 865,000,000  |
| In 1749, Geo. II.; after the Spanish war, it amounted to      | 78,000,000  | In 1817, When the Irish and English exchequers were consolidated | 848,282,477  |
| In 1763, George III.: end of the 7 years' war, it amounted to | 139,000,000 | In 1830, Total amount of the funded and unfunded debt            | 840,184,022  |
| In 1786, Three years after the American war, it amounted to   | 268,000,000 | In 1840, Total amount of ditto                                   | 789,578,000  |
| In 1798, The civil and foreign war, it amounted to            | 462,000,000 | In 1845, Funded debt                                             | 765,789,241  |

**NATURALIZATION.** It is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were,

both a subject and a native of a king or country, that by nature he did not belong to." The first act of naturalization in England passed in 1437; and various similar enactments were made in most of the reigns from that time, several of them special acts relating to individuals. An act for the naturalization of the Jews passed in 1753, but it was repealed in the following year, on the petition of all the cities in England. See *United States*.

**NATIONAL ASSEMBLY OF FRANCE.** Upon the proposition of the abbé Siéyès, the states of France constituted themselves into the National Assembly, June 16, 1789. On the 20th, the hall of this new assembly was shut by order of the king; upon which the deputies of the *Tiers Etat* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 2d they met at the church of St. Louis. This assembly dissolved itself, Sept. 21, 1792. See next article.

**NATIONAL CONVENTION OF FRANCE.** Constituted in the hall of the Tuileries, Sept. 17, and formally opened, Sept. 21, 1792, when M. Grégoire, at the head of the National Assembly, repaired thither and announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare, that the National Convention is constituted." This convention continued until a new constitution was organized, and the Executive Directory was installed at the Little Luxembourg, Nov. 1, 1795. See *Directory*.

**NATIONAL GALLERY, LONDON.** The foundation of this great institution was the purchase, by the British government, for the public service, of the Angerstein collection of pictures, whose number did not much exceed forty. They were purchased of Mr. Angerstein's executors, in Jan. 1822; and the first exhibition of them took place in Pall Mall, in May 1824. Sir G. Beaumont, Mr. Howell Carr, and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been augmented by numerous later gifts, and recent purchases. The present edifice in Trafalgar-square was designed by Mr. Wilkins, and was completed and opened in 1837.

**NAVAL BATTLES.** The Argonautic expedition undertaken by Jason is the first upon record, 1263 B. C.—*Du Fresnoy*. The first sea-fight on record is that between the Corinthians and Corcyreans, 664 B. C.—*Blair*. The following are among the most celebrated naval engagements to be found on the page of history.

#### BEFORE CHRIST.

First sea-fight on record, in which the Corinthians conquer the Corcyreans 664  
The Athenian fleet under Themistocles, with 380 sail, defeat the Persian, consisting of 2000, at the straits of Salamis - - - - - 480  
Again, at the mouth of the river Eurymedon; Cymon, the Athenian admiral, vanquishes the Persian fleet and army, in one day.—*Herodotus* - - - 470  
The Lacedæmonian fleet taken by Alcibiades, the Athenian - - - - - 410  
The Spartan general, Lysander, totally defeats the Athenian fleet under Conon; by this victory he puts an end to the maritime power of Athens - 407  
The Persians engage Conon to command their fleet, with which he entirely vanquishes the Lacedæmonian fleet, and takes fifty sail out of ninety 400  
The Persian fleet conquer the Spartan

at Cnidos; Pisander, the Athenian admiral, is killed; and the maritime power of the Lacedæmonians destroyed.—*Thucydides* - - - 394  
The Roman fleet employed in the siege of Lilybæum, burned by the Carthaginians - - - - - 249  
The Carthaginian fleet destroyed by the consul Lutatius - - - - - 242  
The Roman fleets vanquished by Hannibal, the Carthaginian general; 800 galleys taken, and 16,000 prisoners; second Punic war - - - - - 209  
At Actium, between the fleets of Octavianus Cæsar and Marc Antony. This battle decides the fate of the latter, 300 of his galleys going over to Cæsar, by which he is totally defeated - 31

#### ANNO DOMINI.

The emperor, Claudius II. defeats the Goths, and sinks 2000 of their ships.—*Du Fresnoy* - - - - - 269

NAVAL BATTLES, *continued.*

The fleets belonging to Spain, Venice, and Pius V. defeat the Turkish fleet in the Gulf of Lepanto. The Christian fleet consisted of 206 galleys, and 30,000 men. The Turks, out of 250 galleys, saved only 100; and lost 30,000 men in killed and prisoners.—*Voltaire* - 1571  
 Bay of Gibraltar; Dutch and Spaniards. This was a bloody conflict and decisive victory, and settled for a time the superiority of the Dutch, Apr. 25, 1607

## NAVAL ENGAGEMENTS IN BRITISH HISTORY.

Alfred, with 10 galleys, defeated 300 sail of Danish pirates on the Dorset and Hampshire coast.—*Asser's Life of Alfred* - 897  
 Near Sluys; Edward III. defeated the French fleet of 400 sail, which were all sunk. 30,000 French were killed in this engagement - 1340  
 The English and Flemings; the latter signally defeated - 1371  
 English and French, in which the latter power loses 80 ships - 1389  
 Near Milford Haven; the English take 14, and destroy 15 French ships - 1405  
 Off Barfleur; the duke of Bedford takes 500 French ships - 1416  
 In the Downs; the French fleet captured by the earl of Warwick - 1459  
 Bay of Biscay; English and French, the latter defeated - 1512  
 Sir Edward Howard defeats the French under Prejeant - 1513  
 In the Channel; the British defeat the French fleet with great loss - 1545  
 The *Spanish Armada* driven from the English Channel to the road of Calais, by a running fight, the Spaniards losing 15 ships and 5000 men; they are again defeated, and obliged to bear away for Scotland and Ireland, when their fleet is dispersed in a storm, and they lose 17 more ships, and 5000 more men. See *Armada* - July 19, 1588  
 Dover Straits; between the Dutch admiral, Van Tromp, and admiral Blake. The Dutch surprise the English in the Downs, 80 sail engaging 40 English, six of which are taken or destroyed; and the Dutch admiral sails in triumph through the channel, with a broom at his mast-head, to denote that he had swept the English from the seas - June 29, 1652  
 In the Downs; same admirals, and nearly same loss  
 Sept. 23, Oct. 23, and Nov. 29, 1652  
 The English gain a victory over the Dutch fleet off Portsmouth, taking and destroying 11 men of war and 30 merchantmen. Van Tromp was the Dutch, and Blake the English admiral Feb. 10, 1653  
 Again, near Portland, between the English and Dutch; the latter defeated Feb. 13, 1653  
 Again, off the North Foreland. The Dutch and English fleets consisted of near 100 men-of-war each. Van

Tromp commanded the Dutch; Blake, Monk, and Deane, the English. Six Dutch ships were taken; 11 were sunk, and the rest ran into Calais road - June 2, 1653  
 Again, on the coast of Holland; the Dutch lost 30 men-of-war, and admiral Tromp was killed - July 31, 1653  
 At Cadiz, when two galleons, worth 2,000,000 pieces of eight, were taken by the English - Sept. 1656  
 The Spanish fleet vanquished, and then burnt in the harbor of Santa Cruz, by Blake - April, 1657  
 English and French; 130 of the Bordeaux fleet destroyed by the duke of York - Dec. 4, 1664  
 The duke of York, (afterwards James II.) defeats the Dutch fleet off Harwich; the Dutch admiral blown up with all his crew; 18 capital ships taken, 14 destroyed - June 3, 1665  
 The earl of Sandwich took 12 men of war and 2 India ships - Sept. 4, 1665  
 A contest between the Dutch and English fleets for victory, maintained for four days. The English lose 9, and the Dutch 15 ships, June 1 to 4, 1666  
 Decisive engagement at the mouth of the Thames, when the English gain a glorious victory, the Dutch lose 24 men-of-war, 4 admirals killed, and 4000 officers and seamen. Fought July 26, 1666  
 The English fleet of 16 sail, defeat the French of 30, near Marinico - 1667  
 Coast of Holland; by Prince Rupert, May 28, June 4, and Aug. 11, D'Eurees and Ruyter defeated - 1673  
 Several actions to the disadvantage of the Dutch. They agree to strike to the English colors in the British seas, 25 Charles II. - 1673  
 Off Tangiers, battle between the English and Moors, which lasted 11 days - 1679  
 Off Beachy-head; the English and Dutch are defeated by the French, June 30, 1690  
 The English and Dutch combined fleets gain a signal victory over the French fleet, near Cape La Hogue; 21 of their largest men-of-war were destroyed.— See *La Hogue* - May 19, 1692  
 Off St. Vincent; the English and Dutch squadrons, under admiral Rooke, defeated by the French - June 16, 1693  
 Off Cartagena, between admiral Benbow and the French fleet, commanded by admiral Du Casse, fought Aug. 19.  
 The English and Dutch fleets, under sir George Rooke, defeat the French fleet (having the Spanish galleons in convoy) in the port of Vigo. They take 9 out of 13 galleons, laden chiefly with silver, and six men-of-war; the other 4 galleons, and 14 men-of-war, destroyed, fought Oct. 12, 1702  
 Off the Lizard, when the English fleet was defeated - Oct. 9, 1707

NAVAL BATTLES, *continued.*

- In the Mediterranean, admiral Leake took sixty French vessels laden with provisions - May 22, 1708
- The Spanish fleet of 27 sail totally defeated by sir George Byng, in the Faro of Messina - Aug. 11, 1718
- Bloody battle off Toulon; Matthews and Lestock against the fleets of France and Spain. Here the brave captain Cornwall fell; and the victory was lost by a misunderstanding between the English admirals.—*Naval Hist.* - 1744
- Off Cape Finistere, the French fleet taken by admiral Anson - May 3, 1747
- In the East Indies; the French retired to Pondicherry - 1747
- Off Ushant, when admiral Hawke took seven men-of-war of the French - Oct. 14, 1747
- Admiral Hawke defeats the French fleet commanded by Conflans, in Quiberon Bay; and thus prevents a projected invasion of England, fought Nov. 20, 1759
- Keppel took 3 French frigates, and a fleet of merchantmen - Oct. 9, 1762
- Near Cape St. Vincent, between admiral Rodney and admiral Don Langara, the latter defeated and taken prisoner, losing 8 ships - Jan. 8, 1780
- At St. Jago; Mons. Suffrein defeated by commodore Johnston - April 16, 1781
- Admiral Rodney defeated the French going to attack Jamaica, took 10 ships of the line, (1 sunk, and 3 blown up) and sent the French admiral, count de Grasse, prisoner to England - April 12, 1782
- The British totally defeated the fleets of France and Spain, in the bay of Gibraltar.—See *Gibraltar* - Sept. 13, 1782
- Cape St. Vincent; the Spanish fleet defeated by Sir J. Jervis, and 4 line of battle ships taken - Feb. 14, 1797
- Unsuccessful attempt on Santa Cruz; admiral Nelson loses his right arm; - July 24, 1797
- Camperdown; the Dutch signally defeated by admiral Duncan, and 15 ships of war, with the admiral (De Winter), taken - Oct. 11, 1797
- Nile; Toulon fleet defeated by sir Horatio Nelson, at Aboukir; 9 ships of the line taken, 2 burnt, 2 escaped, - Aug. 1, 1798
- Gibraltar bay; engagement between the French and British fleets; the *Hannibal* of 74 guns lost - July 6, 1801
- Off Cadiz; sir James Saumarez obtains a victory over the French and Spanish fleets; 1 ship captured, fought - July 12, 1801
- Sir Robert Calder with 15 sail, takes 2 ships (both Spanish) out of 20 sail of the French and Spanish combined fleets, off Ferrol - July 22, 1805
- Off Trafalgar; memorable battle, in which lord Nelson defeated the fleets of France and Spain, and in which he received his mortal wound.—(See *Trafalgar*) - Oct. 21, 1805
- Sir R. Strachan, with 4 sail of British, captures 4 French ships of the line, off Cape Ortegal - Nov. 4, 1805
- In the West Indies; the French defeated by sir T. Duckworth; 3 sail of the line taken, 2 driven on shore - Feb. 6, 1806
- Sir John Borlase Warren captures the French fleet under command of admiral Linois - March 13, 1806
- Admiral Duckworth effects the passage of the Dardanelles. See *Dardanelles*, - Feb. 19, 1807
- Copenhagen fleet of 18 ships of the line, 15 frigates, and 31 other vessels, surrenders to lord Cathcart and admiral Gambier. (See *Copenhagen*) - Sept. 7, 1807
- The Russian fleet of several sail, in the Tagus, surrenders to the British, - Sept. 3, 1808
- Algiers bombarded by lord Exmouth. See *Algiers* - Aug. 27, 1816
- Navarino; the British, French, and Russian squadrons, defeat and annihilate the Turkish navy. See *Navarino* - Oct. 20, 1827
- Action between the British ships *Volage* and *Hyacinth*, and 29 Chinese war junks, which were defeated - Nov. 3, 1839
- Bombardment and fall of Acre. The British squadron under admiral Stopford achieved this triumph with trifling loss, while the Egyptians lost 2000 killed and wounded, and 3000 prisoners. See *Syria* - Nov. 3, 1840

## NAVAL BATTLES OF THE UNITED STATES.

- Paul Jones, in the Providence privateer, takes 16 prizes - 1776
- His descent on Whitehaven - April 1778
- He captures the British frigate *Serapis* - Sept. 23, 1779
- Frigate Philadelphia taken by the Tripolitans - 1803
- recaptured by Decatur - Feb. 1, 1804
- Tripoli bombarded by commodore Preble - Aug. 1804
- Frigate Chesapeake fired upon by the British ship *Leopard*, for refusing to be searched - 1807
- Frigate President, vs. British sloop *Little Belt* - May 16, 1811
- Constitution captures British frigate *Guerriere* - Aug. 13, 1812
- Captain Elliott captures two British frigates on lake Erie - Oct. 8, 1812
- Sloop Wasp captures British sloop *Prolic*, Oct. 18; both vessels captured by British 74, *Poictiers* - Oct. 20, 1812
- Frigate United States, captain Decatur, captures British frigate *Macedonian* - 1812
- Constitution, captain Bainbridge, captures British frigate *Java* - Oct. 29, 1812
- Hornet, captain Lawrence, captures British ship *Peacock*, captain Peake, - Feb. 23, 1813

NAVAL BATTLES, U. S. *continued.*

[Delaware and Chesapeake bays blockaded by British.]  
 Frigate Chesapeake surrendered to the British frigate Shannon June 1, 1813  
 Sloop Argus, captured by British sloop Pelican - Aug. 14, 1813  
 Brig Enterprise captures the British brig Boxer - Aug. 1813  
 Fleet on lake Erie, commodore Perry, captures the British fleet Sept. 10, 1813  
 Flotilla, commodore Chauncey, captures British flotilla on lake Ontario, Oct. 5, 1813  
 Frigate Essex, commodore Porter, captured by frigate Phœbe and sloop Cherub - March 28, 1814  
 Sloop Frolic, commodore Bainbridge, surrendered to British frigate Orpheus - April 21, 1814

Sloop Peacock, captain Warrington, captures British brig Epervier April 29, 1814  
 Sloop Wasp, captain Blakeley, captures British brig Reindeer, June 28, 1814  
 Flotilla, commodore Macdonough, victorious over the British on lake Champlain - Sept. 11, 1814  
 Frigate President, surrendered to the British frigate Endymion Jan. 15, 1815  
 Frigate Constitution captures British brigs Cyane and Levant, off Maderia Feb. 1815  
 Sloop Hornet, commodore Biddle, captures British brig Penguin, off Brazil, Feb. 23, 1815  
 U. S. naval force under commodore Conner bombards Vera Cruz (jointly with the land force under general Scott) - 1847

NAVARINÒ, BATTLE OF, between the combined fleets of England, France, and Russia, under command of admiral Codrington, and the Turkish navy, in which the latter was almost wholly annihilated. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies, Oct. 20, 1827. The species of policy which led to this attack upon Turkey, was that of Mr. Canning's administration. This destruction of the Turkish naval power was characterized, by the illustrious duke of Wellington, as being an "untoward event," a memorable phrase, applied to it to this day.

NAVIGATION. It owes its origin to the Phœnicians, about 1500 B. C. The first laws of navigation originated with the Rhodians, 916 B. C. The first account we have of any considerable voyage is that of the Phœnicians sailing round Africa 604 B. C.—*Blair*. On the destruction of Thebes by Alexander the Great, 335 B. C., its commerce passed to Alexandria, and subsequently the Romans became the chief masters of commerce. It passed successively from the Venetians, Genoese, and Hanse Towns, to the Portuguese and Spaniards; and from these to the English and Dutch.

NAVIGATION, INLAND, OF THE UNITED STATES. An official report of U. S. Engineers in 1842 states the number of miles of the rivers west of the Alleghanies, navigable for steamboats, 16,674 miles; entire length of *lake coast*, of which 2000 belong to British possessions, 5000 miles. The steam<sup>1</sup> at tonnage of the western rivers in 1846 was 249,055 tons. Aggregate value of commerce on the western rivers, \$183,609,725. Estimated amount of lake tonnage, \$61,914,910. [For tonnage of ocean shipping at different periods, see *Shipping*.]

NAVIGATION, INLAND, OF GREAT BRITAIN. Mr. Nimmo, in his evidence before the Committee on the state of Ireland, in 1824, said, "we have more inland navigation in Britain than in all the rest of the world put together." The total length of the inland navigation of England, including as well the

navigable rivers as canals, is 5300 miles. See *Canals*.—*Haydn*. This statement scarcely agrees with the preceding.

**NAVIGATION LAWS.** The laws of Oleron were decreed, 6 Richard I., 1194. See *Oleron*. The first navigation act was passed in 1381. Another and more extensive act was passed in 1541. Act relating to the trade of the colonies passed in 1646; and several acts followed relating to navigation. The act regulating the navigation of the river Thames was passed in 1786. Navigation Act, for the encouragement of British ships and seamen, passed 4 William IV., August 1833. British and American navigation laws repealed, 1849.

**NAVY OF THE UNITED STATES.** The first ship of war of the United States was built under the superintendence of the celebrated John Paul Jones, at Portsmouth, N. H., 1781; but the regular navy was commenced by Act of Congress, authorizing the building of six frigates, March 30, 1794. The Constitution launched at Boston, Constellation at Baltimore, 1797. [See *Naval Battles*.]

### NAVIES OF EUROPE AND AMERICA.

**NAVY OF ENGLAND.** The first fleet of galleys, like those of the Danes, was built by Alfred, A. D. 897. The number of galleys had increased under Edgar to 350, about A. D. 965. A formidable fleet was equipped by the public contribution of every town in England, in the reign of Ethelred II., 1007, *et seq.*, when it rendezvoused at Sandwich to be ready to oppose the Danes. From this period fleets were occasionally furnished by the maritime towns, and the Cinque ports, and were usually commanded by the king, or an admiral under him: such was the fleet of Edward III. at the siege of Calais in 1347; it consisted of 40 ships, badly equipped, under no public fixed regulations. The date of the commencement of the Royal or British navy, may therefore be placed 4 Henry VIII. 1512, when the first Navy-office was appointed, with commissioners to manage naval affairs, and a number of stout ships of war began to be permanently kept on foot by the crown.—*Gibson's Camden.* In the time of Henry VIII. the navy consisted of 1 ship of 1200 tons, 2 of 800 tons, and six or seven smaller; the largest was called the *Great Harry*. Elizabeth's fleet at the time of the Spanish Armada, in 1588, consisted of only 28 vessels, none larger than frigates. James I. added 10 ships of 1400 tons each, and 64 guns, the largest then ever built.—*Gibson's Continuation of Camden.*

ACCOUNT OF THE PROGRESSIVE INCREASE OF THE ROYAL NAVY OF ENGLAND, FROM HENRY VIII.'S REIGN TO THE CLOSE OF THE LAST WAR, 1814.

| Yr.  | Ships. | Tons.   | Men voted | Navy estim. | Yr.  | Ships. | Tons.   | Men voted | Navy estim. |
|------|--------|---------|-----------|-------------|------|--------|---------|-----------|-------------|
| 1521 | 16     | 7,260   | —         | no account. | 1760 | 412    | 321,134 | 70,000    | £3,227,143  |
| 1578 | 24     | 10,506  | 6,700     | no account. | 1793 | 498    | 433,226 | 45,000    | 5,525,331   |

| 1658 | 157    | 57,000  | 21,910    | no account. | 1808 | 869    | 892,800 | 143,800   | 17,496,047  |
| 1638 | 173    | 101,892 | 42,000    | no account. | 1814 | 901    | 966,000 | 146,000   | 18,786,509  |
| 1702 | 272    | 159,020 | 40,000    | £1,056,915  |      |        |         |           |             |

In 1814, Great Britain had 901 ships, of which 177 were of the line; and in 1830, she had 621 ships, some of 140 guns each, and down to surveying vessels of 2 guns only. Of these 148 sail were employed on foreign and home service. On Jan. 1, 1841, the total number of ships of all sizes in commission was 183.

**NAVY OF FRANCE.** It is first mentioned in history A. D. 728, when, like that of England at an early period, it consisted of Galleys; in this year the French defeated the Frison fleet. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was in perhaps its highest splendor about 1781; but it became greatly reduced in the late wars against England.

**NEBRASKA.** A territory of the United States as yet (1850) unorganized, occupying 400,000 square miles, the entire space between the Missouri and White Earth Rivers on the east, the Rocky Mountains on the west, the 49th parallel lat. on the north, and the Kansas and Arkansas rivers on the south. First traversed by Lewis and Clarke's expedition, in 1805, and partly explored by Fremont, on his way to Oregon, in 1842.

**NEEDLES.** They make a considerable article of commerce, as well as of home trade in England. German and Hungarian steel is of most repute for needles. The first that were made in England were fabricated in Cheapside, London, in the time of the sanguinary Mary, by a negro from Spain; but, as he would not impart the secret, it was lost at his death, and not recovered again till 1566, in the reign of Elizabeth, when Elias Growse, a German, taught the art to the English, who have since brought it to the highest degree of perfection.—*Stowe.* The family of the Greenings, ancestors of lord Dorchester, established a needle manufactory in Bucks, about this time.—*Anderson.*

**NEMEAN GAMES.** So called from Nemæa, where they were celebrated.

They were originally instituted by the Argives in honor of Archemorus, who died by the bite of a serpent, and Hercules some time after renewed them. They were one of the four great and solemn games which were observed in Greece. The Argives, Corinthians, and the inhabitants of Cleonæ, generally presided by turns at the celebration, in which were exhibited foot and horse-races, chariot-races, boxing, wrestling, and contests of every kind, both gymnical and equestrian. The conqueror was rewarded with a crown of olives, afterwards of green parsley, in memory of the adventure of Archemorus, whom his nurse laid down on a sprig of that plant. They were celebrated every third, or according to others, every fifth year, or more properly on the first and third year of every Olympiad, 1226 B. C.—*Herodotus*.

**NEPTUNE.** The new planet predicted by Le Verrier; discovered by Dr. Galle of Berlin, Sept. 23, 1846.

**NESTORIANS.** A sect of Christians, the followers of Nestorius, some time bishop of Constantinople, who, by the general strain of church historians, is represented as a heretic, for maintaining that though the Virgin Mary was the mother of Jesus Christ as man, yet she was not the mother of God, for that no human creature could participate that to another, which she had not herself; that God was united to Christ under one person, but remained as distinct in nature and essence as though he had never been united at all; that such union made no alteration in the human nature, but that he was subject to the same passions of love and hatred, pleasure and pain, &c., as other men have, only that they were better regulated, and more properly applied than in ordinary men. The generality of Christians in the Levant go under this name; they administer the sacrament with leavened bread, and in both kinds, permit their priests to marry, and use neither confirmation nor auricular confession, &c. Nestorius died A. D. 439.—*Du Pin*.

**NETHERLANDS.** They were attached to the Roman Empire under the name of Belgia, until its decline in the fifth century. For several ages this country formed part of the kingdom of Austrasia. In the twelfth century it was governed by its own counts and earls; and afterwards fell to the dukes of Burgundy, and next to the house of Austria. The seventeen provinces were united into one state, in 1549. For the late history of the Netherlands see *Holland and Belgium*.

**NEVIS.** An English colony, first planted by the English in 1628. This island was taken by the French, Feb. 14, 1782, but was restored to the English at the general peace in the next year. The capital of this island (one of the Caribbees) is Charleston. See *Colonies*.

**NEW ENGLAND.** The confederation of the northeastern colonies of America under this name, for mutual defence, 1643. Sir E. Andros, the tyrannical governor of New England, 1686. The New England States are Maine, New Hampshire, Massachusetts, Vermont, Connecticut, and Rhode Island. See these respectively.

**NEW HAMPSHIRE.** One of the United States; was first granted to Ferdinando Gorges in 1662; first settled at Dover and Portsmouth in 1623. It came voluntarily under the jurisdiction of Massachusetts in 1641; but was made a separate province by an act of Charles I. in 1679. It was several times afterwards connected with Massachusetts until 1741, since which it has remained a separate State. Constitution formed in 1784, and amended, 1792. Population in 1790 was 141,885; in 1800, 138,858; in 1830, 269,328; in 1840, 284,574.

**NEW HOLLAND.** The largest known land that does not bear the name of a continent. When this vast island was first discovered is uncertain. In the beginning of the seventeenth century the north and west coasts were traced

by the Dutch; and what was deemed, till lately, the south extremity, was discovered by Tasman, in 1642. Captain Cook, in 1770, explored the east and north-east from  $38^{\circ}$  south, and ascertained its separation from New Guinea; and, in 1773, captain Furneaux, by connecting Tasman's discoveries with Cook's, completed the circuit. But the supposed south extremity, which Tasman distinguished by the name of Van Diemen's Land, was found, in 1798, to be an island, separated from New Holland by a channel forty leagues wide, named from the discoverer, Bass Strait. Different parts of the coast have been called by the names of the discoverers, &c. The eastern coast, called New South Wales, was taken possession of in the name of George III. of England, by captain Cook, and now forms a part of the British dominions. See *New South Wales*.

**NEW JERSEY.** One of the United States; first settled by the Dutch from New York, at Bergen, 1614–20. A colony of Swedes and Finns on the Delaware, 1627. The province included with New York in the grant by Charles II. to the duke of York in 1664; granted by the duke to lord Berkley and sir George Cartaret, who established a government in 1695. Subdued by the Dutch in 1672, but surrendered by them, 1674; purchased by a company of English emigrants, who formed the first English settlement at Salem, 1674; government surrendered to the crown (in consequence of difficulty about titles, &c.) and accepted by queen Anne, 1702; continued under royal instead of proprietary government until 1776. This State suffered much in the revolution, and acted an important part. Adopted the Federal Constitution by unanimous vote in 1787. Population in 1732, 47,000; in 1790, 184,189; in 1830, 320,779; in 1840, 373,306.

**NEW MEXICO,** according to Spanish and Mexican authorities, extends from about  $32^{\circ}$  to  $42^{\circ}$  N. latitude, and from  $23^{\circ}$  to about  $33^{\circ}$  long. W. of Washington—an area of about 200,000 square miles. The country taken possession of for Spain, by Juan de Onate, sent by count de Monterey, viceroy of Mexico, in 1594. A great massacre of the Spaniards in their pueblos or fort, by the Indians, 1680, when the governor retreated from Santa Fé, and founded Paso del Norte. The whole country reconquered by the Spaniards after a war of ten years; but a deadly hatred has since continued between the races. New Mexico ceded to the United States by the treaty with Mexico, 1848. A large part of it is claimed by Texas, and the boundary is yet (July 1850) undecided.

**NEW SOUTH WALES.** See *New Holland*. The eastern coast of New Holland was explored and taken possession of by captain Cook, for England, in 1770. It was at the recommendation of this illustrious navigator that the design of a convict colony here was first formed. Governor Phillips, the first governor, arrived at Botany Bay with 800 convicts, January 20, 1788: but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital.

**NEW STYLE.** Ordered to be used in England in 1751; and the next year eleven days were left out of the calendar—the third of September, 1752, being reckoned as the fourteenth—so as to make it agree with the Gregorian Calendar, *which see*, and also article *Calendar*. In the year A. D. 200, there was no difference of styles; but there had arisen a difference of eleven days between the old and the new style, the latter being so much beforehand with the former; so that when a person using the old style dates the 1st of May, those who employ the new, reckon the 12th. From this variation in the computation of time, we may easily account for the difference of many dates concerning historical facts and biographical notices.

**NEW YEAR'S DAY.** Its institution as a feast, or day of rejoicing, is the oldest on authentic record transmitted down to our times, and still observed.

The feast was instituted by Numa, and was dedicated to Janus (who presided over the new year), January 1, 713 B. C. On this day, the Romans sacrificed to Janus a cake of new sifted meal, with salt, incense, and wine; and all the mechanics began something of their art or trade; the men of letters did the same as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. After the government was in the hands of the emperors, the consuls marched on New-year's day to the capitol, attended by a crowd, all in new clothes, when two white bulls never yoked were sacrificed to Jupiter Capitolinus. A great deal of incense and other perfumes were spent in the temple; the flamens, together with the consuls, during this religious solemnity offered their vows for the prosperity of the empire and the emperor, after having taken an oath of allegiance, and confirmed all public acts done by him the preceding year. On this day the Romans laid aside all old grudges and ill humor, and took care not to speak so much as one ominous or untoward word. The first of January is more observed as a feast-day in Scotland than it is in England. In many parts of the United States, but chiefly in New York, this is observed as a holiday, the ladies receiving complimentary visits from the other sex. This custom is derived from the Dutch; but is also observed in Paris.

**NEW-YEAR'S GIFTS.** Nonius Marcellus refers the origin of New-Year's gifts among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorized the custom afterwards, and gave these gifts the name of Strenæ, 747 B. C. In the reign of Augustus, the populace, gentry, and senators used to send him new-year's gifts, and if he was not in town, they carried them to the capitol. From the Romans this custom went to the Greeks, and from the heathens to the Christians, who very early came into the practice of making presents to the magistrates. Some of the fathers wrote very strenuously against the practice, upon account of the immoralities committed under that cover and protection; but since the governments of the several nations in Europe became Christian, the custom is still retained as a token of friendship, love, and respect. It is well observed in the United States.

**NEW YORK.** One of the United States. The river Hudson and the island of Manhattan, where New York city now stands, were discovered by Henry Hudson, an Englishman, in the service of the Dutch, 1609. First permanently settled on Manhattan island by the Dutch in 1621; surrendered to the English, under Richard Nichols, for the duke of York, in 1664; confirmed to England by the peace of Breda, 1667; retaken by a Dutch expedition in 1673; restored to the duke of York with a new patent, 1674; first legislative assembly, 1683; Jacob Leisler's revolution, 1689; episcopacy established by law, 1693; negro conspiracy, 1741; colony took an active part in French war, 1756, and the war of Independence; city captured by English, 1776; who evacuated it Nov. 25, 1783; State adopted the Federal Constitution by 30 to 35, 1788; adopted new State Constitution, 1846. Population in 1732, 65,000; in 1790, 340,820; in 1810, 959,049; in 1820, 1,372,812; in 1840, 2,428,921.

**NEW YORK, CITY OF.** Founded by the Dutch, 1614; fort built by them at S. point of the island, 1623; surrendered to the English, 1664; assessed value of all the property in the town in 1668, was £78,231; city taken by the British, 1776; evacuated, Nov. 25, 1783; meeting of first United States Congress here, 1785; Washington inaugurated President of the United States, at the City Hall in Wall-street, April 30, 1789; yellow fever prevailed here in 1795 and 1805; cholera in 1832, 1834, and 1849. Great fire in

the business part of the city, swept over 40 acres, and destroyed property valued at about \$20,000,000, Dec. 16, 1835; another in same neighborhood, 1845; the whole district rebuilt and improved shortly after; celebration of the completion of Croton Aqueduct, Oct. 14, 1842. Population in 1790, 33,131; in 1810, 96,373; in 1830, 202,589; in 1840, 312,710.

**NEW ORLEANS, CITY OF.** Founded by the French in 1717; conveyed to the Spanish, 1762; recovered by the French, 1800; purchased by the United States in the purchase of Louisiana, 1803. The battle of, between the Americans under Gen. Jackson, and the British under Packenham, in which the latter were defeated with loss of 3,000 killed and wounded, the Americans losing only 7 killed and 6 wounded, Jan. 8, 1815. Population in 1810, was 17,242; in 1830, 46,310; in 1840, 102,193, including 23,419 slaves.

**NEWCASTLE, ENGLAND.** The first coal port in the world. The coal-mines were discovered here about A. D. 1234. The first charter which was granted to the townsmen for digging coal was by Henry III. in 1239; but in 1306, the use of coal for fuel was prohibited in London, by royal proclamation, chiefly because it injured the sale of wood for fuel, great quantities of which were then growing about that city; but this interdiction did not long continue, and we may consider coal as having been dug and exported from this place for more than 500 years.

**NEWFOUNDLAND,** discovered by Sebastian Cabot, who called it *Prima Vista*. June 24, A. D. 1494. It was formally taken possession of by sir Henry Gilbert, 1583. In the reign of Elizabeth, other nations had the advantage of the English in the fishery. There were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England, in 1577.—*Hackluyt*. But the English fishery in some years afterwards had increased so much that the ports of Devonshire alone employed 150 ships, and sold their fish in Spain, Portugal, and Italy, 1625. Nearly 1000 English families reside here all the year; and in the fishing season, beginning in May and ending in September, more than 15,000 persons resort to Newfoundland, which may be esteemed as one of our finest nurseries for seamen. Newfoundland has recently obtained the privilege of a colonial legislation. A bishopric was established here in 1839. Appalling fire at St. John's; a great portion of the town destroyed; the loss estimated at £1,000,000 sterling, June 9, 1846.

**NEWS.** The origin of this word has been variously defined. News is a fresh account of any thing.—*Sidney*. It is something not heard before.—*L'Estrange*. News is an account of the transactions of the present times.—*Addison*. The word "news" is not, as many imagine, derived from the adjective new. In former times (between the years 1595 and 1730) it was a prevalent practice to put over the periodical publications of the day the initial letters of the cardinal points of the compass, thus;—

importing that these papers contained intelligence from the four quarters of the globe; and from this practice is derived the term Newspaper.

**NEWSPAPERS.** The first published in England, which might truly be considered as a vehicle of GENERAL INFORMATION, was established by sir Roger L'Estrange, in 1663; it was entitled the *Public Intelligencer*, and continued nearly three years, when it ceased on the appearance of the *Gazette*. A publication, with few claims however to the character of a newspaper, had

previously appeared; it was called the *English Mercury*,\* and came out under the authority of queen Elizabeth, so early as 1588, the period of the Spanish armada. An early copy of this paper is dated July 23, in that year. In the reign of James I., 1622, appeared the *London Weekly Courant*, and in the year 1643 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers, of which the following were the titles:—

*England's Memorable Accidents.*  
*The Kingdom's Intelligencer.*  
*The Diurnal of Certain Passages in Parliament.*  
*The Mercurius Aulicus.*  
*The Scotch Intelligencer.*  
*The Parliament's Scout.*

*The Parliament's Scout's Discovery, or Certain Information.*  
*The Mercurius Civicus, or London's Intelligencer.*  
*The Country's Complaint, &c.*  
*The Weekly Account.*  
*Mercurius Britannicus.*

A paper called the *London Gazette* was published August 22, 1642. The *London Gazette* of the existing series, was published first at Oxford, the court being there on account of the plague, Nov. 7, 1665, and afterwards at London, Feb. 5, 1666. See *Gazette*. The printing of newspapers and pamphlets was prohibited 31 Charles I., 1680.—*Salmon's Chron.* Newspapers were first stamped in 1713. No. of the stamps issued:—

|                            |                            |                            |
|----------------------------|----------------------------|----------------------------|
| In 1753 . . . . 7,411,757  | In 1810 . . . . 20,172,837 | In 1835 . . . . 32,374,652 |
| In 1760 . . . . 9,404,790  | In 1820 . . . . 24,862,186 | In 1840 . . . . 49,033,384 |
| In 1774 . . . . 12,300,000 | In 1825 . . . . 26,950,693 | In 1843 . . . . 56,443,977 |
| In 1790 . . . . 14,035,639 | In 1830 . . . . 30,153,741 | In 1849 . . . . 76,569,235 |
| In 1800 . . . . 16,084,905 |                            |                            |

The total number of newspapers published in the United Kingdom in 1849 was 603, viz: 160 in London, 232 in the English provinces, 117 in Ireland, and 94 in Scotland. The number of advertisements inserted in the London newspapers in 1849 was 886,108, paying a gross duty of £66,458 2s.; in the English provincial newspapers, 834,729, yielding to the crown a revenue of £62,604 13s. 6d.; in the Irish papers, 220,524, paying £11,026 4s., and in the Scotch papers, 2,409,11, paying in duty £18,075 16s. 6d.

**NEWSPAPERS, &c. IN THE UNITED STATES.** The first was the "*Boston News Letter*," in 1704, which was continued till 1774; the second was the *Boston Gazette*, 1719; the third the *American Weekly Mercury*, at Philadelphia, started one day after the last. First *New York Gazette*, in 1725; first newspaper in the Carolinas at Charleston, 1731-2; first *Rhode Island Gazette*, at Newport, 1732; first *Virginia Gazette*, at Williamsburgh, in 1736. In 1775, there were in all the colonies 37 newspapers; in 1810, in the United States, 358; in 1828, 802; in 1839, 1555. See *Periodical Lit.*

**NEWSPAPERS IN FRANCE.** The first was the *Gazette de France*, established by Renaudot, in 1631, and continued with few interruptions till 1827, when it ceased and another paper assumed its name. The *Moniteur*, commenced 1789, has been since 1800 the official journal of the Government. The *Constitutionnelle* and the *Journal des Debats* have long had the largest circulation. There were 374 newspapers published in France in 1832. See *Periodical Lit.*

**NEWSPAPERS, IRISH.** The first Irish newspaper was *Pue's Occurrences*, published in 1700: *Faulkner's Journal* was established by George Faulkner, "a man celebrated for the goodness of his heart, and the weakness of his head," 1728.—*Supplement to Swift*. The oldest of the existing Dublin newspapers,

\* The full title is, "No. 50, *The English Mercurie*, published by authority, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the armament called the Spanish Armada, giving "A journal of what passed since the 21st of this month, between her Majesty's fleet and that of Spayne, transmitted by the Lord Highe Admirall to the Lordes of council."

[It is said by Mr. Watts of the British Museum (1850), that this paper was a forgery, and that the first English paper was the *Weekley Neues*, published by Nathaniel Butler in 1622.]

is the *Freeman's Journal*, founded by the patriot, Dr. Lucas, about the year 1755.—*Westminster Review*, Jan. 1830. The *Limerick Chronicle*, the oldest of the provincial prints, was established in 1768.—*Idem*.

**NEY, MARSHAL, HIS EXECUTION.** Ney was the duke of Elchingen, and prince of the Moskwa, and one of the most valiant and skilful of the marshals of France. After the abdication of Napoleon, 5th April, 1814, he took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March 13, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes filled with bullet-holes, and five horses having been shot under him, until night and defeat obliged him to fly. But though he was included in the decree of July 24, 1815, which guaranteed the safety of all Frenchmen, he was afterwards sought out, and taken in the castle of a friend at Urtillac, where he lay concealed, and brought to trial before the Chamber of Peers. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favor, yet he was sentenced to death, and met his fate with the fortitude which such a hero could hardly fail to evince, Aug. 16, 1815.

**NICENE CREED.** A summary of the Christian faith, composed at Nice by the first general council held there in the palace of Constantine the Great. In this celebrated council, which assembled A. D. 325, the Arians were condemned. It was attended by 318 bishops from divers parts, who both settled the doctrine of the Trinity, and the time for observing Easter.

**NILE, BATTLE OF THE.** One of the greatest in British naval history, between the Toulon and British fleets, the latter commanded by lord, then sir Horatio Nelson. This engagement took place near Rosetta, at the mouth of the celebrated river Nile; nine of the French line-of-battle ships were taken, two were burnt, and two escaped, August 1, 1798. This is sometimes called the battle of Aboukir; it obtained the conqueror a peerage, by the title of baron Nelson of the Nile; his exclamation upon commencing the battle was, "Victory or Westminster-abbey!"

**NILE, SOURCE OF THE.** This great river rises in the Mountains of the Moon, in about ten degrees of N. lat., and in a known course of 1250 miles receives no tributary streams. The travels of Bruce were undertaken to discover the source of the Nile; he set out from England in June, 1768; on the 14th of Nov. 1770, he obtained the great object of his wishes, and returned home in 1773. This river overflows regularly every year, from the 15th of June to the 17th of September, when it begins to decrease, having given fertility to the land; and it must rise 16 cubits to insure that fertility. In 1829, the inundation of the Nile rose to 26 instead of 22, by which 30,000 people were drowned, and immense property lost.

**NIMEGUEN, TREATY OF.** This was the celebrated treaty of peace between France and the United Provinces, 1678. Nimeguen is distinguished in history for other treaties of peace. The French were successful against the British under the duke of York, before Nimeguen, Oct. 28, 1794; but were defeated by the British, with the loss of 500 killed, Nov. 8, following.

**NITRIC ACID**, formerly called *aqua fortis*, first obtained in a separate state by Raymond Lully, an alchemist, about A. D. 1287; but we are indebted to Cavendish, Priestley, and Lavoisier, for our present knowledge of its properties. Mr. Cavendish demonstrated the nature of this acid, in 1785. Nitrous acid, nearly similar to nitric, was discovered by Scheele, in 1771. Nitrous gas was accidentally discovered by Dr. Hales. Nitrous Oxide Gas was discovered by Dr. Priestley, in 1776.

**NOBILITY.** The origin of nobility is referred to the Goths, who, after they had seized a part of Europe, rewarded their heroes with titles of honor, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estates were first granted to Philip the Fair of France, A. D. 1095. George Neville, duke of Bedford (son of John, marquess of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edward IV. 1478. Noblemen's privileges were restrained in June 1773. See the various orders of nobility through the volume; see also *Peerage*.

**NOBILITY OF FRANCE.** The French nobility preceded that of England, and continued through a long line, and various races of kings, until the period of the memorable revolution. The National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquisses, knights, barons, excellencies, abbots, and others, be abolished; that all citizens take their family names; liveries, and armorial bearings, shall also be abolished, June 18, 1790. The records of the nobility, 600 volumes, were burned at the foot of the statue of Louis XIV., June 25, 1792. A new nobility was created by the emperor Napoleon, 1808. The hereditary peerage was abolished in that kingdom, December 27, 1831. See *France*.

**NON-CONFORMISTS.** The Protestants in England are divided into conformists and non-conformists; or, as they are commonly denominated, churchmen and dissenters. The former are those who conform to that mode of worship and form of church-government which are established and supported by the state; the latter are those who meet for divine worship in places of their own. The first place of meeting of the latter, in England, was established at Wandsworth, near London, November 20, 1572. The name of non-conformists was taken by the Puritans, after the Act of Uniformity had passed, August 24, A. D. 1662, when 2000 ministers of the established religion resigned, not choosing to conform to the Thirty-nine Articles.

**NON-JURORS, IN ENGLAND.** Persons who suppose that James II. was unjustly deposed, and who, upon that account, refused to swear allegiance to the family that succeeded him. Among this class of persons were several of the bishops, who were deprived in 1690. Non-jurors were subjected to a double taxation, and were obliged to register their estates, May 1723.

**NOOTKA SOUND.** Discovered by captain Cook in 1778. It was settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs; but the Spaniards, in 1789, captured two English vessels, and took possession of the settlement. The British ministry made their demand for reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

**NORFOLK ISLAND.** A penal colony of England. It was discovered in 1774, by captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson, in 1788, in Sydney bay, on the south side of the island. This has latterly been made the severest penal colony of Great Britain.

**NORMANDY.** Anciently Neustria. From the beginning of the ninth century this country was continually devastated by the Scandinavians, called Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, A. D. 905 to 912, and from its conquerors it received its present name. Rollo was the first duke, and held it as a fief of the crown of France, and several of his successors after him, till William, the seventh duke, conquered England, in

1066, from which time it became a province of England, till it was lost in the reign of king John, 1204, and reunited to the crown of France. The English, however, still keep possession of the islands on the coast, of which Jersey and Guernsey are the principal.

**NORTH-WEST PASSAGE.** The attempt to discover a northwest passage was made by a Portuguese named Cortereal, about A. D. 1500. It was attempted by the English in 1553; and the project was greatly encouraged by queen Elizabeth, in 1585, in which year a company was associated in London, and was called the "Fellowship for the Discovery of the Northwest Passage." The following voyages with this design, were undertaken, under British navigators, in the years respectively stated:—

Sir Hugh Willoughby's expedition to find a north-west passage to China, sailed from the Thames May 20, 1553  
 Sir Martin Frobisher's attempt to find a north-west passage to China - 1576  
 Captain Davis's expedition to find a north-west passage - 1585  
 Barentz's expedition - 1594  
 Weymouth and Knight's - 1602  
 Hudson's voyages; the last undertaken (See *Hudson's Bay*.) - 1610  
 Sir Thomas Button's - 1612  
 Baffin's.—See *Baffin's Bay* - 1616  
 Foxe's expedition - 1631  
 [A number of enterprises undertaken by various countries, followed.]  
 Middleton's expedition - 1742  
 Moore's and Smith's - 1746  
 Hearne's land expedition - 1769  
 Captain Phipps, afterwards lord Mulgrave, his expedition - 1773  
 Captain Cook in the *Resolution* and *Discovery* - July 1776  
 Mackenzie's expedition - 1789  
 Captain Duncan's voyage - 1790  
 The *Discovery*, captain Vancouver, returned from a voyage of survey and discovery on the north-west coast of America - Sept. 24, 1795  
 Lieut. Kotzebue's expedition - Oct. 1815  
 Captain Buchan's and lieut. Franklin's expedition in the *Dorothea* and *Trent* - 1818  
 Captain Ross and lieut. Parry, in the *Isabella* and *Alexander* - 1818  
 Lieuts. Parry and Liddon in the *Hecla* and *Griper* - May 4, 1819  
 They return to Leith - Nov. 3, 1820  
 Cpts. Parry and Lyon, in the *Fury* and *Hecla* - May 8, 1821  
 Capt. Parry's third expedition with the *Hecla* - May 8, 1824  
 Cpts. Franklin and Lyon, after having attempted a land expedition, again sail from Liverpool - Feb. 16, 1825

Captain Parry, again in the *Hecla*, sails from Deptford - March 25, 1827  
 And returns - Oct. 6, 1827  
 Capt. Ross arrived at Hull, on his return from his arctic expedition, after an absence of four years, and when all hope of his return had been nearly abandoned - Oct. 18, 1833  
 Capt. Back and his companions arrived at Liverpool from their perilous Arctic Land Expedition, after having visited the Great Fish River, and examined its course to the Polar Seas - Sept. 8, 1835  
 Captain Back sailed from Chatham in command of His Majesty's ship *Terror*, on an exploring adventure to Wager River. [Captain Back, in the month of Dec. 1835, was awarded, by the Geographical Society, the king's annual premium for his polar discoveries and enterprise - June 21, 1836  
 Dease and Simpson traverse the intervening space between the discoveries of Ross and Parry, and establish that there is a north-west passage - Oct. 1839  
 Sir John Franklin and capt. Crozier in the *Erebus* and *Terror* leave England - May 24, 1845  
 Capt. Ross returned from an unsuccessful expedition in search of Franklin 1849  
 Another expedition (one sent out by lady Franklin) in search of sir John Franklin, consisting of two vessels, sailed from England, April-May 1851  
 Still another, consisting of two vessels, the *Advance* and *Rescue*, liberally purchased for the purpose by Henry Grinnell, a New York merchant, and manned at Government cost from the U. S. navy, under command of lieut. de Haven, sailed from New York - May 1850

**NORTH CAROLINA, ONE OF THE UNITED STATES.** First permanent settlement at Albemarle, by emigrants from Virginia, who fled from religious per-

\* The gallant sir Hugh Willoughby took his departure from Radcliffe, on his fatal voyage for discovering the north-east passage to China. He sailed with great pomp by Greenwich, where the court then resided. Mutual honors were paid on both sides. The council and courtiers appeared at the windows, and the people covered the shores. The young king, Edward VI., alone lost the noble and novel sight, for he then lay on his death-bed; so that the principal object of the parade was disappointed. Sir Hugh Willoughby was unfortunately entangled in the ice, and frozen to death, on the coast of Lapland.—*Hackluyt*.

secution, about 1660. The district granted to lord Clarendon, who induced the celebrated John Locke to prepare a constitution for it, 1663. The chief magistrate was called the palatine, and there was an hereditary nobility. This constitution abolished, as defective, 1693. The two Carolinas purchased by the crown for £17,500, and divided into North and South, in 1720.

**NORWAY.** Until the ninth century, Norway was divided into petty principalities, and was little known to the rest of Europe except by the piratical excursions of its natives. It was converted to Christianity in A. D. 1000. The city of Bergen was founded in 1069. The kingdom was united to Denmark in 1378; and the three kingdoms of Norway, Denmark and Sweden were united, in 1439. Pomerania and Rugen were annexed to Denmark in exchange for Norway, in 1814, and on Nov. 4, in that year, Charles XIII. was proclaimed king by the National Diet assembled at Christiana. The two countries of Sweden and Norway have since then been termed the Scandinavian Peninsula, of which Bernadotte was crowned king by the title of Charles XIV., Feb. 5, 1818. See *Sweden*.

**NOTABLES OF FRANCE.** An assembly of the notables of France was convened by Calonne, the minister of Louis XVI., in 1788. The deranged state of the king's finances induced him to convoke the notables, who assembled Nov. 6, when Calonne opened his plan, but any reform militated too much against private interest to be adopted. Calonne not being able to do any good, was dismissed, and soon after retired to England: and Louis, having lost his confidential minister, Mons. de Vergennes, by death, called Mons. de Brienne, an ecclesiastic, to his councils. In the end, the States General were called, and from this assembly sprang the National Assembly, *which see*. The notables were dismissed by the king, Dec. 12, 1788. The Spanish notables assembled and met Napoleon (conformably with a decree issued by him commanding their attendance,) at Bayonne, May 25, 1808. See *Spain*.

**NOTARIES PUBLIC.** They were first appointed by the primitive fathers of the Christian church, to collect the acts or memoirs of the lives of the martyrs, in the first century.—*Du Fresnoy*. This office was afterwards changed to a commercial employment, to attest deeds and writings, so as to establish their authenticity in any other country.

**NOVA SCOTIA.** Settled in A. D. 1622, by the Scotch, under sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. Since its first settlement it has more than once changed rulers and proprietors, nor was it confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745, and 1758; but was again confirmed to England in 1760. Nova Scotia was divided into two provinces, in 1784; and was erected into a bishopric in August, 1787. See *Baronets*.

**NOVEMBER.** This was anciently the ninth month of the year (whence its name), but when Numa added the months of January and February, 713 B. C., the Romans had it for the eleventh, as it is now. The Roman senators (for whose mean servilities even Tiberius, it is said, often blushed) wished to call this month in which he was born, by his name, in imitation of Julius Cæsar, and Augustus; but this the emperor absolutely refused, saying, "What will you do, conscript fathers, if you have *thirteen* Cæsars?"

**NOVI, BATTLE OF.** in which the French army commanded by Joubert was defeated by the Russians under Suwarrow, with immense loss, Aug. 15, 1799. Among 10,000 of the French slain was their leader, Joubert, and several other distinguished officers. A second battle fought here between the Austrian and French armies, when the latter were signally defeated, January 8, 1800.

**NULLIFICATION OF THE LAWS OF THE UNITED STATES.** The right

claimed by South Carolina, and various threats held out by the legislature of that State, in 1832. Proclamation of president Jackson against the Nullifiers, Dec. 10. A "State Rights" convention at Columbia, S. C., same day. Calhoun resigned the office of vice-president of the United States, Dec. 28, 1832. Nullification nullified by South Carolina convention in consequence of Mr. Clay's compromise tariff, March 11, 1834.

**NUMANTINE WAR, AND SIEGE.** The celebrated war of Numantia with the Romans was commenced solely on account of the latter having given refuge to the Sigidians, their own allies, who had been defeated by the Romans, 141 B. C.—*Livy*. It continued for fourteen years; and though Numantia was unprotected by walls or towers, it bravely withstood the siege. The inhabitants obtained some advantages over the Roman forces till Scipio Africanus was empowered to finish the war, and to see the destruction of Numantia. He began the siege with an army of 60,000 men, and was bravely opposed by the besieged, who were not more than 4000 men able to bear arms. Both armies behaved with uncommon valor, and the courage of the Numantines was soon changed into despair and fury. Their provisions began to fail, and they fed upon the flesh of their horses, and afterwards on that of their dead companions, and at last were obliged to draw lots to kill and devour one another; and at length they set fire to their houses, and all destroyed themselves, B. C. 133, so that not even one remained to adorn the triumph of the conqueror.

**NUNCIO.** A spiritual envoy from the pope of Rome to Catholic states. In early times they and legates ruled the courts of several of the sovereigns of Germany, France, and even England. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II., 1687, is stated to have hastened the Revolution.

**NUNNERY.** The first founded is said to have been that to which the sister of St. Anthony retired at the close of the third century. The first founded in France, near Poitiers, by St. Marcellina, sister to St. Martin, A. D. 360.—*Du Fresnoy*. The first in England was at Folkstone, in Kent, by Eadbald, king of Kent, 630.—*Dugdale's Monasticon Anglicanum*. See articles *Abbeys* and *Monasteries*. The nuns were expelled from their convents in Germany, in July, 1785. They were driven out of their convents in France, in Jan., 1790.

## O.

**OATES TITUS, HIS PLOT.** This Oates was a wicked man, at one time chaplain of a ship of war. Being dismissed the service for his immoral conduct, he became a lecturer in London; and, in conjunction with Dr. Tongue, invented a pretended plot to assassinate Charles II., of which several persons, Catholics, were accused, and upon false testimony, convicted and executed, A. D. 1678. Oates was afterwards tried for perjury, (in the reign of James II.) and being found guilty, he was fined, put in the pillory, publicly whipped from Newgate to Tyburn, and sentenced to imprisonment for life, 1685; but was pardoned, and a pension granted him, 1689.

**OATHS.** The administration of an oath in judicial proceedings was introduced by the Saxons into England, A. D. 600.—*Rapin*. That administered to a judge was settled 1344. Of supremacy, first administered to British subjects, and ratified by parliament, 26 Henry VIII., 1535. Of allegiance, first framed and administered 3 James I., 1605.—*Slowe's Chron*. Of abjuration, being an obligation to maintain the government of king, lords, and commons, the Church of England, and toleration of Protestant dissenters, and

abjuring all Roman Catholic pretenders to the crown, 13 William III. 1701. Oaths were taken on the Gospels so early as A. D. 528; and the words "So help me God and all saints," concluded an oath until 1550.

**OATHS, ANCIENT.** The Greeks and Romans looked upon the infringement of an oath with still greater abhorrence than Christians; they permitted oaths to be taken upon every object in which the person who swore had a decided and sincere belief, upon all kinds of animals, fruits, and vegetables, the stars, the sun, the moon, and other things, without rendering the oaths less binding than if they had been sworn by Jupiter. Jaques Lydius has left us a long catalogue of the numerous objects by which the ancients swore. It was usual with them to swear by what they held most dear; as, for instance, by their own heads, by that of their friend, or by those persons whom they loved most tenderly. The most sacred oath far above any other was by the eyes of their mistress, by her kisses, by her hair.—*Ovid, &c.*

**OBELISK.** The first mentioned in history was that of Rameses, king of Egypt, about 1485 B. C. The Arabians call them Pharaoh's needles, and the Egyptian priests the fingers of the sun; they differed very much as to their costliness, magnitude and magnificence. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was a horizontal dial, that marked the hour, about 14 B. C.

**OBSERVATORIES.** The first is supposed to have been on the top of the temple of Belus at Babylon. On the tomb of Osymandias, in Egypt, was another, and it contained a golden circle 200 feet in diameter: that at Benares was at least as ancient as these. The first in authentic history was at Alexandria, about 300 B. C. The first in modern times was at Cassel, 1561. The Royal Observatory at Greenwich was founded by Charles II. A. D. 1675; and from the meridian of Greenwich all English astronomers make their calculations.

**OCTOBER.** The eighth month in the year of Romulus, as its name imports, and the tenth in the year of Numa. 713 B. C. From this time October has still retained its first name, in spite of all the different appellations which the senate and Roman emperors would have given it. The senate ordered it to be called *Faustinus*, in honor of *Faustina*, wife of Antoninus the emperor; Commodus would have had it called *Invictus*; and Domitian *Domitianus*. October was sacred to Mars.

**ODES** are nearly as old as the lyre; they were at first extempore compositions accompanying this instrument, and sung in honor of the gods. Perhaps the most beautiful and sublime odes ever written, as well as the oldest, are those of the royal prophet Isaiah, on the fall of Babylon, composed about 757 B. C. The celebrated odes of Anacreon were composed about 532 B. C.; and from his time this species of writing became usual. Anciently odes were divided into Strophe, Antistrophe, and Epode. This species of writing is that of our court poets at this day.●

**OGYGES, DELUGE OF.** The Deluge so called, from which Attica lay waste 200 years, occurred 1764 B. C. Many authorities suppose this to be no other

than the universal deluge; but according to some writers, if it at all occurred, it arose in the overflowing of one of the great rivers of the country. See *Deluge*.

**OHIO.** One of the United States. First permanently settled at Marietta, April 1788; second settlement was Symmes's purchase, 6 miles below Cincinnati, 1789; third by French emigrants at Gallipolis, 1791; fourth by New Englanders, at Cleveland and Comeant, 1796. First territorial legislature met at Cincinnati, 1799. The Western Reserve, under jurisdiction of Connecticut, was sold by that State for the benefit of her "School fund" in 1800. Ohio formed her State Constitution and was admitted into the Union, 1802. Population in 1790, was 3,000; in 1800, 45,365; in 1810, 230,760; in 1830, 937,637; in 1840, 1,519,467.

**OIL.** It was used for burning in lamps as early as the epoch of Abraham, about 1921 B. C. It was the staple commodity of Attica, and a jar full was the prize at the Panathenæan games. It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings, *Psalms* cxxxiii. 2; 1 *Sam.* x. 1; xvi. 13. The anointing with this liquid seems also to have been reckoned a necessary ingredient in a festival dress, *Ruth* iii. 3. The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale.

**OLBERS.** The asteroid of this name was discovered by M. Olbers, in 1802.

**OLYMPIADS.** The Greeks computed time by the celebrated era of the Olympiads, which date from the year 776 B. C., being the year in which Corebus was successful at the Olympic games. This era differed from all others in being reckoned by periods of four years instead of single years. Each period of four years was called an Olympiad, and in marking a date, the year and Olympiad were both mentioned. The second Olympiad began in 772; the third, in 768; the fourth, in 764; the fifth, in 760; the 10th in 740, &c.

**OLYMPIC GAMES.** These games, so famous among the Greeks, were instituted in honor of Jupiter. They were holden at the beginning of every fifth year, on the banks of the Alpheus, near Olympia, in the Peloponnesus, now the Morea, to exercise their youth in five kinds of combats. Those who were conquerors in these games were highly honored by their countrymen. The prize contended for was a crown made of a peculiar kind of wild olive, appropriated to this use. The games were instituted by Pelops, 1307 B. C. They are also ascribed to an ancient Hercules; and were revived by Iphytus among the Greeks, 884 B. C.—*Dufresnoy*.

**OMENS.** See *Augury*. Amphictyon was the first who is recorded as having drawn prognostications from omens, 1497 B. C. Alexander the Great is said to have had these superstitions; and also Mithridates the Great, celebrated for his wars with the Romans, his victories, his conquest of twenty-four nations, and his misfortunes. At the birth of this latter there were seen, for seventy days together, two large comets, whose splendor eclipsed that of the noonday sun, occupying so vast a space as the fourth part of the heavens; and this omen, we are told, directed all the actions of Mithridates throughout his life, so much had superstition combined with nature to render him great, 135 B. C.—*Justin*.

**OMNIBUSES.** These vehicles, of which there are nearly 4000 in the London circuit, were introduced there by an enterprising coach proprietor named Shillibeer, and first licensed at Somerset house in July, 1829. They probably originated in Paris, where they are now also very numerous. In New

York, Boston, &c., they were common as early as 1830. There were 465 licensed in New York in 1849.

**OPERA.** Octavio Rinuccini, of Florence, was the inventor of operas, or of the custom of giving musical representations of comedy, tragedy, and other dramatic pieces. Emelio de Cavallero, however, disputed this honor with him, A. D. 1590.—*Nouv. Dict. Hist.* Among the Venetians, opera was the chief glory of their carnival. About the year 1669, the abbot Perrin obtained a grant from Louis XIV. to set up an opera at Paris, where, in 1672, was acted Pomona. Sir William Davenant introduced a species of opera in London, in 1684. The first regularly performed opera was at York-buildings, in 1692. The first at Drury-lane was in 1705. The operas of Handel were performed in 1735, and they became general in several of the theatres a few years after. Among the favorite performances of this kind was Gay's *Beggar's Opera*, first performed in 1727. It ran for sixty-three successive nights, but so often offended the persons in power, that the lord-chamberlain refused to license for performance a second part of it, entitled "Polly." This resentment induced Gay's friends to come forward on its publication with so handsome a subscription, that his profits amounted to 1200*l.*, whereas the *Beggar's Opera* had gained him only 400*l.*—*Life of Gay.*

**OPORTO.** By nature one of the most impregnable cities in Europe; the great mart of Portuguese wine known as "Port." A chartered company for the regulation of the Port-wine trade was established here in A. D. 1756. See article *Wines*. The French under marshal Soult were surprised here by lord Wellington, and defeated in an action fought May 11, 1809. The Miguelites attacked Oporto, and were repulsed by the Pedroites, with considerable loss, Sept. 19, 1832. See *Portugal*.

**OPTICS.** As a science, optics date their origin a little prior to the time of Alhazen, an Arabian philosopher, who flourished early in the twelfth century. It has advanced rapidly since the time of Halley, and is now one of our most flourishing as well as useful sciences.

|                                                                                                                                                  |           |                                                                             |            |

| Camera obscura said to have been invented by Baptista Porta                                                                                      | 1560      | Newton's discoveries                                                        | 1674       |
| Telescopes invented by Leonard Digges, about                                                                                                     | 1571      | Telescopes with a single lens, by Tschirnhausen, about                      | 1690       |
| Telescope made by Jansen (who is said also to have invented the microscope), about                                                               | 1609      | Polarization of light, Huygens, about                                       | 1692       |
| [The same instrument constructed by Galileo, without using the production of Jansen]                                                             |           | Structure of the eye explained by Petit, about                              | 1700       |
| Astronomical telescope suggested by Kepler                                                                                                       | 1611      | Achromatic telescope constructed by Mr. Hall (but not made public) in       | 1733       |
| Microscope, according to Huygens, invented by Drebbel, about                                                                                     | 1621      | Constructed by Dollond, most likely without any knowledge of Hall's         | 1757       |
|                                                                                                                                                  |           | Herschel's great reflecting telescope, erected at Slough                    | 1789       |
|                                                                                                                                                  |           | Camera lucida (Dr. Wollaston)                                               | 1807       |
|                                                                                                                                                  |           | Ramage's reflecting telescope erected at Greenwich                          | 1820       |

**OPTIC NERVES.** The discoverer of the optic nerves is reputed to have been N. Varole, a surgeon and physician of Bologna, about A. D. 1538.—*Nouv. Dict.*

**ORACLES.** The most ancient oracle was that of Dodona; but the most famous was the oracle of Delphi, 1263 B.C. See *Delphi*. The heathen oracles were always delivered in such dubious expressions or terms, that let what would happen to the inquirer, it might be accommodated or explained to mean the event that came to pass. Among the Jews there were several sorts of oracles; as first, those that were delivered *viva voce*, as when God spoke to Moses; secondly, prophetic dreams, as those of Joseph; thirdly, visions, as when a prophet in an ecstasy, being properly neither asleep nor awake, had supernatural revelations; fourthly, when they were accompanied with the ephod or the pectoral worn by the high priest, who was induced with the gift of foretelling future things, upon extraordinary occasions; fifthly, by consulting the prophets or messengers sent by God. At the beginning of Christianity, prophecy appears to have been very common; but it immediately afterwards ceased.—*Lempriere; Pardon.*

**ORANGE, HOUSE OF.** This illustrious house is as ancient as any in Europe, and makes a most distinguished figure in history. Otho I., count of Nassau, received the provinces of Guelderland and Zutphen with his two wives, and they continued several hundred years in the family. Otho II. count of Nassau Dilembourg, who died in 1369, got a great accession of territories in the Low Countries by his wife Abelais, daughter and heiress of Godfrey, count of Vianden; and his grandson Gilbert, having married Jane, daughter and heiress of Philip, baron of Leek and Breda, added these to his other domains in 1404. The title of prince of Orange came first into the Nassau family by the marriage of Claude de Chalons with the count of Nassau in 1530. William prince of Orange, afterwards William III. of England, landed at Torbay, with an army, Nov. 5, 1688, and was crowned with his queen, the princess Mary, daughter of James II., April 11, 1689.

**ORATORIOS.** Their origin is ascribed to St. Philip Neri. The first oratorio in London was performed in Lincoln's-Inn theatre, in Portugal-street, in 1732.

**ORCHARDS.** As objects of farming or field culture, orchards do not appear to have been adopted until about the beginning of the seventeenth century, although they had doubtlessly existed in Great Britain for many ages previously, as appendages to wealthy religious establishments.—*Loudon.*

**ORDEAL.** The ordeal was known among the Greeks. With us it is a term signifying the judiciary determination of accusations for criminal offences by fire and water. It was introduced into England with other superstitions taken from the codes of the Germans. That by fire was confined to the upper classes of the people, that of water, to bondsmen and rustics. Hence the expression of going through fire and water to serve another. Women accused of incontinency formerly underwent the ordeal, to prove their innocence. A prisoner who pleaded not guilty, might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only; and then it was called the *judgment of God*, presuming he would deliver the innocent. The accused were to pass barefooted and blindfold over nine red-hot ploughshares, or were to carry burning-irons in their hands; and accordingly as they escaped, they were judged innocent or guilty, acquitted or condemned.\* The ordeal was used from Edward the Confessor's time to that of Henry III. It was abol-

---

\* The water ordeal was performed in either hot or cold: in cold water, the parties suspected were adjudged innocent, if their bodies were borne up by the water, contrary to the course of nature; in hot water, they were to put their bare arms or legs into scalding water, which if they brought out without hurt, they were taken to be innocent of the crime.

ished by a royal proclamation, 45 Henry III., 1261.—*Law Dict. Rymer's Fœdera.*

**ORDINATION.** In the ancient church there was no such thing as a vague and absolute ordination; but every one ordained had a church whereof he was to be clerk or priest. In the twelfth century, they grew more remiss, and ordained without any title or benefice. The church of Rome is episcopal; and the Church of England so far acknowledges the validity of the ordination of that church, that a Catholic priest is only required to abjure its peculiar distinctions, and he can officiate without re-ordination.

**OREGON.** Territory of the United States, on the N. W. coast of America. First visited by the Spaniards under Juan de Fuca, 1592; by sir Francis Drake, 1578; by Vancouver, 1792. The Columbia river discovered and entered by Capt. Gray, of merchant ship Columbia, of Boston, United States, May 7, 1792; overland expedition of Lewis and Clarke, sent out by Jefferson, 1804–5–6. Missouri Fur Company established at St. Louis, 1808; Pacific Fur Company (J. J. Astor) at New York, 1810; Astoria founded at the mouth of the Columbia, by Astor's colony, 1811: sold to the N. W. Company, 1813: occupied by the British until restored by treaty of Ghent, 1815; operations of the Hudson's Bay Company (English) commenced 1821; the territory divided at the 49th parallel of lat., leaving all north of that line, with the whole of Vancouver's island to Great Britain, remainder to the United States, by Mr. McLane's treaty, signed at London, ratified by the Senate, 41 to 14, June 18, 1846. Population at that time about 20,000. Territorial government established by the U. S. Congress, Aug. 2–13, 1848.

**ORGANS.** The invention of the organ is attributed to Archimedes, about 220 B. C.; but the fact does not rest on sufficient authority. It is also attributed to one Ctesibius, a barber of Alexandria, about 100 B. C. The organ was brought to Europe from the Greek empire, and was first applied to religious devotions, in churches, in A. D. 658.—*Bellarmino.* Organs were used in the Western churches by pope Vitalianus, in 658.—*Ammonius.* It is affirmed that the organ was known in France in the time of Louis I., 815, when one was constructed by an Italian priest. St. Jerome mentions an organ with twelve pairs of bellows, which might have been heard a mile off; and another at Jerusalem which might have been heard on the Mount of Olives. The organ at Haerlem is one of the largest in Europe; it has 60 stops, and 8000 pipes. At Seville is one with 100 stops, and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices.

**ORGANS IN ENGLAND.** That at York-minster is the largest; and the organ in the Music-hall, Birmingham, the next; both equal, perhaps, to that at Haerlem.

**ORKNEY AND SHETLAND ISLES.** These islands were ceded by Denmark to Scotland in A. D. 839, and were confirmed to James III., for a sum of money, in 1468. The Orkneys were the ancient Orcaades; and united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney was founded by St. Servanus early in the fifth century, some affirm by St. Colm. It ended with the abolition of episcopacy in Scotland, about 1689.

**ORLEANS, SIEGE OF,** by the English, under John Talbot, earl of Salisbury, Oct. 12, 1428. The city was bravely defended by Gaucour, the more so as its fall would have ruined the cause of Charles VI., king of France; and it was relieved and the siege raised, by the intrepidity and heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, April 29, 1429. Siege of Orleans, when the duke of Guise was killed, 1563.

**ORRERY.** The employment of planetary machines to illustrate and explain

the motions of the heavenly bodies, appears to have been coeval with the construction of the clepsydræ and other horological automata. Ptolemy devised the circles and epicycles that distinguish his system about A. D. 133. The planetary clock of Finée, was begun A. D. 1553. The planetarium of De Rheita was formed about 1650. The Orrery, so called, was invented by Charles, earl of Orrery; but perhaps with more justice it is ascribed to Mr. Rowley of Lichfield, whom his lordship patronized, 1670. This Orrery has been greatly improved of late years.

**OSTEND.** This town is famous for the long siege it sustained against the Spaniards, from July 1601 to September 1604, when it surrendered by an honorable capitulation. On the death of Charles II. of Spain the French seized Ostend; but, in 1706, after the battle of Ramilies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In the war of 1756, the French garrisoned this town for the empress-queen Maria Theresa. In, 1792, the French once more took Ostend, which they evacuated in 1793, and repossessed in 1794.

**OSTRACISM.** From the Greek word *Ostrakon*, an oyster; a mode of proscription at Athens, where a plurality of ten voices condemned to ten years' banishment those who were either too rich, or had too much authority, for fear they might set up for tyrants over their native country, but without any confiscation of their goods or estate. This custom is said to have been first introduced by the tyrant Hippias; by others it is ascribed to Clisthenes, about 510 B. C. The people wrote the names of those whom they most suspected upon small shells; these they put into an urn or box, and presented it to the senate. Upon a scrutiny, he whose name was oftentimes written was sentenced by the council to be banished, *ab aris et focis*. But this law at last was abused, and they who deserved best of the commonwealth fell under the popular resentment, as Aristides noted for his justice, Miltiades for his victories, &c. It was abolished by ironically proscribing Hyperbolus, a mean person.

**OTAHETI, or TAHITI.** Discovered in 1767, by Wallis, who called it George the Third Island. Captain Cook came hither in 1768, to observe the transit of Venus; sailed round the whole island in a boat, and staid three months: it was visited twice afterward by that celebrated navigator. See *Cook*. Omai, a native of this island, was brought over to England by captain Cook, and carried back by him, in his last voyage. In 1799, king Pomare ceded the district of Mataivai to some English missionaries. Queen Pomare compelled to place herself under the protection of France, Sept. 9, 1843. She retracts, and Otaheite and the neighboring island are taken possession of by admiral Dupetit-Thouars in the name of the French king, Nov. 1843. Seizure of Mr. Pritchard, the English consul, March 5, 1844.

**OTTERBURN, BATTLE OF,** fought in 1388, between the English under the earl of Northumberland and his two sons, and the Scots under sir William Douglas, who was slain by Henry Percy, surnamed Hotspur; but the Scots obtained the victory, and the two Percies were made prisoners. On this battle the ballad of *Chey Chase* is founded.—*Walsingham*.

**OTTOMAN EMPIRE.** The sovereignty of the Turks, founded by Othman I. on the ruin of the empire of the eastern Greeks, A. D. 1293. See *Turkey*.

**OVATION.** An inferior triumph which the Romans allowed the generals of their army whose victories were not considerable. He who was thus rewarded, entered the city with a myrtle crown upon his head, that tree being consecrated to Venus; wherefore when Marcus Crassus was decreed the honor of an ovation, he particularly desired it as a favor of the senate to be allowed a laurel crown instead of a myrtle one. This triumph was called ovation, because the general offered a sheep when he came to the capitol.

whereas in the great triumph he offered a bull. Publius Posthumus Tubertus was the first who was decreed an ovation, 503 B. C.

**OWHYHEE OR HAWAII**, ONE OF THE SANDWICH ISLANDS. Discovered by captain Cook in 1778. Here this illustrious seaman fell a victim to a sudden resentment of the natives. A boat having been stolen by one of the islanders, the captain went on shore to seize the king, and keep him as a hostage till the boat was restored. The people, however, were not disposed to submit to this insult; their resistance brought on hostilities, and captain Cook and some of his companions were killed, Feb. 14, 1779.

**OXFORD UNIVERSITY**. This university is supposed by some to have been a seminary for learning before the time of Alfred, and that it owed its revival and consequence to his liberal patronage. Others state that though the university is ascribed to Alfred, yet that no regular institution deserving the name existed even at the period of the Norman conquest.

| COLLEGES.                                                                                  |                                                                                                      |        |

| Exeter. Walter Stapleton, earl of Exeter                                                   |                                                                                                      | 1314   |
| Hertford College                                                                           |                                                                                                      | 1312   |
| Jesus College. Dr. Hugh Price; queen Elizabeth                                             |                                                                                                      | 1571   |
| Lincoln College. Richard Fleming, 1427; finished by Rotherham, bishop of Lincoln           |                                                                                                      | 1475   |
| Magdalen. Waynflete, bishop of Winchester                                                  |                                                                                                      | 1458   |
| Merton College. Walter de Merton, bishop of Rochester                                      |                                                                                                      | 1274   |
| New College. William of Wykeham,                                                           | bishop of Winchester; first called St. Mary of Winchester                                            | 1375   |
|                                                                                            | Oriel College. King Edward II.; Adam de Brom, archdeacon of Stow                                     | 1334   |
|                                                                                            | Pembroke. Thos. Teesdale, and R. Whitwick, clerk                                                     | 1620   |
|                                                                                            | Queen's College. Robert Eglesfield, clerk, confessor to queen Philippa, consort of Edward III.       | 1340   |
|                                                                                            | St. John's. Sir Thomas White                                                                         | 1557   |
|                                                                                            | Trinity. Sir Thomas Pope                                                                             | 1554   |
|                                                                                            | University. Said to have been founded by king Alfred, 872; founded by William of Durham              | 1172   |
|                                                                                            | Wadham. Nicholas Wadham, and Dorothy his wife                                                        | 1612   |
|                                                                                            | Worcester. Sir Thomas Coke of Bentley in Worcestershire; it was originally called Gloucester College | 1714   |
|                                                                                            |                                                                                                      | HALLS. |
|                                                                                            | St. Albans                                                                                           | 1547   |
|                                                                                            | St. Edmund's                                                                                         | 1269   |
|                                                                                            | St. Mary's                                                                                           | 1616   |
|                                                                                            | St. Mary Magdalen                                                                                    | 1602   |
|                                                                                            | New Inn Hall                                                                                         | 1392   |

**OXYGEN AIR OR GAS**. One of the most important agents in the chemical phenomena of nature, and the processes of art, discovered by Dr. Priestley, Aug. 1774.

P.

**PADLOCKS**. This species of lock was invented by Bechar at Nuremberg in A. D. 1540.

**PAGANISM**. Pagans, in the Scriptures called the heathen, idolaters and gentiles, are worshippers of idols, not agreeing in any set form or points of belief, except in that of one God supreme, in which point all travellers assure us they concur, and their having gods is a demonstrative proof of that belief. Constantine ordered the Pagan temples to be destroyed throughout the Roman empire, A. D. 331; and Paganism was finally overthrown in the reign of Theodosius the Younger, about 390.—*Tillemont*.

**PAINTING**. An art, according to Plato, of the highest antiquity in Egypt. Osymandyas (See *Egypt*) causes his exploits to be represented in painting. 2100 B. C.—*Usher*. Pausias of Sicyon was the inventor of the encaustic, a method of burning the colors into wood or ivory, 335 B. C. The ancients considered Sicyon the nursery of painters. Antiphiles, an Egyptian, is said to have been the inventor of the grotesque, 332 B. C.—*Pliny*. The art was

introduced at Rome from Etruria, by Quintus Fabius, who on that account was styled *Pictor*, 291 B. C.—*Livy*.\* The first excellent pictures were brought from Corinth by Mummius, 146 B. C. After the death of Augustus, not a single painter of eminence appeared for several ages; Ludius, who was very celebrated, is supposed to have been the last, about A. D. 14. Painting on canvas seems to have been known at Rome in A. D. 66. Bede, the Saxon historian, who died in 735, knew something of the art. It revived about the close of the 13th century, and Giovanni Cimabue, of Florence, is awarded the honor of its restoration. It was at once encouraged and generously patronized in Italy. John Van Eyck, of Bruges, and his brother Hubert, are regarded as the founders of the Flemish school of painting in oil, 1415.—*Du Fresnoy*. Pauló Uccello was the first who studied perspective. The earliest mention of the art in England, is A. D. 1523, about which time Henry VIII patronized Holbein, and invited Titian to his court.

**PAINTING IN THE UNITED STATES.** The first practising artist of celebrity was John Watson (born in Scotland, 1685), who commenced painting portraits in New Jersey, 1715. Nathaniel Smybert, of Edinburgh, began in Boston, 1728. Benjamin West was the first native American artist; born in Chester County, Pennsylvania, 1708: painted his first portrait in Lancaster, Pa., 1753. John Singleton Copley, born in Boston, 1738; first painted in 1760: he was the father of lord Lyndhurst, lord chancellor of Great Britain. Chas. W. Peale (born in Maryland, 1741), Gilbert Charles Stuart (Rhode Island, 1754), John Trumbull (Connecticut, 1756), William Dunlap (New Jersey, 1766), E. G. Malbone (Rhode Island, 1777), were the next artists in succession in the United States. See *Dunlap's Arts of Design*, &c.

**PALATINE.** A German dignity. William the Conqueror made his nephew Hugh D'Abrincis, count palatine of Chester, with the title of earl, 1070. Edward III. created the palatine of Lancaster, 1376. See *Lancaster, Duchy of*. The bishoprics of Ely and Durham were also made county palatines.

**PALATINES AND SUABIANS.** About 7000 of these poor Protestants, from the banks of the Rhine, driven from their habitations by the French, arrived in England, and were encamped on Blackheath and Camberwell common; a brief was granted to collect alms for them. 500 families went under the protection of the government to Ireland, and settled chiefly about Limerick where parliament granted them 24,000*l.* for their support. 3000 were sent to New York and Hudson's Bay, but not having been received kindly by the inhabitants, they went to Pennsylvania, and being there greatly encouraged by the Quakers, they invited over some thousands of German and Swiss Protestants, who soon made this colony more flourishing than any other; Anne, 1709.—*Anderson*.

**PALLADIUM.** The statue of Pallas, concerning which ancient authors disagree. Some say it fell from heaven, near the tent of Ilius, as he was building Ilium; but on its preservation depended the safety of Troy; which the oracle of Apollo declared should never be taken so long as the palladium was found within its walls. This fatality being made known to the Greeks they contrived to steal it away during the Trojan war, 1184 B. C., though some maintain, that it was only a statue of similar size and shape, and that the real palladium was conveyed from Troy to Italy by Æneas, 1183 B. C.

---

\* Parrhasius of Ephesus and Zeuxis were cotemporary painters. These artists once contended for pre-eminence in their profession, and when they exhibited their respective pieces, the bird came to peck the grapes which Zeuxis had painted. Parrhasius then produced his piece, and Zeuxis said, "Remove the curtain, that we may see the painting." The curtain itself was the painting, and Zeuxis acknowledged himself to be conquered, exclaiming, "Zeuxis has deceived the birds; but Parrhasius has deceived Zeuxis!" Parrhasius dressed in a purple robe, and wore a crown of gold, calling himself king of painters, 415 A. C.—*Plutarch*.

and preserved by the Romans with the greatest secrecy in the temple of Vesta, and esteemed the destiny of Rome.

**PALM SUNDAY.** When Christ made his triumphal entry into Jurusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, with acclamations and hosannas, A. D. 33. In memory of this circumstance it is usual, in popish countries, to carry palms on the Sunday before Easter; hence called Palm Sunday. Conquerors were not only accustomed to carry palm-trees in their hands; but the Romans, moreover, in their triumphs, sometimes wore *toga palmata*, in which the figures of the palm-trees were interwoven.

**PALMYRA, RUINS OF,** in the deserts of Syria, discovered by some English travellers from Aleppo, A. D. 1678. The ruins of Palmyra, which are chiefly of white marble, prove it to have been more extensive and splendid than even Rome itself. It is supposed to have been the Tadmor in the wilderness built by Solomon. Zenobia, the queen of Palmyra, resisted the Roman power in the time of Aurelian, who having made himself master of the place, caused all the inhabitants to be destroyed, and gave the pillage of the city to the soldiers. The stupenduous ruins of this city were visited, in 1751, by Mr. Wood, who published an account of them in 1753. Mr. Bruce, on ascending a neighboring mount, was struck with the most magnificent sight which, he believes, ever mortal saw: the immense plains below were so covered with the grandest buildings (palaces and temples), they seemed to touch one another.

**PALO-ALTO, BATTLE OF.** See *Battles*.

**PANDECTS.** A digest of the civil law made by order of Justinian, about A. D. 504. These pandects were accidentally discovered at Amalfi, A. D. 1137; they were removed from Pisa in 1416; and are now preserved in the library of Medici at Florence, as the *Pandectæ Florentinæ*.

**PANORAMA.** This ingenious and useful species of exhibition is the invention of Robert Barker. Panoramas are bird's-eye views painted in distemper round the wall of a circular building, with a striking resemblance to reality. In 1788, Mr. Barker exhibited at Edinburgh a view of that city, being the first picture of the kind. He then commenced similar exhibitions in London, having adopted the name of '*Panorama*,' to attract notice, and was ultimately enabled to build commodious premises in Leicester-square for that purpose. He died 1806. The panorama of the Mississippi, by Banvard, a self-taught American artist, was a gigantic undertaking, without precedent in dimensions, completed about 1846; since which numerous similar works have been achieved.

**PANTHEON AT ROME.** A temple built by Augustus Cæsar, some say by Agrippa, his son-in-law, 25 B. C. It was in a round form, having niches in the wall, where the particular image or representation of a particular god was set up; the gates were of brass, and beams covered with gilt brass, and the roof covered with silver plate. Pope Boniface III. dedicated it to the Virgin Mary, and all the saints, by the name of St. Mary de la Rotunda.

**PANTOMIMES.** They were representations by gestures and attitudes among the ancients. They were introduced on the Roman stage by Pylades and Bathyllus, 22 B. C.; and were then considered as the most expressive part of stage performances.—*Usher*. Pantomime dances were introduced about the same time.—*Idem*. Representation by gesture and action only, is contemporaneous with our stage.

**PAPER.** See *Papyrus*. Paper is said to have been invented in China, 170 B. C. It was first made of cotton, about A. D. 1000; and of rags in 1319. White coarse paper was made by sir John Speilman, a German, at Dartford,

in England, 33 Eliz., 1590; and here the first paper-mills were erected.—*Stowe*. Paper for writing and printing, manufactured in England, and an act passed to encourage it, 2 William III., 1690; before this time we paid for these articles to France and Holland 100,000*l.* annually. The French refugees taught our people, who had made coarse brown paper almost exclusively, until they came among us. White paper was first made by us in 1690.—*Anderson*. Paper-making by a machine was first suggested by Louis Robert, who sold his model to the celebrated M. Didot, the great printer. The latter brought it to England, and here, conjointly with M. Fourdrinier, he perfected the machinery. M. Fourdrinier obtained a patent for manufacturing paper of an indefinite length, in 1807; it had previously been made tediously by the hand. A sheet of paper was made 13,800 feet long, and four feet wide, at Whitehall-mills, Derbyshire, in 1830.

**PAPER-HANGINGS.** Stamped paper for this purpose was first made in Spain and Holland, about A. D. 1555. Made of Velvet and floss for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country from early in the eighteenth century; and it has now been brought to such perfection that rich stained paper is made at twelve shillings for one yard, and the common kinds a dozen yards for one shilling.

**PAPYRUS**, the reed from which was made the celebrated paper of Egypt and India, used for writings until the discovery of parchment about 190 B. C. Ptolemy prohibited the exportation of it from Egypt, lest Eumenes of Pergamus should make a library equal to that of Alexandria. A manuscript of the *Antiquities of Josephus* on papyrus of inestimable value was among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris; but it was restored in 1815.

**PARCHMENT.** Invented for writing books by Eumenes (some say by Attalus, of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B. C. Parchment-books from this time became those most used, and the most valuable as well as oldest in the world are written on the skins of goats. It should be mentioned that the Persians, and others, are said to have written all their records on skins long before Eumenes's time.

**PARDONS.** General pardons were proclaimed at coronations; first by Edward III., in 1327. The king's power of pardoning is said to be derived *à lege sua dignitatis*; and no other person has power to remit treason or felonies, stat. 27 Henry VIII., 1535. In democracies there is no power of pardoning; hence Blackstone mentions this prerogative to be one of the greatest advantages of a monarchy above any other form of government. But the king cannot pardon a nuisance to prevent its being abated; or pardon where private justice is concerned.—*Blackstone*. A pardon cannot follow an impeachment of the House of Commons.—*Haydn*. In the United States, the pardoning power is vested in the governors of the several states—a *practice* which upsets Blackstone's *theory*.

**PARIAN MARBLES.** The chronology of the Parian Marbles was composed 264 B. C. The Parian Marbles were discovered in the Isle of Paros, A. D. 1610. They were brought to England, and were presented to the university of Oxford, by Thomas Howard, lord Arundel, whence they are called the Arundelian Marbles, *which see*.

**PARIS.** At the time of the Roman invasion, Paris was only a miserable town ship. It began to be called the city of the Parisii, A. D. 380. Clovis fixed upon it as the capital of his states in 507. This city was several times ravaged by the Normans; and in 1420 was taken by the English, who held it fifteen years. More than 50,000 persons died of famine and plague in 1438 when the hungry wolves entered the city and committed, we are told, gre

devastation. The events in connection with this great city will be found under their respective heads.

Fortifications of Paris, a continuous wall embracing both banks of the Seine, and detached forts, with an *enceinte* of 15½ leagues, were commenced in Dec. 1840, and completed March, 1846, at an expense exceeding £5,000,000 sterling. See *France*.

**PARK, MUNGO, HIS TRAVELS.** This enterprising traveller set sail on his first voyage to Africa, under the patronage of the African Society, to trace the source of the river Niger, May 22, 1795; and returned Dec. 22, 1797, after having encountered great dangers, without his journey through intertropical regions having enabled him to achieve the great object of his ambition. He again sailed from Portsmouth on his second voyage, Jan. 30, 1804, appointed to a new expedition by government; but never returned. The accounts of his murder on the Niger were a long time discredited; unhappily however, they were at length too well authenticated by later intelligence. It appears that Park and his party were attacked by the natives at Boussa, and all killed, with the exception of one slave.

**PARKS.** The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made, was that of Woodstock, formed by Henry I., 1125. The parks of London are in a high degree essential to the health of its immense population. St. James's Park was drained by Henry VIII., 1537. It was improved, planted, and made a thoroughfare for public use 1668. The Green Park forms a part of the ground inclosed by Henry VIII. In Hyde Park, the sheet of water called the Serpentine River, although in the form of a parallelogram, was made between 1730 and 1733, by order of queen Caroline, consort of George II. This queen once inquired of the first Mr. Pitt (afterwards the earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." She took the hint, and the design was never afterwards entertained.

**PARLIAMENT, IMPERIAL, or GREAT BRITAIN.** It derives its origin from the Saxon general assemblies, called *Wittenagemots*; but their constitution totally differed, as well as the title, which is more modern, and is taken from *parler la ment*, which in the Norman law-style signifies to *speak one's mind*. This at once denotes the essence of British parliaments. The name was applied to the general assemblies of the state under Louis VII. of France, about the middle of the twelfth century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edward I., A. D. 1272; and yet Coke declared in his Institutes, and spoke to the same effect, when speaker (A. D. 1592), that this name was used even in the time of Edward the Confessor, 1041. The first summons by writ on record was directed to the bishop of Salisbury, 7 John, 1205. The first clear account we have of the representatives of the people forming a house of commons, was in the 43rd Henry III., 1258, when it was settled, by the statutes at Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which by the sixth statute, were to be held yearly.—*Burton's Annals*. The general representation by knights, citizens, and burgesses, took

place 49 Henry III., 1265.—*Dugdale's Summonses to Parliament*, edit. 1685. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown as was done in the reigns of Henry VIII. and William III. It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth.—*Sir Edward Coke*.

**PARMA.** Formed by the ancient Etrurians. It was made a duchy (with Placentia) A. D. 1545. It fell to Spain by Phillip V.'s marriage with Elizabeth Farnese, 1714. The duke of Parma was raised to the throne of Tuscany, with the title of king of Etruria, in Feb. 1801. Parma was afterwards united to France (with Placentia and Guastalla), and on the fall of Napoleon was conferred on Maria Louisa, the ex-empress, by the treaty of Fontainebleau, April 5, 1814. Battle of Parma: the confederates England, France, and Spain, against the emperor; indecisive, both armies claiming the victory, June 29, 1734. Great battle of Parma, in which the French, under Macdonald, were defeated by Suwarrow, with the loss of 10,000 men, and four generals, July 12 1799. Maria Louisa died Dec. 17, 1847, and the duke of Lucca succeeded by previous compact. The new duke refuses petitions for reforms; Parma occupied by Austrian soldiers, Dec. 21, 1847. The people revolt; barricades, and slaughter, March 20. The duke appoints a regency; flees; is brought back; the duchy proclaimed to be annexed to Piedmont, March 20, 1848. The duke promises to join the league against Austria and is then liberated, April 1, 1848, but is deposed, April 9.

**PARRICIDE.** There was no law against it in ancient Rome, such a crime not being supposed possible. About 500 years after Numa's reign, L. Ostir having killed his father, the Romans first scourged the parricide; then sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. The old Egyptians used to run sharp reeds into every part of the bodies of parricides; and after having thus wounded them, threw them upon a heap of thorns, and set fire to them. In France, before the execution of the criminal, the hand was cut off.

**PARTHIA.** The Parthians were originally a tribe of Scythians, who, being exiled as their name implies, from their own country, settled near Hyrcania. Arsases laid the foundation of an empire which ultimately extended over all Asia, 250 B. C.; and at one time the Parthians disputed the empire of the world with the Romans, and could never be wholly subdued by that nation, who had seen no other people upon earth unconquered by their arms. The last king was Artabanus V., who being killed A. D. 229, his territories were annexed to the new kingdom of Persia, under Artaxerxes.

**PARTITION TREATIES.** The first treaty between England and Holland for regulating the Spanish succession, was signed Oct. 11, 1698; and the second (between France, England, and Holland, declaring the archduke Charles presumptive heir of the Spanish monarchy, Joseph Ferdinand having died in 1699), March 13, 1700. Treaty for the partition of Poland: the first was a secret convention between Russia and Prussia, Feb. 17, 1772; the second, between the same powers and Austria, Aug. 5, same year; the third was between Russia, Austria, and Prussia, Nov. 25, 1795. There were other similar treaties relating to Poland, but not under this name.

**PASQUINADES.** This name, which is given to humorous libels, originated in this way:—At the stall of a cobbler named Pasquin, at Rome, a number of idle persons used to assemble to listen to the pleasant sallies of Pasquin, and to relate little anecdotes in their turn, and indulge themselves in raillery at the expense of the passers-by. After the cobbler's death in the sixteenth

century, the statue of a gladiator was found near his stall, to which the people gave his name, and on which the wits of the time affixed their lampoons upon the state, and their satirical effusions on their neighbors, secretly at night. Small poems, and writings of a similar kind, from this obtained the name of Pasquinades, about A. D. 1533.

**PASSOVER.** A solemn festival of the Jews, instituted 1491 B. C., in commemoration of their coming out of Egypt; because the night before their departure, the destroying angel, who put to death the first-born of the Egyptians, *passed over* the houses of the Hebrews without entering them: they being marked with the blood of the lamb that was killed the evening before, and which for this reason is called the Paschal Lamb. It was celebrated in the new Temple, April 18, 515 B. C.—*Usher*.

**PATAY, BATTLE OF,** in which the renowned and ill-fated Joan of Arc (the Maid of Orleans) signally defeated the English, June 10, 1429. Talbot was taken prisoner, and the valiant Fastolfe was forced to fly. In consequence of this victory, Charles of France entered Rheims in triumph, and was crowned July 17, same year, Joan of Arc assisting in the ceremony in full armor, and holding the sword of state. See *Joan of Arc*.

**PATENTS.** Licenses and authorities granted by the king. Patents granted for titles of nobility, were first made A. D. 1344, by Edward III. They were first granted for the exclusive privilege of printing books, in 1591, about which time the property and right of inventors in arts and manufactures were secured by letters patent.

**PATRIARCHS.** Socrates gives this title to the chiefs of dioceses. The dignity among the Jews is referred to the time of Nerva, A. D. 97. In the Christian church it was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin church had no patriarchs till the 7th century.

**PAUL'S, ST., CATHEDRAL, LONDON.** The noblest Protestant church in the world. The best authority that exists illustrative of the origin of this church is its great restorer, sir Christopher Wren. His opinion, that there had been a church on this spot, built by the Christians in the time of the Romans, was confirmed when he searched for the foundations for his own design. He explodes the notion of there having been a temple of Diana. The first church is supposed to have been destroyed during the Dioclesian persecution, and to have been rebuilt in the reign of Constantine. This was demolished by the pagan Saxons, and restored by Sebert in 603. It was destroyed by the great conflagration in 1086, after which Mauritius, then bishop of London, commenced the magnificent edifice which immediately preceded the present cathedral. St. Paul's was totally destroyed by the memorable fire of 1666; and the first stone of the present edifice was laid June 21, 1675, and the whole was completed in 1710-11, under the illustrious architect sir Christopher Wren.

|                              |             |                             |             |
|------------------------------|-------------|-----------------------------|-------------|
| Length of St. Paul's, within | - 500 feet. | Length of St. Peter's, Rome | - 669 feet. |
| Its greatest breadth         | - 223       | Its greatest breadth within | - 442       |
| Height from the ground       | - 340       | Height from the ground      | - 432       |

**PAVEMENT.** The Carthaginians are said to have been the first who paved their towns with stones. The Romans in the time of Augustus had pavement in many of their streets; but the Appian Way was a paved road, and was constructed 312 B. C. In England there were few paved streets before Henry VII.'s reign. London was first paved about the year 1533. Wood pavement commenced in 1839; but was generally disused in 1847.

**PAVIA, BATTLE OF,** between the French and Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valor,

and killing seven men with his own hand, was at last obliged to surrender himself prisoner. Francis wrote to his mother, Louisa of Savoy, regent of the kingdom in his absence, the melancholy news of his captivity, conceived in these dignified and expressive terms:—*Tout est perdu, madame, fors l'honneur*; Feb. 24, 1525. Collision between the students and the Austrian soldiers, 10 killed and 40 wounded, Jan. 8, 1848.

**PAWNBROKERS.** The origin of borrowing money by means of pledges deposited with lenders is referred, as a regular trade, to Perousa, in Italy, about A. D. 1458; and soon afterwards in England. The business of pawnbrokers was regulated 30 George II., 1756. Licenses were issued 24 George III., 1783. In London there are 334 pawnbrokers; and in England, exclusively of London, 1127.

**PEARLS.** The formation of the pearl has embarrassed both ancient and modern naturalists to explain, and has given occasion to a number of vain and absurd hypotheses. M. Réaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000l. sterling. One which was brought, in 1574, to Philip II. of the size of a pigeon's egg, was valued at 14,400 ducats, equal to 13,996l. A pearl spoken of by Boetius, named the *Incomparable*, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier as being in possession of the emperor of Persia was purchased of an Arab in 1633, and is valued at a sum equal to 110,400l.

**PEERS.** The first of the present order created in England was William Fitz Osborn, as earl of Hereford, by William the Conqueror, in 1066. The first peer who was created by patent was lord Beauchamp of Holt Castle, by Richard II., in 1387. In Scotland, Gilchrist was created earl of Angus by Malcolm III., 1037. In Ireland, sir John de Courcy was created baron of Kinsale, &c., in 1181; the first peer after the obtaining of that kingdom by Henry II. The house of lords consisted of, viz:—

|                              |              |                             |              |
|------------------------------|--------------|-----------------------------|--------------|
| At the death of Charless II. | - 176 peers. | At the death of George III. | - 339 peers. |
| At the death of William III. | - 192        | At the death of George IV.  | - 396        |
| At the death of Anne         | - 209        | At the death of William IV. | - 456        |
| At the death of George I.    | - 216        | In 10th Victoria, 1847      | - 454        |
| At the death of George II.   | - 229        |                             |              |

**PELAGIANS.** A sect founded by Pelagius, a native of Britain. The sect maintained, 1. That Adam was by nature mortal, and whether he had sinned or not, would certainly have died. 2. That the consequences of Adam's sin were confined to his own person. 3. That new-born infants are in the same condition with Adam before the fall. 4. That the law qualified men for the kingdom of heaven, and was founded upon equal promises with the gospel. 5. That the general resurrection of the dead does not follow in virtue of our Saviour's resurrection, &c. This sect appeared A. D. 400 at Rome, and in Carthage about 412.

**PELEW ISLANDS.** Discovered by the Spaniards in the seventeenth century. The wreck here of the East India Company's packet *Antelope*, captain Wilson, 1783. The king, Abba Thule, allowed captain Wilson to bring princee Lee Boo, his son, to England, where he arrived in 1784, and died soon after of the small-pox; and the East India Company erected a monument over his grave in the Rotherhithe churchyard.

**PELOPONNESIAN WAR.** The celebrated war which continued for twenty-seven years between the Athenians and the inhabitants of Peloponnesus, with their respective allies. It is the most famous and the most interesting of all the wars which happened between the inhabitants of Greece. It began 431 B. C., and ended 404 B. C.

**PENAL LAWS, AFFECTING ROMAN CATHOLICS.** The laws enacted against Roman Catholics in Great Britain were very severe; and even up to the period of passing the Emancipation Bill many of them remained unrepealed. All the laws there against Roman Catholics were repealed by the Relief Bill, passed April 13, 1829.

**PENANCE.** Called by the Jews *Thejouvtha*. Penance, they said, consisted in the love of God attended with good works. They made a confession upon the day of expiation, or some time before; and had stated degrees of penance in proportion to the crimes committed. Penance was introduced into the Romish church A. D. 157. In our canon law, penance is chiefly adjudged to the sin of fornication.

**PENDULUMS FOR CLOCKS.** Affirmed to have been adapted by Galileo the younger, about A. D. 1641. Christian Huygens contested the priority of this discovery: the latter brought clocks with pendulums to perfection, 1656.—*Dufresnoy*.

**PENITENTS.** There are various orders of penitents, Magdalens, Magdalencettes, &c. The order of Penitents of St. Magdalen was founded at Marseilles, about A. D. 1272. The Penitents of the Name of Jesus was a congregation of religious in Spain who had led a licentious life, formed about 1550. The Penitents of Orvieto were formed into an order of nuns about 1662.

**PENNSYLVANIA,** one of the United States. Granted by James II. to William Penn. of the Society of Friends, in 1681. (Previously settled by Swedes and Fins, and conquered by the Dutch in 1654.) A tract of 20,000 acres sold by Penn for £400 to a colony which formed a settlement at Philadelphia. The colony governed by proprietors until the revolution of 1776, when the legislature purchased it, paying the proprietors £130,000 in lieu of quit-rents. Battles of Brandywine and Germantown, and other important actions in this State in the war of independence. See *Philadelphia*. Federal Constitution adopted in convention, Dec. 13, 1787, by 46 to 23. Continental Congress at Philadelphia. in 1774. United States Congress, 1790 to 1800, when it was removed to Washington. Population of State in 1732, 30,000; 1790, 434,373; in 1800, 602,545; in 1820, 1,049,13; in 1840, 1,724,033.

**PENNY-POST.** First set up in London and its suburbs by a Mr. Murray, upholsterer A. D. 1681. Mr. Murray afterwards assigned his interest in the undertaking to Mr. Dockwra, a merchant, 1683; but on a trial at the King's Bench bar in the reign of Charles II., was adjudged to belong to the duke of York as a branch of the general post, and was thereupon annexed to the revenue of the crown.—*DeLaune*, 1690. This institution was considerably improved in and round London, July 1794, *et seq.*, and was made a two-penny-post. A penny post was first set up in Dublin in 1774. See *Post-office*.

**PENTECOST.** It literally signifies the ordinal number called the fiftieth; and in the solemn festival of the Jews, so called because it was celebrated fifty days after the feast of the Passover, *Lev. xxiii. 15*. It is called the feast of weeks, *Exod. xxxiv. 22*, because it was kept seven weeks after the Passover.

**PERFUMERY.** Many of the wares coming under this name were known to the ancients, and the Scriptures abound with instances of the use of incenses and perfumes. No such trade as a perfumer was known in Scotland in 1763.—*Creech*. A stamp tax was laid on various articles of perfumery in England and the vendor was obliged to take out a license, in 1786. At the corner of Beaufort Buildings, in the Strand, resided Lilly the perfumer, mentioned in the *Spectator*.—*Leigh*.

**PERIODICAL LITERATURE.** See *Reviews and Magazines*.

**PERIPATETIC PHILOSOPHY.** The philosophy taught by Aristotle, about 342 B. C. Like Plato, who taught in a shady grove called Academia, Aristotle chose a spot of a similar character at Athens, adjacent to the same river, where there were trees and shades: this spot was denominated the Lyceum; and as he usually walked while he instructed his pupils, his philosophy was called Peripatetic.

**PERJURY.** In some countries this crime was punished with death. The early Romans at first punished it by throwing the offender headlong from the Tarpeian precipice; but that penalty was afterwards altered, upon a supposition that the gods would vindicate their own honor by some remarkable judgment upon the offender. The Greeks set a mark of infamy upon them. After the empire became Christian, and if any one swore falsely upon the gospels, he was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the false-swearer became liable to the punishment he charged upon the innocent. In England, perjury was punished with the pillory, 1563.

**PERONNE, TREATY OF.** Louis XI. of France having placed himself in the power of the duke of Burgundy, was forced to sign a treaty at Peronne, confirming those of Arras and Conflans, with some other stipulations of a restrictive and humiliating character, A. D. 1468.

**PERSECUTIONS, GENERAL, OF THE CHRISTIANS.** Historians usually reckon ten. The first under Nero, who having set fire to Rome, threw the odium of the act upon the Christians. Multitudes of them were, in consequence, massacred. Some were wrapped up in the skins of wild beasts, and torn and devoured by dogs; others were crucified, and numbers burned alive, A. D. 64. The 2nd, under Domitian, A. D. 95. The 3rd, in the reign of Trajan, A. D. 100. The 4th, under Adrian, 118. The 5th, under the emperor Severus, 197. The 6th, under Maximinus, 235. The 7th, under Decius, more bloody than any preceding. They were in all places driven from their habitations, plundered and put to death by torments, the rack, and fire. The 8th, under Valerian, 257. The 9th, under Aurelian, 272. The 10th, under Dioclesian. In this persecution, which lasted ten years, houses filled with Christians were set on fire, and droves of them were bound together with ropes and cast into the sea. See *Massacres*.

**PERSECUTIONS OF THE JEWS.** See articles *Jews* and *Massacres*.

**PERSECUTION OF THE PROTESTANTS.** In Franconia, where a multitude of Luther's followers were massacred by William de Furstemberg, 1525.—*Du Fresnoy*. In England when Cranmer, archbishop of Canterbury, and Latimer and Ridley, prelates, and 300 Protestants were burned alive, and great numbers perished in prison, 3 Mary, 1556.—*Warner's Eccles. Hist.* Of the Protestants in France, when numbers perished; their assemblies were prohibited, their places of worship pulled down, and sentence to the galleys proclaimed against all who harbored them, 1723. Executions of the Protestants at Thorn, when great numbers were put to death under pretence of their having been concerned in a tumult occasioned by a procession, 1724. See *Massacres* and *Bartholomew*.

**PERSIAN EMPIRE.** The country which gave name to this celebrated empire was originally called Elam, and received the appellation of Persia from Ferseus, the son of Perseus and Andromeda, who settled here, and perhaps established a petty sovereignty. But long before his time, it was subject to independent princes. Persia was at length included in the first Assyrian monarchy; and when that empire was dismembered by Arbaces, &c., it appertained to the kingdom of Media. Persia was partly conquered from the Greeks, and was tributary to the Parthians for nearly 500 years, when

Artaxerxes, a common soldier, became the founder of the second Persian monarchy, A. D. 229.

|                                                                                                                                                                                    |            |                                                                                                                                                                                          |           |

| The assassin is put to death in a horrible manner . . . . .                                                                                                                        | 465        | It fell under the dominion of Tamerlane, by the defeat of Bajazet . . . . .                                                                                                              | 1402      |
| Reign of Artaxerxes . . . . .                                                                                                                                                      | 464        | Reign of Thomas Kouli Khan . . . . .                                                                                                                                                     | 1732      |
| Cyprus taken from the Persians . . . . .                                                                                                                                           | 449        | He carried the Persian arms into India, which he ravaged. See <i>India</i> . . . . .                                                                                                     | 1738      |
| Memorable retreat of the Greeks. See article <i>Retreat</i> . . . . .                                                                                                              | 401        |                                                                                                                                                                                          |           |

In 1747, Ahmed Abdalla founded the kingdom of Candahar. In 1779, competitors for the throne of Persia sprung up and caused a period of slaughter and desolation till 1794, when Mahomed Khan became sole monarch.

**PERU.** First visited in A. D. 1513, and soon afterwards conquered by the Spaniards, whose avarice led to the most frightful crimes. The easy conquest of this country has not its parallel in history. Pizarro, in 1530, and others, with one vessel, 112 men, and four horses, set out to invade South America, which, however, not succeeding, he again in 1531, embarked with three small vessels, 140 infantry, and thirty-six horses; with these, and two reinforcements of thirty men each, he conquered the empire of Peru, and laid the foundation of that vast power which the Spaniards enjoy in the New World. Pizarro's expedition, 1524. Peru remained in subjection to the Spaniards (who murdered the Incas and all their descendants) without any attempt being made to throw off the oppressive yoke till 1782; but the independence of the country was completely achieved in 1826. The new Peruvian constitution was signed by the president of the Republic, March 21, 1828.

**PETER-PENCE.** Presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, A. D. 725. So called, because agreed to be paid on the feast of St. Peter. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed

by the popes, as a tribute from England, and regularly collected, till suppressed by Henry VIII.—*Camden*.

**PETER, THE WILD BOY.** A savage creature found in the forest of Herts-wold, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, November 1725. At this time he was supposed to be thirteen years old. The king caused him to taste of all the dishes at the royal table; but he preferred wild plants, leaves, and the bark of trees, which he had lived on from his infancy. No human efforts of the many philosophic persons about the court could entirely vary his savage habits, or cause him to utter one distinct syllable. He died in Feb. 1785, at the age of 72. Lord Monboddo presented him as an instance of the hypothesis that "man in a state of nature is a mere animal."

**PETER'S CHURCH, ST., AT ROME.** Originally erected by Constantine. About the middle of the 15th century, Nicholas VI. commenced the present magnificent pile, which was not completed under numerous succeeding popes, until A. D. 1629. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet: the length of the interior is 600 feet, forming the most spacious hall ever constructed by human hands. See *Paul's, St.*

**PETERSBURGH.** The new capital of Russia. Peter the Great first began this city, in 1703. He built a small hut for himself, and some wretched wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hand, laid the foundation of a house of the same materials. From these small beginnings rose the imperial city of Petersburg; and in less than nine years after the wooden hovels were erected, the seat of empire was transferred from Moscow to this place. Here, in 1736, a fire consumed 2000 houses; and in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again, in June 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, Dec. 29, 1837. See *Russia*.

**PETERSBURGH, PEACE OF,** between Russia and Prussia, the former restoring all her conquests to the latter, signed May 5, 1762. **TREATY OF PETERSBURGH,** for the partition of Poland, (see article *Partition Treaties*.) Aug. 5, 1772. **TREATY OF PETERSBURGH,** for a coalition against France, Sept. 8, 1805. Treaty of alliance, signed at St. Petersburg, between Bernadotte, prince royal of Sweden, and the emperor Alexander; the former agreeing to join in the campaign against France, in return for which Sweden was to receive Norway, March 24, 1812.

**PETRARCH AND LAURA.** Two of the most eminent persons of the fourteenth century, celebrated for the exquisite and refined passion of the former for the latter, and the great genius and virtue of both. The chief subject of Petrarch's enchanting sonnets was the beautiful Laura. He was crowned with laurel, as a poet and writer, on Easter-day, April 8, 1341; and died at Arqua, near Padua, July 18, 1374. Laura died April 6, 1348.

**PHALANX.** A troop of men closely embodied — *Milton*. The Greek phalanx consisted of 8000 men in a square battalion, with shields joined, and spears crossing each other. The battalion formed by Philip of Macedon was called the Macedonian phalanx, and was instituted by him 360 B. C.

**PHARISEES.** They were a famous sect among the Jews; so called from a Hebrew word which signifies to separate or set apart, because they pretended to a greater degree of holiness and piety than the rest of the Jews. The admirable parable of the Pharisee and Publican is levelled against spiritual pride, and to recommend the virtue of humility.—*Luke* xviii. 9.

**PHAROS AT ALEXANDRIA**, called the Pharos of Ptolemy Philadelphus, and esteemed as one of the wonders of the world. It was a tower built of white marble, and could be seen at the distance of 100 miles. On the top, fires were constantly kept, to direct sailors in the bay. The building of this tower cost 800 talents, which are equivalent to above 165,100*l.* English, if Attic; or if Alexandrian, double that sum. There was this inscription upon it—"King Ptolemy to the gods, the saviours, for the benefit of sailors;" but Sostratus the architect, wishing to claim all the glory, engraved his own name upon the stones, and afterwards filled the hollow with mortar, and wrote the above inscription. When the mortar had decayed by time, Ptolemy's name disappeared, and the following inscription then became visible;—"Sostratus the Cnidian, son of Dexiphanes, to the gods, the saviours, for the benefit of sailors." About 280 B. C.

**PHARSALIA, BATTLE OF**, between Julius Cæsar and Pompey, in which the former obtained a great and memorable victory, glorious to Cæsar in all its consequences. Cæsar lost about 200 men, or, according to others, 1200. Pompey's loss was 15,000, or 25,000 according to others, and 24,000 of his army were made prisoners of war by the conqueror, May 12, 48 B. C. After this defeat, Pompey fled to Egypt, where he was treacherously slain, by order of Ptolemy the younger, then a minor, and his body thrown naked on the strand, exposed to the view of all those whose curiosity led them that way, till it was burnt by his faithful freedman Philip.

**PHILADELPHIA, CITY OF**. First surveyed and regulated by the English colony under Penn's grant, in 1682. [The Swedes had settled on Delaware bay in 1627.] Named after a city in Asia-Minor and first laid out with a view to rival ancient Babylon in extent; but the plan was restricted to its present limits by the charter of 1701. First or "Continental" Congress at Philadelphia, Sept. 5, 1774. The Declaration of Independence adopted, July 4, 1776, in the State House, still standing in Chesnut-street. The city taken by the British, Sept. 26, 1777; evacuated by them, June 18, 1778. Convention met here, May 17, 1787, and on 17th of Sept. following, agreed on a constitution for the United States. Yellow fever raged, 1793 and 1798. Congress removed to Philadelphia, 1800. United States Bank established here, 1816. United States Mint, in 1792. Girard College opened, 1846. Population in 1732, 12 000; in 1790, 42,000; in 1810, 96,664; in 1830, 167 811; in 1840, 220,423.

**PHILIPPI, BATTLE OF**, between Octavius Cæsar and Marc Antony on one side, and the republican forces under Brutus and Cassius, in which the former obtained the victory. Two battles were fought: in the first, Brutus, who commanded the right wing, defeated the enemy; but Cassius, who had care of the left, was overpowered, and he ordered his freedman to run him through the body. In the second battle, the wing which Brutus commanded obtained a victory; but the other was defeated, and he found himself surrounded by the soldiers of Antony. He however made his escape, and soon after fell on his sword. Both battles were fought in October, 42 B. C.—*Bossuet*.

**PHILIPPICS**. This species of satire derives its name from the orations of Demosthenes against Philip II. of Macedon, and from *Cicero's Orations* (the second of which was called divine by Juvenal) against Marc Antony, which latter cost Cicero his life, 43 B. C.

**PHILIPPINE ISLES**. Discovered by the Spaniards A. D. 1519. In this archipelago the illustrious circumnavigator Magellan, like the still more illustrious Cook in the Sandwich Islands, lost his life in a skirmish, in 1521.

**PHILOSOPHY**. The knowledge of the reason of things, in opposition to history, which is only the knowledge of facts; or to mathematics, which is the

knowledge of the quantity of things;—the hypothesis or system upon which natural effects are explained.—*Locke*. Pythagoras first adopted the name of philosopher (such men having previously been called sages), about 528 B. C. See *Moral Philosophy*. Philosophers were expelled from Rome, and their schools suppressed, by Domitian, A. D. 83.—*Univ. Hist.* Philosophy has undergone four great changes:—1. A total subserviency to priestcraft and superstition, by the Chaldeans and Egyptians. 2. A commixture of reason and poetry, by the Greeks. 3. A mechanical system, introduced by Copernicus and Galileo; and, 4. A system of poetical, verbal, and imaginary causation, taught by Newton, Lavoisier, &c. The world, at present, are divided between the two last.

**PHILOSOPHER'S STONE.** By this name is usually meant a powder, which some wise heads among the chemists imagined had the virtue of turning all imperfect metals into silver and gold—all metals but these being so considered. Kircher observes, with truth, that the quadrature of the circle, perpetual motion, the inextinguishable lamp, and the philosopher's stone, have cracked the brains of philosophers and mathematicians for a long time, without any useful result. For a remarkable case of folly and imposition in relation to this subject, see *Alchemy*.

**PHOSPHORUS.** It was discovered in the year 1667, by Brant, who procured it from urine; and Scheele soon after found a method of preparing it from bones. The discovery was prosecuted by John Kunckell, a Saxon chemist, 1670, and by the hon. Mr. Boyle, about the same time.—*Nouv. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier; the distinction was first pointed out by Lavoisier, in 1777. Canton's phosphorus is so called from its discoverer, 1768. Protophosphurated hydrogen was discovered by sir Humphrey Davy in 1812.

**PHRENOLOGY.** The science of the mind, and of animal propensities, a modern doctrine, started by Dr. Gall, in 1803. See *Craniology*. Dr. Spurzheim improved the science in 1815, and it has now many professors; and a Phrenological Society has been established in London.

**PHYSIC.** Reason and chance led early to the knowledge and virtues of certain herbs. The sea-horse drawing blood from his body by means of a reed to relieve himself from plethora, taught men the art of artificial blood-letting.—*Pliny*. In fabulous history it is mentioned that Polydus having seen a serpent approach the wounded body of another with an herb, with which he covered it, restored the inanimate body of Glaucus in the same manner.—*Hyginus*. Egypt appears to have been the cradle of the healing art; "and the priests," says Cabanus, "soon seized upon the province of medicine, and combined it with their other instruments of power." From the hands of the priests, medicine fell into those of the philosophers, who freed it from its superstitious character. Pythagoras endeavored to explain the formation of diseases, the order of their symptoms, and the action of medicine, about 529 B. C. Hippocrates, justly regarded as the father of medicine and the founder of the science, flourished about 422 B. C. Galen, born A. D. 131, was the oracle of medical science for nearly 1500 years. The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628.

**PHYSICS.** Well described as a science of unbounded extent, and as reaching from an atom to God himself. It is made to embrace the entire doctrine of the bodies and existences of the universe; their phenomena, causes, and effects. Mr. Locke would include God, angels, and spirits, under this term. The origin of physics is referred to the Brachmans, magi, and Hebrew and Egyptian priests. From these it was derived to the Greek sages, particularly Thales, who first professed the study of nature in Greece, about 595

B. C. Hence, it descended to the Pythagoric, Platonic, and Peripatetic schools; and from these to Italy and the rest of Europe.

**PHYSIOLOGY.** In connection with natural philosophy, and that part of physics which teaches the constitution of the body, so far as it is in its healthy or natural state, and to that purpose endeavors to account for the reason of the several functions and operations of the several members. Sometimes it is limited to that part of medicine which particularly considers the structure and constitution of human bodies, with regard to the cure of diseases. Its date is referred to the same time with physics, *which see*.

**PHYSIOGNOMY.** This is a science by which the dispositions of mankind are discovered, chiefly from the features of the face. The origin of the term is referred to Aristotle; Cicero was attached to the science. It became a fashionable study from the beginning of the sixteenth century; and in the last century, the essays of Le Cat and Pernethy led to the modern system. Lavater's researches in this pursuit arose from his having been struck with the singular countenance of a soldier who passed under a window at which he and Zimmerman were standing; published 1776.

**PIANO-FORTE.** Invented by J. C. Schroder, of Dresden, in 1717; he presented a model of his invention to the court of Saxony; and some time after, G. Silverman, a musical-instrument maker, began to manufacture piano-fortes with considerable success. The invention has also been ascribed to an instrument-maker of Florence. The square piano-forte was first made by Freiderica, an organ-builder of Saxony, about 1758. Piano-fortes were made in London by M. Zumpie, a German, 1766; and have been since greatly improved by others here.

**PICHEGRU'S, MOREAU'S, AND GEORGES' CONSPIRACY.** The memorable conspiracy against Napoleon Bonaparte detected, and Georges and Moreau arrested at Paris, February 23, 1804. Pichegru, when captured, was confined in the Temple, where he was found strangled on the morning of the 6th April following. For the particulars relating to this conspiracy, see article *Georges, &c.*

**PICQUET, THE GAME OF,** the first known game upon the cards, invented by Joquemin, and afterwards other games, for the amusement of Charles VI. of France, who was at the time in feeble health, 1390.—*Mézerai*. See article *Cards*.

**PICTS.** A Scythian or German colony, who landed in Scotland much about the time that the Scots began to seize upon the Ebudæ, or Western Isles. They afterwards lived as two distinct nations, the Scots in the highlands and the isles, and the Picts in that now called the lowlands. About A. D. 838 to 843, the Scots under Kenneth II. totally subdued the Picts, and seized all their kingdom, and extended the limits as far as Newcastle-upon-Tyne.

**PICTURES.** Bularchus was the first who introduced, at least among the Greeks, the use of many colors in one picture. One of his pictures was purchased by the king of Lydia for its weight in gold; he flourished 740 B. C. See *Painting*.

**PIGEON, THE CARRIER.** The courier pigeons are of very ancient use. The ancients being destitute of the convenience of posts, were accustomed when they took a long journey, and were desirous of sending back any news with uncommon expedition, to take some pigeons with them. When they thought proper to write to their friends, they let one of these birds loose, with letters fastened to its neck: the bird, once released, would never cease its flight till it arrived at its nest and young ones. Taurosthenes announced to his father his victory at the Olympic games by sending to him at Ægina a

pigeon stained with purple.—*Ovid*. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. In modern times, the most noted were the pigeons of Aleppo, which served as couriers at Alexandretta and Bagdad. Thirty-two pigeons sent from Antwerp were liberated from London at 7 o'clock in the morning; and on the same day at noon, one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day, Nov. 23, 1819.—*Phillips*.

**PILGRIMAGES.** They began to be made about the middle ages of the church, but they were most in vogue after the close of the 11th century. Many licenses were granted to captains of English ships to carry pilgrims abroad, 7 Henry VI., 1428.

**PILLORY.** A scaffold for persons to stand on, in order to render them infamous, and make them a public spectacle, for every one to see and know, that they might avoid and refuse to have any commerce or dealings with them for the future. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears cut off. It was in use in England in the reign of Henry III., 1256. Many persons died in the pillory, by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment in all cases except perjury, in 1815–16. The pillory was totally abolished by act 1 Victoria, June 1837.

**PINS.** As an article of foreign commerce, pins are first mentioned in the statutes A. D. 1483. Those made of brass wire were brought from France in 1540, and were first used in England, it is said, by Catherine Howard, queen of Henry VIII. Before the invention of pins, both sexes used ribbands, loop-holes, laces with points and tags, clasps, hooks and eyes, and skewers of brass, silver, and gold. They were made in England in 1543.—*Stowe*.

**PISA, LEANING TOWER OF.** This celebrated tower, likewise called *Campanile*, on account of its having been erected for the purpose of containing bells, stands in a square close to the cathedral of Pisa. It is built entirely of white marble, and is a beautiful cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 188 feet in height, it falls sixteen feet from the base. Much pains have been taken by connoisseurs to prove that this was done purposely by the architect; but it is evident that the inclination has proceeded from another cause, namely, from an accidental subsidence of the foundation on that side.

**PISTOLS.** These are the smallest sort of fire-arms, carried sometimes on the saddle-bow, sometimes in a girdle round the waist, sometimes in the pocket, &c.—*Pardon*. The pistol was first used by the cavalry of England, in 1544.

**PITCAIRN'S ISLAND.** A small solitary island in the Pacific Ocean, seen by Cook in 1773, and noted for being colonized by ten mutineers from the ship *Bounty*, captain Bligh, in 1789, from which time, till 1814, they (or rather their descendants) remained here unknown. See *Mutiny of the Bounty*.

**PITT'S ADMINISTRATION.** The first administration of this illustrious statesman was formed on the dismissal of the Coalition ministry (*which see*), Dec. 27, 1783. His second administration was formed May 12, 1804. The right honorable William Pitt was son of the great earl of Chatham. He died

Jan. 23, 1806. Mr. Pitt was a minister of commanding powers, and still loftier pretensions: and he departed life in possession of the esteem of a large portion of his countrymen. A public funeral was decreed to his honor by parliament, and a grant of £40,000 to pay his debts.

**PIUS.** This name was first given to the emperor Antoninus Titus, thence called Antoninus Pius, on account of his piety and virtue, A. D. 138. This name was also given to a son of Metellus, because he interested himself so warmly to have his father recalled from banishment. The name of Pius has also been taken by nine of the popes of Rome, the first of whom assumed it in A. D. 142.

**PLAGUE.** "The offspring of inclement skies, and of legions of putrifying locusts."—*Thomson*. The first recorded general plague in all parts of the world occurred 767 B. C. *Petavius*. At Carthage the plague was so terrible that the people sacrificed their children to appease the gods, 534 B. C.—*Baronius*. At Rome prevailed a desolating plague, carrying off a hundred thousand persons in and round the city, 461 B. C. At Athens, whence it spread into Egypt and Ethiopia, and caused an awful devastation, 430 B. C. Another which raged in the Greek islands, Egypt, and Syria, and destroyed 2000 persons every day, 188 B. C. *Pliny*.

At Rome, a most awful plague; 10,000 persons perish daily, A. D. 78.

The same fatal disease again ravaged the Roman empire, A. D. 167.

In Britain, a plague raged so formidably, and swept away such multitudes, that the living were scarcely sufficient to bury the dead, A. D. 430.

A dreadful one began in Europe in 558, extended all over Asia and Africa, and it is said did not cease for many years. *Univ. Hist.*

At Constantinople, when 200,000 of its inhabitants perished, A. D. 746.

[This plague raged for three years, and was equally fatal in Calabria, Sicily, and Greece.]

At Chichester in England, an epidemical disease carried off 34,000 persons, 772.—*Will. Malm.*

In Scotland, 40,000 persons perished of a pestilence, A. D. 954.

In London, a great mortality, A. D. 1094; and in Ireland, 1095.

Again in London: it extended to cattle, fowls, and other domestic animals, 1111.—*Holings.*

In Ireland: after Christmas this year, Henry II. was forced to quit the country, 1172.

Again in Ireland, when a prodigious number perished, 1204.

A general plague raged throughout Europe, causing a most extensive mortality. Britain and Ireland suffered grievously. In London alone, 200 persons were buried daily in the Charterhouse yard.

In Paris and London a dreadful mortality prevailed in 1362 and 1367; and in Ireland, in 1370.

A great pestilence in Ireland, called the *fourth*. destroyed a great number of the people, 1383.

30,000 persons perished of a dreadful pestilence in London, 1407.

Again in Ireland, superinduced by a famine; great numbers died, 1466; and Dublin was taken by a plague, 1470.

An awful pestilence at Oxford, 1471; and throughout England a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478.—*Rapin; Salmon*.

The awful *Sudor Anglicus*, or sweating sickness, very fatal at London, 1485.—*DeLaune*.

The plague at London so dreadful that Henry VII. and his court removed to Calais, 1500.—*Stowe*.

Again, the sweating sickness (mortal in three hours). In most of the capital towns in England half the inhabitants died, and Oxford was depopulated, 9 II. VIII., 1517.—*Stowe*.

Limerick was visited by a plague, when many thousands perished, 1522.

A pestilence throughout Ireland, 1525; and the English Sweat, 1528; and a pestilence in Dublin, 1575.

30,578 persons perished of the plague in London alone, 1603-1604. It was also fatal in Ireland.

200,000 perished of a pestilence at Constantinople, in 1611.

In London, a great mortality prevailed, and 35,417 persons perished, 1625.

In France, a general mortality; at Lyons 60,000 persons died, 1632.

The plague, brought from Sardinia to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1656.

Memorable plague which carried off 63,596 persons in London, 1665.

[Fires were kept up night and day to purify the air for three days; and it is thought the infection was not totally destroyed till the great conflagration of 1666.]

60,000 persons perished of the plague at Marseilles and neighborhood, brought in a ship from the Levant, 1720.

One of the most awful plagues that ever raged, prevailed in Syria, 1760.—*Abbe Mariti*.

**PLAGUE**, *continued*.

In Persia, a fatal pestilence, which carried off 80,000 of the inhabitants of Bassorah, 1773.

In Egypt, more than 800,000 persons died of plague, 1792.

In Barbary, 3000 died daily; and at Fez 247,000 perished, 1799.

In Spain, and at Gibraltar, immense num-

bers were carried off by a pestilent disease in 1804 and 1805.

Again, at Gibraltar, an epidemic fever, much resembling the plague, caused great mortality, 1828.

The Asiatic cholera (see *Cholera*) 1832, 1834, 1849.

**PLAGUES OF EGYPT.** The refusal of the king to hearken to Moses, although he had performed many miracles to prove his divine mission, brings a display of wrath upon the land, in ten awful instances, which are denominated the plagues of Egypt, 1492 B. C. In this year the king, named by some Amenophis, by others Cherrès, is, with his whole army, overwhelmed in the Red Sea.—*Usher, Blair, Lenglet.*

**PLANTAGENET, HOUSE OF.** A race of fourteen English kings, from Henry II. to Richard III., killed at the battle of Bosworth (*which see*), 1485. Antiquaries are at a loss to account for the origin of this appellation; and the best derivation they can find for it is, that Fulk, the first earl of Anjou, of that name, being stung with remorse for some wicked action, went on a pilgrimage to Jerusalem, as a work of atonement; where being scourged with broom twigs, growing on the spot, he took the surname of Plantagenet, or Broom-stalk, which was retained by his posterity.

**PLASTER OF PARIS**, for moulds, figures, statuary, &c. The method of taking likenesses by its use was first discovered by Andrea Verrochio, about A. D. 1466. This gypsum was first found at Montmartre, a village near Paris, whence it obtained its name.

**PLATÆA, BATTLE OF**, between Mardonius the commander of Xerxes king of Persia, and Pausanias the Lacedæmonian, and the Athenians. The Persian army consisted of 300,000 men, 3000 of which scarce escaped with their lives by flight. The Grecian army, which was greatly inferior, lost but few men; and among these, ninety-one Spartans, fifty-two Athenians, and sixteen Tegeans, were the only soldiers found in the number of the slain. The plunder which the Greeks obtained in the Persian camp was immense. Pausanias received a tenth of all the spoils, on account of his uncommon valor during the engagement, and the rest were rewarded each according to their respective merit. This battle was fought on the 22d September, the same day as the battle of Mycale, 479 B. C.; and by it Greece was totally delivered for ever from the continual alarms to which she was exposed on account of the Persian invasions, and from that time none of the princes of Persia dared to appear with a hostile force beyond the Hellespont.

**PLATE.** The earliest use of plate as an article of luxury cannot be precisely traced. In England, plate, with the exception of spoons, was prohibited in public houses by statute 8 William III., 1696. The celebrated Plate Act passed in May 1756. This act was repealed in 1780. The act laying a duty upon plate passed in 1784.

**PLATINA.** This is the heaviest of all the metals, and harder than silver and gold. The name which is given to it originated with the Spaniards, from the word *Plata*, signifying silver, it would seem on account of its silvery color. It was unknown in Europe until A. D. 1748, when Don Antonio Ulloa announced its existence in the narrative of his voyage to Peru.—*Greig.*

**PLATTSBURGH, ON LAKE CHAMPLAIN, NEW YORK, BATTLE OF;** 14,000 British troops under sir George Prevost repulsed, Sept. 11, 1814. The British fleet on the lake captured by Macdonough, at same time.

**PLAYS.** Tragedy, comedy, satire, and pantomime were performed in Greece and Rome. Plays became a general and favorite pastime about 165 B. C.; but they were performed on occasions of festivity some ages before. The Trojan plays consisted of horse-races and exercises of the youth, under a proper head or captain, wherein the utmost dexterity was practised. The plays of Ceres were instituted to please the ladies, who from the 12th to the 20th of April were clad in white, and, in imitation of that goddess, went with a torch in their hands as if in search of her daughter Proserpine. The plays of Flora were so offensive, that they were forced to be put down. The funeral plays were plays in honor of the dead, and to satisfy their ghosts. There were numerous institutions under the name of plays. Plays were first acted in England at Clerkenwell, A. D. 1397. The first company of players that received the sanction of a patent was that of James Burbage, and others, the servants of the earl of Leicester, from queen Elizabeth, in 1574. In England plays were subjected to a censorship in 1737. See *Drama*.

**PLEADINGS.** In the early courts of judicature in England, pleadings were made in the Saxon language in A. D. 786. They were made in Norman-French from the period of the Conquest in 1066; and they so continued until the 36th of Edward III. 1362. Cromwell ordered all law proceedings to be taken in English in 1650. The Latin was used in conveyancing in the courts of law till 1731.

**POET LAUREAT.** Selden could not trace the precise origin of this office. The first record we have of poet-laureat in England is in the 35th Henry III. 1251. The laureat was then styled the king's versifier, and a hundred shillings were his annual stipend.—*Warton; Maddox, Hist. Exch.* Chaucer, on his return from abroad, assumed the title poet-laureat; and in the twelfth year of Richard II., 1389, he obtained a grant of an annual allowance of wine. James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters patent of Charles I. to 100*l.* per annum, with an additional grant of one tierce of Canary Spanish wine, to be taken out of the king's store of wine yearly.

NAMES OF PERSONS WHO FILLED THE OFFICE FROM THE REIGN OF QUEEN ELIZABETH.

|                                     |                                |                |
|-------------------------------------|--------------------------------|----------------|
| Elizabeth appointed Edmund Spenser, | Nahum Tate, died               | A. D. 1716     |
| who died                            | The rev. Laurence Eusden, died | - 1730         |
| Samuel Daniel, died                 | Colley Cibber, died            | - 1757         |
| Ben Jonson, died                    | William Whitehead, died        | - 1785         |

| John Dryden; he was deposed at the  | Henry James Pye, died          | - 1813         |
| revolution                          | Dr. Robert Southey, died       | March 21, 1843 |
| Thomas Shadwell, died               | William Wordsworth, died       | - 1850         |

**POETRY.** The oldest, rarest, and most excellent of the fine arts, and highest species of refined literature. It was the first fixed form of language, and the earliest perpetuation of thought. It existed before music in melody, and before painting in description.—*Hazlitt*. The exact period of the invention of poetry is uncertain. In Scriptural history, the song of Moses on the signal deliverance of the Israelites, and their passage through the Red Sea, is said to be the most ancient piece of poetry in the world, and is very sublime.—*Exodus* xv. Orpheus of Thrace is the earliest author, and is deemed the inventor of poetry (at least in the western part of the world), about 1249 B. C. Homer, the oldest poet whose works have descended to us, flourished about 907 B. C.—*Parian Marb.* Iambic verse (*which see*) was introduced by Archilochus, 700 B. C.—*Du Fresnoy*. For odes, see article *Odes*. We are told that poetry (or more properly the rules of poetry) was first brought to England by Aldhelme, or Adelmus, abbot of Malmesbury, about the close of the seventh century.

**POISONING.** A number of Roman ladies formed a conspiracy for poisoning their husbands, which they too fatally carried into effect. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B. C. It is said that this was the first public knowledge they had of poisoning at Rome. Poisoning was made petty treason in England, and was punished by boiling to death (of which there were some remarkable instances) 23 Henry VIII. 1532. See article *Boiling to Death*.

**POITIERS, BATTLE OF,** in France, between Edward the Black Prince and John king of France, in which the English arms triumphed. The standard of France was overthrown, and many of her distinguished nobility were slain. The French king was taken prisoner, and brought to London, through which he was led amidst an amazing concourse of spectators. Two kings, prisoners in the same court and at the same time, were considered as glorious achievements; but all that England gained by them was only glory, Sept. 19, 1356.—*Carte*.

**POLAND.** Anciently, the country of the Vandals, who emigrated from it to invade the Roman empire. It became a duchy under Lechus I. A. D. 550; and a kingdom under Boleslaus A. D. 999. Poland was dismembered by the emperor of Germany, the empress of Russia, and king of Prussia, who seized the most valuable territories in 1772. It was finally partitioned, and its political existence annihilated, by the above powers, in 1795.\* The king formally resigned his crown at Grodno, and was afterwards removed to Petersburg, where he remained a kind of state prisoner till his death in 1798. With him ended the kingdom of Poland.

|                                                                                                                                                                     |      |                                                                                                                                                                                                              |               |

| War against the Teutonic knights -                                                                                                                                  | 1447 | [The royal and imperial spoilers, on various pretexts, pour their armies into Poland, 1792, <i>et seq.</i> ]                                                                                                 |               |
| The Wallachians treacherously carry off 100,000 Poles, and sell them to the Turks as slaves - - -                                                                   | 1498 | The brave Poles, under Poniatowski and Kosciusko, several times contend successfully against superior armies, but in the end are defeated. Kosciusko, wounded and taken, is carried prisoner to Russia - - - | 1794          |
| Splendid reign of Sigismund II. -                                                                                                                                   | 1548 | Suwarrow's victories and massacres -                                                                                                                                                                         | 1794          |
| Stephen forms a militia composed of Cossacks, a barbarous race, on whom he bestows the Ukraine - - -                                                                | 1575 | Battle of Warsaw - - -                                                                                                                                                                                       | Oct. 12, 1794 |
|                                                                                                                                                                     |      | [Here Suwarrow subsequently butchered                                                                                                                                                                        |               |

\* An act of spoliation more unprincipled never dishonored crowned heads. For a century previously, the balance of power had engaged the attention of the politicians of Europe; but in permitting this odious crime, such an object appears to have been totally lost sight of. Austria and Prussia had long been deadly enemies, and both hated Russia; yet they now conspired against a country they were each pledged to protect, and with unexampled profligacy became leagued in a scheme of plunder consummated by the destruction of 500,000 lives! Russia seized Lithuania, and all that part to the eastward that suited her. Austria took Galicia, the most fertile of the provinces, lying contiguous to her own dominions; and Prussia secured the maritime districts. The most extraordinary circumstance attending this affair was the total inaction of the two great powers, England and France, whose supineness in a more recent instance also is rebuked by policy as well as justice, and deplored by the good and brave among mankind.—*Haydn*.

POLAND, *continued*.

ers 30,000 Poles of all ages and conditions in cold blood.]  
 Courland is annexed to Russia - 1795  
 Stanislaus resigns his crown; final partition of his kingdom - Nov. 25, 1795  
 Kosciusko set at liberty - Dec. 25, 1796  
 Stanislaus dies at St. Petersburg, Feb. 12, 1798  
 Treaty of Tilsit (*which see*) - July 7, 1807  
 [The central provinces form the duchy of Warsaw, between 1807 and 1813.]  
 General Diet at Warsaw - June, 1812  
 New constitution - Nov. 1815  
 Polish Diet opened - Sept. 1820

 A powerful insurrection; 40,000 march on Cracow, but are defeated, Feb. 23, 1846  
 Cracow occupied by the Austrians, and the treaty which had made it independent, declared abrogated, Nov. 16, 1846  
 Unsuccessful revolt at Cracow, Apr. 25, 1848

## DUKES AND KINGS OF POLAND.

- A. D. 550 Lechus I. His posterity held the dukedom for about 150 years.  
 700 Cracus I.  
 \* \* Cracus II., assassinated by his brother.  
 \* \* Lechus II., deposed.  
 750 Venda, drowned herself.  
 760 Premislaus, who or being elected was named Lescus or Less.  
 804 Lescus II., killed by the French.  
 810 Lescus III.  
 815 Popiel I.  
 830 Popiel II.  
 842 Piasius, a country peasant.  
 861 Zemovitus.  
 892 Lescus IV.  
 913 Zemomislaus.  
 964 Micislaus, surnamed the Blind.  
 999 Boleslaus I., surnamed the Intrepid.  
 1025 Micislaus II., went mad.  
 1041 Casimir the Pacific.  
 1058 Boleslaus II., killed himself.  
 1082 Uladislau, surnamed Humanus.  
 1102 Boleslaus III., surnamed Wry-mouth.  
 1.40 Uladislau II., fled.  
 1145 Boleslaus IV., the Curled.  
 1173 Micislaus III., deposed.  
 1176 Casimir II., surnamed the Just.  
 1194 Lescus V., relinquished.  
 1200 Micislaus IV., whose tyranny in a few months restored Lescus V.; but for bad conduct he was again forced to relinquish the government.  
 1203 Uladislau III.; he voluntarily retired.  
 1206 Lescus V., a third time, being chosen by the nobles, assassinated; succeeded by his son, an infant.  
 1228 Boleslaus V., the Chaste.  
 1279 Lescus VI., surnamed the Black, son of Conrad, brother of Lescus V., died 1289. An interregnum of five years, when the Poles chose

- 1295 Premislaus, great duke of Poland, assassinated.  
 1296 Uladislau IV., surnamed Loeticus; he refused the title of king; deposed.  
 1300 Winceslaus.  
 1306 Uladislau IV., again.  
 1333 Casimir the Great, killed by a fall from his horse, while hunting.  
 1370 Lewis, king of Hungary, succeeded by his daughter,  
 1383 Hedwigis, who married, in  
 1385 Jagellon, duke of Lithuania, who embraced the Christian religion, and took the name of  
 Uladislau V.; united Lithuania to Poland.  
 1434 Uladislau VI., killed in battle.  
 1444 Boleslaus, duke of Massovia.  
 1447 Casimir IV.  
 1492 John Albert.  
 1502 Alexander, prince of Livonia.  
 1507 Sigismund I.  
 1548 Sigismund II., Augustus, chose  
 1573 Henry of Valois, duke of Anjou, succeeding to the French throne.  
 1576 Stephen Battory, prince of Transylvania.  
 1587 Sigismund III., son to the king of Sweden.  
 1632 Uladislau VII.  
 1648 John Casimir, abdicated.  
 1669 Michael Koribert Wiesnown.  
 1674 John Sobieski, died in 1697. An interregnum for a year.  
 1698 Frederick Augustus II., forced to resign.  
 1704 Stanislaus I., Leczinsky, forced to retire in 1710.  
 1710 Frederick Augustus II., again.  
 1733 Stanislaus I., again.  
 1733 Frederick Augustus III.  
 1764 Stanislaus Augustus resigns the crown.

So late as the 13th century, the Poles retained the custom of killing old men when past labor, and such children as were born imperfect.

POLAR REGIONS. For voyages of discovery to the, see *North-west Passage*.

**POLE STAR.** A star of the second magnitude, the last in the tail of the constellation called the *Little Bear*; its nearness to the North Pole causes it never to set to those in the northern hemisphere, and therefore it is called the seaman's guide. The discovery of the Pole Star is ascribed by the Chinese to their emperor Hong Ti, the grandson (they say) of Noah, who reigned and flourished 1970 B. C.—*Univ. Hist.*

**POLICE.** That of London has been extended and regulated at various periods. Its jurisdiction was extended 27 Elizabeth 1585, and 16 Charles I. 1640; and the system improved by various acts in subsequent reigns. The London police grew out of the London watch, instituted about 1253. The London police was remodelled by Mr. (afterwards sir Robert) Peel, by statute, June 19, 1829. Some advance has been made since 1840, in introducing a suitable police in New York and other large cities of the United States; but we are yet very far behind London in this matter. Probably no city in the world, large or small, is so well provided as London with an efficient and useful police force; a force which not only detects and prevents crime, but preserves order, quiet, and public convenience, in an admirable manner.

**POLITICAL ECONOMY,** or improvement of the condition of mankind. A science justly viewed as the great high-road to public and private happiness. Its history may be dated from the publication of Dr. Adam Smith's *Wealth of Nations*, 1776.

**POLITICIANS.** A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom; a wise and cunning man.—*Pardon.* The term was first used in France about A. D. 1569.—*Henault.*

**POLL-TAX.** The tax so called was first levied in England A. D. 1378. The rebellion of Wat Tyler sprung from this impost (see *Tyler*), 1381. It was again levied in 1513. By the 18th Charles II. every subject was assessed by the head, viz.—a duke 100*l.*, a marquis 80*l.*, a baronet 30*l.*, a knight 20*l.*, an esquire 10*l.*, and every single private person 12*d.*, 1667. This grievous impost was abolished by William III. at the period of the Revolution.

**POLYGAMY.** Most of the early nations of the world admitted polygamy. It was general among the ancient Jews, and is still so among the Turks and Persians. In Medea it was a reproach to a man to have less than seven wives. Among the Romans, Marc Antony is mentioned as the first who took two wives; and the practice became frequent until forbidden by Arcadius A. D. 393. The emperor Charles V. punished this offence with death. In England, by statute 1 James I. 1603, it was made felony, but with benefit of clergy. This offence is now punished with transportation. See *Marriages.*

**POLYGLOT.** The term is derived from two Greek words denoting "many languages," and it is chiefly used for the Bible so printed. The Polyglot Bible termed the Complutensian Polyglot, in 6 vols. folio, was printed A. D. 1514-17; the first edition at the expense of the celebrated cardinal Ximenes. Three copies of it were printed on vellum. Count MacCarthy, of Toulouse, paid 483*l.* for one of these copies at the Pinelli sale. The second Polyglot was printed at Antwerp, by Montanus, 8 vols. folio, in 1569. The third was printed at Paris, by Le Jay, in 10 vols. folio, 1628-45. The fourth in London, printed by Bryan Walton, in 6 vols. folio, 1657.—*Brunet.*

**POMPEII, RUINS OF.** This ancient city of Campania was partly demolished by an earthquake in A. D. 63. It was afterwards rebuilt, and was swallowed up by an awful eruption of Vesuvius, accompanied by an earthquake, on the night of the 24th of August, A. D. 79. Many of the principal citizens happened at the time to be assembled at a theatre where public spectacles were

exhibited. The ashes buried the whole city, and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, accidentally found a bronze figure; and this discovery attracting the attention of the learned, further search brought numerous productions to light, and at length the city was once more shone on by the sun. Different monarchs have contributed their aid in uncovering the buried city; the part first cleared was supposed to be the main street, A. D. 1750.

**PONDICHERRY.** Formerly the capital of French India, and first settled by the French in 1674. It was taken from them by the Dutch in 1693, and was besieged by the English in 1748. It was taken by the English forces in January 1761, and was restored in 1763. Pondicherry was once more captured by the British, August 23, 1793; and finally in 1803.

**PONTUS.** The early history of this country (which seems to have been but a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*) is very obscure. Artabazes was made king of Pontus by Darius Hystaspes. His successors were little more than satraps or lieutenants of the kings of Persia, and are scarcely known even by name.

|                                                                                                                          |             |                                                                                                                                                     |          |

| Artabazes made king of Pontus by Darius Hystaspes                                                                        | - B. c. 487 | Tigranes ravages Cappadocia                                                                                                                         | B. c. 86 |
| Reign of Mithridates I.                                                                                                  | - 383       | Mithridates enters Bithynia, and makes himself master of many Roman provinces, and puts 80,000 Romans to death                                      | - 86     |
| Ariobarzanes invades Pontus                                                                                              | - 363       | Archelaus defeated by Sylla, at Chæronæa; 100,000 Cappadocians slain                                                                                | - 86     |
| Mithridates II. recovers it                                                                                              | - 336       | Victories and conquests of Mithridates up to this time                                                                                              | - 74     |
| Mithridates III. reigns                                                                                                  | - 301       | The fleet of Mithridates defeats that under Lucullus, in two battles                                                                                | - 73     |
| Ariobarzanes II. reigns                                                                                                  | - 266       | Mithridates defeated by Lucullus                                                                                                                    | - 69     |
| Mithridates IV. is besieged in his capital by the Gauls, &c.                                                             | - 252       | Mithridates defeats Fabius                                                                                                                          | - 68     |
| Mithridates makes an unsuccessful attack upon the free city of Sinope, and is obliged to raise the siege by the Rhodians | - 219       | But is defeated by Pompey                                                                                                                           | - 66     |
| Reign of Pharnaces; he takes Sinope, and makes it the capital of his kingdom                                             | - 183       | Mithridates stabs himself, and dies                                                                                                                 | - 63     |
| Reign of Mithridates V.                                                                                                  | - 157       | Reign of Pharnaces                                                                                                                                  | - 63     |
| He is murdered in the midst of his court                                                                                 | - 123       | Battle of Zela (see <i>Zela</i> ); Pharnaces defeated by Cæsar                                                                                      | - 47     |
| Mithridates VI., surnamed the Great, or Eupator, receives the diadem at 12 years of age                                  | - 123       | Darius reigns                                                                                                                                       | - 39     |
| Marries Laodice, his own sister                                                                                          | - 115       | Polemon, son of Zeno, reigns                                                                                                                        | - 36     |
| She attempts to poison him; he puts her and her accomplices to death                                                     | - 112       | Polemon II. succeeds his father                                                                                                                     | - 33     |
| Mithridates makes a glorious campaign; conquers Scythia, Bosphorus, Colchis, and other countries                         | - 111       | Mithridates VII. reigns                                                                                                                             | - 40     |
| He enters Cappadocia                                                                                                     | - 97        | Pontus afterwards became a Roman province, under the emperors.                                                                                      |          |
| His war with Rome                                                                                                        | - 89        | Alexis Comnenus founded a new empire of the Greeks at Trebisonde, in this country, A. D. 1204, which continued till the Turks destroyed it in 1459. |          |

**POOR LAWS.** The poor of England till the time of Henry VIII. subsisted as the poor of Ireland do to this day, entirely upon private benevolence. By an ancient statute, 23 Edward III. 1348, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "parsons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by statute 15 Richard II. impropiators were obliged to distribute a yearly sum to the poor. But no compulsory law was enacted till the 27th Henry VIII., 1535. The origin of the present system of poor laws is referred to the 43d of Elizabeth, 1600.

|                              |             |                              |             |
|------------------------------|-------------|------------------------------|-------------|
| In 1580, the Poor Rates were | £188,811    | In 1815, the Poor Rates were | £5,418,845  |
| 1680, they amounted to       | - 665,562   | 1820, they amounted to       | - 7,329,594 |
| 1698, they amounted to       | - 819,000   | 1830, they amounted to       | - 8,111,422 |
| 1760, they amounted to       | - 1,556,804 | 1835, they amounted to       | - 6,356,345 |
| 1785, they amounted to       | - 2,184,950 | 1840, they amounted to       | - 5,468,699 |
| 1802, they amounted to       | - 4,952,421 | 1845, they amounted to       | - 5,543,650 |

**POPE.** This title was originally given to all bishops. It was first adopted by Hygenus, A. D. 138; and pope Boniface III. procured Phocas, emperor of the

East, to confine it to the prelates of Rome, 606. By the connivance of Phocas also, the pope's supremacy over the Christian church was established. The custom of kissing the pope's toe was introduced in 708. The first sovereign act of the popes of Rome was by Adrian I., who caused money to be coined with his name, 780. Sergius II. was the first pope who changed his name, on his election in 844. Some contend that it was Sergius I. and others John XII. or XIII. See *Names*. John XVIII., a layman, was made pope 1024. The first pope who kept an army was Leo IX. 1054. Gregory VII. obliged Henry IV., emperor of Germany, to stand three days in the depth of winter, barefooted, at his castle gate, to implore his pardon, 1077. The pope's authority was firmly fixed in England 1079. Appeals from English tribunals to the pope were introduced 19 Stephen, 1154.—*Viner's Statutes*. Henry II. of England held the stirrup of pope Alexander III. to mount his horse, 1161; and also for Becket, 1170.\* Celestine III. kicked the emperor Henry VI.'s crown off his head while kneeling, to show his prerogative of making and unmaking kings, 1191. The pope collected the tenths of the whole kingdom of England, 1226. The papal seat was removed to Avignon, in France, in 1308, for seventy years. The Holy See's demands on England were refused by parliament, 1363. Appeals to Rome from England were abolished 1533.—*Viner*. The words "Lord Pope" were struck out of all English books, 1541. The papal authority declined about 1600. Kissing the pope's toe and other ceremonies, were abolished by Clement XIV. 1773. The pope became destitute of all political influence in Europe, 1787. Pius VI. was burnt in effigy at Paris 1791. He made submission to the French republic, 1796. Was expelled from Rome, and deposed, February 22, 1798, and died at Valence, August 19, 1799. Pius VII. was elected in exile, March 13, 1800. Was dethroned May 13, 1809. Remained a prisoner at Fontainebleau till Napoleon's overthrow; and was restored May 24, 1814. Pope Pius IX. elected June 1846, decrees a senate of 100, Oct. 2, 1847. Riot at Rome, new ministry, May 1, 1848. Count Rossi, the pope's prime minister, assassinated Nov. 16, 1848. Attack of the people on the Quirinale; the pope yields and grants a liberal ministry, Nov. 16. After being a prisoner in his palace for a week, the pope escapes in disguise of a servant to Mola-di-Gaeta, Nov. 24, and thence goes to Portici, near Naples. Roman republic proclaimed Feb. 9, 1849. See *Rome*. The pope returned to Rome, April 1850. See *Italy*; *Rome*; *Reformation*, &c.

#### POPES SINCE THE REFORMATION.

|                                                                                 |                                                        |
|---------------------------------------------------------------------------------|--------------------------------------------------------|
| A.D. 1513 Leo X.; his grant of indulgences for crime led to the reformation.    | 1591 Innocent IX.; died in 2 months.                   |
| 1522 Adrian VI.                                                                 | 1592 Clement VIII.; learned and just.                  |
| 1523 Clement VII.; denounced Henry VIII. of England.                            | 1605 Leo XI.; died same month.                         |
| 1534 Paul III.                                                                  | 1605 Paul V.                                           |
| 1550 Julius III.                                                                | 1621 Gregory XV.; beneficent.                          |
| 1555 Marcellus II.; died in 21 days.                                            | 1623 Urban VIII.                                       |
| 1555 Paul IV.; fiery and haughty.                                               | 1644 Innocent X.; violent and cruel.                   |
| 1559 Pius IV.                                                                   | 1655 Alexander VII.; liberal and learned.              |
| 1566 Pius V.                                                                    | 1667 Clement IX.; died of grief.                       |
| 1572 Gregory XIII.; learned canon; reformed the Calendar, ( <i>which see</i> ). | 1670 Clement X.                                        |
| 1585 Sixtus V.; supposed poisoned.                                              | 1676 Innocent XI.; reformed abuses.                    |
| 1590 Urban VII.; died 12 days after.                                            | 1689 Alexander VIII.                                   |
| 1590 Gregory XIV.                                                               | 1691 Innocent XII.; abolished nepotism.                |
|                                                                                 | 1700 Clement XI.                                       |
|                                                                                 | 1721 Innocent XIII.; the eighth pontiff of his family. |

\* "When Louis, king of France, and Henry II. of England, met pope Alexander III. at the castle of Torcé, on the Loire, they both dismounted to receive him, and holding each of them one of the reins of his bridle, walked on foot by his side, and conducted him in that submissive manner into the castle."—*Hume*. Pope Adrian IV. was the only Englishman that ever obtained the tiara. His arrogance was such, that he obliged Frederick I. to prostrate himself before him, kiss his foot, hold his stirrup, and lead the white palfrey on which he rode. His name was Nicholas Brekespeare. He was elected to the popedom in 1154.

POPEs, *continued.*

1724 Benedict XIII.  
 1730 Clement XII.; reformed abuses.  
 1740 Benedict XIV.; wise and pious.  
 1758 Clement XIII.  
 1769 Clement XIV. Ganganelli.  
 1775 Pius VI., February 14.

1800 Cardinal Chiaramonte, elected at Venice, as Pius VII., March 13.  
 1823 Annibal della Genga, Leo XII., Sept. 28.  
 1831 Mauro Capellari, Gregory XVI., Feb. 2.  
 1846 Mastai Ferretti, Pius IX., inaugurated June 21, aged 54. - June 16.

For *Succession of Popes* to the Reformation, see *Tabular Views*, from page 50 to page 115.

**POPE JOAN.** It is fabulously asserted that in the ninth century, a female, named Joan, conceived a violent passion for a young monk named Felda, and in order to be admitted into his monastery assumed the male habit. On the death of her lover, she entered on the duties of professor, and being very learned, was elected pope when Adrian II. died in 872. Other scandalous particulars follow; "yet until the Reformation the tale was repeated and believed without offence."—*Gibbon*.

**POPISH PLOT.** This plot is said to have been contrived by the Catholics to assassinate Charles II.; concerning which, even modern historians have affirmed, that some circumstances were true, though some were added, and others much magnified. The popish plot united in one conspiracy three particular designs: to kill the king, to subvert the government, and extirpate the Protestant religion: Lord Stafford was convicted of high treason as a conspirator in the Popish plot, and was beheaded, making on the scaffold the most earnest protestations of his innocence, Dec. 29, 1680.—*Rapin*.

**POPULATION.** The population of the world may now, according to the best and latest authorities, Balbi, Hanneman, the *Almanac de Gotha*, &c., be stated in round numbers at 1050 millions. Of these, Europe is supposed to contain 270 millions; Asia, 565 millions; Africa, 115 millions; America, 75 millions; and Australasia, 25 millions. The population of England in A. D. 1377 was 2,092,978 souls. In a little more than a hundred years, 1483, it had increased to 4,689,000. The following tables of the population of the United Kingdom are from official returns:—

## POPULATION OF ENGLAND AND WALES DECENNIAIALLY FOR ONE HUNDRED YEARS.

| Year 1700        | Population 5,475,000 | Year 1770        | Population 7,423,000 |
|------------------|----------------------|------------------|----------------------|
| 1710 - - - ditto | 5,240,000            | 1780 - - - ditto | 7,953,000            |
| 1720 - - - ditto | 5,565,000            | 1790 - - - ditto | 8,675,000            |
| 1730 - - - ditto | 5,796,000            | 1801 - - - ditto | 10,942,646           |
| 1740 - - - ditto | 6,064,000            | 1821 - - - ditto | 14,391,631           |
| 1750 - - - ditto | 6,467,000            | 1841 - - - ditto | 18,844,434           |

**PORCELAIN.** *Porcelaine.* Said to be derived from *Pour cent années*, it being formerly believed that the materials of porcelain were matured under ground 100 years. It is not known who first discovered the art of making porcelain, nor is the date recorded; but the manufacture has been carried on in China at King-te-ching, at least since A. D. 442, and here still the finest porcelain is made. It is first mentioned in Europe in 1581, shortly after which time it was known in England. See *China Porcelain*, and *Dresden China*.

**PORTLAND,** the largest town in Maine, formerly part of Falmouth; burnt by the British, Oct. 1775. Population in 1800, 3,677; in 1820, 8,581; in 1840, 15,082.

**PORTO BELLO.** Discovered by Columbus, November 2, 1502. It was taken from the Spaniards by the British under admiral Vernon, November 22, 1739. It was again taken by admiral Vernon, who destroyed the fortifications, in 1742. Before the abolition of the trade by the galleons, in 1748, and the introduction of register ships, this place was the great mart for the rich commerce of Peru and Chili.

**PORTO FERRAJO.** Capital of Elba; built and fortified by Cosmo I. duke of Florence, in 1548; but the fortifications were not finished till 1628, when Cosmo II. completed them with a magnificence equal to that displayed by the old Romans in their public undertakings. Here was the residence of Napoleon in 1814-15. See *Bonaparte, Elba*, and *France*.

**PORTSMOUTH.** The most considerable haven for men-of-war, and the most strongly fortified place in England. The dock, arsenal, and storehouse, were established in the reign of Henry VIII.

**PORTUGAL.** The ancient Lusitania. The name is derived from Porto Cal, the original appellation of the city of Oporto. It submitted to the Romans about 250 B. C., and underwent the same changes as Spain on the fall of the Roman empire. Conquered by the Moors. A. D. 713. They kept possession till they were conquered by Alphonsus VI. the Valiant of Castile, assisted by many other princes and volunteers. Among those who shared most in this celebrated expedition was Henry of Lorraine, grandson of Robert, king of France. Alphonsus bestowed upon him Theresa, his natural daughter, and, as her marriage portion, the kingdom of Portugal, which he was to hold of him, A. D. 1093.

| Passage to the East Indies, by the Cape of Good Hope, discovered -                                                                                                                                                                                                                  | 1493          | Portugal solicits the assistance of Great Britain -                                                                                                                            | Dec. 3, 1826   |
| Discovery of the Brazils -                                                                                                                                                                                                                                                          | 1500          | Departure of the first British auxiliary troops for Portugal -                                                                                                                 | Dec. 17, 1826  |
| The Inquisition established -                                                                                                                                                                                                                                                       | 1526          | Don Miguel formally assumes the title of king -                                                                                                                                | July 4, 1828   |
| The kingdom seized by Philip II. of Spain -                                                                                                                                                                                                                                         | 1580          | He dissolves the three estates -                                                                                                                                               | July 12, 1828  |
| The Portuguese throw off the yoke, and place John, duke of Braganza, on the throne. His posterity still possess the crown -                                                                                                                                                         | 1640          | Revolution at Brazil -                                                                                                                                                         | April 7, 1831  |
| The great earthquake which destroys Lisbon. See <i>Earthquake</i> -                                                                                                                                                                                                                 | 1755          | Don Pedro arrives in England -                                                                                                                                                 | June 16, 1831  |
| Joseph I. is attacked by assassins, and narrowly escapes death -                                                                                                                                                                                                                    | 1758          | Insurrection in favor of the queen, in which 300 lives are lost -                                                                                                              | Aug. 21, 1831  |
| [This affair causes some of the first families of the kingdom to be tortured to death, their very names being forbidden to be mentioned; yet many were unjustly condemned, and their innocence was soon afterwards made manifest. The Jesuits were also expelled on this occasion.] |               | Don Pedro's expedition sails from Belle-isle -                                                                                                                                 | Feb. 9, 1832   |
| Joseph, having no son, obtains a dispensation from the pope to enable his daughter and brother to intermarry. See <i>Incest</i> . -                                                                                                                                                 | 1760          | At Terceira Don Pedro proclaims himself regent of Portugal, on behalf of his daughter -                                                                                        | April 2, 1832  |
| The Spaniards and French invade Portugal, which is saved by the valor of the English -                                                                                                                                                                                              | 1762 and 1763 | He takes Oporto -                                                                                                                                                              | July 8, 1832   |
| Regency of John (afterwards king) owing to the queen's lunacy -                                                                                                                                                                                                                     | 1792          | After various conflicts, Don Miguel capitulates to the Pedroites -                                                                                                             | May 26, 1834   |
| The Court, on the French invasion, emigrates to the Brazils -                                                                                                                                                                                                                       | Nov. 2, 1807  | Don Miguel is permitted to leave the country unmolested -                                                                                                                      | May 31, 1834   |
| Marshal Junot enters Lisbon, -                                                                                                                                                                                                                                                      | Nov. 29, 1807 | Massacres at Lisbon -                                                                                                                                                          | June 9, 1834   |
| Convention of Cintra (see article under that name) -                                                                                                                                                                                                                                | Aug. 30, 1808 | The queen declared by the Cortes to be of age -                                                                                                                                | Sept. 15, 1834 |
| Portugal cedes Guiana to France -                                                                                                                                                                                                                                                   | 1814          | Don Pedro dies -                                                                                                                                                               | Sept. 21, 1834 |
| Revolution in Portugal -                                                                                                                                                                                                                                                            | Aug. 29, 1820 | Prince Augustus of Portugal (duke of Leuchtenberg), just married to the queen, dies -                                                                                          | March 28, 1835 |
| Constitutional Junta -                                                                                                                                                                                                                                                              | Oct. 1, 1820  | The queen marries prince Ferdinand of Saxe Coburg -                                                                                                                            | Jan. 1, 1836   |
| Return of the Court -                                                                                                                                                                                                                                                               | July 4, 1821  | A sudden change of ministry leads to a formidable revolution -                                                                                                                 | Oct. 9, 1846   |
| Independence of Brazil, the prince regent made emperor -                                                                                                                                                                                                                            | Oct. 12, 1822 | Action at Evora; the insurgents defeated by the queen's troops -                                                                                                               | Oct. 23, 1846  |
| The king of Portugal suppresses the constitution -                                                                                                                                                                                                                                  | June 5, 1823  | [Oporto, where a revolutionary junta is established, and other large towns, are seized by the insurgent army.]                                                                 |                |
| Disturbances at Lisbon; Don Miguel departs, &c. -                                                                                                                                                                                                                                   | May 1-9, 1824 | Actions are fought at Viana, Valpassos, Braga, Torres-Vedras, &c., favorable to the queen. Battle of St. Ubes; the insurgents defeated, losing 861 men in killed and wounded - | May 1, 1847    |
| Treaty with Brazil -                                                                                                                                                                                                                                                                | Aug. 29, 1825 | Intervention of England, France, and Spain, signed in London -                                                                                                                 | May 21, 1847   |
|                                                                                                                                                                                                                                                                                     |               | Claim of the United States on Portugal for damages in the war of 1812, resisted, and U. S. minister leaves Lisbon -                                                            | July, 1850     |

## KINGS OF PORTUGAL.

|                                                             |                                                                                                                                      |
|-------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| A.D. 1093 King of Lorraine, count or earl of Portugal.      | 1335 John I., the Bastard, natural son to Peter the Severe.                                                                          |
| 1112 Alphonso I.; proclaimed king -                         | 1433 Edward.                                                                                                                         |
| 1185 Sancho I.                                              | 1438 Alphonsus V.                                                                                                                    |
| 1212 Alphonso II., surnamed Crassus, or the Fat.            | 1481 John II.                                                                                                                        |
| 1224 Sancho II., the Idle, deposed.                         | 1495 Emanuel.                                                                                                                        |
| 1247 Alphonso III.                                          | 1521 John III.                                                                                                                       |
| 1279 Dennis.                                                | 1557 Sebastian, killed in Africa.                                                                                                    |
| 1325 Alphonsus IV.                                          | 1578 Henry, the Cardinal.                                                                                                            |
| 1357 Peter the Severe.                                      | 1580 Anthony, prior of Crato, son of Emanuel, deposed by Philip II. of Spain, who united Portugal to his other dominions, till 1640. |
| 1367 Ferdinand I., died 1383; an interregnum for 18 months. |                                                                                                                                      |

PORTUGAL, *continued.*

|                                                                                               |                                                               |
|-----------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| 1640 John IV., duke of Braganza, dispossessed the Spaniards, and was proclaimed king, Dec. 1. | 1750 Joseph.                                                  |
| 1656 Alphonsus VI.                                                                            | 1777 Mary Frances Isabella.                                   |
| 1668 Peter II.                                                                                | 1799 John VI.                                                 |
| 1707 John V.                                                                                  | 1826 Don Pedro; he abdicates May 2, in favor of his daughter. |
|                                                                                               | 1826 Maria de Gloria.                                         |

**POSTS.** Posts originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia. Augustus was the first who introduced this institution among the Romans, and who employed post-chaises. This plan was imitated by Charlemagne about A. D. 800.—*Ashe.* Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe. 1470.—*Henault.* In England the plan commenced in the reign of Edward IV., 1481, when riders on post-horses went stages of the distance of twenty miles from each other in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots.—*Gale.* Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England.—*Sadler's Letters.* Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635.—*Strype.*

**POST-OFFICE, THE GENERAL, OF ENGLAND.** See *preceding article.* The first chief postmaster of England was Mr. Thomas Randolph, appointed by queen Elizabeth in 1581.\*

| THE REVENUE OF THE POST-OFFICE OF ENGLAND AT THE FOLLOWING PERIODS, VIZ. |         |                                                            |           |
|--------------------------------------------------------------------------|---------|------------------------------------------------------------|-----------|
| In 1643 It yielded                                                       | £5,000  | In 1805 Great Britain                                      | 1,424,994 |
| 1653 Farmed to John Manley, Esq., for                                    | 10,000  | 1815 Ditto                                                 | 1,755,898 |
| 1663 Farmed to Daniel O'Neale, Esq., for                                 | 21,500  | 1820 United Kingdom                                        | 2,402,697 |
| 1674 Farmed for                                                          | 43,000  | 1825 Ditto                                                 | 2,255,239 |
| 1685 It yielded                                                          | 65,000  | 1835 Ditto                                                 | 2,353,340 |
| 1707 Ditto                                                               | 111,461 | 1839 Last year of the heavy postage                        | 2,522,495 |
| 1764 Ditto                                                               | 432,048 | 1840 First year of the low rate, 1 penny for all distances | 471,000   |
| 1800 Ditto                                                               | 745,313 |                                                            |           |

**POST-OFFICE IN THE UNITED STATES.** The first post-office in the colonies was established in 1710, by act of Parliament for establishing a general post-office for all her Majesty's dominions. During the revolution this department was, of course, controlled by Congress, and the Constitution of the United States, 1789, provided for the continuance of this control—the Postmaster-General being appointed by the President and Senate, as one of the cabinet. For successive Postmaster-Generals see *Administrations.* The following table gives the statistics of the post-offices in the United States at different times since 1790.

| Year. | No. of Post Offices. | Amount of Postage. | Net Revenue. | Extent in mil. of Post Roads |
|-------|----------------------|--------------------|--------------|------------------------------|
| 1790  | 75                   | \$37,938           | \$5,795      | 1,875                        |
| 1800  | 903                  | 280,804            | 66,810       | 20,817                       |
| 1810  | 2,300                | 551,694            | 55,715       | 36,406                       |
| 1820  | 4,500                | 1,111,927          | —†           | 72,492                       |
| 1830  | 8,000                | 1,850,583          | —†           | 115,000                      |
| 1840  | 13,468               | 4,539,265          | —†           | 155,739                      |
| 1845  | 14,183               | 4,289,842          | —†           | 143,940                      |
| 1846  | 14,601               | 3,487,199†         | —†           | 152,865                      |
| 1847  | 15,146               | 3,955,893†         | —†           | 153,813                      |
| 1848  | 16,159               | 4,371,077†         | 44,227       | 163,203                      |

The number of dead letters returned quarterly is estimated at 450 000.

\* Even so late as between 1730 and 1740, the post was only transmitted three days a week between Edinburgh and London; and the metropolis, on one occasion, *only sent a single letter*, which was for an Edinburgh banker, named Ramsay.

† In all these years the receipts fell short of the expenditures.

‡ The returns for 1846, 7, and 8, are for the first three years of the new law passed March 3, 1842 reducing the letter postage to 5 cents under 300 miles, and 10 cents for all greater distances.

**POTATOES.** The potato is a native of Chili and Peru. Potatoes were originally carried to England from Santa Fe. in America, by sir John Hawkins, A. D. 1563. Others ascribe this introduction to sir Francis Drake, in 1586; while their general introduction is mentioned by many writers as occurring in 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America, by that "patriot of every clime," the late Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. It is affirmed that the Neapolitans once refused to eat potatoes during a famine. —*Butler*. Potatoe disease first appeared in Ireland, &c., causing great alarm and distress, Oct. 1845.

**POTOSI, MINES OF.** These mines were discovered by the Spaniards in 1545, and produce the best silver in America. They are in a mountain in the form of a sugar-loaf. Silver was as common in this place as iron is in Europe; but the mines are now much exhausted, or at least little is got in comparison of what was formerly obtained.

**POUND.** From the Latin *Pondus*. The pound sterling was in Saxon times, about A. D. 671, a pound troy of silver, and a shilling was its twentieth part, consequently the latter was three times as large as it is at present. —*Peacham*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina*, or 3*l.* 4*s.* 7*d.* Our avoirdupois weight (*avoir du poids*) came from the French, and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen. —*Chambers*.

**POWDERING THE HAIR.** This custom took its rise from some of the ballad-singers at the fair of St. Germain whitening their heads to make themselves ridiculous. Unlike other habits it was adopted from the low by the high, and became very general about A. D. 1614. In England the powdered-hair tax took place in May 1795, at which time the preposterous practice of using powder was at its height; this tax was one guinea for each person. The hair-powder tax is still continued, though it yields in England under 7000*l.* per year, and in Scotland about 250*l.* It was abolished in Ireland.

**PRÆTORS.** Magistrates of Rome. The office was instituted 365 B. C., when one prætor only was appointed; but a second was appointed in 252 B. C. One administered justice to the citizens, and the other appointed judges in all causes which related to foreigners. In the year of Rome 520, two more prætors were created to assist the consul in the government of the provinces of Sicily and Sardinia, which had been lately conquered, and two more when Spain was reduced into the form of a Roman province, A. U. C. 551. Sylla the dictator added two more, and Julius Cæsar increased the number to 10, and afterwards to 16, and the second triumvirate to 64. After this their numbers fluctuated, being sometimes 18, 16, or 12, till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

**AGA, BATTLE OF,** in which 30,000 Poles were butchered by the merciless Russian general Suwarrow, fought Oct. 10, 1794. Battle of Praga, in which the Poles commanded by Skrznecki defeated the Russian army commanded by general Giesmar, who loses 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon; fought between Grothoff and Wawer, March 31, 1831.

**PRAGMATIC SANCTION.** An ordinance relating to the church and sometimes state affairs; and at one time particularly the ordinances of the kings of France, wherein the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops. Also the emperor's letter by advice of his council, in answer to high personages in particular

contingencies. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, A. D. 1439. The emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the sons of his brother Joseph I., April 17, 1713, and he settled his dominions on his daughter Maria Theresa in conformity thereto, 1722. She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged.

**PRAGUE, BATTLE OF**, between the Imperialists and Bohemians. The latter, who had chosen Frederick V. of the Palatine (son-in-law to our James I.) for their king, were totally defeated. The unfortunate king was forced to flee with his queen and children into Holland, leaving all his baggage and money behind him. He was afterwards deprived of his hereditary dominions, and the Protestant interest was ruined in Bohemia; all owing to the pusillanimity and inactivity of James, Nov. 7, 1620. Prague was taken by the Saxons in 1631; and by the Swedes in 1648. It was taken by storm by the French, in 1741; but they were obliged to leave it in 1742. In 1744, it was taken by the king of Prussia; but he was obliged to abandon it the same year. The great and memorable battle of Prague was fought May 6, 1757. In this engagement the Austrians were defeated by prince Henry of Prussia, and their whole camp taken; their illustrious commander, general Brow, was mortally wounded; and the brave Prussian, marshal Schwerin, was killed. After this victory, Prague was besieged by the king of Prussia, but he was soon afterwards obliged to raise the siege.

**PRAISE-GOD-BAREBONES' PARLIAMENT**. A celebrated parliament, so called from one of the members (who had thus fantastically styled himself according to the fashion of the times), met July 4, 1653. This parliament consisted of 144 members, summoned by the protector Cromwell; they were to sit for fifteen months, and then they were to choose a fresh parliament themselves.

**PRATIQUE**. The writing or license of this name was originally addressed by the Southern nations to the ports of Italy to which vessels were bound, and signified that the ship so licensed came from a place or country in a healthy state, and no way infected with the plague or other contagious disease. The pratique is now called a bill of health, and is still of the same intent and import.—*Ashe*.

**PRAYERS FOR THE DEAD, &c.** They were first introduced into the Christian church about A. D. 190.—*Eusebius*. Prayers addressed to the Virgin Mary and to the saints were introduced by pope Gregory, A. D. 593. The mode of praying with the face to the east was instituted by pope Boniface II., A. D. 532.

**PRECEDENCE**. Precedence was established in very early ages; and in most of the countries of the East and of Europe, and was amongst the laws of Justinian. In England, owing to the disputes that prevailed among courtiers respecting priority of rank and office, the order of precedence was regulated chiefly by two statutes, namely, one passed 31 Henry VIII., 1536, and the other, 1 George I., 1714.

TABLE OF PRECEDENCY.

|                     |                                       |                           |
|---------------------|---------------------------------------|---------------------------|
| THE QUEEN.          | Princess Alice; and other princesses. | Archbishop of Canterbury. |
| Prince of Wales.    | Duchess of Kent.                      | Lord Chancellor.          |
| Prince Albert.      | Queen's uncles.                       | Archbishop of York.       |
| Queen Dowager.      | Queen's aunts.                        | Lord high treasurer.      |
| Queen's other sons. | Queen's cousins.                      | Lord president.           |
| Princess royal.     |                                       | Lord privy seal.          |

\* If of the rank of barons.

PRECEDENCE, *continued.*

|                                                                                               |                                                                |                                                            |
|-----------------------------------------------------------------------------------------------|----------------------------------------------------------------|------------------------------------------------------------|
| *Lord high constable.                                                                         | COMMONERS.                                                     | Knights of the Garter's eldest sons.                       |
| †Lord great chamberlain of England.                                                           | The Speaker.                                                   | Bannerets' eldest sons.                                    |
| *Earl marshal.                                                                                | Treasurer, comptroller, and vice-chamberlain of the household. | Knights of the bath's eldest sons.                         |
| *Lord high admiral.                                                                           | Secretaries of State, if they be under the degree of baron.    | Knights' eldest sons.                                      |
| Lord steward of the household.                                                                | Viscounts' eldest sons.                                        | Baronets' younger sons.                                    |
| Lord Chamberlain.                                                                             | Earls' younger sons.                                           | Flag and field officers.                                   |
| Dukes, according to patent.                                                                   | Barons' eldest sons.                                           | Sergeants-at-law.                                          |
| Marquesses, according to their patents.                                                       | Knights of the Garter.                                         | Doctors, Deans, and chancellors.                           |
| Dukes' eldest sons.                                                                           | Privy councillors.                                             | Masters in chancery.                                       |
| Earls, according to their patents.                                                            | Chancellor of the Exchequer.                                   | Companions of the bath.                                    |
| Marquesses' eldest sons.                                                                      | Chancellor of the duchy of Lancaster.                          | Gentlemen of the privy chamber.                            |
| Dukes' younger sons.                                                                          | Lord chief justice of the queen's bench.                       | Esquires of the knights of the Bath.                       |
| Viscounts, according to their patents.                                                        | Master of the rolls.                                           | Esquires by creation.                                      |
| Earls' eldest sons.                                                                           | Vice-chancellor.                                               | Esquires by office or commission.                          |
| Marquesses' younger sons.                                                                     | Lord chief justice of the common pleas.                        | Younger sons of knights of the garter.                     |
| Bishop of London.                                                                             | Lord chief baron.                                              | Sons of bannerets.                                         |
| Bishop of Durham.                                                                             | Judges and barons, according to seniority.                     | Younger sons of knights of the bath.                       |
| Bishop of Winchester.                                                                         | Hereditary bannerets.                                          | Younger sons of knights bachelors.                         |
| All other bishops, according to their seniority of consecration.                              | Viscounts' younger sons.                                       | Gentlemen entitled to bear arms.                           |
| Secretary of State, being a baron.                                                            | Barons' younger sons.                                          | Clergymen, not dignitaries.                                |
| Commissioners of the great seal.                                                              | Baronets.                                                      | Barriers at law.                                           |
| Barons, according to their patents.                                                           | Bannerets for life only.                                       | Officers of the army and navy, not esquires by commission. |
| [All the above, except the royal family, hold their precedence of rank by act 31 Henry VIII.] | Knights of the bath.                                           | Citizens, burgesses, &c.                                   |
|                                                                                               | Grand Crosses.                                                 |                                                            |
|                                                                                               | Knights commanders.                                            |                                                            |
|                                                                                               | Knights bachelors.                                             |                                                            |
|                                                                                               | Eldest sons of the younger sons of peers.                      |                                                            |
|                                                                                               | Baronets' eldest sons.                                         |                                                            |

**PREDESTINATION.** The belief that God hath from all eternity unchangeably appointed whatever comes to pass. This doctrine is the subject of one of the most perplexing controversies that have occurred among mankind. It was taught by the ancient Stoics and early Christians; and Mahomet introduced the doctrine of an absolute predestination into his Koran in the strongest light. The controversy respecting it in the Christian church arose in the fifth century, when it was maintained by St. Augustin; and Lucidus, a priest of Gaul, taught it A. D. 470.

**RESBURG, PEACE OF,** between France and Austria, by which the ancient states of Venice were ceded to Italy; the principality of Eichstett, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria and the duke of Wirttemberg, who, as well as the duke of Baden, were then created kings by Napoleon; the independence of the Helvetic republic was also stipulated, Dec. 26, 1805.

**RESBYTERIANS.** A numerous and increasing sect of Christians, so called from their maintaining that the government of the church appointed in the New Testament was by Presbyteries, or associations of ministers and ruling elders, equal in power, office, and in order. The first Presbyterian meeting-house in England was established by the Puritans at Wandsworth, Surrey, Nov. 20, 1572. Presbyterianism is the religion of Scotland. Its distinguishing tenets seem to have been first embodied in the formulary of faith attri-

\* Above all of their own rank only, by 31 Henry VIII.

† When in actual office only, by 1 George I.

N. B. The priority of signing any treaty or public instrument by ministers of state is taken by rank of office, and not title.

buted to John Knox, and compiled by that reformer in 1560. It was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707.

**PRESIDENTS OF THE UNITED STATES.** Washington, unanimously elected president of the federal convention, which sat at Philadelphia from May 25 to Sept. 17, 1787; and was unanimously elected first president of the United States, April 6, 1789. See *United States and Administrations*.

**PRESS, THE PRINTING.** This great engine was of rude construction from the period of the discovery of the art of printing, up to the close of the eighteenth century, when many improvements were made. William Caxton a mercer of London, had a press set up at Westminster, 1471.—*Stowe's Chron.* The earl of Stanhope's iron presses were in general use in 1806. The printing-machine was invented by Koenig in 1811, and Applegath's followed. The Columbian press of Clymer was produced in 1814; and the Albion press, an improvement on this last, came into use a few years after. Printing by means of steam machinery was first executed in England at *The Times* office, London, on Monday, November 28, 1814. Cowper's and Applegath's rollers for distributing the ink upon the types were brought into use in 1817. Vast improvements have been made in the United States within a few years, both in hand and steam-presses. The most celebrated manufacturers, probably, are R. Hoe & Co., of New-York. Their largest presses for newspapers are capable of throwing off 10,000 sheets per hour, which is so much in advance of any presses in Europe that they have supplied orders from Paris. The presses of Seth Adams & Co., of Boston, are perhaps the best in the world for book printing. See article *Printing*.

**PRESS, LIBERTY OF THE.** The *imprimatur*, "let it be printed," was much used on the title-pages of books printed in the 16th and 17th centuries. The liberty of the press was restrained, and the number of master printers in London and Westminster limited, by the star-chamber, 14 Charles I., 1638. And again by act of parliament, 6 William III., 1693. The celebrated toast, "The liberty of the press—it is like the air we breathe—if we have it not we die," was first given at the Crown and Anchor tavern, London, at a Whig dinner in 1795. Presses were licensed, and the printer's name required to be placed on both the first and last pages of a book, July 1799. In France and Germany the liberty of the press has been occasionally granted, but again restricted by the reactionary governments. In the United States it was fully guaranteed by the constitution.

**PRESSING TO DEATH.** A punishment in England, referred to the reign of Henry III. or of Edward I., and on the statute book until the latter part of the last century. A remarkable instance of this death, in England, is the following:—Hugh Calverly, of Calverly in Yorkshire, esq., having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle, a large iron weight being placed upon his breast, 3 James I. 1605.—*Stowe's Chron.*

**PRESTONPANS, BATTLE OF,** between the Young Pretender, prince Charles Stuart, heading his Scotch adherents, and the royal army under sir John Cope. The latter was defeated with the loss of 500 men, and was forced to fly at the very first onset. Sir John Cope precipitately galloped from the field of battle to Berwick-upon-Tweed, where he was the first to announce his own discomfiture. His disgrace is perpetuated in a favorite Scottish ballad, called, from the doughty hero, "Johnie Cope." Fought Sept. 21, 1745.

**PRETENDER.** The person known in English history by the title of the *Pretender*;

or Chevalier de St. George, was the son of James II., born in 1688, and acknowledged by Louis XIV. as James III. of England, in 1701. He was proclaimed, and his standard set up, at Braemar and Castletown in Scotland, Sept. 6, 1715; and he landed at Peterhead, in Aberdeenshire, from France, to encourage the rebellion that the earl of Mar and his other adherents had promoted, Dec. 26, same year. This rebellion having been soon suppressed, the Pretender escaped to Montrose (from whence he arrived at Gravelines), Feb. 4, 1716; and died at Rome, Dec. 30, 1765.

**PRETENDER, THE YOUNG.** The son of the preceding, called prince Charles, born in 1720. He landed in Scotland, and proclaimed his father king, June 1745. He gained the battle of Prestonpans, Sept. 21, 1745, and of Falkirk, January 18, 1746; but was defeated at Culloden, April 16, same year, and sought safety by flight. He continued wandering among the frightful wilds of Scotland for nearly six months, and as 30,000*l.* was offered for taking him, he was constantly pursued by the British troops, often hemmed round by his enemies, but still rescued by some lucky accident, and he at length escaped from the isle of Uist to Morlaix. He died March 3, 1788. His natural daughter assumed the title of Duchess of Albany; she died in 1789. His brother, the cardinal York, calling himself Henry IX. of England, born March 1725, died at Rome in August 1807.

**PRIDE'S PURGE.** In the civil war against Charles I. colonel Pride, at the head of two regiments, surrounded the house of parliament, and seizing in the passage 41 members of the Presbyterian party, sent them to a low room, then called *hell*. Above 160 other members were excluded, and none admitted but the most furious of the independents. This atrocious invasion of parliamentary rights was called *Pride's Purge*, and the privileged members were named the *Rump*, to whom nothing remained to complete their wickedness, but to murder the king, 24 Charles I., 1648.—*Goldsmith*.

**PRIESTS.** Anciently elders, but the name is now given to the clergy only. In the Old Testament the age of priests was fixed at thirty years. Among the Jews, the dignity of high or chief priest was annexed to Aaron's family, 1491 B. C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamen or high-priest, and so have the Christians, excepting among some particular sects.

**PRIMER.** A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children should publicly learn or read in schools, containing prayers and portions of the Scripture. Copies of primers are preserved of so early a date as 1539.—*Ashe*.

**PRIMOGENITURE, RIGHT OF,** an usage brought down from the earliest times. The first born in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In England, by the ancient custom of gavel-kind, primogeniture was of no account. It came in with the feudal law, 3 William I., 1068.

**PRINTING.** The greatest of all the arts. The honor of its invention has been appropriated to Mentz, Strasburg, Haerlem, Venice, Rome, Florence, Basle and Augsburg; but the claims of the three first only are entitled to attention. Adrian Junius awards the honor of the invention to Laurencez John Coster of Haerlem, "who printed with blocks, a book of images and letters. *Speculum Humanae Salvationis*, and compounded an ink more viscous and tenacious than common ink, which blotted, about A. D. 1438." The leaves of this book being printed on one side only, were afterwards pasted to-

gether. John Faust established a printing office at Mentz, and printed the *Tractatus Petri Hispani*, in 1442. John Guttenberg invented *cut meta*<sup>1</sup> types, and used them in printing the earliest edition of the Bible, which was commenced in 1444, and finished in 1460. See *Book*. Peter Schæffer cast the first metal types in matrices, and was therefore the inventor of COMPLETE PRINTING, 1452.—*Adrian Junius; Du Fresnoy*.

|                                                                                                                                                              |                                                                                                                                                      |

<sup>1</sup>To the west of the Sanctuary, in Westminster Abbey, stood the Eleemosynary or Almonry, where the first printing-press in England was erected in 1471, by William Caxton, encouraged by the learned Thomas Milling, then abbot. He produced "*The Game and Play of the Chesse*," the first book ever printed in these kingdoms. There is a slight difference about the place in which it was printed, but all agree that it was within the precincts of this religious house.—*Leigh*.

PRINTING, *continued.*

## THE LORD'S PRAYER.

As printed by Caxton in 1483.

*Father our that art in heavens, hallowed be  
thy name: thy kyngdome come to us; thy  
will be done in earth as is in heaven: oure  
every days bred give us to day; and for-  
give us oure trespasses, as we forgive  
them that tresspass against us; and lead  
us not into temptation, but deliver us from  
all evil sin, amen.—LEWIS'S LIFE OF  
CAXTON.*

## A PLACARD.

As printed by William Caxton.

*If it plesse any man spirituel or temporel to  
bye any pies of two or thre comemoraciōs of  
Salisbury use\* empryntid after the forme  
of this presēt letre whiche ben wel  
and truly correct, late him come to westmon-  
ester in to the almonestye at the reed pale  
[red pale] and he shall have them good  
there.—DIBDIN'S TYP. ANTIQ.*

Among the early printers, the only points used were the comma, parenthesis, interrogation, and full stop. To these succeeded the colon; afterwards the semicolon; and last the note of admiration. The sentences were full of abbreviations and contractions; and there were no running-titles, numbered leaves or catch-words. Our punctuation appears to have been introduced with the art of printing.

**PRINTED GOODS.** The art of calico-printing is of considerable antiquity, and there exist specimens of Egyptian cotton dyed by figured blocks many hundred years old. A similar process has been resorted to even in the Sandwich Islands, where they use a large leaf as a substitute for the block. See article *Cotton*. The copyright of designs secured in England by 2 Victoria, 1839.

**PRIORIES.** They were of early foundation, and are mentioned in A. D. 722 in England. See *Abbeys* and *Monasteries*. The priories of aliens were first seized upon by Edward I. in 1285, on the breaking out of a war between England and France. They were seized in several succeeding reigns on the like occasions, but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Henry V. 1414.—*Rymer's Fœdera*.

**PRISONERS OF WAR.** Among the ancient nations, prisoners of war when spared by the sword were usually enslaved, and this custom more or less continued until about the thirteenth century, when civilized nations, instead of enslaving, commonly exchanged their prisoners. The Spanish, French, and American prisoners of war in England were 12,000 in number, Sept. 30, 1779. The number exchanged by cartel with France from the commencement of the then war, was 44,000, June 1781.—*Phillips*. The English prisoners in France estimated at 6000, and the French in England, 27,000, Sept. 1798.—*Idem*. The English in France amounted to 10,300, and the French, &c., in England to 47,600, in 1811.—*Idem*. This was the greatest

\* Romish Service books, used at Salisbury by the devout, called *Pics* (*Pica*, Latin), as is supposed from the different color of the text and rubric. Our *Pica* is called *Cicero* by foreign printers.—*Wheatley*.

number, owing to the occasional exchanges made, up to the period of the last war.

**PRISON DISCIPLINE SOCIETY**, in England, owes its existence to the philanthropic labors of Sir T. F. Buxton, M. P. It was instituted in 1815, and held its first public meeting in 1820. Its objects are, the amelioration of jails, by the diffusion of information respecting their construction and management, the classification and employment of the prisoners, and the prevention of crime, by inspiring a dread of punishment, and by inducing the criminal, on his discharge from confinement, to abandon his vicious pursuits.—*Haydn*. In the United States a Prison Discipline Society for the same object was established in Boston in 1825. The Rev. Louis Dwight was its active promoter and secretary. Great efforts have been made in several States for the amelioration and improvement of prisoners; and the various system adopted and practised at Wethersfield, Conn., at Auburn, N. Y., Philadelphia, &c., have attracted the attention of statesmen and travellers from Europe. Among those who have labored effectively in this matter is a lady—Miss Dix, of New York—who has accomplished more than any other person, for the welfare of prisoners and of the insane, and may deserve even a higher name than the American Mrs. Fry.

**PRIVY COUNCIL, ENGLAND**. This assembly is of great antiquity. Instituted by Alfred, A. D. 895. In ancient times the number was twelve; but it was afterwards so increased, that it was found inconvenient for secrecy and despatch, and Charles II. limited it to thirty, whereof fifteen were the principal officers of state (councillors *ex officio*), and ten lords and five commoners of the king's choice, A. D. 1679. The number is now indefinite. To attempt the life of a privy-councillor in the execution of his office made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 10 Anne, 1711.

**PRIZE MONEY**. In the English navy the money arising from captures made upon the enemy, is divided into eight equal parts, and thus distributed by order of government:—Captain to have three-eighths, unless under the direction of a flag-officer, who in that case is to have one of the said three-eighths; captains of marines and land forces, sea lieutenants, &c., one-eighth; lieutenants of marines, gunners, admiral's secretaries, &c., one-eighth; midshipmen, captain's clerks, &c., one-eighth; ordinary and able seamen, marines, &c., two-eighths.

**PROFILES**. The first profile taken, as recorded, was that of Antigonus, who, having but one eye, his likeness was so taken, 330 B. C.—*Ashe*. "Until the end of the third century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner."—*Addison*.

**PROMISSORY NOTES**. They were regulated and allowed to be made assignable in 1705. First taxed by a stamp in 1782; the tax was increased in 1804, and again in 1808, and subsequently. See *Bills of Exchange*.

**PROPAGANDA FIDE**. The celebrated congregation or college in the Romish Church, *Congregatio de Propaganda Fide*, was constituted at Rome by pope Gregory XV. in 1622. Its constitution was altered by several of the succeeding pontiffs.

**PROPERTY TAX IN ENGLAND**. Parliament granted to Henry VIII. a subsidy of two-fifteenths from the commons and two-tenths from the clergy to aid the king in a war with France, 1512.—*Rapin*. Cardinal Wolsey proposed a tenth of the property of the laity and a fourth of the clergy to the same king, 1522. The London merchants strenuously opposed this tax: they were required to declare on oath the real value of their effects; but they firmly refused, alleging that it was not possible for them to give

an exact account of their effects, part whereof was in the hands of correspondents in foreign countries. At length, by agreement, the king was pleased to accept of a sum according to their own calculation of themselves. —*Butler*. This tax was levied at various periods, and was of great amount in the last years of the late war. The assessments on real property, under the property-tax of 1815, were 51,898,423*l*.

**PROPHECY.** The word prophet, in proper language, means one of the sacred writers empowered by God to display futurity. We have in the Old Testament the writings of sixteen prophets; *i. e.* of four greater, and twelve lesser. The former are Isaiah, Jeremiah, Ezekiel, and Daniel; the latter are Hosea, Joel, Amos, Obadiah, Micah, Jonah, Nahum, Habakkuk, Zephaniah, Haggai, Zechariah, and Malachi. Prophecy is instanced in the earliest times. The prophetic denunciations upon Babylon were executed by Cyrus, 538 B. C. God's judgment upon Jerusalem (*Isaiah*, xxix. 1—8) executed by Titus, A. D. 70. Many other instances of prophecy occur in Scripture.

**PROTESTANTS.** The emperor Charles V. called a diet at Spire in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged, owing to Luther's opposition to the Roman Catholic religion. Against a decree of this diet, to support the doctrines of the church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, April 17, 1530. Hence the term protestants was given to the followers of Luther, and it afterwards included Calvinists, and all other sects separated from the see of Rome. The six protesting princes were John and George, the electors of Saxony and Brandenburg; Ernest and Francis, the two dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt; these were joined by the inhabitants of Strasburg, Nuremberg, Ulm, Constance, Hailbron and seven other cities. See *Lutheranism*, *Calvinism*, &c.

**PROVISIONS—REMARKABLE FACTS CONCERNING THEM.** Wheat for food for 100 men for one day worth only one shilling, and a sheep for fourpence, Henry I., about 1130. The price of wine raised to sixpence per quart for red, and eightpence for white, that the sellers might be enabled to live by it, 2 John, 1200.—*Burton's Annals*. When wheat was at 6*s.* per quarter, the farthing loaf was to be equal in weight to twenty-four ounces (made of the whole grain), and to sixteen the white. When wheat was at 1*s.* 6*d.* per quarter, the farthing loaf white was to weigh sixty-four ounces, and the whole grain (the same as standard now) ninety-six, by the first assize, A. D. 1202.—*Mat. Paris*. A remarkable plenty in all Europe, 1280.—*Dufresnoy*. Wheat 1*s.* per quarter, 14 Edward I. 1286.—*Stowe*. The price of provisions fixed by the common-council of London as follows: two pullets, three-halfpence; a partridge, or two woodcocks, three-half-pence; a fat lamb sixpence from Christmas to Shrovetide, the rest of the year fourpence, 29 Edward I. 1299. *Stowe*. Price of provisions fixed by parliament: at the rate of 2*l.* 8*s.* of our money for a fat ox, if fed with corn 3*l.* 12*s.*; a shorn sheep, 5*s.*; two dozen of eggs, 3*d.*; other articles nearly the same as fixed by the common-council above recited, 7 Edward II. 1313.—*Rot. Parl.* Wine, the best sold for 20*s.* per tun, 10 Richard II. 1387. Wheat being at 1*s.* 1*d.* the bushel in 1390. this was deemed so high a price that it is called a dearth of corn by the historians of that era. Beef and pork settled at a halfpenny the pound, and veal three farthings, by act of parliament, 24 Henry VIII. 1533.—*Anderson's Origin of Commerce*. Milk was sold, three pints, ale-measure, for one halfpenny, 2 Eliz. 1560.—*Stowe's Chronicle*.

**PRUSSIA.** This country was anciently possessed by the Venedi, about 320 B. C. The Venedi were conquered by a people called the Borussi, who in-

- 1701 Frederick I.
- 1713 Frederick William I.
- 1740 Frederick II., surnamed the Great.
- 1786 Frederick William II.
- 1797 Frederick William III.
- 1840 Frederick William IV., June 7.

**PUBLICHOUSES IN ENGLAND.** A power of licensing them was first granted to sir Giles Mompesson and sir Francis Mitchel for their own emolument, A. D. 1620-1. The number of public houses in England at this period was about 13 000. In 1700 the number was 32 600; and in 1790, the number in Great Britain was 76 000. It is supposed that there were about 50,000 public houses, and 30 000 beer-shops in England and Wales in 1830. The number on Jan. 5, 1840, was 95,820.

**PULLEY.** The pulley, together with the vice and other mechanical instruments, are said to have been invented by Archytas of Tarentum, a disciple of Pythagoras, about 516 B. C.—*Univ. Hist.* It has been ascertained that in a single movable pulley the power gained is doubled. In a continued combination the power is twice the number of pullies, less 1.—*Phillips.*

**PULTOWA, BATTLE OF.** In this memorable engagement Charles XII. of Sweden was entirely defeated by Peter the Great of Russia, and obliged to take refuge at Bender, in the Turkish dominions. The vanquished monarch would have fallen into the hands of the czar after the engagement, had he not been saved by the personal exertions of the brave count Poniatowski, a Polish nobleman, whom Voltaire has commemorated and immortalized. This battle was lost chiefly owing to a want of concert in the generals, and to the circumstance of Charles having been dangerously wounded, just before, which obliged him to issue his commands from a litter, without being able to encourage his soldiers by his presence. Fought July 8, 1709.

**PUMPS.** Ctesibius of Alexandria, architect and mechanic, is said to have invented the pump (with other hydraulic instruments) about 224 B. C., although the invention is ascribed to Danaus, at Lindus, 1485 B. C. They were in general use in England, A. D. 1425. The air-pump was invented by Otto Guericke in 1654, and was improved by Boyle in 1657. An inscription on the pump in front of the Royal Exchange, London, states that the well beneath was first sunk in A. D. 1282.

**PUNIC WARS.** The first Punic war was undertaken by the Romans against Carthage 264 B. C. The ambition of Rome was the origin of this war; it lasted twenty-three years, and ended 241 B. C. The second Punic war began 218 B. C., in which year Hannibal marched a numerous army of 90,000 foot and 12,000 horse towards Italy, resolved to carry on the war to the gates of Rome. He crossed the Rhone, the Alps, and the Apennines, with uncommon celerity; and the Roman consuls who were stationed to stop his progress were severally defeated. The battles of Trebia, of Ticinus, and of the lake of Trasymenus, followed. This war lasted seventeen years, and ended in 201 B. C. The third Punic war began 149 B. C., and was terminated by the fall of Carthage, 146 B. C. See *Carthage*.

**PURGATORY.** The middle place between the grave, or heaven, and hell,

where, it is believed by the Roman Catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine of purgatory was known about A. D. 250; and was introduced into the Roman church in 593.—*Platina*. It was introduced early in the sixth century.—*Dupin*.

**PURIFICATION.** The act of cleansing, especially considered, as relating to the religious performance among the Jewish women. It was ordained by the Jewish law that a woman should keep within her house forty days after the birth of a son, and eighty days after the birth of a daughter, when she was to go to the temple and offer a lamb, pigeon, or turtle, A. D. 214. Among the Christians, the feast of purification was instituted, A. D. 542, in honor of the Virgin Mary's going to the temple, where, according to custom, she presented her son Jesus Christ, and offered two turtles for him. Pope Sergius I. ordered the procession with wax tapers, from whence it is called Candlemas-day.

**PURITANS.** The name given to such persons as in the reigns of queen Elizabeth, king James, and king Charles I., pretended to greater holiness of living and stricter discipline than any other people. They at first were members of the established church, but afterwards became separatists upon account of several ceremonies that were by the rigidity of those times severely insisted upon.—*Bishop Sanderson*.

**PYRAMIDS OF EGYPT.** The pyramids, according to Dr. Pococke and Sonnini, "so celebrated from remote antiquity, are the most illustrious monuments of art. It is singular that such superb piles are nowhere to be found but in Egypt; for in every other country, pyramids are rather puerile and diminutive imitations of those in Egypt, than attempts at appropriate magnificence. The pyramids are situated on a rock at the foot of some high mountains which bound the Nile." The first building of them commenced, it is supposed, about 1500 B. C. They were formerly accounted one of the seven wonders of the world. The largest, near Gizeh, is 461 feet in perpendicular height, with a platform on the top 32 feet square, and the length of the base is 746 feet. It occupies eleven acres of ground, and is constructed of such stupendous blocks of stone, that a more marvellous result of human labor has not been found on the earth.

"Virtue alone outbuilds the pyramids,

"Her monuments shall stand when Egypt's fall."—*Young*.

**PYRENEES, BATTLE OF THE,** between the British army, commanded by lord Wellington, and the French, under the command of marshal Soult. The latter army was defeated with great slaughter, July 28, 1813. After the battle of Vittoria (fought June 21), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro, a duty to which his abilities were inferior; for Soult retreated into France with a loss of more than 20,000 men, having been defeated in a series of engagements from July 25 to August 2.

**PYRENEES, PEACE OF THE.** A peace concluded between France and Spain; by the treaty of the Pyrenees, Spain yielding Roussillon, Artois, and her rights to Alsace; and France ceding her conquests in Catalonia, Italy, &c., and engaging not to assist Portugal, Nov. 7, 1659.

**PYTHAGOREAN PHILOSOPHY.** Founded by Pythagoras, of Samos, head of the Italic sect. He first taught the doctrine of metempsychosis or transmigration of the soul from one body to another. He forbade his disciples to eat flesh, as also beans, because he supposed them to have been produced from the same putrified matter from which at the creation of the world man was formed. In his theological system, Pythagoras supported that the universe was created from a shapeless heap of passive matter by

the hands of a powerful being, who himself was the mover and soul of the world. He was the inventor of the multiplication-table, and a great improver of geometry, while in astronomy he taught the system adopted at this day, 539 B. C.

**PYTHIAN GAMES.** Games celebrated in honor of Apollo, near the temple of Delphi. They were first instituted, according to the more received opinion, by Apollo himself, in commemoration of the victory which he had obtained over the serpent Python, from which they received their name; though others maintain that they were first established by Agamemnon, or Diomedes, or by Amphictyon, or, lastly, by the council of the Amphictyons, B. C. 1263.—*Arundelian Marbles*.

## Q.

**QUACKERY AND QUACK MEDICINES.** At the first appearance that a French quack made in Paris, a boy walked before him, publishing, with a shrill voice, "My father cures all sorts of distempers;" to which the doctor added in a grave manner, "What the child says is true."—*Addison*. Quacks sprung up with the art of medicine; and several countries, particularly England and France, abound with them. In London, some of their establishments are called colleges. Quack medicines were taxed in England in 1783 *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter; he was found guilty, and sentenced to pay a fine of 250*l.*, Oct. 30, 1830.

**QUADRANT.** The mathematical instrument in the form of a quarter circle. The solar quadrant was introduced about 290 B. C. The Arabian astronomers under the Caliphs, in A. D. 995, had a quadrant of 21 feet 8 inches radius, and a sextant 57 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600. Hadley's quadrant, in 1731. See *Navigation*.

**QUADRUPLE ALLIANCE.** The celebrated treaty of Alliance between Great Britain, France, and the Emperor, signed at London. This alliance, on the accession of the states of Holland, obtained the name of the Quadruple Alliance, and was for the purpose of guaranteeing the succession of the reigning families in Great Britain and France, and settling the partition of the Spanish monarchy. Aug. 2, 1718.

**QUESTOR,** in Roman antiquity, was an officer who had the management of the public treasure, instituted 484 B. C. The questorship was the first office any person could bear in the commonwealth, and gave a right to sit in the senate. At first there were only two; but afterwards the number was greatly increased.

**QUAKERS OR FRIENDS.** Originally called Seekers, from their seeking the truth; and afterwards Friends—a beautiful appellation, and characteristic of the relation which man, under the Christian dispensation, ought to bear towards man.—*Clarkson*. Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because Fox (the founder) admonished him and those present with him, to tremble at the word of the Lord. This respectable sect, excelling in morals, prudence, and industry, was commenced in England about A. D. 1650, by George Fox, who was soon joined by a number of learned, ingenious, and pious men—among others, by George Keith, Wm. Penn, and Robert Barclay of Ury.\* The *thee* and *thou* used by the

---

\* The Quakers early suffered grievous persecutions in England and America. At Boston, where the first Friends who arrived were females, they, even females, were cruelly scourged, and their

Quakers originated with their founder, who published a book of instructions for teachers and professors. The solemn affirmation of Quakers was enacted to be taken in all cases, in the courts below, wherein oaths are required from other subjects, 8 William III. 1696.

**QUARANTINE.** The custom first observed at Venice, A. D. 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, 40 days before they were admitted into the city. Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe.

**QUATRE-BRAS, BATTLE OF,** between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney, fought two days before the battle of Waterloo. In this engagement the gallant duke of Brunswick fell, June 16, 1815.

**QUEBEC.** Founded by the French in 1605. It was reduced by the English, with all Canada, in 1626, but was restored in 1632. Quebec was besieged by the English, but without success, in 1711; but was conquered by them, after a battle memorable for the death of general Wolfe in the moment of victory, Sept. 13, 1759. This battle was fought on the Plains of Abraham. Quebec was besieged by the Americans under Gen. Montgomery, who was slain, December 31, 1775; and the siege was raised the next year. The public and private stores, and several wharfs, were destroyed by fire in 1815; the loss being estimated at upwards of 260,000*l*. Awful fire, 1650 houses, the dwellings of 12,000 persons, burnt to the ground, May 28, 1845. Another great fire, one month afterwards; 1365 houses burnt, June 28, 1845. Disastrous fire at the theatre, 50 lives lost, Jan. 12, 1846.

**QUEEN.** The first queen invested with authority as a ruling sovereign, was Semiramis, queen and empress of Assyria, 2017 B. C. She embellished the city of Babylon, made it her capital, and by her means it became the most magnificent and superb city in the world. The title of queen is coeval with that of king. The Hungarians had such an aversion to the name of queen, that whenever a queen ascended the throne, she reigned with the title of king. See note to article *Hungary*.

**QUEEN CAROLINE'S TRIAL.** Caroline, the consort of George IV. of England, was subjected, when princess of Wales, to the ordeal of the Delicate Investigation, May 29, 1806. Her trial commenced Aug. 19, 1820. Illuminations on her acquittal, Nov. 10-12. Her death Aug. 7, 1821. Riot at her funeral, Aug. 14.

**QUEENS OF ENGLAND.** There have been, since the conquest, besides the present sovereign, four queens of England who have reigned in their own right, not counting the empress Maude, daughter of Henry I., or the lady Jane Grey, whose *quasi* reign lasted only ten days. There have been thirty-four queens, the consorts of kings, exclusively of four wives of kings who

---

ears cut off, yet they were unshaken in their constancy. In 1659, they stated in parliament that 2,000 Friends had endured sufferings and imprisonment in Newgate; and 164 Friends offered themselves at this time, by name, to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death. Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664. The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. But the Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated 28 of the prisoners in Holland, the rest having died of the plague in that year. See *Plague*. Of the 120 few reached America.

died previously to their husbands ascending the throne. Of thirty-five actual sovereigns of England, four died unmarried, three kings and one queen. The following list includes all these royal personages :—

#### OF WILLIAM I.

*Matilda*, daughter of Baldwin, earl of Flanders; she was married in 1051; and died 1084.

#### WILLIAM II.

This sovereign died unmarried.

#### OF HENRY I.

*Matilda*, daughter of Malcolm III. king of Scotland; she was married November 11, 1100; and died May 1, 1119.

*Adelais*, daughter of Godfrey, earl of Louvaine; she was married January 29, 1129. Survived the king.

#### MAUDE OF MATILDA.

Daughter of Henry I., and rightful heir to the throne; she was born 1101; was betrothed in 1109, at eight years of age, to Henry V., emperor of Germany, who died 1125. She married, secondly, Geoffrey Plantagenet, earl of Anjou, 1130. Was set aside from the English succession by Stephen, 1135; landed in England and claimed the crown, 1139. Crowned, but was soon after defeated at Winchester, 1141. Concluded a peace with Stephen, which secured the succession to her son, Henry, 1153; died 1167.

#### OF STEPHEN.

*Matilda*, daughter of Eustace, count of Boulogne; she was married in 1128; and died May 3, 1151.

#### OF HENRY II.

*Eleanor*, the repudiated queen of Louis VII. king of France, and heiress of Guienne and Poitou; she was married to Henry 1152; and died 1204.

[The Fair Rosamond was the mistress of this prince. See article *Rosamond*.

#### OF RICHARD I.

*Berengera*, daughter of the king of Navarre; she was married May 12, 1191. Survived the king.

#### OF JOHN.

*Avisa*, daughter of the earl of Gloucester; she was married in 1189. Divorced.

*Isabella*, daughter of the count of Angoulême; she was the young and virgin wife of the count de la Marche; married to John in 1200. Survived the king, on whose death she was remarried to the count de la Marche.

#### OF HENRY III.

*Eleanor*, daughter of the count de Provence; she was married January 14, 1236. Survived the king; and died in 1292, in a monastery, whither she had retired.

#### OF EDWARD I.

*Eleanor* of Castile; she was married in 1253; died of a fever, on her journey to Scotland, at Horneby, in Lincolnshire, 1296.

*Margaret*, sister of the king of France; she

was married September 12, 1299. Survived the king.

#### OF EDWARD II.

*Isabella*, daughter of the king of France; she was married in 1308. On the death, by the gibbet, of her favorite, Mortimer, she was confined for the rest of her life in her own house at Rising, near London.—*Hume*.

#### OF EDWARD III.

*Philippa*, daughter of the count of Holland and Hainault; she was married January 24, 1328; and died August 16, 1369.

#### OF RICHARD II.

*Anne*, of Bohemia, sister of the emperor Wenceslaus of Germany; she was married in January 1382; and died August 3, 1395.

*Isabella*, daughter of Charles VI. of France; she was married Nov. 1, 1396. On the murder of her husband she returned to her father.

#### OF HENRY IV.

*Mary*, daughter of the earl of Hereford; she died, before Henry obtained the crown, in 1394.

*Joan* of Navarre, widow of the duke of Bretagne; she was married in 1403. Survived the king, and died in 1437.

#### OF HENRY V.

*Catherine*, daughter of the king of France; she was married May 30, 1420. She outlived Henry, and was married to Owen Tudor, grandfather of Henry VII.

#### OF HENRY VI.

*Margaret*, daughter of the duke of Anjou; she was married April 22, 1445. She survived the unfortunate king, her husband, and died in 1452.

#### OF EDWARD IV.

*Lady Elizabeth Grey*, daughter of sir Richard Woodville, and widow of sir John Grey, of Groby; she was married March 1, 1464. Suspected of favoring the insurrection of Lambert Simnel; and closed her life in confinement.

#### EDWARD V.

This prince perished in the Tower, in the 13th year of his age; and died unmarried.

#### OF RICHARD III.

*Anne*, daughter of the earl of Warwick, and widow of Edward, prince of Wales, whom Richard had murdered, 1471. She is supposed to have been poisoned by Richard (having died suddenly March 6, 1485), to make way for his intended marriage with the princess Elizabeth of York.

#### OF HENRY VII.

*Elizabeth* of York, princess of England, daughter of Edward IV.; she was married January 18, 1486; and died February 11 1503.

QUEENS, *continued.*

## OF HENRY VIII.

*Catherine* of Arragon, widow of Henry's elder brother, Arthur, prince of Wales. She was married June 3, 1509; was the mother of queen Mary; was repudiated, and afterwards formally divorced, May 23, 1533; died January 6, 1536.

*Anna Boleyn*, daughter of sir Thomas Boleyn, and maid of honor to Catherine. She was privately married, before Catherine was divorced, Nov. 14, 1532; was the mother of queen Elizabeth; was beheaded at the Tower, May 19, 1536.

*Jane Seymour*, daughter of sir John Seymour, and maid of honor to Anna Boleyn. She was married May 20, 1536, the day after Anna's execution; was the mother of Edward VI., of whom she died in childbirth, Oct. 13, 1537.

*Anne of Cleves*, sister of William, duke of Cleves. She was married January 6, 1540; was divorced July 10, 1540; and died in 1557.

*Catherine Howard*, niece of the duke of Norfolk; she was married August 8, 1540; and was beheaded on Tower hill February 12, 1542.

*Catherine Parr*, daughter of sir Thomas Parr, and widow of Nevill, lord Latimer. She was married July 12, 1543. Survived the king, after whose death she married sir Thomas Seymour, created lord Sudley; and died September 5, 1548.

## EDWARD VI.

This prince, who ascended the throne in his tenth year, reigned six years and five months, and died unmarried.

## LADY JANE GREY.

Daughter of the duke of Suffolk, and wife of lord Guildford Dudley. Proclaimed queen on the death of Edward. In ten days afterwards returned to private life; was tried Nov. 13, 1553; and beheaded February 12, 1554, when but seventeen years of age.

## MARY.

Daughter of Henry VIII. She ascended the throne July 6, 1553; married Philip II. of Spain, July 25, 1554; and died November 17, 1558. The king her husband died in 1598.

## ELIZABETH.

Daughter of Henry VIII. Succeeded to the crown Nov. 17, 1558; reigned 44 years, 4 months, and 7 days; and died unmarried.

## OF JAMES I.

*Anne*, princess of Denmark, daughter of Frederick II.; she was married August 20, 1589; and died March 1619.

## OF CHARLES I.

*Henrietta Maria*, daughter of Henry IV. king of France; she was married June 13, 1625. Survived the unfortunate king; and died in France, August 10, 1669.

## OF CHARLES II.

CATHERINE, infanta of Portugal, daughter of John IV. and sister of Alfonso VI.; she was married May 21, 1662. Survived the king, returned to Portugal, and died Dec. 21, 1705.

## OF JAMES II.

*Anne Hyde*, daughter of Edward Hyde, earl of Clarendon; she was married in September 1660; and died before James ascended the throne, in 1671.

*Mary Beatrice*, princess of Modena, daughter of Alphonzo d'Este, duke; she was married November 21, 1673. At the revolution in 1688, she retired with James to France; and died at St. Germain in 1718, having survived her consort seventeen years.

## WILLIAM and MARY.

MARY, the princess of Orange, daughter of James II.; married to William, Nov. 4, 1677; ascended the throne Feb. 13, 1689; died December 28, 1694.

## ANNE.

Daughter of James II. She married George prince of Denmark, July 28, 1683; succeeded to the throne March 8, 1702; had thirteen children, all of whom died young; lost her husband, October 28, 1708; and died August 1, 1714.

## OF GEORGE I.

*Sophia Dorothea*, daughter of the duke of Zell. She died a few weeks previously to the accession of George to the crown, June 8, 1714.

## OF GEORGE II.

*Wilhelmina Caroline Dorothea*, of Brandenburg-Anspach; married in 1704; and died November 20, 1737.

## OF GEORGE III.

*Charlotte Sophia*, daughter of the duke of Mecklenburgh-Strelitz; married September 8, 1761; and died November 17, 1818.

## OF GEORGE IV.

*Caroline Amelia Augusta*, daughter of the duke of Brunswick; she was married April 8, 1795; was mother of the lamented princess Charlotte; and died August 7, 1821. See article *Queen Caroline*.

## OF WILLIAM IV.

*Adelaide Amelia Louisa Teresa Caroline*, sister of the duke of Saxe-Meiningen; she was married July 11, 1818; and survived the king.

## VICTORIA.

*Alexandrina Victoria*, the reigning queen, daughter of the duke of Kent; born May 24, 1819; succeeded to the crown June 20, 1837; crowned June 28, 1838. Married her cousin prince Albert of Saxe-Coburg-Gotha, February 10, 1840.

QUEENSTOWN, CANADA. Taken by the troops of the United States of America.

ca, October 13, 1812; but retaken by the British forces, who defeated the Americans with considerable loss in killed, wounded, and prisoners, the same day.

**QUICKSILVER.** In its liquid state, it is commonly called virgin mercury. It is endowed with very extraordinary properties, and used to show the weight of the atmosphere, and its continual variations, &c. Its use in refining silver was discovered A. D. 1540. There are mines of it in various parts, the chief of which are at Almeida in Spain, and at Udria in Carniola in Germany, discovered by accident in 1497. A mine was discovered at Ceylon in 1797. Quicksilver was congealed in winter at St. Petersburg in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker, in 1787.

**QUIETISTS.** The doctrines and religious opinions of Molinus, the Spaniard, whose work, the *Spiritual Guide*, was the foundation of the sect of Quietists in France. His principal tenet was, that the purity of religion consisted in an internal silent meditation and recollection of the merits of Christ, and the mercies of God. His doctrine was also called quietism from a kind of absolute rest and inaction in which the sect supposed the soul to be, when arrived at that state of perfection called by them unitive life. They then imagined the soul to be wholly employed in contemplating its God. Madame de la Mothe-Guyon, who was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon, the celebrated archbishop of Cambray, between whom and Bossuet, bishop of Meaux, she occasioned the famous controversy concerning Quietism, 1697. The sect sprang up about 1678.—*Nouv. Dict.*

**QUILLS.** They are said to have been first used for pens in A. D. 553; but some say not before 635. Quills are for the most part plucked with great cruelty from living geese; and all persons, from convenience, economy, and feeling, ought to prefer metallic pens, which came into use in 1830.—*Phillips*.

**QUITO.** A presidency of Colombia (*which see*) celebrated as having been the scene of the measurement of a degree of the meridian, by the French and Spanish mathematicians, in the reign of Louis XV. Forty thousand souls were hurried into eternity by a dreadful earthquake at Quito, which almost overwhelmed the city, Feb. 4, 1797.

## R.

**RACES.** One of the exercises among the ancient games of Greece (see *Chariots*). Horse-races were known in England in very early times. Fitz-Stephen, who wrote in the days of Henry II., mentions the delight taken by the citizens of London in the diversion. In James's reign, Croydon in the south, and Garterly in the north, were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607.—*Camden*. In the end of Charles I.'s reign, races were performed at Hyde-park, and also Newmarket, although first used as a place for hunting. Charles II. patronized them, and instead of bells, gave a silver bowl, or cup, value 100 guineas.

**RACKS.** This engine of death, as well as of torture, for extracting a confession from criminals, was early known in the southern countries of Europe. The early Christians suffered by the rack, which was in later times an instrument of the Inquisition. The duke of Exeter, in the reign of Henry VI., erected a rack of torture (then called the duke of Exeter's daughter), now seen in the Tower, 1423. In the case of Felton, who murdered the duke of Buckingham, the judges of England nobly protested against the punishment proposed in the privy council of putting the assassin to the rack, as being contrary to the laws, 1628. See *Ravillac*.

**RADCLIFFE LIBRARY, OXFORD.** Founded under the will of Dr. John Radcliffe, the most eminent physician of his time. He left 40,000*l.* to the University of Oxford for this purpose, dying Nov. 1. 1714. The first stone of the library was laid May 17, 1737; the edifice was completely finished in 1749, and was opened April 13, same year.

**RADSTADT, PEACE OF,** between France and the emperor, March 6, 1714. CONGRESS of—commenced to treat of a general peace with the Germanic powers, Dec. 9, 1797. Negotiations were carried on throughout the year 1798. Atrocious massacre of the French plenipotentiaries at Radstadt by the Austrian regiment of Szeltzler, April 28, 1798.

**RAFTS.** The Greeks knew no other way of crossing the narrow seas but on rafts or beams tied to one another, until the use of shipping was brought among them by Danaus of Egypt, when he fled from his brother Rameses, 1485 B. C.—*Heylin.*

**RAILROADS.** There were short roads called tram-ways in and about Newcastle so early as the middle of the 17th century; but they were made of wood, and were used for transporting coals a moderate distance from the pits to the place of shipping. They are thus mentioned in 1676:—"The manner of the carriage is by laying rails of timber from the colliery to the river, exactly straight and parallel; and bulky carts are made with four rollers fitting those rails, whereby the carriage is so easy that one horse will draw down four or five chaldrons of coals, and is an immense benefit to the coal-merchants,"—*Life of Lord-Keeper North.* They were made of iron, at Whitehaven, in 1738. The first considerable iron railroad was laid down at Colebrook Dale in 1786. The first iron railroad sanctioned by parliament (with the exception of a few undertaken by canal companies as small branches to mines) was the Surrey iron railway (by horses), from the Thames at Wandsworth to Croydon, for which the act was obtained in 1801. The first great and extensive enterprise of this kind is the Liverpool and Manchester railway (by engines), commenced in October 1826, and opened Sept. 15, 1830.

EXTENT OF RAILWAYS OPENED THROUGHOUT THE WORLD, IN 1847.

|                                | <i>Miles.</i> |                  | <i>Miles.</i> |

Total length of railways opened throughout the world:—in 1847, 21,761 miles.

In 1824, the first locomotive constructed travelled at the rate of 6 miles per hour; in 1829, the Rocket travelled at the rate of fifteen miles per hour; in 1834, the Fire Fly attained a speed of 20 miles per hour; in 1839, the North Star moved with a velocity of 37 miles per hour; and at the present moment locomotives have attained a speed of 70 miles per hour. During the same period the quantity of fuel required for generating steam has been diminished five-sixths, that is, six tons of coal were formerly consumed for one at the present moment, and other expenses are diminished in a corresponding ratio.—*Tuck's Railways, 1847.*

**RAILROADS IN THE UNITED STATES.** In January 1849, the lines completed reached an aggregate of

|                                     |                |
|-------------------------------------|----------------|
| In New England                      | - 1,219 miles. |
| In New York                         | - 840 do.      |
| In other parts of the United States | - 4,053 do.    |
| Total                               | - 6,117 do.    |

[See *American Almanac*, 1850, page 211, for complete list.]

A considerable number of miles have since been completed, including a portion of the New York and Erie; Hudson River Railroad, &c., &c. The first railway in the United States, was the Quincy and Boston, to convey granite for Bunker Hill monument, 1827. Boston and Providence Railroad, opened June 2, 1835. Boston and Lowell, June 27, and Boston and Worcester, July 6, same year. Utica and Schenectady, opened Aug. 1, 1836. Baltimore to Wilmington, July 19, 1837. Providence and Stonington, Nov. 10, 1837. Worcester and Springfield, Mass., Oct. 1, 1839. Housatonic, Feb. 12, 1840.

**RAILROADS IN FRANCE.** There was a small one at mount Cenis as early as 1783; the first of any extent was the St. Etienne and Andrezieux 22 miles, commenced in 1825. Paris and Versailles commenced 1827. Horrible accident on that from Paris to Versailles, 70 persons killed by collision and fire, including the celebrated navigator D'Urville, May 8, 1842. Another on the Paris and Brussels Railway, train ran off a bridge, 14 killed and 20 wounded, July 8, 1846.

**RAILWAYS, BELGIUM.** That between Brussels and Antwerp, the first in Belgium, opened May 3, 1836.

**RAMLIES, BATTLE OF,** between the English under the duke of Marlborough and the allies on the one side, and the French on the other; fought on Whitsunday, May 23, 1706. The duke achieved one of his most glorious victories, which accelerated the fall of Louvain, Brussels, and other important places, and parliament rewarded the victor by settling the honors which had been conferred on himself, upon the male and female issue of his daughters.

**RATISBON, PEACE OF,** concluded between France and the emperor of Germany, and by which was terminated the war for the Mantuan succession, October 13, 1630. It was at Ratisbon, in a diet held there, that the German princes seceded from the Germanic empire, and placed themselves under the protection of the emperor Napoleon, August 1, 1806.

**RATS.** The brown rat, very improperly called the Norway rat, the great pest of our dwellings, originally came to us from Persia and the Southern regions of Asia. This fact is rendered evident from the testimony of Pallas and F. Cuvier. Pallas describes the migratory nature of rats, and states that in the autumn of 1729 they arrived at Astrachan in such incredible numbers, that nothing could be done to oppose them; they came from the western deserts, nor did the waves of the Volga arrest their progress. They only advanced to the vicinity of Paris in the middle of the sixteenth century, and in some parts of France are still unknown.

**RAVENNA, BATTLE OF,** between the French under the great Gaston de Foix (duke of Nemours and nephew of Louis XII.) and the Spanish and papal armies. De Foix gained the memorable battle, but perished in the moment of victory, and his death closed the fortunes of the French in Italy, April 11, 1512.

**RAVILLAC'S MURDER OF HENRY IV. OF FRANCE.** The death of Ravillac is one of the most dreadful upon record. He assassinated the king, May 14, 1610; and when put to the torture, he broke out into horrid execrations. He was carried to the Grève, and tied to the rack, a wooden engine in the shape of St. Andrew's cross. His right hand, within which was fastened the knife with which he did the murder, was first burnt at a slow fire. Then the fleshy and most delicate parts of his body were torn with red hot pincers, and into the gaping wounds melted lead, oil, pitch, and rosin were poured. His body was so robust, that he endured this exquisite pain; and his strength resisted that of the four horses by which his limbs were to be

pulled to pieces. The executioner in consequence cut him into quarters, and the spectators, who refused to pray for him, dragged them through the streets.

**REFORM IN PARLIAMENT.** This subject was a chief source of agitation for many years, and during several administrations. Mr. Pitt's motion for a reform in parliament was lost by a majority of 20, in 1782. The discussion on this motion was the most remarkable up to the period at which reform was conceded. The first ministerial measure of reform was in earl Grey's administration, when it was proposed in the house of commons by lord John Russell, March 1, 1831. His bill defeated in the house of lords by 41 majority, Oct. 8. The bill of 1832 defeated by 35 majority, May 7. New peers were created May 18, and the bill was finally passed by peers (106 to 22) June 4, 1832.

**REFORMATION, THE.** The early efforts for the reformation of the church may be traced to the reign of Charlemagne, when Paulinus, bishop of Aquileia, employed his voice and pen to accomplish this object. The principal reformers were Wickliffe, Huss, Luther, Zuinglius, Tyndal, Calvin, Petri, Melancthon, Erasmus, Jerome of Prague, Zisca, Browne, and Knox. The eras of the Reformation are as follows:—

|                                               |            |                                              |            |
|-----------------------------------------------|------------|----------------------------------------------|------------|
| In England ( <i>Wickliffe</i> ) . . . . .     | A. D. 1360 | In Sweden ( <i>Petri</i> ) . . . . .         | A. D. 1530 |
| In Bohemia ( <i>Huss</i> ) . . . . .          | 1405       | In England ( <i>Henry VIII.</i> ) . . . . .  | 1534       |
| In Germany ( <i>Luther</i> ) . . . . .        | 1517       | In Ireland ( <i>Browne</i> ) . . . . .       | 1535       |
| In Switzerland ( <i>Zuinglius</i> ) . . . . . | 1519       | In England, completed ( <i>Cranmer, I u-</i> |            |
| In Denmark . . . . .                          | 1521       | <i>cer, Fagius, &amp;c.</i> ) . . . . .      | 1547       |
| In France ( <i>Calvin</i> ) . . . . .         | 1529       | In Scotland ( <i>Knox</i> ) . . . . .        | 1560       |
| Protestants first so called . . . . .         | 1529       | In the Netherlands . . . . .                 | 1562       |

The reformed religion was established by queen Elizabeth on her accession to the throne, 1558. George Browne, archbishop of Dublin, was the first prelate who embraced the Protestant religion in Ireland, 1535. See *Luther, Protestants, &c.*

**RELIGION.** Properly, that awful reverence and pure worship that is due to God, the supreme Author of all beings, though it is very often abused, and applied to superstitious adorations among Christians, and to idols and false gods among the heathens.—*Pardon.* Religion had its origin in most tribes and nations in their ignorance of the causes of natural phenomena. benefits being ascribed to a good spirit, and evils to a bad one.—*Phillips.* Religious ceremonies in the worship of the Supreme Being are said to have been introduced by Enos, 2832 B. C.—*Lenglet.* See the different sects as described throughout the volume. The Established religion of England commenced, with the Reformation (*which see*), 1534. The Six Articles of Religion, for the non-observance of which many Protestants as well as Catholics suffered death, passed 1539. The Thirty-nine Articles were established first in 1552; they were reduced from forty-two to thirty-nine in January 1563, and received the sanction of parliament in 1571.

**REPEAL OF THE UNION OF GREAT BRITAIN AND IRELAND.** An Irish association was formed with this object under the auspices of Mr. O'Connell, in 1829. A new and more resolved association afterwards sprung up, and in 1841, 1842, and 1843 became more violent, each successive year, in its deliberations. Assemblies of the people were held, in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons, and called "monster meetings." A meeting to be held at Clontarf, on Oct. 8, was suppressed by government; O'Connell and his chief associates were brought to trial, Jan. 15, 1844.

**RETREAT OF THE GREEKS.** Memorable retreat of 10,000 Greeks who had joined the army of the younger Cyrus in his revolt against his brother Artaxerxes. Xenophon was selected by his brother officers to superintend the retreat of his countrymen. He rose superior to danger, and though under

continual alarms from the sudden attacks of the Persians, he was enabled to cross rapid rivers, penetrate through vast deserts, gain the tops of mountains, till he could rest secure for awhile, and refresh his tired companions. This celebrated retreat was at last happily effected; the Greeks returned home after a march of 1155 parasangs, or leagues, which was performed in 215 days, after an absence of fifteen months. The whole perhaps might now be forgotten, or at least but obscurely known, if the great philosopher who planned it had not employed his pen in describing the dangers which he escaped, and the difficulties which he surmounted. 401 B. C.—*Vossius*.

**REVENUE, PUBLIC, OF ENGLAND.** The revenue collected for the civil list and for all the other charges of government, as well ordinary as extraordinary, £1,200,000 per annum, in 1660, the first after the restoration of Charles II. Raised to £6,000,000, and every branch of the revenue anticipated, which was the origin of the funds and the national debt, William and Mary, 1690.—*Salmon's Chron. Hist.*

GENERAL VIEW OF THE PUBLIC REVENUE SINCE THE CONQUEST, BY SIR JOHN SINCLAIR.

|                       |           |          |                             |           |            |

**REVIEWS AND MAGAZINES.** The first publication of the character of a *review* was the "*Journal des Savants*," established at Paris, in 1665, by Denis de Sallo. It was at first published weekly, and contained analyses and critiques of new works, which were so severe as to give much offence. De Sallo died in 1669, and the journal was afterwards edited by Gallois, De la Roque, and Cousin. From 1715 to 1792, it was conducted by a society of learned men, and appeared in monthly numbers; and the collection from 1665 to 1792 forms 111 volumes 4to. In 1792, it was discontinued; but in 1816, it was revived, and has had a number of eminent men among its contributors, as De Sacy, Langlès, Rémusat, Biot, Cuvier, &c. Numerous other literary and scientific journals have been established at Paris within a few years.

The *Gentleman's Magazine*, which first appeared in 1731, and the *Monthly Review*, in 1749, were the first works of the kind published in London, that obtained any great degree of permanency or celebrity. Of the journals which preceded the *Gentleman's Magazine*, the following are enumerated by Nichols; viz. "Weekly Memorials, or an Account of Books lately set forth,"

1688-9; "Memoirs of Literature," 8 vols., 8vo., 1722; "New Memoirs of Literature," 6 vols., 1725 to 1727; "Present State of the Republic of Letters," 18 vols., 1728 to 1736; "Historia Literaria," 4 vols., 1730 to 1732.

The *Gentleman's Magazine* was established in 1731, by Edward Cave, the first editor, who died in 1754, leaving the work in the hands of his associate, David Henry, who received as coadjutor John Nichols, in 1778, and died in 1792, having been connected with the management of the magazine more than fifty years. Mr. Nichols, who was an eminent antiquary, and author of "Literary Anecdotes," 9 vols., died in 1827, having been joint or sole editor nearly half a century. These editors were all printers by profession; and the appellation assumed and retained by the conductor of the work from its commencement to the present time, is Sylvanus Urban. This Magazine is celebrated for the early connection of Dr. Johnson with the first editor, and in a notice of the life of Cave, revised in 1781, Dr. Johnson says of this magazine, that its "scheme is known wherever the English language is spoken,—that it is one of the most successful and lucrative pamphlets which literary history has upon record." A new series of this work was begun January, 1834; the first series having been completed in 103 volumes.

The *Monthly Review*, the earliest regular work of the kind in England, was established in 1749, by Ralph Griffiths, LL. D., who continued to conduct it 54 years, assisted by his son in the latter years of his life. This work was continued until 1844, and had many able contributors. The first series, from 1749 to 1789 inclusive, comprises 81 volumes; Second Series, ending in 1825, 108 volumes.

The *Critical Review* [London] was established in 1756, by Archibald Hamilton, with the assistance of Dr. Smollett and other friends. From 1764 to 1785, the Rev. Joseph Robertson was a liberal contributor, having furnished upwards of 2,620 articles. This work was discontinued several years since. First Series, from 1756 to 1790, inclusive, 70 volumes; 2d Series, from 1791 to 1803, inclusive, 39 volumes; 3d Series, from 1804 to 1811, inclusive, 24 volumes; 4th Series, from 1812 to 1814, inclusive, 6 volumes. A 5th Series was begun in 1815.

The *British Critic* [London] was established in 1793; and its first editors were the Rev. Messrs. Robert Nares and William Beloe: the latter of whom died in 1817; and the former in 1829, having retained his connection with the work till the completion of the 42d volume. It was at first published in monthly numbers; but from 1827, it appeared quarterly, under the title of "The British Critic and Theological Review," until 1843, when a new work, called the *English Review*, took its place. It was conducted by the members of the ecclesiastical establishment; and maintained Tory and High Church principles.

The establishment of the *Edinburgh Review*, in 1802, formed an era in periodical criticism; as this work from its commencement took a wider range and assumed a higher tone, both in literature and politics, than any preceding publication of the kind. It has uniformly been a strenuous assertor of Whig or reforming principles. Its editors have been the Rev. Sidney Smith (the first year), Francis Jeffrey, and (now) Macvey Napier. Among its principal writers, besides Sidney Smith and Jeffrey, are the distinguished names of Playfair, Dugald Stewart, Mackintosh, Brown, Leslie, Brougham, and Macaulay. This work soon gained a wide circulation; and at one time, upwards of 20,000 copies were published; but in 1832, the number was somewhat less than 9000.

The *Quarterly Review* [London] was established in 1809, and, as early as 1812, it is said to have obtained a circulation little short of 6000 copies. It may be regarded as a rival publication to the *Edinburgh Review*, maintain-

ing, in a manner equally uncompromising, opposite or High Tory principles. It was edited from its commencement till 1825 by William Gifford; then by H. N. Coleridge; and now by J. G. Lockhart. Among its writers are numbered sir Walter Scott, Southey, and Croker. It has had many able and learned contributors, some of whom are understood to have been connected with the government.

The *Eclectic Review* [London], a monthly Journal, was commenced in 1805. It is conducted by Protestant Dissenters, and maintains evangelical principles in religion, and liberal or reforming principles in politics. It has had many able contributors, among whom are numbered Adam Clarke, Robert Hall, and John Foster.—Present editor, Josiah Conder.—First Series, from 1805 to 1813, inclusive, 10 volumes; 2d Series, from 1814 to 1828, inclusive, 30 volumes. The 3d Series was begun in 1829.

The *Christian Observer* [London], a monthly journal, conducted by members of the established church, was commenced in 1802, and maintains what are commonly styled evangelical principles. It has had a number of able contributors. The first editor, Zachary Macaulay; the present, the Rev. Samuel Charles Wilks.—Most of the volumes of this work have been republished in this country.

*Blackwood's Edinburgh Magazine*, a monthly journal, was commenced in 1817. It is edited by Professor John Wilson, and maintains High Tory politics. The number of copies published, in 1832, was stated at upwards of 9000.

The *Westminster Review*, established, in 1824, by the disciples of Jeremy Bentham, is a strenuous advocate for radical reform in church, state, and legislation. First editor, John Bowring, LL.D; then succeeded by Mr. Mill, and by W. E. Hickson. The *Foreign Quarterly* was united with it in 1845.

The *Foreign Quarterly Review* [London], established in 1827, devoted to foreign literature, and conducted with ability, until 1845, when it was united to the *Westminster Review*.—*Amer. Almanac, &c.*

**REVOLUTION, ERA OF THE.** This memorable revolution took place in England in 1688, and is styled by Voltaire as the era of English liberty. James II. had rendered himself hateful to his subjects by his tyranny and oppression; and soon after the landing of the prince of Orange at Torbay, Nov. 5, 1688, the throne was abdicated by James, who fled. The revolution was consummated by William III. and his queen (Mary, daughter of James) being proclaimed, Feb. 13, and crowned April 11, 1689.

**REVOLUTIONS, REMARKABLE IN ANCIENT HISTORY.** The Assyrian empire destroyed, and that of the Medes and Persians founded by Cyrus the Great, 536 B. C. The Macedonian empire founded on the destruction of the Persian, on the defeat of Darius Codomanus, by Alexander the Great, 331 B. C. The Roman empire established on the ruins of the Macedonian, or Greek monarchy, by Julius Cæsar, 47 B. C. The Eastern empire, founded by Constantine the Great, on the final overthrow of the Roman, A. D. 306. The empire of the Western Franks began under Charlemagne, A. D. 802. This empire underwent a new revolution, and became the German empire under Rodolph of Hapsburgh, the head of the house of Austria, A. D. 1273, from whom it is also called the Monarchy of the Austrians. The Eastern empire passed into the hands of the Turks, about A. D. 1293. See also the *Revolutions of particular countries under their proper heads, as Rome, France, Portugal, &c.*

**REVOLUTIONS, THE MOST CELEBRATED IN MODERN HISTORY.** In Portugal, A. D. 1640. In England, 1688. In Poland, 1704, 1795, and 1830. In Russia, 1730 and 1762. In Sweden, 1772 and 1809. In America, 1775. In France, 1789, 1830, and 1848. In Holland, 1795. In Venice, 1797. In Rome, 1798. In the Netherlands, 1830. In Brunswick, 1830. In Brazil, 1831. In Rome,

Tuscany, Lombardy, Hungary, &c., 1848-9. These last were temporary only—the former governments were restored, 1849. See these countries respectively.

**REVIEWS AND MAGAZINES IN THE UNITED STATES.** Before the American Revolution various attempts were made to establish religious and literary journals in several places in this country, particularly Boston, New York, and Philadelphia; but no one of them obtained a liberal support or had a long duration. The following are some of the leading literary and religious reviews and magazines:

| BOSTON. Founded.                                                                                              | NEW YORK.                                                                                 | PHILADELPHIA.                                                                                                                 |
|---------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <i>American Monthly Magazine</i> , (the first) established by Jeremy Gridley, continued 3 years, about - 1745 | <i>N. Y. Magazine and Literary Repository</i> , (to 1792) - 1757                          | <i>Aitkin's Pennsylvania Magazine</i> was the most popular before the Revolution; Thos. Paine and Francis Hopkinson, editors  |
| <i>Massachusetts Magazine</i> , (lasted to 1795) 1784                                                         | <i>Literary Review</i> , R. C. Sands, &c. (to 1823) - 1822                                | <i>Amer. Museum</i> , pub. by Matthew Carey, (to 1792) - 1787                                                                 |
| <i>Monthly Anthology</i> , Pri. Ticknor, A. H. Everett, Buckminster, &c. (to 1811) - 1803                     | <i>Atlantic Mag.</i> , Sands, afterwards <i>New York Monthly Review</i> , - 1824          | <i>Literary Magazine and American Register</i> , C. Brockden Brown, (to 1810) - 1805                                          |
| <i>General Repertory and Review</i> , (1st Amer. quarterly,) edited at Cambridge by Andrews Norton - 1812-13  | <i>Knickerbocker Mag.</i> , C. F. Hoffman, succeeded by Flint, and now L. G. Clark - 1832 | <i>Portfolio</i> , pub. monthly from 1809 by Jos. Denie; edited by Nicholas Biddle, 1812-16, and 1816-21 by J. E. Hall - 1801 |
| <i>North American Review</i> , commenced by W. Tudor - 1815                                                   | <i>Democratic Review</i> (until 1841 at Washington) 1837                                  | <i>Analectic Mag.</i> , Moses Thomas, (to 1820) - 1813                                                                        |
| <i>Christian Examiner</i> , (quarterly) Channing, Dewey, Ware, &c. - 1818                                     | <i>American Monthly Magazine</i> , N. Y., (to 1838) Herbert, Hoffman, Benjamin - 1835     | <i>Amer. Quar. Review</i> , Robt. Walsh, (to 1837) 1827                                                                       |
| <i>American Biblic. Repository</i> , founded by E. Robinson, D. D., at Andover - 1831                         | <i>N. Y. Review</i> , (quarterly) J. G. Cogswell, (to 1842) - 1837                        | <i>Graham's Magazine</i> - 1827                                                                                               |
| <i>Christian Review</i> , (Baptist) quarterly - 1835                                                          | <i>American Review</i> , G. H. Colton - 1844                                              | <i>Lady's Book</i> , Mrs. Hale                                                                                                |
| <i>Boston Quarterly Review</i> , (Brownson) - 1837                                                            | <i>Hunt's Merchant's Magazine</i> - 1839                                                  | <i>Stryker's American Register</i> , (quarterly) - 1847                                                                       |
| <i>New England Magazine</i> , Buckingham - 1833                                                               | NEW HAVEN.                                                                                |                                                                                                                               |
| <i>American Quarterly Register</i> , Edwards - 18—                                                            | <i>Christian Observer</i> - 182—                                                          | <i>Southern Quarterly Review</i> , at Charleston, (to 1833, recommenced 1842) - 1823                                          |
| <i>The Dial</i> , (quarterly) Emerson, to 1843 - 1841                                                         | <i>American Journal of Science &amp; Arts</i> , (Silliman's) quarterly - 1818             | <i>Southern Lit. Messenger</i> , at Richmond, by T. W. White - 1834                                                           |
| <i>Massachusetts Quarterly</i> , Theo. Parker, &c. 1846                                                       | <i>New Englander</i> , Theol. (quarterly) - 1843                                          | <i>Biblical Repertory and Theological Review</i> , Princeton, N. J. - 18—                                                     |
|                                                                                                               | <i>Church Review</i> (quarterly) - 1848                                                   |                                                                                                                               |

**RHEIMS.** The principal church here was built before A. D. 406; it was rebuilt in the twelfth century, and is now very beautiful. The corpse of St. Remy the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France have been successively crowned at Rheims; probably, because Clovis, the founder of the French monarchy, when converted from paganism, was baptized in the cathedral here, in the year 496. This city was taken and retaken several times in the last months of the war of 1814.

**RHETORIC.** Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B. C.—*Abbé Lenglet*. Rhetoric was first taught in Latin at Rome by Photius Gallus, 87 B. C.—*Idem*. "We are first to consider what is to be said; secondly, how: thirdly, in what words; and lastly, how it is to be ornamented."—*Cicero*. A regius professor of rhetoric was appointed in Edinburgh, April 20, 1762, when Dr. Blair became first professor.

\* Subsequent editors:—W. Phillips, 1817; E. T. Channing, Dana, and Sparks, 1817; Edward Everett, 1819; Jared Sparks, 1823; A. H. Everett, 1830; J. G. Palfrey, 1833; F. Bowen, 1842.

**RHINE, CONFEDERATION OF THE.** See article *Confederation of the Rhine*.

**RHODE ISLAND**, one of the United States; first settled by Roger Williams and his associates, who left Massachusetts to escape religious persecution, and founded the town of Providence, in 1636. Williams obtained a patent from Plymouth Co. in 1644, including Providence Plantations and Rhode Island, which had been settled 1638. New charter by Charles II., in 1663, which has continued in force till recently, unchanged by the Revolution. Dorr's attempt to change or overturn this constitution by armed force, in June, 1842, defeated by the military force of the government. New constitution adopted in convention, September 1842. Constitution of the United States adopted May 29, 1790; this State being the last to accede to it. Population in 1790, 58,825; in 1810, 76,931; in 1830, 97,212; in 1840, 108,130.

**RHODES.** This city was peopled from Crete, as early as 916 B. C. The Rhodians were famous navigators, masters of the sea, and institutors of a maritime code, which was afterwards adopted by the Romans. The republic not completed till 480 B. C. The city built 432 B. C. Its famous Colossus (which see) thrown down by an earthquake, 224 B. C., and finally destroyed by the Saracen admiral Moavia, A. D. 672—*Priestley*.

**RIALTO, AT VENICE.** This renowned bridge is mentioned by Shakspeare in his "Merchant of Venice." It was built in 1570, and consists of a single arch, but a very noble one, of marble, built across the Grand Canal, near the middle, where it is the narrowest: this celebrated arch is ninety feet wide on the level of the canal, and twenty-four feet high.

**RIGHTS, BILL OF.** The declaration made by the lords and commons of England to the prince and princess of Orange, Feb. 13, 1689. See *Bill of Rights*.

**RIOTS.** Some of the most noted in the United States:

At Baltimore, office of a Newspaper opposed to the war, demolished, July, 1812.

At Providence, 4 persons killed by the military, Sept. 24, 1831.

At Baltimore, about the bank of Md., several killed and wounded. Aug. 8, 1835.

At New York, "abolition riots," caused by discussions on slavery, and supposed intentions of abolitionists to promote "amalgamation" between whites and blacks, July 10-12, 1834.

At Charlestown, Mass., a Catholic seminary or nunnery burnt, Aug. 11, 1834.

At Philadelphia, further "abolition" riots, 40 houses destroyed, Aug. 12, 1834.

At Utica, Boston, &c., same cause, 1835-6.

At Cincinnati, printing-press of Mr. Burney's "abolition" paper destroyed, July 30, 1836.

At New York, caused by the high price of flour; several hundred barrels of flour destroyed, Feb. 13, 1837.

At Alton, Ill., Rev. E. P. Lovejoy's anti-slavery newspaper destroyed, and he was killed, Nov. 7, 1837.

At Philadelphia, mob opposed to the anti-slavery discussions, destroyed Pennsylvania Hall, &c., May 17, 1838.

In the Pennsylvania legislature, two different legislatures organized, the Senate expelled from their Chamber by a mob. Militia called out and the contest settled after 4 days, Dec. 8, 1838.

At Cincinnati, chiefly of Irishmen against abolitionists and negroes, Sept. 4, 1841.

Disgraceful affray in Pennsylvania legislature; a member stabbed by another, April 8, 1843.

Another in House of Representatives of U. S.; rencontre between Weller and Shriver, Jan. 25, 1844.

Riot at Philadelphia, between "native Americans" and the Irish, 30 houses and 3 churches burned, fourteen persons killed, forty wounded; finally put down by the military, May 6-8, 1844.

The same renewed, and 40 to 50 killed and wounded by the military: 5000 troops called out, July 7, 1844.

Outrages of "Anti-Renters," in Rensselaer County, N. Y. Commenced August 21, 1844: renewed in December.

Delaware Co., N. Y., declared by governor Wright to be in a state of insurrection. Collection of rents being resisted by rioters disguised as Indians, and an under sheriff murdered, Aug. 27, 1845.

Anti-Rent riot in Columbia Co. N. Y. March 25, 1847.

Riots at the Astor Place Opera House, N. Y. against Mr. Macready, the English actor 21 killed; May 10, 1849.

Disgraceful rencontre between Foote of Mississippi and Benton of Missouri, in the Senate of the U. S., the first gross insult to that assembly, May, 1850.

**RIVER AND HARBOR CONVENTION**, for promoting improvements, &c.; as-

sembled at Chicago, Ill., July 5, 1847. House of Representatives votes (112 to 53) that it is expedient and constitutional for the general government to promote such improvements, July 1848.

**ROBESPIERRE'S REIGN OF TERROR.** Maximilian Robespierre headed the populace in the Champ de Mars, in Paris, demanding the dethronement of the king, July 17, 1791. He was triumphant in 1793, and great numbers of eminent men and citizens were sacrificed during his sanguinary administration. Billaud Varennes denounced the tyranny of Robespierre in the tribune, July 28, 1794. Cries of "Down with the tyrant!" resounded through the hall; and so great was the abhorrence of the Convention of this wicked minister, that he was immediately ordered to the place of execution and suffered death, no man deeming himself safe while Robespierre lived.

**ROBIN HOOD.** The celebrated captain of a notorious band of robbers, who infested the forest of Sherwood in Nottinghamshire, and from thence made excursions to many parts of England, in search of booty. Some historians assert that this was only a name assumed by the then earl of Huntingdon, who was disgraced and banished the court by Richard I. at his accession. Robin Hood, Little John his friend and second in command, with their numerous followers, continued their depredations from about 1189 to 1247, when he died.—*Stowe's Chron.*

**ROCKETS, CONGREVE'S.** War implements of very destructive power, were invented by sir William Congreve, about 1803. The carcass rockets were first used at Boulogne, their powers having been previously demonstrated in the presence of Mr. Pitt and several of the cabinet ministers, 1806. See article *Boulogne Flotilla*.

**ROMAN CATHOLICS.** The progress of Christianity during the life-time of its divine founder was confined within narrow bounds: the Holy Land was alone the scene of his labors, and of his life and death. The period of the rise of the Roman Catholic religion may be dated from the establishment of Christianity by Constantine, A. D. 323. See *Rome*. The foundation of the papal power dates from A. D. 606, when Boniface III. assumed the title of Universal Bishop. See *Pope*. Pepin, king of France, invested pope Stephen II. with the temporal dominions of Rome and its territories, A. D. 756. The tremendous power of the Roman pontiffs was weakened by the Reformation, and has since been gradually yielding to the influence of the reformed doctrines, and the general diffusion of knowledge among the nations of the earth. Of 225 millions of Christians, about 160 millions are, or pass under the denomination of, Roman Catholics.—*M. Balbi*.

**ROMAN CATHOLICS IN ENGLAND.** Laws were enacted against them in 1539. They were forbidden the British court in 1673; but restored to favor there in 1685. Disabled from holding offices of trust 1689; and excluded from the British throne same year. Obligated to register their names and estates 1717. Indulgences were granted to Roman Catholics by parliament in 1778. They were permitted to purchase land, and take it by descent, 1780. The "no-popery" riots (Gordon's) 1780. Catholic Emancipation Bill passed April 13, 1829, D. O'Connell being the first M. P. who took his seat under the act.

**ROMANCES.** "Stories of love and arms, wherein abundance of enthusiastic flights of the imagination are introduced, giving false images of life."—*Pardon*. As Heliodorus, a bishop of Tricea, in Thessaly, was the author of *Ethiopics*, in Greek, the first work in this species of writing, he is hence styled the "Father of Romances." His work has a moral tendency, and particularly inculcates the virtue of chastity. He flourished A. D. 398.—*Huet de Origine Fabul. Roman.*

**ROME.** Once the mistress of the world, and subsequently the seat of the most extensive ecclesiastical jurisdiction ever acknowledged by mankind. Romulus is universally supposed to have laid the foundations of this celebrated city, on the 20th of April, according to Varro, in the year 3961 of the Julian period, 3251 years after the creation of the world, 753 before the birth of Christ, 431 years after the Trojan war, and in the fourth year of the sixth Olympiad. In its original state. Rome was but a small castle on the summit of Mount Palatine; and the founder, to give his followers the appearance of a nation or a barbarian horde, was obliged to erect a standard as a common asylum for every criminal, debtor, or murderer, who fled from their native country to avoid the punishment which attended them. From such an assemblage a numerous body was soon collected, and before the death of the founder, the Romans had covered with their habitations, the Palatine, Capitoline, Aventine, Esquiline hills, with Mount Caelius, and Quirinalis. Their numerous and successful wars led, in the course of ages, to their mastery over all mankind, and to their conquest of nearly the whole of the then known world. The Romans and the Albans, contesting for superiority, agreed to choose three champions on each part to decide it. The three *Horatii*, Roman knights, and the three *Curiatii*, Albans, having been elected by their respective countries, engaged in the celebrated combat, which by the victory of the *Horatii*, united Alba to Rome, 667 B. C.—*Livy*. See *Tubular Views*, p. 15 to p. 63.

|                                                                                                                                                                                                                       |          |      |

| French armament against the republic reaches Civita Vecchia                                                                                                                                               | April 25, | 1849 |
| French repulsed under the walls of Rome, with the loss of 600                                                                                                                                             | April 29, | 1849 |
| Rome surrenders after an attack of 29 days, and false promises on the part of the French                                                                                                                  | July 2,   | 1849 |
| Rome entered by the French under Oudinot, and evacuated by Garibaldi and his force of 3,000 men                                                                                                           | July 3,   | 1849 |
| Garibaldi escapes to the Adriatic                                                                                                                                                                         | Aug. 2,   | 1849 |
| Oudinot surrenders the government into the hands of three commissioners of the pope, who begin the work of reaction                                                                                       | Aug. 3,   | 1849 |
| Letter of the French president, dictating the basis of the restoration of the pope's temporal power, viz.: general amnesty, secularization of the administration, code Napoleon, and a liberal government | Aug. 18,  | 1849 |
| Pope Pius IX. returned to Rome                                                                                                                                                                            | Apr.      | 1850 |

**ROSARY.** "We owe to Dominic de Guzman, a canon of the order of St. Augustin, two most important blessings," says a Spanish writer, "the Rosary and the Holy Office," A. D. 1202. Other authors mention the Rosary as being said in 1093.

**ROSES, THE WHITE AND RED.** The intestine wars which so long devastated England, were carried on under the symbols of the *White* and the *Red Rose*, and were called the wars of the Roses. The partisans of the house of Lan-

caster chose the *red* roses as their mark of distinction, and those of York were denominated from the *white*. These wars originated with the descendants of Edward III. That monarch was succeeded by his grandson, Richard II., who being deposed, the duke of Lancaster was proclaimed king, by the title of Henry IV. in prejudice to the duke of York, the right heir to the crown; he being descended from Lionel, the *second* son of Edward III., whereas the duke of Lancaster was the son of John of Gaunt, the *third* son of king Edward. The accession of Henry occasioned several conspiracies during his reign; and the animosities which subsisted between his descendants and those of the duke of York afterwards filled the kingdom with civil commotions, and deluged its plains with blood, particularly in the reigns of Henry VI. and Edward IV. First battle fought, May 22, 1455. See *Albans, St.* Union of the Roses in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV., 1486

**ROSICRUSIANS.** A sect of hermetical philosophers, first appeared in Germany in 1302, and again early in the 17th century. They swore fidelity, promised secrecy, and wrote hieroglyphically; and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosophists of the Indies, taught the same doctrine with themselves.

**ROUND-HEADS.** During the unhappy war which brought Charles I. of England to the scaffold, the adherents of that monarch were first called Cavaliers, and the friends of the parliament were called Round-heads. This latter term arose from those persons who thus distinguished themselves putting a round bowl or wooden dish upon their heads, and cutting their hair by the edges or brims of the bowl. See *Cavaliers*.

**ROYAL ACADEMY OF ARTS IN ENGLAND.** Instituted 1768, under the patronage of George III.; and sir Joshua Reynolds, knighted on the occasion, was appointed its first president.—*Leigh*.

**ROYAL HUMANE SOCIETY, LONDON.** This institution, for the recovery of persons apparently drowned, was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes and Cogan, but principally by the exertions of the last three gentlemen. The society has eighteen receiving-houses in the metropolis, all of which are supplied with perfect and excellent apparatus, and designated by conspicuous boards, announcing their object.

**ROYAL INSTITUTION, LONDON.** This institution was formed in 1800, under the patronage of George III., and incorporated by royal charter as "The Royal Institution of Great Britain," for diffusing the knowledge, and facilitating the general introduction, of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life. The investigations and the important discoveries of sir H. Davy, who lectured on chemistry here, conferred no small degree of celebrity on this establishment. A new professorship was created in 1833.

**ROYAL SOCIETY.** The origin of this learned body is ascribed to the hon. Robert Boyle and sir Wm. Petty, who, together with the several doctors of divinity and physic, Matthew Wren and Mr. Rook, frequently met in the apartments of Dr. Wilkins, in Wadham College, Oxford; where the society continued till 1658. Charles II., April 22, 1663, constituted them a body politic and corporate, by the appellation of the "President, Council and Fellows of the Royal Society of London, for improving Natural Knowledge."

**RUMP PARLIAMENT.** The parliament so designated at the period of the civil war in England. Colonel Pride at the head of two regiments blockaded the house of commons, and seized in the passage 41 members of the Presbyterian party, whom he confined; above 160 more were excluded; and none but the most determined of the Independents, about 60, were

permitted to enter the house. This invasion of parliamentary rights was called Pride's Purge, and the admitted members were called the Rump, 1649.—*Goldsmith.*

**RUSSIA.** Anciently Sarmatia. It is conjectured that the aborigines of this vast tract of country were the immediate progeny of Magog, second son of Japhet; and that they settled here very shortly after the dispersion from Babel, where they were gradually divided into tribes, each distinguished by a particular name, but still retaining their ancient general appellation, until it was changed by the Romans into that of Scythians. Rurick was grand-duke of Novogorod, A. D. 882, which is the earliest authentic account of this country. In 981, Woladimer was the first Christian king. Audrey I. began his reign in 1156, and laid the foundation of Moscow. About 1200, the Mongol Tartars conquered Russia, and held it in subjection till 1540, when John Basilowitz restored it to independence. In the middle of the sixteenth century the Russians discovered and conquered Siberia.

1682 Peter I., the Great.  
1725 Catherine I.  
1727 Peter II.  
1730 Anne, a nun.

RUSSIA, *continued*.

1740 John V. ; murdered, July 17, 1762.

1741 Elizabeth.

1762 Peter III. ; deposed, and died soon afterwards.

1762 Catherine II.

1796 Paul I. ; murdered, Feb. 25, 1801.

1801 Alexander.

1825 Nicholas, December 1.

**RYE-HOUSE PLOT.** The real, or more probably pretended, conspiracy to assassinate Charles II. and his brother the duke of York (afterwards James II.) at a place called Rye-house, on the way to London from Newmarket. This design was said to have been frustrated by the king's house at Newmarket accidentally taking fire, which hastened the royal party away eight days before the plot was to take place, March 22, 1683. The plot was discovered June 12, following. The patriot Algernon Sidney, suffered death on a false charge of being concerned in this conspiracy, Dec. 7, 1683.

**RYSWICK, PEACE OF,** concluded between England, France, Spain, and Holland, signed Sept. 20, and by the emperor of Germany, Oct. 30, 1697.

## S.

**SABBATH, THE.** Ordained by the Almighty. The Jews observed the seventh day in commemoration of the creation and their redemption from the bondage of the Egyptians; the Christians observe the first day of the week in commemoration of the resurrection of Christ from the dead, and the universal redemption of mankind. The sabbath-day, or Sunday, ordained to be kept holy in England, from Saturday at three in the afternoon to Monday at break-of-day, 4 Canon, Edgar, A. D. 960. Act of parliament levying one shilling on every person absent from church on Sundays, 3 James I. 1606. Act restraining amusements, Charles I., 1626. Act restraining the performance of servile works, and the sale of goods, except milk at certain hours, meat in public houses, and works of necessity and charity, on forfeiture of five shillings, 29 Charles II. 1677.

**SABBATLIANS.** Christians, who, professing to follow the example and precepts of Christ, keep the ancient divine Sabbath of Saturday, instead of the modern Romish festival of Sunday, for which this sect allege that there is not a tittle of Scriptural authority. They maintain that the Jewish Sabbath was never abrogated, nor any other appointed or instituted, and consequently that it ought to be as religiously observed by the Christians as by the Jews, 1549.

**SABBATICAL YEAR.** A Jewish institution, 1444 B. C. Every seventh year, during which time the very ground had rest, and was not tilled, and every forty-ninth year all debts were forgiven, slaves set at liberty, and estates, &c., that were before sold or mortgaged, returned to their original families, &c.—*Josephus*.

**SABINES.** The people from whom the Romans, under Romulus, took away their daughters by force for wives, having made and invited them to some public sports or shows on purpose; when the Sabines were determined to revenge this affront, the women became mediators to their fathers in behalf of their husbands the Romans, and settled a regular and lasting peace between them, 750 B. C.

**SACRED WAR.** The first, concerning the temple at Delphi, took place 448 B. C. The second Sacred War occurred on Delphi being attacked by the Phœceans, 356 B. C. This latter war was terminated by Philip of Macedon taking all the cities of the Phœceans, 348 B. C.—*Plutarch*.

**SACRIFICE.** The first religious sacrifice was offered to God by Abel; it consisted of milk and the firstlings of his flock, 3875 B. C.—*Josephus*; *Usher*. Sacrifices to the gods were first introduced into Greece by Phoroneus, king of

Argos, 1773 B. C. The offering of human sacrifices seems to have originated with the Chaldeans, from whom the custom passed into Greece, Persia, and other eastern nations. All sacrifices to the true God ceased with the sacrifice of the Redeemer, A. D. 33.

**SADDLES.** In the earlier ages the Romans used neither saddles nor stirrups, which led to several maladies of the hips and legs. Saddles were in use in the third century, and are mentioned as made of leather in A. D. 304. They were known in England about the year 600. Side-saddles for ladies were in use in 1388. Anne, the queen of Richard II., introduced them to the English ladies.—*Stowe*.

**SADDUCEES.** A sect among the Jews, said to have been founded by one Sadoc, a scholar of Antigonus, who, misinterpreting his master's doctrine, taught there was neither heaven nor hell, angel nor spirit; that the soul was mortal, and that there was no resurrection of the body from the dead. As for their other opinions, the Sadducees agreed in general with the Samaritans, excepting that they were partakers of all the Jewish sacrifices. This sect began about 200 B. C.—*Pardon*.

**SAFETY-LAMP.** That of the illustrious sir Humphrey Davy, to prevent accidents which happen in coal and other mines, introduced in 1815; and improved in 1817. The safety-lamp is founded on the principle that flame, in passing through iron-wire meshes, loses so much of its heat as not to be capable of igniting inflammable substances around, while flame alone ignites gas. It should be mentioned, that the father of all safety-lamps is Dr. Reid Clanny, of Sunderland, whose invention and improvements are authenticated in the *Transactions of the Society of Arts*, for 1817, and in *Thomson's Annals of Philosophy*, same year.

**SAGUNTUM, SIEGE OF.** The famous and dreadful siege of Saguntum (now Morvedro in Valencia) was sustained 219 B. C. The heroic citizens, after exerting incredible acts of valor for eight months, chose to be buried in the ruins of their city rather than surrender to Hannibal. They burnt themselves, with their houses and all their effects, and the conqueror became master of a pile of ashes and of dead.

**ST. SALVADOR.** The first point of land discovered in the West Indies or America by the illustrious Christopher Columbus. It was previously called Guanahani, or Cat's Isle, and Columbus (in acknowledgment to God for his deliverance from the dangers to which he was exposed in his voyage of discovery) named it St. Salvador, October 11, 1492.

**ST. SEBASTIAN'S, SIEGE OF,** by the British and allied army under lord Wellington. St. Sebastian, after a short siege, during which it sustained a most heavy bombardment, and by which the whole town was laid nearly in ruins, was stormed by general (afterwards lord) Graham, and taken, August 31, 1813.

**ST. SOPHIA, CHURCH OF.** In Constantinople, a short distance from the Sublime Porte, stands the ancient Christian church of St. Sophia, built by Justinian; and since the Mahometan conquest, in 1453, used as an imperial mosque. It abounds in curiosities. Its length is 269 feet, and its breadth 243 feet. Six of its pillars are of green jasper, from the Temple of Diana, at Ephesus; and eight of porphyry, from the Temple of the Sun, at Rome.

**ST. VINCENT, BATTLE OF,** between the Spanish and British fleets off the Cape. The latter was commanded by sir John Jervis (afterwards earl St. Vincent), who took four line-of-battle ships, and considerably damaged the rest of the Spanish fleet, February 14, 1797.

**SALAMANCA, BATTLE OF**, between the British and allies commanded by lord Wellington, and the French army under Marshal Marmont, fought July 22, 1812. In this great and memorable battle the illustrious Wellington was victorious, though the loss of the allies was most severe, amounting in killed, wounded, and missing, to nearly 6000 men; but that of the enemy was much greater. Marmont left in the victor's hands 7141 prisoners, 11 pieces of cannon, 6 stand of colors, and two eagles: 8000 men are believed to have been killed and wounded. Marmont was the seventh French Marshal whom lord Wellington had defeated in the course of four years. An immediate consequence of this victory was the capture of Madrid with 2500 more prisoners, and an immense quantity of stores.

**SALAMIS, BATTLE OF**. The Persians defeated by the Greeks in this great sea-fight, October 20, 480 B. C. Themistocles, the Greek commander, with only 380 sail, defeated the fleet of Xerxes, which consisted of 2000 sail. After this battle, Xerxes retired from Greece, leaving behind him Mardonius, with 300,000 men, to carry on the war, and suffer more disasters. In his retreat, he found the bridge of boats he had crossed over at the Hellespont, now the Dardanelles, destroyed by a tempest.

**SALIQUE, or SALIC, LAW**. By this law females are excluded from inheriting the crown of France. It was instituted by Pharamond, A. D. 424. Ratified in a council of state by Clovis I., the real founder of the French monarchy, in 511.—*Henault's France*. In order to give more authority to the maxim that "the crown should never descend to a female," it was usual to derive it from a clause of the Salian code of the ancient Franks; but this clause, if strictly examined, carries only the appearance of favoring the principle, and does not in reality bear the sense imposed upon it.

**SALT AND SALT-MINES**. Salt is either procured from rocks in the earth, from salt-springs, or from sea-water. The famous salt-mines of Wielitska, near Cracow, in Poland, have been worked 600 years, and yet present, it has been lately said, no appearance of being exhausted. Rock-salt was discovered about A. D. 950. Saltpetre was first made in England about 1625. The fine salt-mines of Staffordshire were discovered about 1670.

**SAMARITANS**. The Samaritans are often mentioned in the Scriptures. They were the inhabitants of a province of which Samaria was the capital, and were composed of heathens and rebellious Jews; and on having a temple built there after the form of that of Jerusalem, a lasting enmity arose between the people of Judea and Samaria, so that no intercourse took place between the two countries, and the name of Samaritan became a word of reproach, and as if it were a curse.—*Lempriere*.

**SANCTUARIES**. They had their origin in the early ages. Rome was one entire sanctuary from 751 B. C. In England, privileged places for the safety of offenders were granted by king Lucius to our churches and their precincts. St. John's of Beverley was thus privileged in the time of the Saxons. St. Burein's, in Cornwall, was privileged by Athelstan, A. D. 935; Westminster, by Edward the Confessor; St. Martin's-le-Grand, 1529. Sanctuaries were abolished at the Reformation. Several places in London were privileged against the arrest of persons for debt. These last were suppressed in 1696.

**SANDALS**. The shoe or slipper worn especially by the eastern nations. At first it was only a piece of leather like the sole of a shoe, to keep the foot from the ground, but was in the course of time improved to a covering of cloth, ornamented with all the delicacies of art, and made of the richest materials, and worn by the high priests at great solemnities, and by kings, princes, and great men as a mark of distinction. Sandals were also worn by women, as appears from the story of Judith and Holofernes, where,

among other decorations, she is said to have put on sandals, at the sight of which he was ravished. It was usual for ladies to have slaves to carry their sandals in cases, ready to adorn their feet on occasions of state. See *Shoes*.

**SANDWICH ISLANDS.** A group of eleven islands in the Pacific Ocean. They were discovered by captain Cook in 1778. Many voyagers report that the natural capacity of the natives seems in no respect below the common standard of mankind. It was in one of these islands that this illustrious circumnavigator fell a victim to the sudden resentment of the natives, Feb. 14, 1779. Extraordinary progress in the civilization and improvement of the natives, effected chiefly by the American missionaries. Tamehameha, chief of Hawaii, becomes king of the group, 18 . Rihoriho, his son, succeeds him, 1819. Idolatry abolished, 1819. Rihoriho and his queen died in England, 1824. Kanikeaouli, 20 years of age, king, 1824. Mission established by the American Board, 1820. In 1832 there were 900 schools and 50,000 pupils in the Islands. Treaty with the French, made with admiral Dupetit-Thouars, 1837. Another, enforcing the introduction of Catholic missionaries, &c., 1839. Tamehameha III. becomes king, Dr. G. P. Judd, an American, prime-minister, 18 . In 1831 there were 14 ships. 2630 tons, belonging to the Islands—which are important to the United States as a whaling station. See *Owhyhee*.

**SANHEDRIM.** An ancient Jewish council of the highest jurisdiction, of seventy, or as some say, seventy-three members. They date this senate from *Numbers* xi. 16. It was yet in being at the time of Jesus Christ, *John* xviii. 31. A Jewish Sanhedrim was summoned by the emperor Napoleon at Paris, July 23, 1806 ; and it assembled Jan. 20, 1807.

**SAPPIC VERSE.** The verse invented by Sappho, the lyric poetess of Mitylene. Sappho was equally celebrated for her poetry, her beauty, and her amorous disposition. She conceived a hopeless passion for Phaon, a youth of her native country, on which account she threw herself into the sea from Mount Leucas, and was drowned. The Lesbians, after her death, paid her divine honors, and called her the tenth muse, 594 B. C.

**SARACENS.** A celebrated people from the deserts of Arabia, *Sarra* in their language signifying a desert. They were the first disciples of Mahomet; and within 40 years after his death, in A. D. 631, they conquered a great part of Asia, Africa, and Europe. They conquered Spain in 713 *et seq.*; the empire of the Saracens closed by Bagdad being taken by the Tartars, 1258. —*Blair*. There are now no people known by this name; the descendants of those who subdued Spain are called Moors.

**SARAGOSSA.** Anciently Cæsarea Augusta; whence, by corruption, its name. Its church has been a place of great devotion. They tell us that the Virgin, while yet living, appeared to St. James, who was preaching the gospel, and left him her image, which was afterwards placed in the church, with a little Jesus in its arms, ornamented with a profusion of gold and jewels, and illuminated by a multitude of lamps. In December 1778, four hundred of the inhabitants perished in a fire at the theatre. Saragossa taken by the French, after a most heroic defence by general Palafox, during as renowned a siege as is on record, February 13, 1809.

**SARATOGA, BURGOYNE'S SURRENDER AT.** Here general Burgoyne, commander of the British army, after a severe engagement with the Americans in the war of independence (Oct. 7), being surrounded, surrendered to the American general Gates, when 5791 men laid down their arms, October 17, 1777.

**SARDANAPALUS.** The last king of Assyria. See *Assyria*. One of the most

infamous and sensual monarchs that ever lived. Having grown odious to his subjects, and being surrounded by hostile armies, dreading to fall into their hands, he shut himself up in his capital at Nineveh. Here he caused a vast pile of wood to be raised in a court of his palace, and heaping upon it all his gold, silver, jewels, precious and rare articles, the royal apparel, and other treasures, and inclosing his concubines and eunuchs in an apartment within the pile, he set all on fire, perishing himself in the flames. This is the mightiest conflagration of wealth on record. The riches thus destroyed were worth *a thousand myriads of talents of gold*, and *TEN TIMES as many talents of silver!!!* about 1,400,000,000*l.* sterling.—*Athenæus.*

**SARDINIA.** The first inhabitants of Piedmont, Savoy, &c., are supposed to have been the Umbrians, Etrurians, Ligurians, and afterwards the Gauls (when they established themselves in Italy, under Brennus, &c.) from whom this country was called Cisalpine Gaul (or Gaul on this side of the Alps, with respect to Rome): it afterwards became a part of Lombardy, from whom it was taken by the Burgundians. The island of Sardinia has been successively possessed by the Phœnicians and Greeks, the Carthaginians, Romans, Saracens, and Spaniards. From settlers belonging to which various nations the present inhabitants derive their origin.

|                                                                                                                                                 |                   |                                                                                                                               |                |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------|----------------|
| Subjugated by the Romans                                                                                                                        | B.C. 231          | Declares war against Austria, enters Milan with an army, to assist the popular cause, and drives the Austrians towards Mantua | March 23, 1848 |
| Taken by the Moors, about                                                                                                                       | A.D. 723          | Takes Lodi                                                                                                                    | April 1, ****  |
| Reduced by the Genoese                                                                                                                          | 1115              | Forces the Austrian line near Verona,                                                                                         | April 17, **** |
| The pope grants Sardinia to the Pisanese, who are, however, too weak to expel the Saracens                                                      | 1132              | Takes Peschiera                                                                                                               | May 30, ****   |
| Alphonso IV. of Arragon, becomes master of Sardinia                                                                                             | 1324              | Defeats the Austrians under Radetsky, at Goito                                                                                | ****           |
| Taken from the Spaniards by the English naval forces                                                                                            | 1708              | Sardinian army driven from Vicenza, Verona, the Adige, &c., June-July                                                         | 1848           |
| Recovered by the Spaniards                                                                                                                      | 1717              | Retreats to Ticino after capitulation of Milan                                                                                | Aug. 4, ****   |
| They again lose possession                                                                                                                      | 1719              | Followed by an armistice                                                                                                      | March 1849     |
| Ceded to the duke of Savoy, as an equivalent for Sicily                                                                                         | 1720              | Rupture of the armistice                                                                                                      | March 1849     |
| Victor Amadeus, having the title of king abdicates in favor of his son                                                                          | A.D. 1730         | Battle of Novara; the Sardinians under Charles Albert, totally defeated by Radetsky                                           | ****           |
| Attempting to recover Sardinia, he is taken, and dies in prison                                                                                 | 1732              | The king abdicates in favor of his son, Victor Emanuel, count of Savoy, and leaves the kingdom                                | March 23, **** |
| [The court kept at Turin till 1706, when these dominions were overrun by the French arms, and shortly afterwards annexed to the French empire.] |                   | Insurrection at Genoa against the new king                                                                                    | April 1, ****  |
| The king resigns his crown to his brother, duke of Aoust                                                                                        | June 4, 1802      | Genoa invested by Marmora, and fully reduced                                                                                  | April 11, **** |
| Sardinia annexed to Italy, and Bonaparte crowned king of the whole.                                                                             | December 26, 1805 | Charles Albert late king, dies at Lisbon                                                                                      | July 28, ****  |
| Restored to its rightful sovereign, with Genoa added to it                                                                                      | December 1814     | Victor Emanuel opens the legislative chamber with a moderate speech, and is warmly greeted                                    | Aug. 1, ****   |
| King Charles Albert, having protested against Austrian encroachments in Italy, calls out an additional force of 25,000 men                      | Jan. 10, 1848     | Treaty with Austria                                                                                                           | Aug. 6, ****   |
| Proclaims the basis of a Constitution                                                                                                           | Feb. 8, 1848      | The chamber votes 100,000 livres to relieve the refugees from various parts of Italy                                          | Aug. 30, ****  |

#### KINGS OF SARDINIA.

|                                                                   |                                 |
|-------------------------------------------------------------------|---------------------------------|
| A. D. 1720. Victor Amadeus, son of Charles Emanuel duke of Savoy. | 1802. Victor Emanuel.           |
| 1730. Charles Emanuel.                                            | 1821. Charles Felix.            |
| 1773. Victor Amadeus Maria II.                                    | 1831. Charles Albert, April 27. |
| 1796. Charles Emanuel.                                            | 1848. Victor Emanuel            |

**SATIRE.** About a century after the introduction of comedy, satire made its appearance at Rome in the writings of Lucilius, who was so celebrated in this species of composition that he has been called the inventor of it, 116

B. C.—*Livy*. Lucilius obtained praise lavished with too liberal a hand: we may compare him to a river which rolls upon its waters precious sand, accompanied with mire and dirt.—*Horace*.

**SATURDAY.** With us this is the last or seventh day of the week; but with the Jews it is the Sabbath. See *Sabbath*. It was so called from an idol worshipped on this day by the old Saxons, and according to Vertigern was named by them Saterne's-day.—*Pardon*. It is more probably from Saturn, *dies Saturni*.—*Addison*.

**SATURN.** Ascertained to be about 900 millions of miles distant from the sun, and its diameter to be 89,170 miles. His satellites were discovered by Galileo and Simon Meyer, 1608–9–10; his belt, &c., by Huygens in 1634; his fifth satellite by the same in 1655; and his sixth and seventh by Herschel in 1789. Cassini was also a discoverer of the satellites of the planets.

**SATURNALIA.** Festivals in honor of Saturn. They were instituted long before the foundation of Rome, in commemoration of the freedom and equality which prevailed on earth in the golden reign of Saturn. Some, however, suppose that the Saturnalia were first observed at Rome in the reign of Tullus Hostilius, after a victory obtained over the Sabines; while others support that Janus first instituted them in gratitude to Saturn, from whom he had learned agriculture. Others suppose that they were first celebrated after a victory obtained over the Latins by the dictator Posthumus. During these festivals no business was allowed, amusements were encouraged, distinctions ceased, and even slaves could say what they pleased to their masters with impunity.—*Lenglet*.

**SAVINGS BANKS, ENGLAND.** The benefit clubs among artisans, having accumulated stocks of money for their progressive purposes, a plan was adopted to identify these funds with the public debt of the country, and an extra rate of interest was held out as an inducement; hence, savings banks to receive small sums, returnable with interest, on demand, were formed. Brought under parliamentary regulation in 1816. The number of savings banks considerably increased up to 1846; and the number of depositors in that year was, for the United Kingdom, 1,063,418; and the whole amount deposited, 32,661,924*l*. In the United States the first savings bank in Philadelphia, 1816; the next in Boston, 1817. They are now very numerous throughout the United States.

**SAVOY.** It became a Roman province 118 B. C. The Alemans seized it in A. D. 395, and the Franks in 496. It shared the revolutions of Switzerland till 1040, when Conrad, emperor of Germany, gave it to Hubert, with the title of earl. Amadeus, earl of Savoy, solicited Sigismund to erect his dominions into a duchy, which he did at Cambray, February 19, 1417. Victor Amadeus, duke of Savoy, obtained the kingdom of Sicily, by treaty, from Spain, which he afterwards exchanged with the emperor for the island of Sardinia, with the title of king, 1713–20. The French subdued this country in 1792, and made it a department of France, under the name of Mont Blanc, in 1800.

**SAW.** Invented by Dædalus.—*Pliny*. Invented by Talus.—*Apollodorus*. Talus, it is said, having found the jaw-bone of a snake, he employed it to cut through a piece of wood, and then formed an instrument of iron like it. Beecher says saw-mills were invented in the seventeenth century; but he errs. Saw-mills were erected in Madeira in 1420; at Breslau, in 1427. Norway had the first saw-mill in 1530. The bishop of Ely, ambassador from Mary of England to the court of Rome, describes a saw-mill there, 1555. In England saw-mills had at first the same fate with printing in Turkey, the crane in Strasburg, &c. The attempts to introduce them were

violently opposed; and one erected by a Dutchman in 1663 was forced to be abandoned.

**SAXONY.** The royal family of Saxony is of very ancient origin, and is allied to all the royal houses in Europe. The sovereignty still continues in the same family, notwithstanding it encountered an interruption of more than two hundred years, from 1180 to 1423. Saxony, which had been for many centuries an electorate, was formed into a kingdom in 1806, when Frederick Augustus became the first king. That sovereign was succeeded by his brother, Anthony, May 5, 1827. The present sovereign is Frederick Augustus II., who ascended the throne, 6th of June, 1836. Saxony became the scene of the great struggle against Napoleon in 1813. Insurrection at Dresden; the king retires to Konigstern, May 3, 1849. Insurgents put down by the Prussian troops, May 7, 1849.

**SCANDALUM MAGNATUM.** The name given to a special statute relating to any wrong, by words or in writing, done to high personages of the land, such as peers, judges, ministers of the crown, officers in the state, and other great public functionaries, by the circulation of scandalous statements, false news, or horrible messages. This law was enacted 2 Richard II., 1378.

**SCEPTIC.** The ancient sect of philosophers founded by Pyrrho, 334 B. C. Pyrrho was in continual suspense of judgment; he doubted of every thing, never made any conclusions, and when he had carefully examined a subject, and investigated all its parts, he concluded by still doubting of its evidence. As he showed so much indifference in every thing, and declared that life and death were the same thing, some of his disciples asked him, why he did not hurry himself out of the world? "Because," says he, "there is no difference between life and death." Timon was one of the chief followers of this sect, which was almost extinct in the time of Cicero.—*Strabo*.

**SCEPTRE.** This is a more ancient emblem of royalty than the crown. In the earlier ages of the world, the sceptres of kings were long walking-staves; they afterwards were carved, and made shorter. Tarquin the Elder was the first who assumed the sceptre among the Romans, about 468 B. C. The French sceptre of the first race of kings was a golden rod, A. D. 481.—*Le Gendre*.

**SCHOOLS.** Charity schools were instituted in London to prevent the seduction of the infant poor into Roman Catholic seminaries, 3 James II. 1687.—*Rapin*. Charter schools were instituted in Ireland 1733.—*Scully*. In England there are now 13,642 schools (exclusively of Sunday schools) for the education of the poor; and the number of children is 998,431. The parochial and endowed schools of Scotland are in number (exclusively of Sunday schools) 4,836; and the number of children, 181,467. The number of schools in Wales is 841, and the number of children 38,164: in Ireland, 13,327 schools, and 774,000 children. In the United States the system of public schools is very generally and effectively supported. The school-fund in Maine amounts to \$350,000; in Massachusetts, \$850,000; in Connecticut, \$2,077,641; New York, \$6,491,803; New Jersey, \$369,278; Delaware, \$225,000; Virginia, \$1,448,261; Georgia, \$262,300; Alabama, \$1,215,381; Tennessee, \$1,346,068; Kentucky, \$1,221,819; Ohio, \$1,566,931; Michigan, \$500,000; Indiana, \$2,195,149; Missouri, \$575,668; Iowa, \$132,909. Total in 1849, \$21,420,275. In the State of New York the number of District School Libraries is about 11,000. See *Education, Libraries, &c.*

**SCIENCE IN THE UNITED STATES.** Franklin's discoveries in electricity, 1752. American Philosophical Society established, 1769. American Academy of Arts and Sciences, 1780. First course of Chemical Lectures in the United States, by Dr. S. L. Mitchill, N. Y., 1792. Botanic garden and Professor of

Natural History established at Harvard College, 1805. American Association for the Advancement of Science, formed, 1845.

**SCILLY ISLES.** They held commerce with the Phœnicians. They are mentioned by Strabo as being ten in number. The memorable shipwreck of the British squadron under sir Cloudesley Shovel occurred here. This brave admiral returning from an expedition against Toulon, mistook these rocks for land, and struck upon them. His ship, the *Association*, in which were his lady, two sons, many persons of rank, and 800 brave men, went instantly to the bottom. The *Eagle*, Captain Hancock, and the *Romney* and *Firebrand*, were also lost. The rest of the fleet escaped, Oct. 22, 1707. Sir Cloudesley's body, being found, was conveyed to London, and buried in Westminster Abbey, where a monument was erected to his memory.

**SCOTLAND.** See *Caledonia*. This important member of the British empire was governed by a king before the Romans visited England, and continued an independent kingdom till the death of the English queen Elizabeth, when James VI. of Scotland, the most immediate heir, was called to the throne of England, and constantly resided in the latter; he and his successors calling themselves kings of England and Scotland, and each country having a separate parliament, till the year 1707, in the reign of queen Anne, when both kingdoms were united under the general name of Great Britain. See *England and Scotland, Tabular Views*, p. 75., *et seq.*

**SCREW.** This instrument was known early to the Greeks. The pumping-screw of Archimedes, or screw-cylinder for raising water, invented 236 B. C., is still in use, and still bears that philosopher's name. The power of the screw is astonishing; it being calculated that if the distance between the two spirals or threads of the screw be half an inch, and the length of each handle twelve inches, the circle that they describe in going round will be seventy-five inches, and consequently 150 times greater than half an inch, the distance between the two spirals. Therefore one man can, with the assistance of this screw, press down or raise up as much as 150 men could do without it. This power increases in proportion to the closeness of the spirals and the length of the handles.—*Greig*.

**SCULPTURE.** The origin of this art cannot be traced with any certainty. The invention is given by some ancient writers to the Egyptians, and by others to the Greeks. It is referred by some historians to 1020 B. C., and sculpture in marble to 872 B. C. Pausanias refers the nearest approach to perfection in the art to 560 B. C. According to sacred history, Bezaleel and Aholiab, who built the tabernacle in the wilderness, and made all the vessels and ornaments, were the first architects and sculptors of repute, and their excellence is recorded as the gift of God, *Exodus xxxi*. Dipœnus and Scyllis, statuarys at Crete, established a school at Sicyon. Pliny speaks of them as being the first who sculptured marble and polished it; all statues before their time being of wood, 568 B. C. This, however, can only be fact so far as it relates to the western world; for in the eastern countries the art was known long before. Alexander gave Lysippus the sole right of making his statues, 326 B. C. He left no less than 600 pieces, some of which were so highly valued in the age of Augustus, that they sold for their weight in gold. Sculpture never found any very distinguished followers among the Romans, and in the middle ages it fell into disuse. With the revival of the sister art, painting, it revived also; and Donato di Bardi, born at Florence, A. D. 1383, was the earliest professor among the moderns. Sculpture was revived, under the auspices of the Medici family, about 1460.—*Abbé Lenglet*.

**SCYTHIA.** The country situate on the most northern parts of Europe and Asia, from which circumstance it is generally denominated European and

**Asiatic.** The most northern parts of Scythia were uninhabited, on account of the extreme coldness of the climate. The boundaries of Scythia were unknown to the ancients, as no traveller had penetrated beyond the vast tracts of lands which lay at the north, east, and west. The Scythians made several irruptions upon the more southern provinces of Asia, especially B. C. 624, when they remained in possession of Asia Minor for twenty-eight years; and we find them at different periods extending their conquests in Europe, and penetrating as far as Egypt. In the first centuries after Christ they invaded the Roman empire.

**SEAS, SOVEREIGNTY OF THE.** The claim of England is of very ancient date. Arthur was the first who assumed the sovereignty of the seas for Britain, and Alfred afterwards supported this right. The sovereignty of England over the British seas was maintained by Selden, and measures were taken by government in consequence, 8 Charles I. 1633. The Dutch, after the death of Charles I., made some attempts to obtain it, but were roughly treated by Blake and other admirals. Russia and other parts of the North, armed, to avoid search, 1780; again 1800. See *Armed Neutrality* and *Flag*.

**SECRETARY OF STATE.** The first in England was lord Cromwell, A. D. 1529. Towards the close of Henry VIII.'s reign two secretaries were appointed; and upon the union with Scotland, Anne added a third, as secretary for Scotch affairs: this appointment was afterwards laid aside: but in the reign of George III. the number was again increased to three, one for the American department. In 1782 this last was abolished by act of parliament; and the appointments as at present subsequently took place, the secretaries being now home, foreign, and colonies. The first Secretary of State of the United States was Thomas Jefferson, appointed by Washington, Sept. 26, 1789. For his successors see *Administrations*. There is a Secretary of State in each of the States, appointed by the executive or elected by the people.

**SECTS.** See them severally through the volume. The great vicissitude of things is the vicissitude of sects. True religion is built upon a rock; all others are tossed upon the waves of time.—*Bacon*. Assuming the population of the globe to be one thousand and fifty millions, the following division, with reference to their religious worship, will appear.—*M. Balbi*.

|            |   |   |   |   |             |                                                                               |               |
|------------|---|---|---|---|-------------|-------------------------------------------------------------------------------|---------------|
| Jews       | - | - | - | - | 4,500,000   | Idolaters, &c., not professing the<br>Jewish, Christian, or Mahometan worship | - 665,500,000 |
| Christians | - | - | - | - | 225,000,000 |                                                                               |               |
| Mahometans | - | - | - | - | 155,000,000 |                                                                               |               |

**SEDAN CHAIRS.** So called from Sedan, on the Meuse, in France. The first seen in England was in 1581. One was used in the reign of James I. by the duke of Buckingham, to the great indignation of the people, who exclaimed that he was employing his fellow-creatures to do the service of beasts. Sedan chairs came into fashion in London in 1634, when sir Francis Duncomb obtained the sole privilege to use, let, and hire a number of such covered chairs for fourteen years. They became in very general use in 1649.

**SEDUCTION.** For this offence the laws of England have provided no other punishment than a pecuniary satisfaction to the injured family. And even this satisfaction is only obtained by one of the quaintest fictions in the world; the father bringing his action against the seducer for the loss of his daughter's services during her pregnancy and nurturing.—*Paley's Moral Philosophy*. A law for the punishment of seduction was passed by the legislature of New York in 1841.

**SEMPACH, BATTLE OF,** between the Swiss and Leopold, duke of Austria. The heroic Swiss, after prodigies of valor, gained a great and memorable victory over the duke, who was slain, July 9, 1386. By this battle they es-

established the liberty of their country; and it is still annually commemorated with great solemnity at Sempach.

**SEPTEMBER.** The ninth month of the year, reckoned from January, and the seventh from March, whence its name, from *septimius*, seventh. It became the ninth month when January and February were added to the year by Numa, 713 B. C. The Roman senate would have given this month the name of Tiberius, but that emperor opposed it; the emperor Domitian gave it his own name, Germanicus; the senate under Antoninus Pius gave it that of Antoninus; Commodus gave it his surname, Hercules; and the emperor Tacitus his own name, Tacitus. But these appellations are all gone into disuse.

**SEPTUAGINT VERSION OF THE BIBLE,** made 277 B. C. Seventy-two translators were shut up in thirty-six cells; each pair translated the whole; and on subsequent comparison the thirty-six copies did not vary by a word or letter.—*Justin Martyr*. St. Jerome affirms they translated only the Pentateuch; but St. Justin and others say they translated the whole. Ptolemy gave the Jews about a million sterling for a copy of the Testament, and seventy translators half a million more for the translation.—*Josephus*. Finished in seventy-two days.—*Hewlett*.

**SERINGAPATAM, BATTLES OF,** called also the battle of Arikera, in which the British defeated Tippoo Saib, May 15, 1791. Battle, in which the redoubts were stormed, and Tippoo was reduced by lord Cornwallis, Feb. 6, 1792. After this capture, preliminaries of peace were signed, and Tippoo agreed to cede one-half of Mysore, and to pay 33,000,000 of rupees (about 3,300,000 sterling) to England, and to give up to lord Cornwallis his two eldest sons as hostages. In a new war the Madras army arrived before Seringapatam, April 5, 1799; it was joined by the Bombay army, April 14; and the place was stormed and carried by major-general Baird, May 4, same year. In this engagement Tippoo was killed. See *India*.

**SERPENTS.** The largest, the record of which is in some degree satisfactorily attested, was that which disputed the passage of the army led by Regulus along the banks of the Bagrada. It was 120 feet long, and had killed many of his soldiers. It was destroyed by a battering-ram; and its skin was afterwards seen by Pliny in the capitol at Rome.—*Pliny*. The American papers have frequently chronicled the appearance of a sea-serpent on the coast, but its existence has been generally doubted. Haydn quotes from Phillips that a sea-serpent was cast on shore on the Orkney Islands, which was fifty-five feet long, and the circumference equal to the girth of an Orkney pony, 1808.

**SERVANTS.** In England, an act laying a duty on male servants was passed in 1775. This tax was augmented in 1781, *et seq.* A tax on female servants was imposed in 1785; but this latter act was repealed in 1792. The tax on servants yielded in 1830 about 250,000*l.* per annum, but in 1840 the revenue from it had fallen to 201,482*l.*

**SEVILLE.** The capital of Spain until Philip II. finally established his court at Madrid, A. D. 1563. This city is the *Hispalis* of the Phœnicians, and the *Julia* of the Romans. The peace of Seville, between England, France, and Spain, and also a defensive alliance to which Holland acceded, signed Nov. 9, 1729. Seville surrendered to the French, Feb. 1, 1810; and was taken by assault by the British and Spaniards, after the battle of Salamanca, Aug. 27, 1812.

**SEXTANT.** This instrument is used in the manner of a quadrant, and contains sixty degrees, or the sixth part of a circle. It is for taking the altitude of the planets, &c. Invented by the celebrated Tycho Brahe, at Augsburg,

in 1550.—*Vince's Astron.* The Arabian astronomers under the Caliphs are said to have had a sextant of fifty-nine feet nine inches radius, about A. P. 995.—*Ashe.*

**SHEEP.** They were impolitically exported from England to Spain, and, the breed being thereby improved, produced the fine Spanish wool, which proved detrimental to our woollen manufacture, 8 Edward IV. 1467.—*Anderson.* Their exportation prohibited on pain of fine and imprisonment, 1522. The number of sheep in the United Kingdom has been variously stated—by some at 43,000,000, by others at 49,000,000, and by more at 60,000,000, in 1840.

**SHERIFF.** The office of sheriff is from *shire-reve*, governor of a shire or county. London had its sheriffs prior to William I.'s reign; but some say that sheriffs were first nominated for every county in England by William in 1079.

**SHERIFFMUIR, BATTLE OF,** between the royal army under the duke of Argyll, and the Scotch rebel forces who favored the Pretender (the chevalier de St. George, son of James II.), commanded by the earl of Mar; the insurgents were defeated, and several persons of rank were taken prisoners. The battle was fought on the very day on which the rebel forces in the same cause were defeated at Preston, Nov. 12, 1715.

**SHIP-BUILDING.** The art is attributed to the Egyptians, as the first inventors; the first ship (probably a galley) being brought from Egypt to Greece by Danaus, 1485 B. C.—*Blair.* The first double-decked ship was built by the Tyrians, 786 B. C.—*Lenglet.* The first double-decked one built in England was of 1000 tons burthen, by order of Henry VII. 1509; it was called the *Great Harry*, and cost 14,000*l.*—*Stowe.* Before this time 24-gun ships were the largest in the navy, and these had no port-holes, the guns being on the upper decks only. Port-holes and other improvements were invented by Descharges, a French builder at Brest, in the reign of Louis XII., about 1500. Ship-building was first treated as a science by Hoste, 1696. A 74-gun ship was put upon the stocks at Van Diemen's Land, to be sheathed with India-rubber, 1829. For beautiful models and fast sailing, the shipping of the United States—especially the packet ships and steamers sailing from New York—are not surpassed, and probably not equalled, by any in the world. See *Navy* and *Steam Vessels.*

**SHIPPING OF GREAT BRITAIN AND IRELAND.** Shipping was first registered in the river Thames in 1786; and throughout the empire in 1787. In the middle of the 18th century, the shipping of England was but half a million of tons—less than London now. In 1840, the number of ships in the British empire was 29,174; tonnage, 3,277,338; seamen, 205,904. These returns were exclusive of ships and boats propelled by steam. See *Steam Vessels.*

**SHIPPING OF THE UNITED STATES.** Tonnage at different periods.

| Years. | Tonnage.  | Years. | Tonnage.  | Years. | Tonnage.  | Years. | Tonnage.  |
|--------|-----------|--------|-----------|--------|-----------|--------|-----------|
| 1791   | 502,146   | 1806   | 1,203,735 | 1821   | 1,238,958 | 1835   | 1,824,940 |
| 1792   | 564,437   | 1807   | 1,268,548 | 1822   | 1,324,699 | 1836   | 1,892,102 |
| 1793   | 491,780   | 1808   | 1,242,595 | 1823   | 1,336,565 | 1837   | 1,896,685 |
| 1794   | 628,817   | 1809   | 1,350,281 | 1824   | 1,389,163 | 1838   | 1,995,639 |
| 1795   | 747,964   | 1810   | 1,424,783 | 1825   | 1,423,112 | 1839   | 2,096,478 |
| 1796   | 831,900   | 1811   | 1,232,502 | 1826   | 1,534,190 | 1840   | 2,180,764 |
| 1797   | 876,913   | 1812   | 1,269,997 | 1827   | 1,620,608 | 1841   | 2,130,744 |
| 1798   | 898,328   | 1813   | 1,666,628 | 1828   | 1,741,392 | 1842   | 2,092,390 |
| 1799   | 946,408   | 1814   | 1,159,209 | 1829   | 1,260,978 | 1843   | 2,158,602 |
| 1800   | 972,492   | 1815   | 1,368,127 | 1830   | 1,191,776 | 1844   | 2,280,095 |
| 1801   | 1,033,219 | 1816   | 1,372,218 | 1831   | 1,267,846 | 1845   | 2,417,002 |
| 1802   | 892,101   | 1817   | 1,399,911 | 1832   | 1,439,450 | 1846   | 2,562,084 |
| 1803   | 949,147   | 1818   | 1,225,184 | 1833   | 1,601,150 | 1847   | 2,839,946 |
| 1804   | 1,042,404 | 1819   | 1,260,751 | 1834   | 1,758,907 | 1848   | 3,150,502 |
| 1805   | 1,140,369 | 1820   | 1,280,166 |        |           |        |           |

**SHIP-MONEY.** It was first levied A.D. 1007, and caused great commotions. This impost being illegally levied by Charles I. in 1634, led to the revolution. He assessed London in seven ships, of 4000 tons, and 1560 men; Yorkshire in two ships, of 600 tons, or 12,000*l.*; Bristol in one ship of 100 tons; Lancashire in one ship of 400 tons. The trial of the patriot Hampden for refusing to pay the tax, which he at first solely opposed, took place in 1638. Ship-money was included in a redress of grievances in 1641. Hampden received a wound in a skirmish with prince Rupert, and died June 24, 1643.

**SHIPWRECKS, AND DISASTERS AT SEA.** See *Wrecks of Shipping*.

**SHIRTS.** This now almost universal garment is said to have been first generally worn in the west of Europe early in the eighth century.—*Du Fresnoy*. Woollen shirts were commonly worn in England until about the 38th of Henry III., 1253, when linen, but of a coarse kind (fine coming at this period from abroad), was first manufactured in England by Flemish artisans.—*Stowe*.

**SHOES.** Among the Jews they were made of leather, linen, rush, or wood. Moons were worn as ornaments in their shoes by the Jewish women.—*Isaiah* iii. 18. Among the Greeks shoes were of various kinds. Pythagoras would have his disciples wear shoes made of the bark of trees; probably, that they might not wear what were made of the skins of animals, as they refrained from the use of every thing that had life. Sandals were worn by women of distinction. The Romans wore an ivory crescent on their shoes; and Caligula wore his enriched with precious stones. The Indians, like the Egyptians, wore shoes made of the bark of the papyrus. In England the people had an extravagant way of adorning their feet; they wore the beaks or points of their shoes so long, that they encumbered themselves in walking, and were forced to tie them up to their knees; the fine gentlemen fastened theirs with chains of silver, or silver gilt, and others with laces. This custom was in vogue from A. D. 1462, but was prohibited, on the forfeiture of 20*s.* and on pain of being cursed by the clergy, 7 Edward IV. 1467. See *Dress*. Shoes as at present worn were introduced about 1633. The buckle was not used till 1668.—*Stowe*; *Mortimer*.

**SHOP-TAX, IN ENGLAND.** The act by which a tax was levied upon retail shops was passed in 1785; but it caused so great a commotion, particularly in London, that it was deemed expedient to repeal it in 1789. The statute whereby shop-lifting was made a felony, without benefit of clergy, was passed 10 and 11 William III. 1699. This statute has been repealed. See *Acts*.

**SHREWSBURY, BATTLE OF,** between the royal army of Henry IV. and the army of the nobles, led by Percy (surnamed Hotspur), son of the duke of Northumberland, who had conspired to dethrone Henry. Each army consisted of about 12,000 men, and the engagement was most bloody. Henry was seen every where in the thickest of the fight; while his valiant son, who was afterwards the renowned conqueror of France, fought by his side, and though wounded in the face by an arrow, still kept the field, and performed astonishing acts of valor. On the other side, the daring Hotspur supported the renown he had acquired in many bloody engagements, and every where sought out the king as a noble object of his vengeance. 2300 gentlemen were slain, and about 6000 private men. The death of Hotspur by an unknown hand decided the fortune of the day, and gave the victory to the king, July 21, 1403.—*Hume*. [See *Shakspeare's Henry IV.*]

**SHROPSHIRE, BATTLE OF,** in which the Britons were completely subjugated, and Caractacus, the renowned king of the Silures, became, through the treachery of the queen of the Briganti, a prisoner of the Romans, A. D. 51.

While Caractacus was being led through Rome, his eyes were dazzled by the splendors that surrounded him. "Alas!" he cried, "how is it possible that a people possessed of such magnificence at home could envy me a humble cottage in Britain?" The emperor was affected with the British hero's misfortunes, and won by his address. He ordered him to be unchained upon the spot, and set at liberty with the rest of the captives.—*Goldsmith*.

**SHROVE TUESDAY.** In the season of Lent, after the people had made confession, according to the discipline of the ancient church, they were permitted to indulge in festive amusements, although not allowed to partake of any repast beyond the usual substitutes for flesh; and hence arose the custom yet preserved of eating pancakes and fritters at Shrovetide, the Greek Christians eating eggs, milk, &c. during the first week in Lent. On these days of authorized indulgence the most wanton recreations were tolerated, provided a due regard was paid to the abstinence commanded by the church; and from this origin sprang the Carnival. On Shrove Tuesday the people in every parish throughout England formerly confessed their sins; and the parish bell for the purpose was rung at ten o'clock. In several ancient parishes the custom yet prevails of ringing the bell, and obtains in London the name of pancake-bell. Observed as a festival before 1430.

**SIBYLS.** The Sibyllæ were certain women inspired by heaven, who flourished in different parts of the world. Their number is unknown. Plato speaks of one, others of two, Pliny of three, Ælian of four, and Varro of ten, an opinion which is universally adopted by the learned. An Erythrean sibyl is said to have offered to Tarquin II. nine books containing the Roman destinies, demanding for them 300 pieces of gold. He denied her, whereupon the sibyl threw three of them into the fire, and asked the same price for the other six, which being still denied, she burned three more, and again demanded the same sum for those that remained; when Tarquin, conferring with the pontiffs, was advised to buy them. Two magistrates were created to consult them on all occasions, 531 B. C.

**SICILY.** See *Naples*. The ancient inhabitants of this island were the Sicani, a people of Spain, and Etruscans, who came hither from Italy, 1294 B. C. A second colony, under Siculus, arrived 80 years before the destruction of Troy, 1264 B. C.—*Lenglet*. The Phœnicians and Greeks settled some colonies here, and at last the Carthaginians became masters of the whole island, till they were dispossessed of it by the Romans in the Punic wars. Some authors suppose that Sicily was originally joined to the continent, and that it was separated from Italy by an earthquake, and that the straits of the Charybdis were formed.—*Justin*; *Livy*.

|                                                                                                                |       |      |                                                                                                                    |       |      |

SICILY, *continued.*

- deposes the Norman princes, and makes himself king - A. D. 1266
- The French becoming hated by the Sicilians, a general massacre of the invaders takes place, one Frenchman only escaping.—See *Sicilian Vespers* - 1283
- In the same year Sicily is seized by a fleet sent by the kings of Arragon, in Spain; but Naples remains to the house of Anjou, which expires - 1382
- Jane, the late sovereign, having left her crown to Louis, duke of Anjou, his pretensions are resisted by Charles Duraazzo, cousin of Jane, who ascends the throne - 1386
- Alphonso, king of Arragon, takes possession of Naples - 1458
- The kingdom of Naples and Sicily united to the Spanish monarchy - 1504
- The tyranny of the Spaniards causes an insurrection, excited by Masaniello, a fisherman, who, in fifteen days, raises two hundred thousand men - 1647
- Henry duke of Guise, taking advantage of these commotions, procures himself to be proclaimed king; but is, in a few days, delivered up to the Spaniards by his adherents - 1647
- Ceded to Victor, duke of Savoy, by the treaty of Utrecht - A. D. 1713
- Ceded by him to the emperor Charles VI., Sardinia being given to him as an equivalent - 1720
- The Spaniards having made themselves masters of both kingdoms, Charles, son of the king of Spain, ascends the throne, with the ancient title renewed, of king of the Two Sicilies - 1734
- Order of St. Januarius instituted by king Charles - 1738
- The throne of Spain becoming vacant, Charles, who is heir, vacates the throne of the two Sicilies in favor of his brother Ferdinand, agreeably to treaty - 1759
- Dreadful earthquake at Messina, in Sicily, which destroys 40,000 persons - 1783
- Naples preserved from the power of the French by the British forces under admiral Nelson - 1799
- Violent earthquake in the neighborhood of Naples - 1805
- The French invade Naples, depose king Ferdinand IV., and give the crown of the Two Sicilies to Joseph Bonaparte, brother to the emperor of the French - 1806
- For subsequent events, see *Naples*.

## KINGS OF THE TWO SICILIES.

- A. D. 1713. Victor Amadeus, duke of Savoy; he resigned it to the emperor Charles VI., in 1718, and got Sardinia in lieu of it.
1718. Charles VI. emperor.
1734. Charles, second son to the king of Spain, resigned in 1759.
1759. Ferdinand IV., third son of the former king.
1806. Joseph Napoleon Bonaparte.
1808. Joachim Murat; he was shot, October 13, 1815.
1815. Ferdinand I.; formerly Ferdinand IV. of Naples, and intermediately Ferdinand III. of Sicily; now of the United Kingdom of the Two Sicilies.
1826. Francis I.
1830. Ferdinand II., Nov. 8.

**SICILIAN VESPERS.** The memorable massacre of the French in Sicily, known by this name, commenced at Palermo, March 30, 1282. The French had become hateful to the Sicilians, and a conspiracy against Charles of Anjou was already ripe, when the following occurrence led to develop and accomplish it. On Easter Monday, the chief conspirators had assembled at Palermo; and while the French were engaged in festivities, a Sicilian bride happened to pass by with her train. She was observed by one Drochet, a Frenchman, who, advancing towards her, began to use her rudely, under pretence of searching for arms. A young Sicilian, exasperated at this affront, stabbed him with his own sword; and a tumult ensuing, 200 French were instantly murdered. The enraged populace now ran through the city, crying out "Let the French die!" and, without distinction of rank, age, or sex, they slaughtered all of that nation they could find, to the number of 8000. Even such as had fled to the churches found no sanctuary there—the massacre became general throughout the island.

**STEGES.** Azoth, which was besieged by Psammetichus the Powerful, held out for nineteen years.—*Usher*. It held out for twenty-nine years.—*Herodotus*. This was the longest siege recorded in the annals of antiquity. The siege of Troy was the most celebrated, occupied ten years, 1184 B. C. The following are the principal and most memorable sieges since the twelfth century:—

- |                                                                            |                                                                               |                           |
|----------------------------------------------------------------------------|-------------------------------------------------------------------------------|---------------------------|
| Acre, 1192, 1799, by Bonaparte; siege raised after 60 days, open trenches. | Algiers, 1681; Bomb-vessels first used by a French engineer named Renau, 1816 | Almeida, August 27, 1810. |
| Algesiras, 1341.                                                           | Alkmaer, 1573.                                                                | Amiens, 1597.             |
|                                                                            |                                                                               | Ancona, 1798.             |
|                                                                            |                                                                               | Angoulême, 1345.          |

**SIERRA LEONE.** Discovered in A. D. 1460. In 1786, London swarmed with free negroes living in idleness and want; and 400 of them, with 60 whites, mostly women of bad character and in ill health, were sent out to Sierra Leone, at the charge of government, to form a settlement, December 9, 1786. The settlement attacked by the French, September 1794: by the natives, February 1802. Sir Charles Macarthy, the governor of the colony, murdered by the Ashantee chief, Jan. 21, 1824.

**SILK.** Wrought silk was brought from Persia to Greece, 325 B. C. Known at Rome in Tiberius's time, when a law passed in the senate, prohibiting the use of plate of massy gold, and also forbidding men to debase themselves by wearing silk, fit only for women. Heliogabalus first wore a garment of silk, A. D. 220. Silk was at first of the same value with gold, weight for weight, and was thought to grow in the same manner as cotton on trees. Silk-worms were brought from India to Europe in the sixth century. Charlemagne sent Offa, king of Mercia, a present of two silken vests, A. D. 780. The manufacture was encouraged by Roger, king of Sicily, at Palermo, 1130, when the Sicilians not only bred the silk-worms, but spun and weaved the silk. The manufacture spread into Italy and Spain, and also into the south of France, a little before the reign of Francis I., about 1510; and Henry IV. propagated mulberry-trees and silk-worms throughout the kingdom, 1589. In England, silk mantles were worn by some noblemen's ladies at a ball at Kenilworth Castle, 1286. Silk was worn by the English clergy in 1534. Manufactured in England in 1604; and broad silk wove from raw silk in 1620. Brought to perfection by the French refugees in London, at Spitalfields, 1688. A silk-throwing mill was made in England, and fixed up at Derby, by sir Thomas Lombe, merchant of London, modelled from the original mill then in the king of Sardinia's dominions, about 1714.

**SILVER.** It exists in most parts of the world, and is found mixed with other ores in various mines in Great Britain. The silver mines of South America are far the richest. A mine was discovered in the district of La Paz in 130, which was so rich that the silver of it was often cut with a chisel.

1749, one mass of silver, weighing 370 lbs. was sent to Spain. From a mine in Norway, a piece of silver was dug, and sent to the Royal Museum at Copenhagen, weighing 560 lbs., and worth 1680*l.* In England silver-plate and vessels were first used by Wilfrid, a Northumberland bishop, a lofty and ambitious man, A. D. 709.—*Tyrell's Hist. of England.* Silver knives, spoons, and cups, were great luxuries in 1300.

**SILVER COIN.** Silver was first coined by the Lydians, some say; others, by Phidon of Argos, 869 B. C. At Rome it was first coined by Fabius Pictor, 269 B. C. Used in Britain 25 B. C. The Saxons coined silver pennies, which were 22½ grains weight. In 1302, the penny was yet the largest silver coin in England. See *Shillings*, &c., and *Coin*. From 1816 to 1840 inclusive,

were coined at the Mint in London, 11,108,265*l.* 15*s.* in silver, being a yearly average of 444,330*l.*—*Parl. Ret.*

**SIMONIANIS.** An ancient sect of Christians, so called from their founder Simon Magus, or the Magician. He was the first heretic, and went to Rome about A. D. 41. His heresies were extravagant and presumptuous, yet he had many followers, A. D. 57. A sect called St. Simonians sprung up in France; and lately attracted considerable attention in that country; and the doctrine of Simonianism has been advocated in England, and particularly by Dr. Prati, who lectured upon it at a meeting in London, held Jan. 24, 1834.

**SINGING.** See *Music*. The singing of psalms was a very ancient custom both among the Jews and Christians. St. Paul mentions this practice, which was continued in all succeeding ages, with some variations as to the mode and circumstance. During the persecution of the Orthodox Christians by the empress Justina, mother of the then young Valentinian II. A. D. 386, ecclesiastical music was introduced in favor of the Arians. "At this time it was first ordered that hymns should be sung after the manner of Eastern nations, that the devout might not languish and pine away with a tedious sorrow." The practice was imitated by almost all other congregations of the world.—*St. Augustin*. Pope Gregory the Great refined upon the church music, and made it more exact and harmonious; and that it might be general, he set up singing-schools in Rome, A. D. 602.

**SIRNAMES**, first came up in Greece and Egypt, and arose in great acts and distinctions; as *Soter*, from Saviour; *Nicator*, conqueror; *Euergetes*, or Benefactor; *Philopater*, lover of his father; *Philometer*, lover of his mother, &c. Strato was surnamed *Physicus*, from his deep study of nature; Aristides was called the *Just*; Phocion the *Good*; Plato, the *Athenian Bee*; Xenophon, the *Attic Muse*; Aristotle, the *Stagyrite*; Pythagoras, the *Samian Sage*; Menedæmus, the *Eretrian Bull*; Democritus, the *Laughing Philosopher*; Virgil, the *Mantuan Swain*, &c. Surnames were introduced into England by the Normans, and were adopted by the nobility, A. D. 1100. The old Normans used *Fitz*, which signifies son, as Fitzherbert. The Irish used *O*, for grandson, as O'Neal, O'Donnel. The Scottish Highlanders employed *Mac*, as Macdonald, son of Donald. The Saxons added the word son to the father's name, as Williamson. Many of the most common surnames, such as Johnson, Wilson, Dyson, Nicholson, &c., were taken by Brabanter and other Flemings, who were naturalized in the reign of Henry VI. 1435.—*Rymer's Fœdera*, vol. x.

**SLAVERY.** Slavery has existed from the earliest ages. With other abominable customs, the traffic in men spread from Chaldea into Egypt, Arabia, and all over the East, and at length into every known region under heaven. In Greece, in the time of Homer, all prisoners of war were treated as slaves. The Lacedæmonian youth, trained up in the practice of deceiving and butchering slaves, were from time to time let loose upon them to show their proficiency in stratagem and massacre; and once, for their amusement only, they murdered 3000 in one night. Alexander, when he razed Thebes, sold the whole people, men, women, and children, for slaves, 335 *n. c.* See *Helots*.

**SLAVERY IN ROME.** In Rome slaves were often chained to the gate of a great man's house, to give admittance to the guests invited to the feast. By one of the laws of the XII. Tables, creditors could seize their insolvent debtors, and keep them in their houses till, by their services or labor, they had discharged the sum they owed. C. Pollio threw such slaves as gave him the slightest offence into his fish-ponds, to fatten his lampreys, 42 *n. c.* Cæcilius Isidorus left to his heir 4116 slaves, 12 *n. c.*

**SLAVERY IN ENGLAND.** Slavery was very early known; and laws respecting the sale of slaves was made by Alfred. The English peasantry were so commonly sold for slaves in Saxon and Norman times, that children were sold in Bristol market like cattle for exportation. Many were sent to Ireland, and others to Scotland. A statute was enacted by Edward VI. that a runaway, or any one who lived idly for three days, should be brought before two justices of the peace, and marked V with a hot iron on the breast, and adjudged the slave of him who brought him for two years. He was to take the slave, and give him bread, water, or small drink, and refuse meat, and cause him to work by beating, chaining, or otherwise; and if, within that space, he absented himself fourteen days, was to be marked on the forehead or cheek, by a hot iron, with an S, and be his master's slave for ever—second desertion was made felony. Lawful to put a ring of iron round his neck, arm, or leg. A beggar's child might be put apprentice, and, on running away, become a slave to his master, 1547.

**SLAVE TRADE.** The slave trade from Congo and Angola was begun by the Portuguese in 1481. Volumes have been written, confined to facts alone, describing the horrors of this traffic. The commerce in man has brutalized a tract 15 degrees on each side the equator, and 40 degrees wide, or of four millions of square miles; and men and women have been bred for sale to the Christian nations during the last 250 years, and wars carried on to make prisoners for the Christian market. The Abbé Raynal computes that, at the time of his writing, 9,000,000 of slaves had been consumed by the Europeans, "Add 1,000,000 at least more, for it is about ten years since," says Mr. Cooper, who published letters on this subject in 1787. In the year 1768, the slaves taken from their own continent amounted to 104,100. In 1786, the annual number was about 100,000; and in 1807 (the last year of the English slave trade), it was shown by authentic documents, produced by government, that from 1792 upwards of 3,500,000 Africans had been torn from their country, and had either miserably perished on the passage, or been sold in the West Indies.\*—*Butler*. Bull of pope Gregory against the slave trade, Dec. 1830. Quintuple treaty for the suppression of the slave trade, allowing mutual right of search, signed at London, by the representatives of Great Britain, France, Austria, Russia, and Prussia, December 20, 1841. King of Sweden abolishes slavery in the island of St. Bartholomew, Oct. 9, 1847.

**SLAVE TRADE OF ENGLAND.** Captain, afterwards sir John Hawkins, was the first Englishman, after the discovery of America, who made a traffic of the human species. His first expedition with the object of procuring negroes on the coast of Africa, and conveying them for sale to the West Indies, took place in October, 1563. See *Guinea*. Queen Anne directed the colonial government of New York to take care "that the Almighty should

---

\* European avarice has been glutted with the murder of 180,000,000 of our fellow-creatures, recollecting that for every one slave procured, ten are slaughtered in their own land in war, and that a fifth die on the passage, and a third in the seasoning.—*COOPER'S LETTERS ON THE SLAVE TRADE*. "But," says *BUTLER*, "this monstrous colossal crime has not been perpetrated with impunity. Not only its prosecution, but its effects have in some measure called down upon us the frowns and the judgments of heaven.

"By foreign wealth are British morals changed,  
And Afric's sons, and India's, smile avenged."

The trade was abolished in Austria in 1782. By the French convention in 1794. By the United States in 1807. By England (*see above*) in 1807. The Allies, at Vienna, declared against it, February 1815. Napoleon, in the hundred days, abolished the trade, March 29, 1815. Treaty with Spain, 1817; with the Netherlands, May, 1818; with Brazil, Nov. 1826. But this horrid traffic continues to be encouraged in several states.—*Haydn*.

be devoutly and duly served, according to the rites of the Church of England, and also that the Royal African Company should be encouraged, and that the colony should have a constant and sufficient supply of *merchandise negroes* at moderate rates." In the year 1786, England employed 130 ships, and carried off 42,000 slaves; Bristol and Liverpool were chiefly engaged in it; and such was the extent of British commerce in human flesh, that at the period of slave emancipation in the British plantations in 1833, the number of slaves, which had previously been considerably more, yet then amounted to 770,280. The slave-trade question was debated in the British parliament in 1787. The debate for its abolition lasted two days in April 1791. The motion of Mr. Wilberforce was lost by a majority of 88 to 83, April 3, 1798. After several other efforts of humane and just men, the question was introduced under the auspices of lord Grenville and Mr. Fox, then ministers, March 31, 1806; and the trade was finally abolished by parliament, March 25, 1807.

#### SLAVERY OF THE AMERICAN INDIANS IN EUROPE.

Many of the early navigators to America, including Columbus himself, carried considerable numbers of the aborigines to Europe, where they were sold into slavery. Queen Isabella commanded the liberation of Indians held in bondage in her possessions, in - 1501

—but the next year the slavery of Indians was recognized as lawful; and the practice of selling the natives of North America into foreign bondage continued for nearly two centuries. The excellent Winthrop enumerates Indians among his bequests.—*Bancroft*.

#### SLAVERY IN THE UNITED STATES. See *Slave Trade*.

The first negro slaves in the English colonies of North America were brought to Virginia in a Dutch vessel of war - 1620  
Negroes "who had been fraudulently brought from Guinea" to Massachusetts (the first in New England), were sent home at the public expense by the general court of that colony - 1646  
Gorton and Roger Williams made a decree against slavery in Rhode Island 1652  
White slaves were sold in England, to be transported to Virginia: average price for 5 years' service, £5—while a negro was worth £25.—*Bancroft* - 1672  
Virginia had one slave to 50 whites - 1650  
The Quakers abolished slavery among themselves - 1754  
Resolutions against the slave trade passed by the first congress of the colonies - 1774  
Act against the external slave trade passed by congress of the United States - 1789

[Slavery had been already prohibited in most of the northern States in their constitutions.]  
Act of congress against fitting out vessels for slave trade - 1794  
Act forbidding any citizen of the United States from holding property in foreign slave vessels. United States vessels authorized to seize slavers - 1800  
Act forbidding, under heavy penalties, the introduction of slaves into the United States - 1807  
Act declaring the slave trade piracy, punishable with death - 1820  
[Slavery has, however, been continued in thirteen of the States. See *Missouri*.]  
The number of slaves in the United States in 1790 was - 697,697  
In 1800 - 896,849  
In 1810 - 1,191,364  
In 1820 - 1,538,064  
In 1830 - 2,010,431  
In 1840 - 2,487,355

SLAVES, EMANCIPATION OF. Act for the abolition of slavery throughout the British colonies, and for the promotion of industry among the manumitted slaves, and for the compensation to the persons hitherto entitled to the services of such slaves, by the grant from parliament of 20,000,000*l.* sterling, passed 3 and 4 William IV., Aug. 28, 1833. By the operation of this act, slavery terminated in the British possessions on Aug. 1, 1834, and 770,280 slaves became free.

SLEEP. We are told that while Epimenides was at Athens, and was one day attending his flocks, he entered a cave, and there fell asleep. His sleep continued, according to some writers, forty or forty-seven years; Pliny says he slept fifty-seven years; and when he awoke, he found every object so altered he knew not where he was. It is supposed that he lived 289 years

596 B. C. We have many, and even very late, instances of persons in these countries sleeping continuously for weeks and months.

**SMALL-POX.** Lady Mary Wortley Montagu introduced inoculation for the small-pox from Turkey, her own son having been inoculated with perfect success at Adrianople, A. D. 1718. She was allowed, by way of experiment, to inoculate seven capital convicts, who, on their recovery, were pardoned. Inoculation for the small-pox was encouraged under the auspices of Dr. Mead. A small-pox hospital was instituted in London, 1746, but the present building was not opened till 1756. See *Inoculation* and *Vaccination*.

**SMITHSONIAN INSTITUTION.** Founded by will of James Smithson, a natural son of the duke of Northumberland, who died 1835, and left £100,000 "to the United States of America, to found at Washington an institution for the increase and diffusion of knowledge among men." Act of Congress accepting the bequest, and providing for the fulfilment of the trust, 1846. Corner stone of the building laid, May 1, 1847.

**SMOLENSKO, BATTLE OF.** One of the most memorable of the celebrated Russian campaign of 1812, between the French and Russian armies. The French in this most sanguinary engagement were three times repulsed, but they ultimately succeeded, and, on entering Smolensko, found the city, which had been bombarded, burning and partly in ruins. Barclay de Tolly, the Russian commander-in-chief, incurred the displeasure of the emperor Alexander, because he retreated after the battle, and Kutusoff succeeded to the command, Aug. 17, 1812.

**SMUGGLERS IN ENGLAND.** The customs duties were instituted originally to enable the king to afford protection to trade against pirates; and they afterwards became a branch of the public revenue. A severe penalty against smuggling was enacted in 1736.

**SNUFF-TAKING.** This practice took its rise in England from the captures made of vast quantities of snuff by sir George Rooke's expedition to Vigo in 1702. The prize of the forces having been sent home and sold, the vice soon obtained from which the revenue now draws, with tobacco, considerably more than 3,000,000*l.* per annum. In the year ending Jan. 5, 1840, there were imported 1,622,493 lbs. of snuff, of which 196,305 lbs. were entered for home consumption; the duty was 88,263*l.* See *Tobacco*.

**SOAP.** This article was imperfectly known to the ancients. The first express mention of it occurs in Pliny and Galen; and the former declares it to be an invention of the Gauls, though he prefers the German to the Gallic soap. In remote periods clothes were cleansed by being rubbed or stamped upon in water. Nausicaa and her attendants, Homer tells us, washed theirs by treading upon them with their feet in pits of water.—*Odyssey*, book vi. The manufacture of soap began in London in 1524, before which time it was supplied by Bristol at one penny per pound.

**SOBRAON, BATTLE OF; INDIA.** The British army, 35,000 strong, under Sir Hugh (now lord) Gough, attacked the Sikh force on the Sutlej. The enemy was dislodged after a dreadful contest, and all their batteries taken; and in attempting the passage of a river by a floating bridge in their rear, the weight of the masses that crowded upon it caused it to break down, and more than 10,000 Sikhs were killed, wounded, or drowned. The British loss was 2383 men; fought Feb. 10, 1846.

**SOCIETY ISLANDS** seized by the French admiral, Dupetit Thouars, and queen Pomare deposed, Nov. 9, 1843, but the transaction was disavowed by the French government.

**SOCIALISM.** This is the name given to the doctrine which teaches that all men have common interests, and that society ought to be, accordingly, or-

ganized on that principle. It has been taught, more or less distinctly, in all ages and nations: by Pythagoras B. C. 466, and Plato B. C. 422, among the Greeks; by the sect of Essenes, in the time of our Saviour, among the Jews; by the first Christians A. D. 34; by several of the fathers of the Church; by sir Thomas More, in his *Utopia*, A. D. 1515; by Campanella, A. D. 1623; and by Babeau, in France, A. D. ; but the principal modern teachers of it have been Charles Fourier, who was born at Besançon in 1772; and who published a variety of able works on the subject; by Claude Henri St. Simon, born also in France, at Paris, in A. D. 1760; and by Robert Owen, of England, who first taught it publicly in London in 1834. Through the instrumentality of their writings it has been spread over Germany, France, England, and the United States, where socialism, in different forms, has a considerable number of disciples. In February, 1848, an attempt was made by Louis Blanc, one of the Provisional Government of Paris, to organize labor on socialist principles, but without success. A great many religious sects, such as the Moravians, the Rappites, the Zoarites, and the Shakers, adopt the doctrine of common property in their social arrangements.

**SOCINIANS.** So called from their founders, Faustus and Lælius Socinus. They taught that Jesus was a mere man, who had no existence before he was conceived by the Virgin; that the Holy Ghost was not a distinct person; and that the Father only is truly God. They maintained that Christ died only to give mankind a pattern of heroic virtue, and to seal his doctrines with his death. Original sin, grace, and predestination they treated as mere chimeras. Socinianism was propagated about A. D. 1560.—*Pardon.*

**SODOM AND GOMORRAH.** These cities, with all their inhabitants, destroyed by fire from heaven, 1897 B. C.—*Bible, Blair, Usher.* The offence of sodomy was first sown in England by the Lombards. By an old English law, the criminal was burnt to death, though Fleta says he should be buried alive. The crime was subject to ecclesiastical censure only at the time of Henry VIII., who made it felony without benefit of clergy, 1533. Confirmed by statute 5 Elizabeth, 1562.

**SOLAR SYSTEM.** The system nearly as now accepted, after the investigations and discoveries of many enlightened centuries and ages, was taught by Pythagoras of Samos, about 529 B. C. In his system of the universe he placed the sun in the centre, and all the planets moving in elliptical orbits round it—a doctrine deemed chimerical and improbable, till the deep inquiries of the philosophy of the sixteenth century proved it, by the most accurate calculations, to be true and incontestable. The system of Pythagoras was revived by Copernicus, and it is hence called the Copernican system. Its truth was fully demonstrated by sir Isaac Newton, in 1695. How truly the poet says—

“He who through vast immensity can pierce,  
See worlds on worlds compose one universe,  
Observe how system into system runs,  
What other planets circle other suns,  
What varied beings people every star,  
May tell why Heaven has made us what we are.”—*Pope.*

**SOLOMON'S TEMPLE.** The foundation laid, 480 years after the deliverance from Egypt, 1012 B. C. The temple solemnly dedicated, Friday, October 30, 1004 B. C., being 1000 years before the birth of the Redeemer.—*Usher, Lenglet.*

**SORCERERS AND MAGICIANS.** A law was enacted against their seductions, 33 Henry VIII. 1541; and another statute equally severe was passed 5 Elizabeth, 1563. The pretension to sorcery and witchcraft and the conversing with evil spirits was made capital, 1 James I., 1603. For shocking instances of the punishment of sorcerers, see *Witchcraft.*

**SOLDAN or SOUJAH.** The title of the lieutenant-generals of the caliphs, which they went by in their provinces or armies. These officers afterwards made themselves sovereigns. Saladin, general of the forces of the Noradine, king of Damascus, was the first that took upon him this title in Egypt, A. D. 1165, after having killed the caliph Caym.

**SOUND.** Fewer than thirty vibrations in a second give no sound; and when the vibrations exceed 7520 in a second, the tones cease to be discriminated. Roberval states the velocity of sound at the rate of 560 feet in a second; Gassendus, at 1473; Derham, at 1142 feet. At Paris, where cannon were fired under many varieties of weather in 1738, it was found to be 1107 feet. The fire of the British on landing in Egypt was distinctly heard 130 miles on the sea. See *Acoustics*.

**SOUNDINGS AT SEA.** Captain Ross, of H. M. S. *Ædipus*, took extraordinary soundings at sea. One of them was taken 900 miles west of St. Helena, where it extended to the depth of 5000 fathoms. Another sounding was made in latitude of 33 degrees S. and longitude 9 degrees W., about 300 mile from the Cape of Good Hope, when 2266 fathoms were sounded; the weight employed amounted to 450 lbs., 1840.

**SOUTH CAROLINA.** One of the United States; first settlement was made under Governor Sayle, at Port Royal, in 1670, and at Charleston 1671; received a colony of French refugees, exiled by the revocation of the Edict of Nantes, 1690; church of England established by law, 1703; proprietary government in the two Carolinas superseded by one established by the people in 1719; the country purchased of the proprietors by the English parliament in 1729, when the country was divided into North and South Carolina; received colonies of Swiss, Germans, and Irish at various times. This State early resisted the claims of the mother country, and was active in the revolutionary war. Charleston and a large part of the State taken by the British in 1780; battle of Eutaw Springs, 1781; Federal Constitution adopted May 23, 1788, by 149 to 73; "nullification ordinance" passed Nov. 1832. Population in 1790 was 249,000; in 1810, 415,115; in 1830, 581,458; in 1840, 594,398, including 327,538 slaves.

**SOUTH SEA BUBBLE.** This destructive speculation was commenced in 1710; and the company incorporated by statute, 1716. The bubble, which ruined thousands of families, exploded in 1720, and the directors' estates, to the value of 2,014,000*l.* were seized in 1721. Mr. Knight, the cashier, absconded with 100,000*l.*; but he compounded the fraud for 10,000*l.*, and returned to England in 1743. Almost all the wealthy persons in the kingdom had become stock-jobbers and speculators in this fatal scheme. The artifices of the directors had raised the shares, originally of 100*l.*, to the enormous price of 1000*l.* See *Law's Bubble*.

**SOUTHCOTT, JOANNA.** See *Impostors, &c.*

**SPAIN.** The first settlers are supposed to have been the progeny of Tubal, fifth son of Japheth. The Phœnicians and Carthaginians successively planted colonies on the coasts; and the Romans possessed the whole country. In the decline of the Roman empire, Spain was seized by the Vandals, Alans, and Suevi; afterwards subdued by the Visigoths, who laid the foundation of the present monarchy. See *Tabular Views*, p. 65, *et seq.*

|                                                         |       |                    |                                                                                                                                                                                                                                                                                                             |

SPAIN, *continued.*

- Union of Navarre and Castile - A. D. 1031  
 The kingdom of Arragon commenced  
 under Ramirez I. - 1035  
 Leon and Asturias united to Castile - 1037  
 Portugal taken from the Saracens by  
 Henry of Bourbon - 1087  
 The Saracens, beset on all sides by the  
 Christians, call in the aid of the Moors  
 from Africa, who seize the dominions  
 they came to protect, and subdue the  
 Saracens - 1091 *et seq*  
 The Moors defeated in several battles  
 by Alphonsus I. of Navarre - 1118  
 Twelve Moorish kings overcome in one  
 great pitched battle - 1135  
 University of Salamanca founded - 1200  
 Leon and Castile re-united - 1226  
 Cordova, the residence of the first Moor-  
 ish kings, taken by Ferdinand of Cas-  
 tile and Leon - 1236  
 The kingdom of Granada begun by the  
 Moors, their last refuge from the  
 power of the Christians - 1238  
 Reign of Alphonsus the Wise - 1252  
 The crown of Navarre passes to the  
 royal family of France - 1276  
 200,000 Moors invade Spain - 1327  
 They are defeated by Alphonsus XI.,  
 with great slaughter - 1340  
 The infant Don Henriquez, son of John  
 the First of Castile, first had the title  
 of prince of Asturias - 1388  
 Ferdinand II. of Arragon marries Isa-  
 bella of Castile; and nearly the whole  
 Christian dominions of Spain are uni-  
 ted in one monarchy - 1474  
 Granada taken after a two years' siege;  
 and the power of the Moors finally  
 extirpated by the valor of Ferdinand - 1492  
 Columbus issent from Spain to explore  
 the western world - 1492  
 Ferdinand conquers the greater part of  
 the kingdom of Navarre - 1512  
 Accession of the house of Austria to the  
 throne of Spain - 1516  
 Charles V. of Spain and Germany re-  
 tires from the world - 1556  
 Philip I. commences his bloody perse-  
 cution of the Protestants - 1561  
 The Escorial began building - 1562  
 Portugal united to Spain - 1580  
 The invincible Spanish Armada de-  
 stroyed. See *Armada*, and *Naval*  
*Battles* - 1588  
 Philip III. banishes the Moors and their  
 descendants, to the number of 900,000,  
 from Spain - 1610  
 Philip IV. loses Portugal - 1640  
 Gibraltar taken by the English - 1704  
 Philip V. invades Naples - 1714  
 Charles III., king of the Two Sicilies,  
 succeeds to the crown - 1759  
 Battle of Cape St. Vincent - Feb. 14, 1797  
 Spanish treasure-ships, valued at 3,000,-  
 000 dollars, seized by the English  
 Oct. 29, 1804  
 Battle of Trafalgar. See *Trafalgar*,  
*Battle of* - Oct. 31, 1805  
 Sway of the prince of Peace - 1806  
 Conspiracy of the prince of Asturias  
 against his father - July 25, 1807  
 Treaty of Fontainebleau - Oct. 27, 1807  
 The French take Madrid - A. D. March, 1808  
 The prince of Peace dismissed by the  
 king of Spain - March 18, 1808  
 Abdication of Charles IV. in favor of  
 Ferdinand - March 19, 1808  
 And at Bayonne, in favor of his "friend  
 and ally;" Napoleon, when Ferdi-  
 nand relinquished the crown, May 1, 1808  
 The French are massacred at Madrid,  
 May 2, 1808  
 Napoleon assembles the notables at  
 Bayonne - May 25, 1808  
 Joseph Bonaparte enters Madrid, as  
 king of Spain - July 12, 1808  
 He retires from the capital - July 29, 1808  
 Supreme Junta installed - Sept. 1808  
 Madrid retaken by the French, and Jo-  
 seph restored - Dec. 2, 1808  
 The royal family of Spain imprisoned  
 in the palace of Chambery, in Savoy,  
 Dec. 5, 1808  
 [Spain now becomes the scene of the  
 struggle called the Peninsular War,  
 for the events of which see the arti-  
 cles severally.]  
 Constitution of the Cortes - May 8, 1812  
 Ferdinand VII. restored - May 14, 1814  
 Spanish revolution began - Jan. 1, 1820  
 Ferdinand swears to the constitution of  
 the Cortes - March 8, 1820  
 Removal of the king to Seville, and  
 thence to Cadiz - April 20, 1823  
 The French enter Spain - April 27, 1823  
 They invest Cadiz - June 25, 1823  
 Battle of the Trocadero - Aug. 31, 1823  
 Despotism resumed; the Cortes dis-  
 solved; executions - Oct. 1823  
 Riego put to death - Nov. 27, 1823  
 The French evacuate Cadiz - Sept. 21, 1828  
 Cadiz made a free port - Feb. 24, 1829  
 Salique law abolished - March 25, 1830  
 Queen of Spain appointed regent dur-  
 ing the king's indisposition, and a  
 complete change made in the minis-  
 try - Oct. 25, 1832  
 Don Carlos declares himself legitimate  
 successor to his brother's throne,  
 should the king die - April 29, 1833  
 Death of Charles IV., and his queen  
 assumes the title of governing queen,  
 until Isabella II., her infant daughter,  
 attains her majority - Sept. 29, 1833  
 The royalist volunteers disarmed, with  
 some bloodshed, at Madrid - Oct. 27, 1833  
 Don Carlos lands at Portsmouth with  
 his family - June 18, 1834  
 He suddenly appears among his ad-  
 herents in Spain - July 10, 1834  
 The peers vote the perpetual exclusion  
 of Don Carlos from the throne, Aug. 30, 1834  
 [Here commences the desolating civil  
 war, in which British auxiliaries take  
 the side of the queen.]  
 Espartero gains the battle of Bilbao,  
 and is ennobled - Dec. 25, 1836  
 General Evans retires from the com-  
 mand of the auxiliary legion, and ar-  
 rives in London, after having achieved  
 various successes in Spain - June 20, 1837  
 Madrid is declared in a state of siege,  
 Aug. 11, 1837  
 [Espartero and other Christiano generals

SPAIN, *continued.*

engage with the Carlists, and numerous conflicts take place with various success.]  
 Madrid is again declared in a state of siege - A. D. Oct. 30, 1838  
 The Spanish Cortes dissolved - June 1, 1839  
 The Carlists under Marota desert Don Carlos - Aug. 25, 1839  
 Marota and Espartero conclude a treaty of peace - Aug. 25, 1839  
 Don Carlos seeks refuge in France - Sept. 13, 1839  
 Cabrera, the Carlist general, unable to maintain the war, enters France with a body of his troops - July 7, 1840  
 The British auxiliaries evacuate St. Sebastian and Passages - Aug. 25, 1840  
 Espartero makes his triumphal entry into Madrid - Oct. 5, 1840  
 The queen regent appoints a new ministry, who are nominated by Espartero - Oct. 5, 1840  
 The abdication of the queen regent of Spain - Oct. 12, 1840  
 [She subsequently leaves the kingdom; visits France; next settles in Sicily; but returns to France.]  
 Espartero, duke of Victory, expels the papal nuncio - Dec. 29, 1840  
 The Spanish cortes declare Espartero regent during the minority of the young queen - Apr. 12, 1841  
 Insurrection in favor of Christina is commenced at Pampeluna by Gen. O'Donnell's army - Oct. 2, 1841  
 It spreads to Vittoria and other parts of the kingdom - Oct. 1841  
 Don Diego Leon attacks the palace at Madrid, and his followers are repulsed, and numbers of them slain by the queen's guard - Oct. 7, 1841  
 Don Diego Leon, having been seized, is shot at Madrid - Oct. 15, 1841  
 Zarbano captures Bilbao - Oct. 21, 1841  
 Rodil, the constitutional general, enters Vittoria - Oct. 21, 1841  
 Espartero decrees the suspension of queen Christina's pension - Oct. 26, 1841  
 Espartero makes his triumphal entry into Madrid - Nov. 23, 1841  
 An insurrection breaks out at Barcelona; the national guard joins the populace - Nov. 13, 1842  
 Battle in the streets between the national guard and the troops; the latter lose 500 in killed and wounded, and retreat to the citadel - Nov. 15, 1842

The troops evacuate the citadel, and retire to Montjuich - Nov. 17, 1842  
 The regent Espartero arrives before Barcelona, and demands its unconditional surrender - Nov. 29, 1842  
 Bombardment of Barcelona - Dec. 2, 1842  
 It capitulates - Dec. 4, 1842  
 The disturbances of Malaga - May 25, 1843  
 The revolutionary junta is re-established at Barcelona - June 11, 1843  
 [Coruna, Seville, Burgos, Santiago, and numerous other towns, shortly afterwards "pronounce" against the regent Espartero.]  
 Arrival of Gen. Narvaez at Madrid, which surrenders - July 15, 1843  
 Espartero bombards Seville - July 21, 1843  
 The siege is raised - July 27, 1843  
 [The revolution is completely successful, and Espartero flies to Cadiz, and embarks on board her Majesty's ship *Malabar*.]  
 The new government deprive Espartero of his titles and rank - Aug. 16, 1843  
 Espartero and his suite and friends arrive in London - Aug. 23, 1843  
 Reaction against the new government breaks out at Madrid - Aug. 29, 1843  
 The young queen Isabella II., 13 years old, is declared by the cortes to be of age - Nov. 8, 1843  
 The queen-mother, Christina, returns to Spain - March 23, 1844  
 Don Carlos, from Bourges, formally relinquishes his right to the crown, in favor of his son - May 18, 1845  
 Narvaez and his ministry resign, Feb. 12; they return to power, March 17; and again resign - March 28, 1846  
 The queen is publicly affianced to her cousin, don Francisco d'Assiz, duke of Cadiz - Aug. 27, 1846  
 Escape of Don Carlos and others from France - Sept. 14, 1846  
 Marriage of the queen; and marriage also of the infanta Louisa to the duke de Montpensier - Oct. 10, 1846  
 [The Montpensier marriage occasions the displeasure of England, and disturbs the friendly relations of the French and English governments.]  
 Amnesty granted by the queen to political offenders - Oct. 18, 1846  
 The queen has a son born, who dies the same day - July 1, 1850

## KINGS OF SPAIN.

A. D. 406. Alaric I., king of the Goths; murdered.  
 411. Athalsus; murdered by his soldiers.  
 415. Wallia.  
 420. Theodoric I.; killed in battle.  
 450. Torrismunus, assassinated by his favorite.  
 452. Theodoric II.  
 466. Euric.  
 484. Alaric II.; killed in battle.  
 507. Gesalric; killed in battle.  
 511. Amalaric; killed in battle.  
 531. Theodat; assassinated by a madman.

548. Theodisele; murdered for female violation.  
 549. Agila; taken prisoner and put to death.  
 554. Athanagild.  
 567. From this year to the year 687, sixteen kings reigned.  
 687. Egica or Egiza.  
 697. Vitizza.  
 741. Roderick; killed in battle in An interregnum till  
 718. Pelagius.  
 736. Favila; killed by a boar in hunting.

SPAIN, *continued.*

738. Alphonsus I.; Catholic.  
 757. Froila I.; killed by his brother Aurelius.  
 768. Aurelius.  
 774. Silo.  
 783. Mauregat.  
 789. Veremond.  
 791. Alphonsus II.; the chaste.  
 824. Ramiro I.; he put 70,000 Saracens to the sword in one battle.  
 860. Ordogno I.  
 862. Alphonsus III.; surnamed the great; deposed by his son.  
 910. Garcias.  
 914. Ordogno II.  
 923. Froila II.  
 924. Alphonsus IV.; abdicated.  
 931. Ramiro II., killed in battle.  
 950. Ordogno III.  
 955. Ordogno IV.  
 956. Sancho I., the Fat; poisoned with an apple.  
 967. Ramiro III.  
 982. Veremund II.; the Gouty.  
 999. Alphonsus V.; killed at the siege of Viscu.  
 1028. Veremund III.; killed in battle.  
 1035. Ferdinand the Great, king of Leon and Castile.  
 1065. Sancho II., the Strong, king of Castile; Alphonsus in Leon and Asturias; and Garcias in Galicia.  
 1072. Alphonsus VI., the Valiant; in Castile and Leon.  
 1109. Alphonsus VII.  
 1122. Alphonsus VIII.  
 1157. Sancho III., the Beloved, in Castile; Ferdinand in Leon.  
 1158. Alphonsus IX., in Castile.  
 1214. Henry I.  
 1236. Ferdinand III. the Holy; in him Castile and Leon were reunited, and perpetually annexed.  
 1252. Alphonsus the Wise; deposed.  
 1284. Sancho IV., the Brave; Peter III. in Arragon.  
 1295. Ferdinand IV.  
 1312. Alphonsus X.; John in Arragon.  
 1350. Peter the Cruel; deposed. Reinstated by Edward the Black Prince of England; afterwards beheaded by his subjects.  
 1368. Henry II., the Gracious; poisoned by a monk.  
 1379. John I.; he united Biscay to Castile.  
 1390. Henry III., the Sickly.  
 1406. John II.  
 1454. Henry IV. the Impotent.  
 1474. Ferdinand V., the Catholic, in whom, by his marriage with Isabella, the kingdoms of Castile and Arragon were united.  
 1504. Philip I. of Austria, and his queen Joan.  
 1506. Joan alone over both kingdoms.  
 1516. Charles I., and emperor of Germany, resigned both crowns, and retired to a monastery.  
 1555. Philip II., married Mary, queen-regnant of England.  
 1598. Philip III., son of the preceding; he drove the Moors from Grenada and the adjacent provinces.  
 1621. Philip IV., his son; a reign of nearly continuous and unfortunate wars with the Dutch and France.  
 1665. Charles II.  
 1700. Philip V., duke of Anjou, grandson to Louis XIV. of France; resigned.  
 1724. Lewis I.; who reigned only a few months.  
 1724. Philip V.; again.  
 1745. Ferdinand VI., surnamed the Wise; he distinguished his reign by acts of liberality and beneficence.  
 1759. Charles III., king of the Two Sicilies.  
 1788. Charles IV.; abdicated in favor of his son and successor.  
 1808. Ferdinand VII., whom Napoleon, of France, also forced to resign.  
 1808. Joseph Bonaparte, brother of Napoleon; deposed.  
 1814. Ferdinand VII.; restored; succeeded by his daughter.  
 1833. Isabella II., Sept. 29; who came to the throne when three years of age.

While nearly all the other nations of the world have been at peace, this country, for the last quarter of a century, has been a prey to the most deplorable commotions, and almost continuous and destructive civil war. From the death of Ferdinand, the intrigues of Christina, the queen-mother, and the parties in her interest, have led to successive revolutions in the state, and caused, in 1840, her own abdication of the regency, and expulsion from the kingdom.

SPANISH ARMADA AGAINST ENGLAND. See article *Armada*.

SPARTA. The capital of Laconia, one of the most considerable republics of the Peloponnesus, and the formidable rival of Athens. Though without walls, it resisted the attacks of its enemies by the valor of its citizens, for eight centuries. The epoch of its foundation is much disputed. Lelex is supposed to have been the first king, 1516 B. C. From Lacedæmon the fourth king, and his wife Sparta, who are also spoken of as the founders of the city, it obtained the names by which it was most known. The history of Lacedæmon may be divided into five eras, viz., 1st. Under the ancient kings, from Lelex to the settlement of the Heraclidæ, comprising about four hun-

dred and twelve years. 2d. Under the Heraclidæ as absolute monarchs, till Lycurgus instituted a senate, by which the people obtained a share in the government, including about two hundred and twenty years. 3d. From the establishment of the senate, to the introduction of ephori, or five inspectors by Theopompus, about one hundred and twenty-four years. 4th. From the appointment of the ephori, to the total abolition of royalty, about five hundred and forty years. 5th. From the abolition of the monarchy, to the subjugation of the country to the Roman power, a period of about seventy-two years, 147 B. C.—*Abbé Lenglet*. See *Tabular Views: Greece*, page 7, *et seq.* See also *Greece*. The Lacedæmonians were a nation of soldiers. They cultivated neither the arts, sciences, commerce, nor agriculture. All their laws, all their institutions, all their education, in a word, the very constitution of their republic, were calculated to make them warriors. And never were men brought into the field more capable of enduring fatigue. They hardened their bodies by stripes, and by manly exercises, accustoming themselves to undergo hardships, and even to die without fear or regret. The women were as courageous as the men, and celebrated with festivals the fall of their sons, when killed in battle, or coolly put them to death with their own hands, if by a shameful flight, or the loss of their arms, they brought disgrace upon their country.—*Abbé Lenglet*.

**SPECTACLES AND READING-GLASSES.** See *Optics*. Spectacles were unknown to the ancients. They are generally supposed to have been invented in the 13th century, by Alexander de Spina, a monk of Florence, in Italy, about A. D. 1285.—*Gen. Hist.* They were invented by Roger Bacon, our own illustrious countryman, according to Dr. Plott. The hint was certainly given by Bacon about 1280. Some affirm that the real inventor was Salvino; and Mr. Manni gives proofs in favor of Salvino in his *Treatise on Spectacles*.

**SPHERES.** The celestial and terrestrial globes, and also sun-dials, were invented by Anaximander, 552 B. C. The armillary sphere is said to have been invented by Eratosthenes about 255 B. C. The planetarium was constructed by Archimedes before 212 B. C. It was maintained by Pythagoras that the motions of the twelve spheres must produce delightful sounds, inaudible to the ears of mortals, which he called the music of the spheres.

**SPINNING.** The art of spinning was ascribed by the ancients to Minerva, the goddess of wisdom, such was their veneration for it. Arcas, king of Arcadia, taught his subjects the art of spinning about 1500 B. C. Lucretia with her maids was found spinning, when her husband Collatinus paid a visit to her from the camp. The wife of Tarquin was an excellent spinner; and a garment made by her, worn by Servius Tullius, was preserved in the temple of Fortune. Augustus Cæsar usually wore no garments but such as were made by his wife, sister, or daughter. The spinning-wheel was invented at Brunswick, about A. D. 1530. Till 1767, the spinning of cotton was performed by the hand-spinning-wheel, when Hargrave, an ingenious mechanic, near Blackburn, made a spinning-jenny, with eight spindles. Hargrave also erected the first carding-machine, with cylinders. Arkwright's machine for spinning by water was an extension of the principle of Hargrave's; but he also applied a large and small roller to expand the thread, and, for this ingenious contrivance, took out a patent in 1769. At first, he worked his machinery by horses; but in 1771 he built a mill on the stream of the Derwent, at Cromford. In 1779, Crompton invented the mule, which is a further and wonderful improvement of this art.—*P allips*.

**SPIRES.** In ancient times the emperors held many diets at Spires, and it was the seat of the imperial chamber till 1689, when the city was burnt by the French, and not rebuilt till after the peace of Ryswick in 1697. The diet to

condemn the reformers was held at Spire, called there by the emperor Charles V., 1529. This was the era of Protestantism. See *Protestants*.

**SPIRITS.** See *Distillation*. No human invention has ever tended more to corrupt the morals, and ruin the character, constitution, and circumstances of numbers of mankind, than distillation. In all nations spirituous liquors have been considered as a proper subject of heavy taxation for the support of the state. In 1840, England made about ten millions of gallons of spirits, Scotland made about seven millions of gallons, and Ireland about nine millions of gallons. In England, Ireland, and Scotland, duty was paid, in 1840, on the following quantities of spirits, viz.—Rum, 2,830,263 gallons; brandy, 1,167,756 gallons; Geneva, 18,640 gallons; on other foreign spirits, 8,758 gallons; and on British, Irish, and Scotch spirits, 25,190,843 gallons; making in the whole nearly thirty millions of gallons, upon which the duty amounted to about eight millions of pounds sterling!—*Parl. Returns*.

**SPITZBERGEN.** Discovered in 1533, by sir Hugh Willoughby, who called it Greenland, supposing it to be a part of the western continent. In 1595, it was visited by Barentz and Cornelius, two Dutchmen, who pretended to be the original discoverers, and called it Spitzbergen, or sharp mountains, from the many sharp-pointed and rocky mountains with which it abounds.

**STAMP-DUTIES IN ENGLAND.** The first institution of stamp-duties was by statute 5 and 6 William and Mary, June 23, 1694, when a duty was imposed upon paper, vellum, and parchment. The stamp-duty on newspapers was commenced in 1713, and every year added to the list of articles upon which stamp-duty was made payable. The American Stamp Act, a memorable statute, one of those imposts levied by the parliament of Great Britain which produced the American war, and led to the independence of the United States, was passed March 22, 1765. Stamp-duties in Ireland commenced 1774. Stamps on notes and bills of exchange in 1782. The stamp-duties produced in England, in 1800, the revenue of 3,126,535*l.*; and in 1840, for the United Kingdom, 6,726,817*l.* See *Newspapers, &c.*

**STANDARDS.** See *Banners, Flags, &c.* The practice in the army of using the cross on standards and shields arose in the miraculous appearance of a cross to Constantine, previously to his battle with Maxentius: this fact rests on the authority of Eusebius, who states that he had received it from the emperor himself, A. D. 312. For the celebrated French standard, see *Lily*. **STANDARD OF MAHOMET;** on this ensign no infidel dare look. It was carried in procession about 1768, when several hundred Christians who ignorantly looked upon it, were massacred by the Turkish populace. The **IMPERIAL STANDARD** was first hoisted on the Tower of London, and on Bedford Tower, Dublin, and displayed by the Foot Guards, on the union of the kingdoms, Jan. 1, 1801.

**STAR-CHAMBER, COURT OF.** So called haply from its roof being garnished with stars.—*Coke*. This court of justice, so tremendous in the Tudor and part of the Stuart reigns, was called Star-chamber, not from the *stars* on its roof (which were obliterated even before the reign of queen Elizabeth) but from the *Starra*, or Jewish covenants, deposited there by order of Richard I. No *Star* was allowed to be valid except found in those repositories, and here they remained till the banishment of the Jews by Edward I. The court was instituted 2 Henry VII. 1487, for trials by a committee of the privy council. In Charles I.'s reign, it exercised its power, independent of any law, upon several bold innovators in liberty, who only gloried in their sufferings, and contributed to render government odious and contemptible.—*Goldsmith*. It was abolished 16 Charles I., 1641. There were

from 26 to 42 judges, the lord-chancellor having the casting voice.—*Gibbon*.

**STARS.** They were classed into constellations, it is supposed, about 1200 B. C. Hicetas, of Syracuse, taught that the sun and the stars were motionless, and that the earth moved round them (this is mentioned by Cicero, and probably gave the first hint of this system to Copernicus), about 344 A. C. Job, Hesiod, and Homer, mention several of the constellations. The Royal Library at Paris contains a Chinese chart of the heavens, made about 600 B. C., in which 1460 stars are correctly inserted. The aberration of the stars discovered by Dr. Bradley, 1727. See *Astronomy* and *Solar System*.

**STATES-GENERAL OF FRANCE.** An ancient assembly of France. Previously to the Revolution it had not met since A. D. 1614. The states consisted of three orders, the nobility, clergy, and commons. They were convened by Louis XVI., and assembled at Versailles, May 5, 1789. Here a contest arose, whether the three orders should make three distinct houses, or but one assembly. The commons insisted upon the latter, and, assuming the title of the National Assembly, declared that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to concede the point, and they all met in one hall. See *National Assembly*.

**STATIONERS.** Books and paper were formerly sold only at stalls, hence the dealers were called stationers. The company of stationers of London is of great antiquity, and existed long before printing was invented; yet it was not incorporated until 3 Philip and Mary, 1555. Their old dwelling was in Paternoster-row.—*Mortimer*.

**STATUES.** See *Moulds, Sculpture, &c.* Phidias, whose statue of Jupiter passed for one of the wonders of the world, was the greatest statuary among the ancients, 440 B. C. He had previously made a statue of Minerva at the request of Pericles, which was placed in the Parthenon. It was made with ivory and gold, and measured 39 feet in height. Acilius raised a golden statue to his father, the first that appeared in Italy. Lysippus invented the art of taking likenesses in plaster moulds, from which he afterwards cast models in wax, 326 B. C. Michael Angelo was the greatest artist among the moderns. The first equestrian statute erected in Great Britain was that of Charles I. in 1678.

**STEAM ENGINE.** This is the most important prime mover that the ingenuity of man has yet devised. The first idea of it was suggested by the marquis of Worcester in his *Century of Inventions*, as "a way to drive up water by fire," A. D. 1663. It does not, however, appear that the noble inventor could ever interest the public in favor of this great discovery.

|                                                                                                      |            |                                                                                            |        |

| Thomas Paine proposed the application of steam in America                                            | 1778       | First steam-engine erected in Dublin by Henry Jackson                                      | 1791   |
| Engine made to give a rotary motion                                                                  | 1778       | Jouffroy's experiments in France                                                           | 1792   |

STEAM ENGINE, *continued.*

Chancellor Livingston builds a steamer  
on the Hudson . . . . . 1797  
First experiment on the Thames . . . . . 1801  
The experiment of Mr. Symington re-  
peated with success . . . . . 1802  
Trevethick's high-pressure engine . . . . . 1802  
Oliver Evans' experiments in locomotive  
engines in Penn. . . . . 1804  
Woolf's double cylinder expansion en-  
gine constructed . . . . . 1804  
Manufactories warmed by steam . . . . . 1806  
Fulton started a steam-boat on the river  
Hudson, built by himself, and named  
"The North River;" engine by Boul-  
ton and Watt; passage to Albany in 33  
hours: FIRST STEAM NAVIGATION ON  
record . . . . . 1807  
The next three steam-boats in the world  
were the *Car of Neptune*, . . . . . 1808  
The *Paragon* . . . . . 1811  
The *Richmond* . . . . . 1812  
all in New York.  
Steam power to convey coals on a rail-  
way, employed by Blenkinsop . . . . . 1811  
Steam vessels first commenced plying  
on the Clyde (FIRST IN EUROPE) . . . . . 1812

Steam applied to printing in the *Times*  
office. See *Press* . . . . . 1814  
There were five steam vessels in Scot-  
land (*Parl. Returns*) in . . . . . 1813  
First steam vessel on the Thames  
brought by Mr. Dodd, from Glasgow 1815  
The first steamer built in England (*Parl.*  
*Returns*) . . . . . 1815  
The *Savannah* steamer, of 350 tons,  
went from New York to Liverpool  
in 26 days . . . . . July 15, 1819  
First steamer in Ireland . . . . . 1820  
Captain Johnson obtained 10,000*l.* for  
making the first steam voyage to In-  
dia, in the *Enterprise*, which sailed  
from Falmouth . . . . . Aug. 16, 1825  
Locomotive steam carriages on rail-  
ways, at Liverpool . . . . . Oct. 1829  
The Railway opened (see *Liverpool*) . . . . . 1830  
The *Great Western* arrives from Bris-  
tol at New York, and the *Sirius* from  
Cork, same day, being their first voy-  
age, in 18 days . . . . . June 17, 1833  
War steamers built in England . . . . . 1838  
First steamer of the Cunard line was  
the *Britannia* to Boston; after a pas-  
sage of 14 ds. 8 hrs., arrived July 18, 1840

**STEAM BOATS IN THE UNITED STATES.** In 1838 returns from 23 States gave an aggregate of 700 vessels—whole tonnage, 153,660 tons; but these returns were not complete. The increase from 1838 to 1850 was very great: probably there are, in 1850, at least 1500 vessels, with an aggregate of 300,000 tons. The first American ocean steamer of any note was the *Washington*, which made her first passage to Southampton in June 1847. The whole number of steam-boats, locomotive and stationary engines, in the United States, in 1838, was 3,010.

## STEAM VESSELS OF THE BRITISH EMPIRE.

STEAM VESSELS BELONGING TO THE BRITISH EMPIRE AT THE FOLLOWING PERIODS;

| Year.          | England. | Scotland. | Ireland. | Dependencies. | Total. |
|----------------|----------|-----------|----------|---------------|--------|
| 1814 . . . . . | 0        | 5         | 0        | 1             | 6      |
| 1815 . . . . . | 3        | 5         | 0        | 2             | 10     |
| 1820 . . . . . | 17       | 14        | 3        | 9             | 43     |
| 1825 . . . . . | 112      | 36        | 3        | 17            | 168    |
| 1830 . . . . . | 203      | 61        | 31       | 20            | 315    |
| 1835 . . . . . | 344      | 85        | 68       | 48            | 545    |
| 1845 . . . . . | 694      | 139       | 79       | 89            | 1001   |

**STEEL-YARD.** A most ancient instrument, the same that is translated *ba-lance* in the Pentateuch. The *Statara Romana*, or Roman steel-yard, is mentioned in 315 B. C.

**STENOGRAPHY.** The art of writing in short-hand is said to have been practised by most of the ancient nations. It is said to have followed from the hieroglyphics of the Egyptians. It is also attributed to the poet Ennius, improved upon by Tyro, Cicero's freed-man, and still more by Seneca. The *Ars Scribendi Characteris*, printed about A. D. 1412, is the oldest system extant. Peter Bales, the famous penman, published on stenography in 1590. There are now numerous systems of it, many of them of easy acquirement and great simplicity.

**STEREOMETRY.** The instrument by which is compassed the art of taking the contents of vessels of liquids by gauging, invented about A. D. 1350.—*Anderson.*

**STEREOTYPE.** See *Printing*. It is said that stereotyping was known in 1711; but this is doubted. It is said to have been suggested by Wm. Ged

of Edinburgh, 1735.—*Nichols*. This species of printing is ascribed by others to Mr. Tilloch, 1779. The invention of it is also attributed to Francis Ambrose Didot, of Paris, about that year.—*Ferguson*. But stereotype printing was in use in Holland, in the last century; and a quarto Bible and Dutch folio Bible were printed there.—*Phillips*. Stereotyping was introduced into London, by Wilson, in 1804.—*Idem*.

**STEREOTYPING.** The foregoing is from Haydn. But this art is said to have been invented by Cadwallader Colden of New York, who sent the details of his plan in 1779 to Dr. Franklin, then in Paris. Franklin communicated the plan to Didot, the famous printer, and Herbau, a German, who had been an assistant of Didot, took it up in opposition to Didot. It is affirmed, on good authority, that Herbau's method of stereotyping is precisely similar to that which Colden invented. Stereotyping was first actually practised in New York in 1813, when John Watts stereotyped the Larger Catechism. In June 1815 the Bruces of New York stereotyped a duodecimo Bible.—*Dr. J. W. Francis*.

**STOCKINGS.** Those of silk were first worn by Henry II. of France, 1547. In 1560, queen Elizabeth was presented with a pair of black knit silk stockings, by her silk-woman, Mrs. Montague, and she never wore cloth ones any more.—*Howell*. He adds, "Henry VIII. wore ordinarily cloth hose, except there came from Spain, by great chance, a pair of silk stockings; for Spain very early abounded with silk." Edward VI. was presented with a pair of Spanish silk stockings by his merchant, sir Thomas Gresham; and the present was then much taken notice of.—*Idem*. Others relate that William Rider, a London apprentice, seeing at the house of an Italian merchant, a pair of knit worsted stockings from Mantua, ingeniously made a pair like them, which he presented to the earl of Pembroke, the first of the kind made in England, 1564.—*Stowe*.

**STOCKS.** The public funding system originated in Venice, and was introduced into Florence in 1340. The English funding system may be said to have had its rise in 1694. The number of stockholders in 1840 amounted to 337,481. By a return of the average price of the public funds by the commissioners for the reduction of the national debt, it appears that *Consols* averaged in the year—

See *Public Debt*.

**STOICS.** Disciples of Zeno, the cynic philosopher; they obtained the name of stoics because they listened to his instructions and harangues in a porch or portico at Athens, called in Greek *Stoa*. Zeno taught that man's supreme happiness consisted in living according and agreeable to nature and reason, and that God was the soul of the world. The Pharisees affected the same stiffness, patience, apathy, austerity, and insensibility, which this sect is famous for.—*Stanley*.

**STONE.** Stone buildings were introduced into England, A. D. 670. A stone bridge was built at Bow in 1087, and is accounted the first; but a bridge exists at Crowland, which is said to have been built in 860. See *Bridges*. The first stone building in Ireland was a castle, 1161. See *Building*. Stone china-ware was made by Wedgwood in 1762. Artificial stone for statues was manufactured by a Neapolitan, and introduced into England, 1776. Stone paper was made in 1796.

**STONEHENGE.** Among the most celebrated monuments of British antiquity. Said to have been erected on the counsel of Merlin by Aurelius Ambrosius, in memory of 460 Britons who were murdered by Hengist, the Saxon, A. D.

475.—*Geoffrey of Monmouth*. Erected as a sepulchral monument of Ambrosius, A. D. 500.—*Polydore Vergil*. An ancient temple of the Britons, in which the Druids officiated.—*Dr. Stukeley*. The Britons had annual meetings at Abury and Stonehenge, where laws were made, and justice administered, and heinous crimes punished, by burning alive in wicker-baskets.

**STORMS.** The following are among the best authenticated and most memorable. In London a storm raged which destroyed 1500 houses, A. D. 944. One in several parts of England, the sky being very dark, the wind coming from the S.W.; many churches were destroyed; and in London 500 houses fell, October 5, 1091. One on the coast of Calais, when Hugh de Beauvais, and several thousand foreigners, on their voyage to assist king John against the barons, perished, 1215.—*Holinshed*.

It thundered 15 days successively, with tempests of rain and wind, A. D. 1233.

A storm with violent lightnings; one flash passed through a chamber where Edward I. and his queen were conversing, did them no damage, but killed two of their attendants: 1285.—*Hoveden*.

A violent storm of hail near Chartres, in France, which fell on the army of Edward III., then on its march. The hail was so large that the army and horses suffered very much, and Edward was obliged to conclude a peace, 1339.—*Matt. Paris*.

When Richard II.'s queen came from Bohemia, on setting foot on shore an awful storm arose, and her ship and a number of others were dashed to pieces in the harbor, Jan. 1382.—*Holinshed*.

Richard's second queen also brought a storm with her to the English coasts, in which the king's baggage was lost, and many ships cast away, 1389.—*Idem*.

A hurricane throughout Europe, which did very considerable damage; more remarked in England, happening Sept. 3, 1658, the day that Cromwell died.—*Mortimer*.

A storm on the eastern coasts of England; 200 colliers and coasters lost, with most of their crews, 1696.

The storm called the "Great Storm," one of the most terrible that ever raged in England. The devastation on land was immense; and in the harbors, and on the coasts, the loss in shipping and in lives was still greater, Nov. 26, 1703.\*

A snow storm in Sweden, when 7000 Swedes, it is said, perished upon the mountains, in their march to attack Drontheim, A. D. 1719.

One in India, when many hundreds of vessels were cast away, a fleet of Indian

greatly damaged, and some ships lost, and 30,000 persons perished, Oct. 11, 1737.

A dreadful hurricane at the Havana; many public edifices and 4043 houses were destroyed, and 1000 inhabitants perished, Oct. 25, 1768.—*Annual Register*.

An awful storm in the north of England, in which many vessels were destroyed, and 4 Dublin packets foundered, Oct. 29, 1775. At Surat, in the East Indies; destroyed 7000 of the inhabitants, April 22, 1782.

One hundred and thirty-one villages and farms laid waste in France, 1785.

A dreadful hurricane, which ravaged the Leeward Islands, from 20th to 22d Sept. 1819. At the Island of St. Thomas alone, 104 vessels were lost.

At Gibraltar, where more than a hundred vessels were destroyed, Feb. 18, 1828.

Awful hurricane on the western coast of England, and in Ireland. The storm raged through Cheshire, Staffordshire, and Warwickshire; 20 persons were killed in Liverpool, by the falling of buildings, and 100 were drowned in the neighborhood; the coast and harbors were covered with wrecks; the value of two of the vessels lost being nearly half a million sterling. In Limerick, Galway, Athlone, and other places, more than 200 houses were blown down, and as many more were burnt, the wind spreading the fires. Dublin suffered dreadfully; London and its neighborhood scarcely sustained any damage, Jan. 6-7, 1839.

Hurricane at Havana, 92 vessels sunk, 1275 houses destroyed, and 1038 injured, Oct. 10-11, 1846.

Hurricane at Antigua, St. Thomas, &c. Aug. 21, 1848.

**STOVES.** The ancients used stoves which concealed the fire, as the German stoves yet do. They lighted the fire also in a large tube in the middle of

---

\* The loss sustained in London alone was calculated at 2,000,000*l.* sterling. The number of persons drowned in the floods of the Severn and Thames, and lost on the coast of Holland, and in ships blown from their anchors and never heard of afterwards, is thought to have been 8000. Twelve men-of-war, with more than 1800 men on board, were lost within sight of their own shore. Trees were torn up by the roots, 17,000 of them in Kent alone. The Eddystone light-house was destroyed, and in it the ingenious contriver of it, Winstanley, and the persons who were with him. The bishop of Bath and Wells and his lady were killed in bed in their palace, in Somersetshire. Multitudes of cattle were also lost; in one level 15,000 sheep were drowned.

the room, the roof being open. Apartments were warmed too by portable braziers. See *Chimneys*.

**STRASBURG.** The attempt at insurrection in the city of Strasburg, by Louis-Napoleon Bonaparte, a nephew of the deceased emperor, aided by two officers and some privates, which was instantly suppressed by the arrest of the parties. The prince was afterwards shipped off to America by the French government, Oct. 29, 1836. This enthusiast made another attempt, by a descent at Boulogne, Aug. 6, 1840. See *France*.

**STRATTON-HILL, BATTLE OF,** in Devonshire, between the royal army and the forces of the parliament, headed by the poet Waller; in this battle the victory was gained over the parliamentarians, who lost numbers in killed and wounded, and Waller was obliged to fly to Bristol; fought May 16, 1643.

**STUCCO-WORK.** The art was known to the ancients, and was much prized by them, particularly by the Romans, who excelled in it.—*Abbé Lenglet*. It was revived by D Udine about A. D. 1550; and is now exquisitely performed in Italy and France, and is advancing rapidly to perfection in England.

**STYLE.** The style was altered by Augustus Cæsar's ordering leap-year to be but once in four years, and the month Sextillis to be called Augustus, 8 B.C. Again at Rome, by taking twelve days off the calendar, A. D. 1582. See *Calendar*. Introduced into most of the other states of Europe, 1710. Act passed to change the style in England from the Julian to the Gregorian, 1751. It took effect Sept. 3, 1752. See *New Style* and *Year*.

**STYLE, ROYAL, OF THE KINGS OF ENGLAND.** See articles *Majesty* and *Titles*.

**SUBSIDIES.** Subsidies to the kings of England formerly granted in kind, particularly in wool; 30,000 sacks were voted to Edward III. on account of the war with France, 1340.—*Anderson*. Subsidies raised upon the subjects of England for the last time by James I., 1624, but they were contained in a bill for the redress of grievances, 1639. England granted subsidies to foreign powers in several wars, particularly in the war against the revolutionists of France, and the war against Bonaparte. One of the most remarkable of these latter was June 20, 1800, when a treaty of subsidies was ratified at Vienna, between Austria and England, stipulating that the war should be vigorously prosecuted against France, and that neither of the contracting powers should enter into a separate peace. Subsidies to Austria, Prussia, Russia, the Porte, and other powers, were afterwards given by England, to the amount of many tens of millions sterling.—*Phillips*.

**SUB-TREASURY.** Bill providing for the safe keeping of the moneys belonging to the United States, passed the Senate by 24 to 18, Jan. 23, 1840; repealed Aug. 9, 1841. Re-enacted in a new form, 184—.

**SUCCESSION, ACT OF.** The memorable act to exclude Roman Catholics from ascending the throne of Great Britain was passed in 1689; and the crown of England was settled upon the present royal family by the act of June 12, 1701.

**SUCCESSION, THE WAR OF.** This celebrated war, alike distinguished by the glorious achievements of the duke of Marlborough and its barren and unprofitable results, arose in the question whether an Austrian or a French prince, grandson of Louis XIV., should succeed to the throne of Spain. Our court opposed Louis, and Marlborough was victorious; but the allies withdrew, one after another, and the French prince succeeded; 1702 to 1713. See *Utrecht, Peace of*.

**SUGAR, *Saccharum officinarum*.** Sugar is supposed to have been known to the

ancient Jews. Found in the East Indies by Nearchus, admiral of Alexander, 325 B. C.—*Strabo*. An oriental nation in alliance with Pompey used the juice of the cane as a common beverage.—*Lucan*. The best sugar was produced in India.—*Pliny*. It was prescribed as a medicine by Galen.—*Encyclop*. Brought into Europe from Asia, A. D. 625. In large quantities, 1150. It was attempted to be cultivated in Italy; but not succeeding, the Portuguese and Spaniards carried it to America about 1510.—*Robertson's History of Charles V.*\*

**SUGAR-REFINING.** The art of refining sugar was made known to the Europeans by a Venetian, A. D. 1503. It was first practised in England in 1659, though some authorities say that we had the art among us a few years sooner. Sugar was first taxed by name, 1 James II., 1685.—*Anderson*; *Mortimer*. See *Beet Root*.

**SUICIDE.** The first instance of it (passing that of Samson) recorded in Jewish history is that of Saul, 1055 B. C.—*Apollodorus*. The Greek and Roman philosophers deemed it a crime, and burned the offending hand apart from the rest of the body. In the early part of the Roman history, the only instance recorded occurs in the reign of Tarquin I., when the soldiers, thinking themselves disgraced by being ordered to make common sewers, destroyed themselves, 606 B. C. Instances afterwards occurred, however, of illustrious men committing suicide, as Cato, 45 B. C. In the Catholic church, in the sixth century, it was ordained that no commemoration should be made in the Eucharist for such as committed self-murder. This ecclesiastical law continued till the Reformation, when it was admitted into the statute law of England by the authority of parliament, with the confiscation of land and goods.

A FEW OF THE MOST MEMORABLE RECENT CASES OF SUICIDE IN ENGLAND, &C.

|                              |                 |                                |                  |

| Of hon. colonel Stanhope     | - Jan. 26, 1825 |                                |                  |

There have been only three instances of self-destruction by fire; that of the philosopher Empedocles, who threw himself into the crater of Mount Etna; of a Frenchman, who, in imitation of him, threw himself, in 1820, into the crater of Vesuvius; and of an Englishman, who jumped into the furnace of a forge about the year 1811. Plutarch relates that an unaccountable passion for suicide seized the Milesian virgins, from which they could not be prevented by the tears and prayers of their friends; but a decree being issued that the body of every young maid who did self-murder should be drawn naked through the streets, a stop was soon put to the extraordinary frenzy. In England, the body was buried in cross-roads, a stake being previously driven through it, until the statute 4 George IV., 1823.

**SULTAN.** A Turkish title, from the Arabic, signifying *king of kings*, and given to the grand signior or emperor of Turkey. It was first given to the Turkish princes Angrolipex and Musgad, about A. D. 1055.—*Vattier*. It

\* About the year 1138 the sugar-cane was transported from Tripoli and Syria to Sicily, thence to Madeira, and finally to the West Indies and America. It is not known at what date sugar was introduced into England, but it seems to have been prior to the reign of Henry VIII. Mr. Whitaker, in the History of Whalley, p. 109, quotes an earlier instance, in 1497. A manuscript letter, from sir Edward Wotton to lord Cobham, dated Calais, 6th March, 1546, advertises him that sir Edward had taken up for his lordship, 25 sugar loaves at six shillings a loaf, "whiche is eight pence a pounce." In 1840, the imports of sugar into the United Kingdom were nearly 5,000,000 cwts., of which nearly four millions were for home consumption; and the duty amounted to about five millions and a half sterling.

was first given, according to others, to the emperor Mahmoud, in the fourth century of the Hegira.

**SUMMATRA, ISLAND OF.** The Malays at Qualla Battoo having committed piracies on American vessels, the town was destroyed by the United States frigate Potomac, and 150 Malays killed, Feb. 6, 1832.

**SUMPTUARY LAWS.** Laws to restrain excess in dress, furniture, eating, &c. Those of Zaleucus ordained that no woman should go attended by more than one maid in the street, unless she were drunk; and that she should not wear gold or embroidered apparel, unless she designed to act unchastely, 450 B. C.—*Diog. Laert.* This law checked luxury. The *Lex Orchia* among the Romans limited the guests at feasts, and the number and quality of the dishes at an entertainment; and it also enforced that during supper, which was the chief meal among the Romans, the doors of every house should be left open. The English sumptuary laws were chiefly in the reigns of Edward III. and Henry VIII. See *Dress, Luxury, &c.*

**SUN.** Pythagoras taught that the sun was one of the twelve spheres, about 529 B. C. The relative distances of the sun and moon were first calculated geometrically by Aristarchus, who also maintained the stability of the sun, about 280 B. C. Numerous theories were ventured during fifteen centuries, and astronomy lay neglected until about A. D. 1200, when it was brought into Europe by the Moors of Barbary and Spain. The Copernican system was made known in 1530. See *Copernican System and Solar System.* Galileo and Newton maintained that the sun was an igneous globe. Maculæ were first discovered by Chr. Scheiner, 1611. Transit of Mercury observed by Gassendi. By the observations of Dr. Halley on a spot which darkened the sun's disk in July and August, 1676, he established the certainty of its motion round its own axis. Parallax of the sun, Dr. Halley, 1702. A macula, three times the size of the earth, passed the sun's centre, April 21, 1766, and frequently since. Herschel measured two spots whose length taken together exceeded 50,000 miles, April 19, 1779.

**SUN-DIALS.** Invented by Anaximander, 550 B. C.—*Pliny*, 1, 2. The first erected at Rome was that by Papirius Cursor, when the time was divided into hours, 293 B. C. Sun-dials were first set up in churches, A. D. 613.—*Abbé Lenglet.*

**SUNDAY, or LORD'S DAY.** Sunday was the day on which, anciently, divine adoration was paid to the Sun. Among Christians it is called the Lord's day, on account of our Saviour's rising from the dead on that day, which, according to the Jewish account, was the next day after the sabbath. The apostles transferred that religious rest observed by the Jews on the sabbath to this day. The first civil law for its proper observance was made by Constantine, A. D. 321.—*Eusebius.* The council of Orleans prohibited country labor, 338. The *Book of Innocent Sunday Sports*, authorizing certain sports and pastimes after divine service on Sundays, published in England 14 James I. in 1617, was violently opposed by the clergy and puritans. Its sanction by the unfortunate Charles I. was a primary cause of the civil war which ended in his death. This book was burnt by the hangman, and the sports suppressed by order of parliament.—*Rapin.* Sunday schools were established in England first by Mr. Raikes in 1780. Act of parliament closing all the post-offices on Sunday passed May 1850.

**SUPREMACY OVER THE CHURCH.** The supremacy of the king over the church as well as sovereignty over the state, whereby the king was made head of the church of England, was established in 1534, when Henry VIII. shook off the yoke of Rome, and settled the supremacy in himself. Our kings have from that time had the title of supreme head of the church conferred upon them by parliament. The bishop of Rochester (Fisher) and

the ex-lord chancellor (sir Thomas More) were, among numerous others, beheaded for denying the king's supremacy, 1535.—*Haydn*.

**SURGERY.** It was not until the age of Hippocrates that diseases were made a separate study from philosophy, &c., about 410 B. C. Hippocrates mentions the *ambe*, the ancient instrument with which they reduced dislocated bones. Celsus flourished about A. D. 17; Galen, 170; Ætius, 500; Paulus Ægineta, in 640. The Arabians revived surgery about 900; and in the 16th century sprung up a new era in the science; between these periods surgery was confined to ignorant priests or barbers. Anatomy was cultivated under the illustrious Vesalius, the father of modern surgery, in 1538. In England surgeons and doctors were exempted from bearing arms or serving on juries, 1513, at which period there were only thirteen in London.

**SURGEONS, COLLEGE OF.** The first charter for surgeons was granted by Henry VIII., 1540. Formerly barbers and surgeons were united, until it was enacted that "no person using any shaving or barbering in London shall occupy any surgery, letting of blood, or other matter, excepting only the drawing of teeth." The surgeons obtained another charter in 1745; and a new charter in 1800.

**SURPLICES.** First worn by the Pagan priests. First used in churches, A. D. 316, and generally introduced by pope Adrian, 786. Every minister saying public prayers shall wear a comely surplice with sleeves, *Can.* 58. The garb prescribed by Stat. 2 Edward VI., 1547; and again 1 Elizabeth, 1558; and 13 and 14 Charles II., 1662.

**SUSPENSION BRIDGES.** The greatest and oldest in the world is in China, near King-tung; it is formed of chains. Rope suspension bridges, from rocks to rocks, are also of Chinese origin. In these realms chain suspension bridges are of recent construction. The bridge over the Menai Strait is the most surprising work, every way considered, of modern times.

**SUTTEES, OR THE BURNING OF WIDOWS.** This custom began in India from one of the wives of "Bramah, the son of God," sacrificing herself at his death, that she might attend him in heaven. So many as seventeen widows have burned themselves on the funeral pile of a rajah; and in Bengal alone, 700 have thus perished, until lately, in each year. Mr. Holwell was present at many of these sacrifices. On February 4, 1743, he saw a young and beautiful creature, only seventeen years of age, the mother of two children, thus sacrifice herself, with a fortitude and courage that astonished every witness of the scene.—*Holwell*. The English government in India have discouraged these self-immolations, while yet avoiding any undue interference with the religion and prejudices of the natives. Suttees were abolished by English colonial law, Dec. 7, 1829; but they have since occasionally, though rarely, taken place.

**SWEARING ON THE GOSPEL.** First used A. D. 528. Introduced in judicial proceedings about 600.—*Rapin*. PROFANE SWEARING made punishable by fine; a laborer or servant forfeiting 1s., others 2s. for the first offence; for the second offence, 4s.; the third offence, 6s.; 6 William III., 1695. See *Oaths*.

**SWEDEN.** The ancient inhabitants were the Fins, now the modern inhabitants of Finland, a diminutive race, who retired to their present territory on the appearance of the Scandinavians or Goths, who have ever since been masters of the country.

Gylf reigns in Sweden - - - B.C. 57

| 1699 Charles XII.; killed at the siege of Frederickshall.    | 1771 Gustavus III., Adolphus.               |
| 1718 Ulrica Eleanora; resigned when her husband was elected. | 1792 Gustavus Adolphus IV.                  |
| 1720 Frederick, landgrave of Hesse-Cassel.                   | 1809 Charles XIII.                          |
| 1751 Adolphus Frederick, duke of Holstein.                   | 1818 Charles John XIV., Bernadotte, Feb. 5. |
|                                                              | 1844 Oscar, his son, March 8.               |

**SWEDENBORGIANS.** A sect of mystics, so called from the learned but eccentric Emanuel Swedenborg, a Swedish nobleman. He considered the New Jerusalem, foretold in the Apocalypse, to be a church now about to be established, in which will be known the true nature of God and of man, of the Word, of heaven and of hell—concerning all which subjects error and ignorance now prevail, and in which church this knowledge will bear its proper fruits—love to the Lord and to one's neighbor, and purity of life. His first work on theology was published in 1743; his sect rose about 1760, but it did not spread in England until 1782. His doctrines have a considerable number of respectable advocates in the United States.

**SWITZERLAND.** The ancient Helvetians were a Gaulish people, conquered by Julius Cæsar, and afterwards subject to the Burgundians and Germans. Many Franks also settled here in the early ages. The canton of Schweitz was peopled by the Cimbrians, who, leaving their original habitation in Scandinavia, invaded Italy, and were defeated by the Roman general Marius; after which they fled into Helvetia, about 100 b. c. This canton has given name to the whole confederacy.

| A malignant fever carries off, in the canton of Basle, 11,000 souls                                                         | - 1314         | Swiss guards ordered to quit France                                                                                                                              | - 1792          |
| Form of government made perpetual                                                                                           | - 1315         | Helvetic confederation dissolved; its subjugation by France                                                                                                      | - 1798          |
| Lucerne joins the confederacy                                                                                               | - 1335         | The number of cantons increased to 19; the federal government restored; and a landamman appointed by France,                                                     |                 |
| The canton of Zurich joins, and becomes head of the league                                                                  | - 1350         | May 12, 1802                                                                                                                                                     |                 |
| Berne, Glaris, and Zug join                                                                                                 | - 1351         | Uri, Schweitz, and Underwald separate from the republic                                                                                                          | - July 13, 1802 |
| The Grisons league (see <i>Caddee</i> )                                                                                     | - 1400         | Switzerland joins France with 6,000 men                                                                                                                          | - Aug. 24, 1811 |
| Second league of the Grisons                                                                                                | - 1424         | The Allies entered Switzerland in the spring of 1814. The number of cantons increased to 22, and the independence of Switzerland secured by the treaty of Vienna | - 1815          |
| The third league of the Grisons                                                                                             | - 1436         | Federal diet opened                                                                                                                                              | - Oct. 16, 1847 |
| Swiss soldiers first enter into the pay of France, under Louis XI.                                                          | - 1480         | — passes resolves against the Sonderbund, and troops of Uri attack canton Tessino                                                                                | - Nov. 4, 1847  |
| Union of Fribourg and Soleure                                                                                               | - 1481         | Forces of the diet attack Fribourg                                                                                                                               | - Nov. 10, 1847 |
| Maximilian I. emperor, acknowledges Swiss independence                                                                      | - 1499         | Neuchâtel declares independence,                                                                                                                                 | - Feb. 29, 1848 |
| Schaffhausen joins the union                                                                                                | - 1501         |                                                                                                                                                                  |                 |
| The Swiss confederacy acknowledged by France and other powers                                                               | - 1516         |                                                                                                                                                                  |                 |
| The Reformation begins at Basle; the bishop compelled to retire                                                             | - 1519         |                                                                                                                                                                  |                 |
| The Grison leagues join the Swiss confederacy as allies                                                                     | - 1544         |                                                                                                                                                                  |                 |
| Appenzel joins the other cantons                                                                                            | - 1597         |                                                                                                                                                                  |                 |
| Charles Emanuel of Savoy attempts Geneva by surprise, scales the walls, and penetrates the town; but in the end is defeated | - 1602         |                                                                                                                                                                  |                 |
| [This circumstance gives rise to an annual festival commemorative of their escape from tyranny.]                            |                |                                                                                                                                                                  |                 |

**SWORDS.** They were formed of iron taken from a mountain by the Chinese, 1879 B. C.—*Univ. Hist.* The sword is one of the earliest implements

of war. The Roman swords were from 20 to 30 inches long. The broadsword and scimitar are of modern adoption. The sword of state carried at an English king's coronation by a king of Scotland, 1194. Damascus steel swords are the most prized; and next, the sword of Ferrara steel. The Scotch Highlanders were accustomed to procure the latter from a celebrated artificer, named Andrea di Ferrara, and used to call them their *Andrew Ferraras*. The broadsword was forbidden to be worn in Edinburgh in 1724.

**SYCAMORE-TREE.** This tree is called by some the Egyptian Fig-tree. The date of its being planted in England is not known, but it was very early. In Mrs. Jamieson's *Memoirs of Female Sovereigns*, we are told that Mary queen of Scots brought over from France a little sycamore-tree, which she planted in the gardens of Holyrood, and that from this little tree have sprung all the beautiful groves of sycamore now to be seen in Scotland.

**SYDNEY, NEW SOUTH WALES.** Founded by governor Philip, on a cove of Port Jackson, in 1788, as a British settlement for the colony of convicts originally intended for Botany Bay; but now the principal seat of the government of the colony. It was denominated Sydney in compliment to lord Sydney. The town is now becoming considerable in extent and population; and it has a legislative council, which was first held July 13, 1829. See *New South Wales*; *Convicts*, &c.

**SYNAGOGUE.** Authors are not agreed as to the time when the Jews first had synagogues. Some refer it to the time of the ceremonial law, and others to the times after the Babylonish captivity. In Jerusalem were 480 synagogues. There are in London six synagogues.

**SYNOD.** The first general synods were called by emperors, and afterwards by Christian princes; but the pope ultimately usurped this power, one of his legates usually presiding (see *Councils*). National, were those of one nation only. The first of this kind held in England was at Hertford, A. D. 673: the last was held by cardinal Pole in 1555. Made unlawful to hold synods but by royal authority, 25 Henry VIII., 1533.

**SYNOD OF DORT.** The famous, or general assembly of Dort in Holland, to which deputies were sent from England and all the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Arminius, principally upon the points of justification and grace, 1618. —*Aitzema*.

**SYRACUSE.** Founded by Archias, 732 B. C.—*Eusebius*. 749 B. C.—*Univ. Hist.* Taken by Marcellus, when Archimedes, the illustrious mathematician, was slain, 212 B. C. (see *Sicily*). Syracuse was destroyed by an earthquake, with many thousands of its inhabitants, January 1693. Again nearly destroyed, Aug. 6, 1757.

**SYRIA.** Of the early history of ancient Syria, a few particulars are gleaned from Scripture; and it otherwise affords nothing peculiar, being involved in the histories of the Assyrian, Babylonian, and Persian empires (*which see*). The capital of Syria was originally Damascus; but after the battle of Ipsus, Seleucus (the chief of the Seleucidæ) founded the celebrated city of Antioch.

|                                                                     |             |                                                                                                                                                                                                        |             |

|                                                                                                                                                  |        |      | Fall of Acre (see <i>Acre</i> )                                                                                           | Nov. 3,            | 1840         |

After much expostulation with the sultan, the four powers, England, Austria, Russia, and Prussia, prevail upon him to make the pachalic of Egypt hereditary in the family of Mehemet Ali, who surrenders to the Turkish fleet, and whose troops evacuate Syria. A treaty to that effect signed at London, between the representatives of those powers, July 13, 1841. This result conciliates France, and promises peace in the East, and its continuance among the great powers of Europe.

ever the queen appeared, the young prince her step-son blushed, a tremor overspread his frame, his pulse quickened, and his voice grew weak. She was of his own age, and of exceeding beauty. On discovering the true cause of his patient's disorder, Erasistratus adopted an expedient which was the foundation of his great fame. He informed the king that his heir must die, as he languished under a hopeless passion. "Who," asked Seleucus, "is the object of his love?" "My wife," answered the physician. "Then resign her to him," said the king. "But if," said Erasistratus "it were the queen he loved, would you, Seleucus, yield up the idol of your affections to another?" "Yes," replied Seleucus, "I would readily relinquish both my queen and kingdom to save my son's life." "Then be at ease," Erasistratus rejoined, "for the object of his love is Stratonice!"—*Biog. Dict.*

\* This treaty was engraved on a marble column, now in the court of the Theatre of Oxford. It was presented to Oxford by the earl of Arundel in the reign of Charles II.

## T.

**TAHITI.** The French, or abbreviated name for Otaheite. See *Otaheite*.

**TALavera, BATTLE OF,** between the united British and Spanish armies under sir Arthur Wellesley (19,000 British and 30,000 Spaniards), and the French army, amounting to 47,000, commanded by marshals Victor and Sebastiani, July 27 and 28, 1809.

**TALMUD.** There are two books of the doctrine of the religion and morality of the Jews,—the Talmud of Jerusalem, and the Talmud of Babylon. The one composed by the Rabbi Juda Hakkadosh, about the close of the second century; the second, being commentaries, &c., by succeeding rabbis, were collected by Ben Eliezer, about the sixth century. Abridged by Maimonides in the twelfth century.

**TAMERLANE.** The conqueror of Persia, India and Egypt, and plunderer of Bagdad, Delhi, and Cairo. He subdued the renowned warrior Bajazet, sultan of the Turks, whom he exposed in a large iron cage, the fate the latter had destined for his adversary if he had been the victor. Bajazet dashed his head against the bars of this prison, and killed himself, 1403.—*Chalcondila's Hist. Turk.*

**TANNING.** Was early practised by various nations. The use of tan was introduced into these countries from Holland by William III. for raising orange-trees. It was discontinued until about 1719, when ananas were first brought into England. Since then, tan has been in general use in gardening. Great improvements were made in tanning in 1795, *et seq.*

**TAPESTRY.** An art of weaving borrowed from the Saracens, and hence its original workers in France were called *Sarazinois*. The invention of tapestry hangings belongs [the date is not mentioned] to the Netherlands. —*Guicciardini*. Manufactured in France under Henry IV., by artists invited from Flanders, 1606. The art was brought into England by William Sheldon; and the first manufactory of it was established at Mortlake by sir Francis Crane, 17 James I., 1619.—*Salmon*. Under Louis XIV. the art of tapestry was much improved in France. See *Gobelin Tapestry*. Very early instances of making tapestry are mentioned by the ancient poets, and also in Scripture; so that the Saracens' manufacture is a revival of the art. For the tapestry wrought by Matilda of England, see *Bayeux Tapestry*.

**TARENTUM, WAR OF.** The war which the people of Tarentum supported against the Romans, assisted by Pyrrhus, king of Epirus, and which is greatly celebrated in history. This war, which had been undertaken B. C. 281, by the Romans, to avenge the insults the Tarentines had offered to their ships when near their harbors, was terminated after ten years; 300,000 prisoners were taken, and Tarentum became subject to Rome.

**TARTARY.** This name is given to several nations of the East. The Tartar race was known and celebrated in antiquity under the name of Scythians. It was during the decline of the Roman empire that these tribes began permanently to forsake their own plains, in search of more fertile regions; and the first of these ravagers whose terror and fame reached the frontier of Italy were the Huns, the ancestors of the modern race of Mongols. The first acknowledged sovereign of this vast country was the famous Jenghis Khan, A. D. 1206. His empire, by the conquest of China, Persia, and all Central Asia, became one of the most formidable ever established; but it was split into parts in a few reigns. Timur, or Tamerlane, again conquered Persia, again broke the power of the Turks in Asia Minor, 1402, and founded a dynasty in India, which formed the most splendid court in Asia, till the close of the eighteenth century.

**TAVERNS.** In England, were places of entertainment, under various names,

in ancient times. Taverns, as so called, may be traced to the 13th century. "In the raigne of king Edward the Third *only three taverns* were allowed in London: one in Chepe, one in Walbroke, and the other in Lombard-street."—*Sir Henry Spelman*. The *Boar's Head*, in Eastcheap, existed in the reign of Henry IV., and was the rendezvous of prince Henry and his dissolute companions. Shakspeare mentions it as the residence of Mrs. Quickly, and the scene of sir John Falstaff's merriment.—*Shakspeare, Henry IV.* Of little less antiquity is the *White Hart*, Bishopsgate, established in 1480: this house was rebuilt in 1829. Taverns were restrained by an act of Edward VI., 1552, to 40 in London, 8 in York, 4 in Norwich, 3 in Westminster, 6 in Bristol, 3 in Lincoln, 4 in Hull, 3 in Shrewsbury, 4 in Exeter, 3 in Salisbury, 4 in Gloucester, 4 in Chester, 3 in Hereford, 3 in Worcester, 3 in Southampton, 4 in Canterbury, 3 in Ipswich, 3 in Winchester, 3 in Oxford, 4 in Cambridge, 3 in Colchester, 4 in Newcastle-upon-Tyne. Taverns were licensed in 1752.

**TAXES.** The first levied on the people was by Solon, the first Athenian legislator, 540 B.C. The first class of citizens paid an Attic talent of silver, about 55*l.* English money. The next was by Darius, the son of Hystaspes, which was a land-tax by assessment, and deemed so odious that his subjects styled him, by way of derision, Darius the Trader, 480 B.C.—*D'Eon's Histoire des Finances*. Taxes in specie were first introduced into England by William I., 1067, and he raised them arbitrarily; yet subsidies in kind, as in wool, corn, leather, and other products of the country, continued till the accession of Richard II., 1377.—*Camden*. First taxation of the British colonies in America, 1764; produced active resistance, 1765; stamp act repealed, 1766: re-enacted 1767. See *Income, Revenue, Cost of Government, &c.*

**TE DEUM.** A kind of hymn or song of thanksgiving used in the church, beginning with the words *Te Deum laudamus*—We praise thee, O God. It is generally supposed to be the composition of Augustin and Ambrose, about A.D. 390; and is sung in the Romish church with extraordinary pomp and solemnity on some happy event, such as a national thanksgiving for a great victory or for a bounteous harvest.

**TEA.** First known in Europe, being brought from India by the Dutch, 1610. Brought into England in 1666, by lord Ossory and lord Arlington, from Holland; and being admired by persons of rank, it was imported from thence, and generally sold for 60 shillings per pound, till our East India Company took up the trade.—*Anderson*. Green tea began to be used in 1715. The duty imposed on tea in America, 1767. This tax occasioned the destruction of 17 chests at New York, and 340 at Boston, November 1773. and was one of the causes of the Revolutionary war.

**TEAS IMPORTED INTO ENGLAND OR CHARGED WITH DUTY IN THE FOLLOWING YEARS.**

|       |   |      |            |       |   |      |            |       |   |      |            |
|-------|---|------|------------|-------|---|------|------------|-------|---|------|------------|
| 1726. | - | lbs. | 700,000    | 1805. | - | lbs. | 24,133,000 | 1825. | - | lbs. | 27,803,668 |
| 1766. | - | -    | 7,000,000  | 1810. | - | -    | 25,414,000 | 1830. | - | -    | 30,544,404 |
| 1792. | - | -    | 13,185,000 | 1815. | - | -    | 26,368,000 | 1835. | - | -    | 44,360,555 |
| 1800. | - | -    | 23,723,000 | 1820. | - | -    | 25,662,474 | 1840. | - | -    | 38,068,551 |

In England, the duty derived on tea is now about 4,000,000*l.* annually. Millions of pounds weight of sloe, liquorice, and ash-tree leaves, are every year mixed with Chinese teas in England.—*Report of the House of Commons*, 1818. The consumption of the whole civilized world, exclusively of England, is about 22 000 000 of pounds, while the annual consumption in Great Britain is 30 000 000.—*Evidence in the House of Commons*, 1830. The first tea-sale in London on the abolition of the exclusive privilege of the East India Company, Aug. 19, 1834. The value of teas imported into the United States for one year, ending July 1, 1847, was \$4,278,463; while that of coffee was \$9,102,872.

**TEA-TREE.** *Thea Bohea.* Brought to England from China, about 1768. The finest tea-plant known in England was raised in Kew Gardens; but the first that ever flourished in Europe was one belonging to the duke of Northumberland at Sion.

**TELEGRAPHS.** They were early in use. Polybius calls the different instruments used by the ancients for communicating information *pyrsice*, because the signals were always made by fire. The most ingenious of the moderns had not thought of such a machine as a telegraph until 1663, when the plan was suggested by the marquis of Worcester. The first idea of a telegraph on the modern construction was suggested by Dr. Hooke, 1684. M. Amontons is also said to have been the inventor of telegraphs about this period. It was not till 1793 that the instrument was applied to useful purposes: M. Chappe then invented the telegraph first used by the French. Two erected over the admiralty-office, London, 1796. The Semaphore was erected there 1816. The naval signals, by telegraph, enable 400 previously-concerted sentences to be transmitted from ship to ship, by varying the combinations of two revolving crosses; and also to spell any particular words, letter by letter. See *Electric Telegraph*.

**TELESCOPES.** This invention is noticed by Leonard Digges, about 1571. Roger Bacon, about A. D. 1250, described telescopes and microscopes exactly, and yet neither were made till one Metius, at Alkamaer, and Jansen, of Middleburgh, made them about the same time; the latter from an accidental discovery made by his children, 1590—1609. Galileo imitated their invention by its description, and made three in succession, one of which magnified a thousand times. With these he discovered Jupiter's moons and the phases of Venus. Telescopes became very popular, and were improved by Zucchi, Huygens, Gregory, and Newton; and finally by Martin, Hall, Dolland, and Herschel. Achromatic telescopes were made by More Hall, about 1723. A telescope was made in London for the observatory of Madrid, which cost 11,000*l.* in 1802; but the Herschel telescope, made 1789—1795, is superior: it has the great speculum 48 inches in diameter, 3½ inches thick, weighs 2118 lbs., and magnifies 6400 times. See *Herschel Telescope*.

**TEMPERANCE SOCIETIES.** It is to the credit of the American people that the first great public movement in behalf of temperance was made in this country. Temperance societies began to be formed in 1825-6. One of the most prominent of the first promoters of the reform was the Rev. Dr. Hewitt of Connecticut, who was worthily styled the Apostle of Temperance. The exertions of this and other energetic advocates of temperance and total abstinence have effected a wonderful change for the better in the general habits of the people. Several thousand temperance societies, under various names, have been formed, and a large number of vessels now sail from various ports of the United States, the crews of which are unsupplied with spirituous liquors of any kind. The movement has spread to some extent in Europe, but by far the most successful of its promoters has been the Rev. Theobald Mathew, a Roman Catholic clergyman in Ireland, who has administered the "total abstinence" pledge to about two millions of his countrymen. He commenced his ministry in this cause in 1830. In Germany there were 300 temperance societies in 1846.

**TEMPLARS.** The first military order of Knights Templars was founded in A. D. 1118 by Baldwin II., king of Jerusalem. The templars were numerous in several countries, and came to England in 1185. The order was suppressed by the council of Vienna, and its revenues were bestowed upon other orders, in 1312. Numbers of the order were burnt alive and hanged, and it suffered great persecutions throughout Europe, particularly in France

in the reign of Philip of Valois, 1342. They were several times suppressed in England, and finally in 1340.

**TEMPLE, LONDON.** Thus called, because it was anciently the dwelling house of the Knights Templars. At the suppression of that order, it was purchased by the professors of the common law, and converted into inns. They are called the Inner and Middle Temple.

**TEMPLES.** They originated in the sepulchres built for the dead.—*Eusebius*. The Egyptians were the first who erected temples to the gods.—*Herodotus*. The first erected in Greece is ascribed to Deucalion.—*Apollonius*. For temple of Belus, see *Babel*. The temple of Jerusalem, built by Solomon, 1012 B. C. Fired by Nebuchadnezzar, 587 B. C. Rebuilt, 536 B. C. Pillaged by Antiochus, 170 B. C. Rebuilt by Herod, 18 B. C. Destroyed by Titus, A. D. 70.—The temple of Apollo, at DELPHOS, first a cottage with boughs, built of stone by Trophorius, about 1200 B. C. Burnt by the Pisistratidæ, 548 B. C. A new temple raised by the family of the Alcmaeonidæ, about 513 B. C.—Temple of Diana at Ephesus, built seven times; planned by Ctesiphon, 544 B. C. Fired by Erostratus, to perpetuate his name, 356 B. C. To rebuild it, employed 220 years. Destroyed by the Goths, A. D. 260.—The Temple of Piety was built by Acilius, on the spot where once a woman had fed with her milk her aged father, whom the senate had imprisoned, and excluded from all aliments.—*Val. Max.* Temple of Theseus, built 480 years B. C., is at this day the most perfect ancient edifice in the world.—The heathen temples were destroyed throughout the Roman empire by Constantine the Great, A. D. 331. See *Heathen Temples*.

**TENNESSEE.** One of the United States; was originally included in the charter of North Carolina by Charles II. in 1664; first settlement on Wetanga river, 1757; attacked, and 200 men, women, and children massacred by the Indians in 1760; the Indians chastised next year, but continued frequent contests with the colonists for several years. The territory ceded by North Carolina to the United States in 1790; admitted into the Union as a State, 1796. Population in 1790, 35,691; in 1810, 261,727; in 1830, 681,904; in 1840, 829,210, including 183,059 slaves.

**TEST ACT.** The statute of Charles II., directing all officers, civil and military, under government, to receive the sacrament according to the forms of the Church of England, and to take the oaths against transubstantiation, &c., was enacted March 1673; repealed, 1828.

**TEUTONI, OR TEUTONES.** A people of Germany, who with the Cimbri made incursions upon Gaul, and cut to pieces two Roman armies. They were at last defeated by the consul Marius, and an infinite number made prisoners, 101 B. C. See *Cimbri*.

**TEUTONIC ORDER.** The order of military knights established in the Holy Land towards the close of the twelfth century. The institution arose in the humanity of the Teutones to the sick and wounded of the Christian army under the celebrated Guy of Lusignan when before Acre. The order was confirmed by a bull of pope Cælestine III., A. D. 1191. See *Prussia*, &c.

**TEWKSBURY, BATTLE OF,** in which Edward IV. gained a decisive victory over the Lancastrians. Queen Margaret, the consort of Henry VI., and her son, were taken prisoners. The queen was conveyed to the Tower of London, where king Henry expired a few days after this fatal engagement; being, as is generally supposed, murdered by the duke of Gloucester, afterwards Richard III. The queen was ransomed in 1475, by the French king, Lewis XI., for 50,000 crowns. This was the last battle between the houses of York and Lancaster, May 4, 1471. See *Roses*.

**TEXAS.** One of the United States; first settled by the Spaniards at San Francisco in 1690; made one of the federal States of Mexico, in conjunction with the adjacent State of Coahuila, on the formation of the Mexican republic—an unpopular Union to the Texans, and productive of the first disagreement with the central government; colonization of Texas by emigrants from the United States, commenced 1821; war with Mexico for independence commenced 1833, and ended by the defeat and capture of the Mexican president, Santa Anna, at San Jacinto, 21st April, 1836, which secured the independence of Texas; admitted into the Union as a State (the 28th), after active opposition with reference to the exclusion of slavery, Feb. 20, 1845. Population at that time about 200,000. [The first treaty for its annexation was rejected by the United States Senate, 35 to 16, June 8, 1844.]

**THAMES TUNNEL.** Projected by Mr. Brunel, to form a communication between the two sides of the river, at Rotherhithe and Wapping, the most extraordinary construction of ancient or modern times. The shaft was begun in 1825. At a distance of 544 feet from the shaft the first irruption took place, May 18, 1827. The second irruption, by which six workmen perished, Jan. 12, 1828. The length of the tunnel is 1300 feet; its width is 35 feet; height, 20 feet; clear width of each archway, including footpath, about 14 feet; thickness of earth beneath the crown of the tunnel and the bed of the river, about 15 feet. The tunnel was opened throughout for foot passengers, March 25, 1843.

**THANE.** A title much in use anciently, and which sometimes signified a nobleman, sometimes a freeman, and sometimes a magistrate; but most properly, an officer under the king. The Saxons had a nobility called thanes, and the Scots also. The title was abolished in England at the Conquest, upon the introduction of the feudal system. Abolished in Scotland by king Malcolm III., when the title of earl was adopted, 1057.

**THEATRES.** That of Bacchus, at Athens, built by Philos, 420 B. C., was the first erected. Marcellus' theatre at Rome was built about 80 B. C. Theatres were afterwards numerous, and were erected in most cities of Italy. There was a theatre at Pompeii where most of the inhabitants of the town were assembled on the night of August 24, A. D. 79, when an eruption of Vesuvius covered Pompeii. Scenes were introduced into theatres, painted by Balthazar Sienna, A. D. 1533. The first royal license for a theatre in England was in 1574, to master Burbage and four others, servants of the earl of Leicester, to act plays at the Globe, Bankside. See *Globe*. But long before that time, miracle plays were represented in the fields. The prices of admission in the reign of queen Elizabeth were, gallery, 2d.; lords' room, 1s. —*Dickens*. The first play-bill was dated April 8, 1663, and issued from Drury-lane; it runs thus: "By his Majestie, his company of Comedians at the New Theatre in Drury Lane, will be acted a comedy called the *Humorous Lieutenant*." After detailing the characters, it concludes thus: "The play will begin at three o'clock exactly." Lincoln's-inn theatre was opened in 1695. The first attempt at theatrical performances in the United States was the acting of Otway's *Orphan*, in Boston, in 1750; but all such exhibitions were immediately afterwards prohibited there. A strolling company acted in a sail-loft in New York in 1758. The first regular theatre was in New York in 1793; the second in Boston; and the third in Philadelphia soon after. Dunlap's History of the American Theatre was published in New York, 1832. See *Drama*, *Plays*, &c.

**THEBES.** The ancient celebrated city of Thebais in Egypt, called also Hecatompylos, on account of its hundred gates, and Diospolis, as being sacred to Jupiter. In the time of its splendor, it extended above twenty-three miles, and upon any emergency could send into the field, by each of its hundred

gates, 20 000 fighting men and 200 chariots. Thebes was ruined by Cambyzes, king of Persia, and few traces of it were seen in the age of Juvenal.—*Plutarch*. Also Thebes, the capital of the country successively called Aonia, Messapia, Ogygia, Hyantis, and Bœotia. See *Bæotia*. Thebes was called Cadmeis, from Cadmus, the founder of the city. It rose to a celebrated republic, styled the Theban, about 820 B. C. It was dismantled by the Romans, 145 B. C.—*Livy*; *Thucydides*.

**THEFT.** This offence was punished by heavy fines among the Jews. By death at Athens, by the laws of Draco. See *Draco*. The Anglo-Saxons nominally punished theft with death, if above 12*d.* value; but the criminal could redeem his life by a ransom. In the 9th of Henry I. this power of redemption was taken away, 1108. The laws against theft, until lately, were very severe in England; they were revised by Mr. (afterwards Sir Robert) Peel's acts, 9 and 10 George IV.

**THEISTS.** The sect so called came in with the Restoration, about 1660, and they taught a union with all men who believed in one God, but who rejected public worship and exterior forms of religion. They maintained that their religion was better because older and more simple than that which was given by God to the Hebrews.

**THEOLOGICAL SCHOOLS.** The first in the United States was that at Andover, founded 1808.

**THERMOMETER.** The invention of this instrument is ascribed to several scientific person all about the same time. Invented by Drebbel of Alcmæer, A. D. 1609.—*Boerhaave*. Invented by Paulo Sarpi, 1609.—*Fulgentio*. Invented by Sanctorio in 1610.—*Borelli*. Fahrenheit's thermometer was invented about 1726; and the scale called Reaumur's soon after, 1730. The mode of construction by substituting quicksilver for spirits was invented some years subsequently.

**THERMOPYLÆ, BATTLE OF.** Leonidas at the head of 300 Spartans, at the defile of Thermopylæ, withstands the whole force of the Persians during three days, when Ephialtes, a Trachinian, perfidiously leading the enemy by a secret path up the mountains, brings them to the rear of the Greeks, who, thus placed between two assailants, devote themselves to the good of their country, and perish gloriously on heaps of their slaughtered foes. Of 300 heroes who engaged in this conflict with hundreds of thousands of the Persians, one man only returned home, and he was received with reproaches and insults for having fled from a battle in which his brave companions, with their royal leader, had fallen. Twenty thousand Persians perished by the hands of the Spartans, Aug. 7, 480 B. C.—*Vossius de Græc. Hist.*

**THESSALY.** This country is much celebrated in classical history, as being the seat of many of the adventures described by the poets. The first king of whom we have any certain knowledge was Hellen, son of Deucalion, from whom his subjects were called Hellenists, a name afterwards extended to all Greece. From Thessaly the most powerful tribes of Greece derived their origin, as the Achæans, the Ætolians, the Dorians, the Hellenists, &c. The two most remarkable events in the early history of this country, are the deluge of Deucalion, 1503 B. C., and the expedition of the Argonauts, 1263. See them severally.

**THRACE.** So called from Thrax, the son of Mars. Conquered by Philip and Alexander, and annexed to the Macedonian empire about 335 B. C.; and it so remained till the conquest of Macedonia by the Romans, 168 B. C. Byzantium was the capital of Thrace, on the ruins of which Constantinople was built. The Turks took the country under Mahomet II., A. D. 1453.—*Priestley*.

**THRASHING-MACHINES.** The flail was the only instrument formerly in use. The Romans used a machine called the *tribulum*, a sledge loaded with stones or iron, drawn over the corn-sheaves by horses. The first machine attempted in modern times was invented by Michael Menzies, at Edinburgh, about 1732; Miekles, in 1776.

**THRASYMENUS, BATTLE OF.** A most bloody engagement between the Carthaginians under Hannibal and the Romans under Flaminius, 217 B. C. No less than 15,000 Romans were left dead on the field of battle, and 10,000 taken prisoners; or, according to Livy, 6000; or Polybius, 15,000. The loss of Hannibal was about 1500 men. And about 10,000 Romans made their escape, all covered with wounds.—*Livy*; *Polybius*.

**THUMB-SCREW.** An inhuman instrument which was commonly used in the first stages of torture by the Spanish inquisition. It was in use in England also. The Rev. Wm. Carstairs was the last who suffered by it before the privy council, to make him divulge secrets entrusted to him, which he firmly resisted. After the revolution in 1688, the thumb-screw was given him as a present by the council. King William expressed a desire to see it, and tried it on, bidding the doctor to turn the screw; but at the third turn he cried out, "Hold! hold! doctor; another turn would make me confess any thing."

**THURSDAY.** The fifth day of the week, derived from Thor, a deified hero worshipped by the ancient inhabitants of the northern nations, particularly by the Scandinavians and Celts. The authority of this deity extended over the winds and seasons, and especially over thunder and lightning. He is said to have been the most valiant of the sons of Odin. This day, which was consecrated to Thor, still retains his name in the Danish, Swedish, and Low-Dutch languages, as well as in the English. Thursday, or Thors-day, has been rendered into Latin by *dies Jovis*, or Jupiter's day.

**TIDES.** Homer is the earliest profane author who speaks of the tides. Posidonius of Apamea accounted for the tides from the motion of the moon, about 79 B. C.; and Cæsar speaks of them in his fourth book of the Gallic War. The theory of the tides was first satisfactorily explained by Kepler, A. D. 1598; but the honor of a complete explanation of them was reserved for sir Isaac Newton, who laid hold of this class of phenomena to prove universal gravitation, about 1683.

**TILSIT, PEACE OF.** The memorable treaty concluded between France and Russia, when Napoleon restored to the Prussian monarch one-half of his territories, and Russia recognized the Confederation of the Rhine, and the elevation of Napoleon's three brothers, Joseph, Louis, and Jerome, to the thrones of Naples, Holland, and Westphalia. Signed July 7, 1807, and ratified July 19 following.

**TILTS AND TOURNAMENTS.** Were greatly in vogue in England in the eleventh and twelfth centuries. Notwithstanding many edicts against them, and anathemas from Rome, they were not abolished till the reign of Henry IV., about A. D. 1400.—*Rapin*. They first took their rise in Italy upon the suppression of the gladiators in the fifth century. They were suppressed in France in 1560.—*Voltaire's Gen. Hist.*

**TIMBER.** The annual demand of timber for the British navy, in war, is 60,000 loads, or 40,000 full-grown trees, a ton each, of which thirty-five will stand on an acre; in peace, 32,000 tons, or 48,000 loads. A seventy-four gun ship consumes 3000 loads, or 2000 tons of trees, the produce of fifty-seven acres in a century. Hence the whole navy consumes 102,600 acres, and 1026 per annum.—*Allnut*. England imports about 800,000 loads of timber annually, exclusively of masts, yards, staves, lathwood, &c., together with about 8,000,000 of deals and deal-ends.—*Parl. Ret.*

**TIME-MEASURE.** That of Scipio Nasica was invented 159 B. C. Early authors inform us that Alfred's time-keeper was six large wax tapers, each twelve inches long; but as they burnt unequally, owing to the wind, he invented a lantern made of wood, and thin plates of ox-horns, glass being a great rarity, A. D. 887. The ancients had three time-measures: hour-glasses, sun-dials, and a vessel full of water with a hole in its bottom. See *Clocks, Watches, &c.*

**TIN.** The Phœnicians traded with England for this article for more than 1100 years before the Christian era. It is said that this trade first gave them commercial importance in the ancient world. Under the Saxons, our tin-mines appear to have been neglected; but after the coming in of the Normans, they produced considerable revenues to the earls of Cornwall, particularly to Richard, brother of Henry III.; a charter and various immunities were granted by Edmund, earl Richard's brother, who also framed the stannary laws, laying a duty on the tin, payable to the earls of Cornwall. Edward III. confirmed the tinners in their privileges, and erected Cornwall into a dukedom, with which he invested his son, Edward the Black Prince, 1335. Since that time, the heirs-apparent to the crown of England, if eldest sons, have enjoyed it successively. Tin-mines were discovered in Germany, which lessened the value of those in England, till then the only tin-mines in Europe, A. D. 1240.—*Anderson.* Discovered in Barbary 1640; in India, 1740; in New Spain, 1782. England exports at present, on an average, 1500 tons of unwrought tin, besides manufactured tin and tin-plates, of the value of 400,000*l.*

**TITHES AND TENTHS.** Were first given by Moses to the tribe of Levi, 1490 B. C.—*Josephus.* For the first 800 years of the Christian church they were given purely as alms, and were voluntary.—*Wickliffe.* "I will not put the title of the clergy to tithes upon any divine right, though such a right certainly commenced, and I believe as certainly ceased, with the Jewish theocracy."—*Blackstone.* The first mention of them in any English written law, is a constitutional decree made in a synod strongly enjoining tithes, A. D. 786. Offa, king of Mercia, gave unto the church the tithes of all his kingdom, to expiate for the death of Ethelbert, king of the East Angles, whom he had caused to be basely murdered, A. D. 794.—*Burn's Eccles. Law.* Tithes were first granted to the English clergy in a general assembly held by Ethelwold, A. D. 844.—*Henry's Hist. of Eng.* They were established in France by Charlemagne, about 800.—*Henault.* Tenths were confirmed in the Lateran councils, 1215.—*Rainaldi.*

**TITLES, ROYAL.** The following is the succession in which the royal titles swelled in England. Henry IV. had the title of "Grace" and "My liege" conferred upon him, 1399. The title of "Excellent Grace" was conferred upon Henry VI., 1422. Edward IV. had that of "Most High and Mighty Prince," 1461. Henry VII. had the title "Highness," 1485; and Henry VIII. had the same title, and sometimes "Grace," 1509, *et seq.* But these two last were absorbed in the title of "Majesty," being that with which Francis I. of France addressed Henry at their memorable interview in 1520.—See *Field of the Cloth of Gold.* Henry VIII. was the first and last king who was styled "Dread Sovereign." James I. coupled to "Majesty" the present "Sacred," or "Most Excellent Majesty." "Majesty" was the style of the emperors of Germany; the first king to whom it was given was Louis XI. of France, about 1463.

**TOBACCO, *Nicotiana Tabacum.*** This plant received its name from Tobacco, a province of Yucatan, New Spain. Some say from the island of Tobago, one of the Caribbees; others, from Tabasco, in the gulf of Florida. It was first observed at St. Domingo, A. D. 1496; and was used freely by the Span-

iards in Yucatan in 1520. Tobacco was first carried to England, 7 Elizabeth, 1565, by sir John Hawkins; but sir Walter Raleigh and sir Francis Drake are also mentioned as having first introduced it there. It was manufactured only for exportation for some years.—*Stowe's Chron.* In 1584 a proclamation was issued against it. King James I. issued his famous Counter-Blast against Tobacco in 16 . The star-chamber ordered the duties to be 6s. 10d. per pound, 1614. Its cultivation was prohibited in England by Charles II. An act laying a duty on the importation was passed, 1684. The cultivation was allowed in Ireland 1779. The tax was increased, and put under the excise, 1789.—*Anderson; Ashe.* Various statutes have passed relative to tobacco. Act to revive the act prohibiting the culture of tobacco in Ireland passed 1831. Act directing that tobacco grown in Ireland be purchased in order to its being destroyed, 1832. The quantity consumed in England in 1791 was nine millions and a half of pounds, and in 1829 about fifteen millions of pounds.—*Chan. of the Ex.* In 1840, the quantity had reached to forty millions of pounds.—*Parl. Ret.* In the United States, tobacco is grown chiefly in Maryland and Virginia; but to some extent in all the southern states. The value of the crop exported in 1848 was \$7,551,122. Tobacco is produced also in France, in India, &c.; that of the United States is considered the best in flavor, but that of Cuba is preferred for smoking. Several works have been published on the evil effects and *bad taste* of this weed.

**TOBAGO.** Settled by the Dutch, A. D. 1642. Taken by the English, 1672; retaken, 1674. In 1748 it was declared a neutral island; but in 1763 it was ceded to the English. Tobago was taken by the French under De Grasse in 1781. and confirmed to them in 1783. Again taken by the English, April 14, 1793, but restored at the peace of Amiens, Oct. 6, 1802. The island was once more taken by the British under general Grinfield, July 1, 1803, and was confirmed to them by the peace of Paris in 1814.

**TOLERATION ACT.** To William III. is due the honor and wisdom of the first toleration act known in the history of this country, passed in 1689. The dissenters have ever since enjoyed the benefits of this act without interruption, though their liberties were greatly endangered in the latter end of queen Anne's reign.

**TOLLS.** They were first paid by vessels passing the Stade on the Elbe, A. D. 1109. They were first demanded by the Danes of vessels passing the Sound, 1341. Toll-bars in England originated in 1267, on the grant of a penny for every wagon that passed through a certain manor. Toll-gates or turnpikes were used in 1663.

**TONNAGE AND POUNDAGE.** An ancient duty levied on wine and other goods, commenced in England about 21 Edward III., 1346. The first granted to the kings of England for life, 5 Edward IV., 1465. *Cunningham's Hist. Taxes.*

**TONTINES.** Loans given for life annuities with benefit of survivorship, so called from the inventor Laurence Tonti, a Neapolitan. They were first set on foot at Paris to reconcile the people to cardinal Mazarin's government, by amusing them with the hope of becoming suddenly rich, A. D. 1653.—*Voltaire.* The late celebrated Mr. Jennings was an original subscriber for a 100l. share in a tontine company; and being the last survivor of the shareholders, his share produced him 3000*l. per annum.* He died worth 2,115,-244*l.*, aged 103 years, June 19, 1798.—*Haydn.*

**TOPLITZ. BATTLE OF.** A battle was fought at Toplitz between the Austrians and Prussians, in which the latter were defeated, 1762. Battle of Toplitz, August 30, 1813. Here the allied sovereigns had their head-quarters a considerable time in this latter year. Treaty of Toplitz, being a triple

alliance between Russia, Austria, and Prussia, Sept. 9, 1813. Treaty of Toplitz, between Austria and Great Britain, Oct. 3, same year.

**TORTURE.** It has disgraced humanity in the earliest ages in every country. It was only permitted by the Romans in the examination of slaves. It was used early in the Catholic church against heretics. Occasionally used in England so late as the 1st Elizabeth, 1558; and in Scotland until 1690. The trial by torture was abolished in Portugal, 1776; in France, by order of Louis XVI., in 1780, although it had not been practised there some time before. Ordered to be discontinued in Sweden by Gustavus III., 1786. It yet continues in other countries.

**TORY.** Various authors have differently described this term. It is said to be derived from an Irish word, originally signifying a savage, or rather a collector of tithes and taxes.—*Encyclop.* The names of Cavaliers and Round-heads, which existed in the time of Charles I. were changed, some tell us, into those of Tories and Whigs. The Tories were those who vindicated the divine right of kings, and held high notions of their prerogatives; while "the Whigs" denoted a friend to civil and religious liberty.—*Ashe.* The name of Tory was given by the country party to the court party, comparing them to Popish robbers; and arose out of the Meal-tub plot (*which see*), in 1679. The terms are defined by extreme politicians, as of two parties in the aristocracy: the Whigs, who would curb the power of the crown; and the Tories, who would curb the power of the people.—*Phillips.* In our revolutionary war the term was applied to the royalists; but, oddly enough, at the time of president Jackson, it was given to the ultra democratic party, while the other great party called themselves *Whigs*. See *Whigs*.

**TOULON, FRANCE.** In 1706 this town was bombarded by the allies, both by land and sea, by which almost the whole town was reduced to a heap of ruins, and several ships burned; but they were at last obliged to raise the siege. It surrendered, August 23, 1793, to the British admiral, lord Hood, who took possession both of the town and shipping in the name of Louis XVII., under a stipulation to assist in restoring the French constitution of 1789. A conflict took place between the English and French forces, when the latter were repulsed, Nov. 15, 1793. Toulon was evacuated by the British, Dec. 19, same year, when great cruelties were exercised towards inhabitants as were supposed to be favorable to the British.

**TOULOUSE, FRANCE.** Founded about 615 B. C. A dreadful tribunal was established here to extirpate heretics, A. D. 1229. The troubadours, or rhetoricians of Toulouse, had their origin about A. D. 850, and consisted of a fraternity of poets, whose art was extended throughout Europe, and gave rise to the Italian and French poetry. See *Troubadours*.

**TOULOUSE, BATTLE OF.** The final battle between the British Peninsular army under lord Wellington and the French—one of the most bloody that had been fought from the time lord Wellington had received the command of the troops in Portugal. The French were commanded by marshal Soult, whom the victorious British hero forced to retreat, after twelve hours fighting, from seven o'clock in the morning until seven at night, the British forcing the French intrenched position before Toulouse. The loss of the allies in killed and wounded was between four and five thousand men; that of the French exceeded 10,000. At the period of this battle Bonaparte had abdicated the throne of France; but neither of the commanders was aware of that fact, or the close of the war at Paris. Fought April 10, 1814.

**TOURNAMENTS or JOUSTS.** Some authors refer them to Trojan origin, such as Ascanius instituted among the Romans. The tournament is a martial sport or exercise which the ancient cavaliers used to perform, to show

their bravery and address. It is derived from the French word *tourner*, "to turn round," because, to be expert in these exercises, much agility, both of horse and man, was necessary. They were much practised A. D. 890; and were regulated and countenanced by Henry I., emperor, about 919. The Lateran council published an article against their continuance in 1136. One was held in Smithfield so late as the 12th century, when the taste for them declined in England. Henry II. of France, in a tilt with the count de Montgomery, had his eye struck out, an accident which caused the king's death in a few days, June 29, 1559. Tournaments were from this event abolished in France, and with them "the age of chivalry is fled." A magnificent and costly feast and splendid tournament took place at Eglinton castle, August 29, 1839, and the following week: many of the visitors assumed the characters of ancient knights, lady Seymour being the "Queen of Beauty," as fairest of the female throng. But this festivity is not likely to lead to a revival of the old tournament.

**TOURNAY.** Taken by the allies in 1709, and ceded to the house of Austria by the treaty of Utrecht; but the Dutch were allowed to place a garrison in it, as one of the barrier towns. It was taken by the French under general Labourdonnaye, Nov. 11, 1792. Battle near Tournay, by the Austrians and British on one side, and the French on the other, the former victorious, May 8, 1793. Another battle was fought between the British and French, when the latter were repulsed, at Rousalaer, losing 200 men and three field-pieces, May 6, 1794.

**TOURS, BATTLE OF.** One of the glorious victories of Charles Martel, and that which most established his fame, gained over the Saracens near Tours, and from which he acquired the name of *Martel*, signifying *hammer*. We are told that but for this timely victory of Charles Martel, all Europe, as well as Asia and Africa, must have become Mahomedan; October 10, A. D. 732.

**TOWERS.** That of Babel, the first of which we read, built in the plains of Shinar (*Genesis* xi.), 2247 B. C. See *Babel*. The Tower of the Winds at Athens, built 550 B. C. The Tower of Pharos (see *Pharos*), 280 B. C. Towers were built early in England; and the round towers in Ireland may be reckoned among the most ancient curiosities. They were the only structures of stone found in Ireland before the first arrival of the English, except some buildings in the maritime towns founded by the Danes. These towers were tall, hollow pillars, nearly cylindrical, but narrowing towards the top, pierced with lateral holes to admit the light, high above the ground, and covered with conical roofs of the same materials. Of these productions of old Irish masonry, fifty-six still remain, from 50 to 130 feet high.

**TOWER OF LONDON.** Anciently a royal palace, and consisted of no more than what is now called the White Tower, which appears to have been first marked out by William the Conqueror, A. D. 1076, commenced in 1078, and completed by his son William Rufus, who, in 1098, surrounded it with walls, and a broad, deep ditch. Several succeeding princes made additions to it, and king Edward III. built the church. In 1638 the White Tower was rebuilt; and since the restoration of king Charles II. it has been thoroughly repaired, and a great number of additional buildings made to it. Here are the Armory, Jewel-office, and various other divisions and buildings of peculiar interest; and here were many executions of illustrious persons, and many murders. See *England*.

**TOWTON, BATTLE OF.** This great battle is supposed to be the most fierce and bloody that ever happened in any domestic war. It was fought between the houses of York (Edward IV.) and Lancaster (Henry VI.), to the latter

of whom it was fatal, and on whose side more than 37,000 of his subjects fell. Edward issued orders to give no quarter, and the most merciless slaughter ensued. Henry was made prisoner and confined in the Tower, his queen, Margaret, fled to Flanders: fought March 29, 1461.

**TRAFALGAR, BATTLE OF**, the greatest naval victory ever obtained by England, fought by the British, under command of the immortal Nelson, against the combined fleets of France and Spain, commanded by admiral Villeneuve and two Spanish admirals. The enemy's force was eighteen French and fifteen Spanish vessels, all of the line; that of the British twenty-seven ships. After a bloody and protracted fight, admiral Villeneuve and the other admirals were taken, and nineteen of their ships captured, sunk, or destroyed. But the hero of England lost his life in this memorable battle; and admiral Collingwood succeeded to the command. Nelson's ship was the *Victory*; and his last signal on going into the engagement, was "England expects every man to do his duty." Oct. 21, 1805.

**TRAGEDY**. That of *Alcestis* was the first represented by Thespis, the first tragic poet at Athens, 536 B. C.—*Arund. Marbles*. Prizes instituted, and the first gained by *Æschylus*, 486 B. C.—*Ibid.* Another prize carried by *Sophocles*, 470 B. C.—*Ibid.* Another by *Euripides*, 442 B. C.—*Ibid.* Another by *Astydamus*, 377 B. C.—*Ibid.* See *Drama; Plays; Theatres*.

**TRAJAN'S PILLAR**. Erected A. D. 114, by the directions of the emperor Trajan, and executed by Apollodorus. This column, which still exists at Rome, was built in the large square called the *Forum Romanum*; it is 140 feet high, of the Tuscan order, and commemorates the victories of the emperor.

**TRANSFUSION OF THE BLOOD**. It began to be practised in the fifteenth century, and was successful in France, where Louis XI., when dying, went farther still, and drank the warm blood of infants, in the vain hope of prolonging life, A. D. 1483.—*Henault*. After trials of the efficacy of transfusion upon animals, M. Denis revived the practice in Paris, where, out of five persons upon whom he operated, two died, and the magistracy prohibited the experiment upon human bodies afterwards, 1668. Lower, an English physician, who died in 1691, practised in this way.—*Friend's Hist. of Phys.* Transfusion again attempted in France, in 1797; and recently in Great Britain, but seldom with success. See article *Blood*.

**TRANSPORTATION OF FELONS IN ENGLAND**. The first criminals were ordered for transportation instead of execution, A. D. 1590; but banishment for lighter offences than those adjudged death was much earlier. England is reproached abroad for transporting persons whose offences are comparatively venial. John Eyre, esq., a man of fortune, was sentenced to transportation for stealing a few quires of paper, Nov. 1, 1771.—*Phillips*. More recently, the reverend Dr. Halloran, tutor to the earl of Chesterfield, was transported for forging a frank, (10*d.* postage) Sept. 9, 1818. The first transportation of felons to Botany Bay was in May 1787; they arrived at the settlement in January 1788. Returning from transportation was punished with death until 1834, when an act passed making the offence punishable by transportation for life.

**TRANSUBSTANTIATION**. This doctrine was first introduced by a friar, about A. D. 840. It became a confirmed article of Christian faith about 1000. It was opposed in England about 1019; but the English church admitted the doctrine before 1066. Belief in it as necessary to salvation was finally established by the council of Placentia, 1095. The word "transubstantiation" was first used by Peter of Blois about 1165. John Huss, in subsequent times, was the first opposer of this doctrine; he was burnt by order of the council of Constance, A. D. 1415.—*Cave's Hist. Lit.*

**TRAPPISTS**, or **MONKS OF LA TRAPPE**. A French order in the department of Orne, famed in the days of superstition for their austerity of discipline, and for keeping a perpetual silence. This order was charged with rebellion and conspiracy in France, and 64 English and Irish Trappists were shipped by the French government at Painboeuf, Nov. 19, and were landed from the *Hébé* French frigate at Cork, Nov. 30, 1831. They have established themselves at Mount Melleray, county of Waterford; but do not maintain there the extreme rigor of their order.

**TRAVELLING ABROAD**. See article *Absentees*. In order to discourage English subjects from travelling to foreign countries and spending money there, a tax was levied (but of very inadequate amount) by way of license for going abroad, and paid to the crown, 10 Charles I., 1635.—*Rapin*.

**TREAD-MILL**. An invention of the Chinese, and used in China to raise water for the irrigation of the fields. The tread-mill lately introduced into the prisons of Great Britain is of a more complicated construction. It is the invention of Mr. Cubitt of Ipswich. The first was erected at Brixton jail, 1817. This punishment has not been introduced in the United States.

**TREASON**. See *High Treason*. It was punished in England only by banishment till after Henry I.—*Baker's Chronicle*. Ascertained by law. Edward III., 1349. Trials regulated, and two witnesses required to convict, 1695. The laws relating to treason are numerous, and formerly the punishment was dreadful—hanging, quartering, beheading, &c., and even burning alive. Mr. Martin brought in a bill for the abolition of burning alive for treason, which passed both houses in 1788. **PETTY TREASON** may happen three ways: a wife's murder of her husband; a servant's murder of his master; and an ecclesiastical person's murder of his prelate or other superior—so declared by statute 25 Edward III., 1350.

**TREATIES**. The first formal and written treaty made by England with any foreign nation was entered into A. D. 1217. The first commercial treaty was with the Flemings, 1 Edward, 1272; the second with Portugal and Spain, 1308.—*Anderson*. The chief treaties of the principal civilized nations of Europe will be found described in their respective places: the following forms an index to them. See *Conventions; Coalitions; Leagues, &c.*

| 1,200 years; and in Scotland, said to be    | ferred to.]                                         |
| 2,500 years.                                |                                                     |

TRENT, COUNCIL OF. This celebrated council is reckoned in the Catholic church as the eighteenth or last general council. Its decisions are implicitly received as the standard of faith, morals, and discipline in that church. The first council assembled A. D. 1545, and continued (but with interruptions) under pope Paul III., Julius III., and Pius IV., to 1563, when the last council was held.

TRIALS. Alfred is said to have been the contriver of trial by jury; but there is good evidence of such trials long before his time. In a cause tried at Hawarden, nearly a hundred years before the reign of Alfred, we have a list of the twelve jurors; confirmed, too, by the fact that the descendants of one of them, of the name of Corbyn, of the Gate, still preserve their name and residence at a spot in the parish yet called the Gate.—*Phillips*.

TRIBUNES OF THE PEOPLE. *Tribuni Plebis*. Magistrates of Rome, first chosen from among the commons to represent the people, 492 B. C., at the time the people, after a quarrel with the senators, had retired to Mons Sacer. The first two were C. Licinius, and L. Albinus; but their number was soon after raised to five, and 37 years after to ten, which remained fixed. Their office was annual, and as the first had been created on the 4th of the ides of December, that day was ever after chosen for the election.

TRINIDAD. This island was discovered by Columbus in 1498, and was taken from the Spaniards by sir Walter Raleigh in 1595; but the French took it from the English in 1676. Taken by the British, with four ships of the line, and a military force under command of sir Ralph Abercrombie, to whom the island capitulated, Feb. 21, 1797; they captured two, and burnt three Spanish ships of war in the harbor. This possession was confirmed to England by the peace of Amiens in 1802. The insurrection of the negroes occurred Jan. 4, 1832. See *Colonies*.

TRINITY AND TRINITARIANS. The doctrine of the Trinity is received by all Christian sects except those called Unitarians (*which see*). Theophilus, bishop of Antiöch, who flourished in the second century, the first who used the term Trinity, to express the three sacred persons in the Godhead. His *Defence of Christianity* was edited by Gesner, at Zurich, in 1546.—*Watkins*.

An order of the Trinity was founded, A. D. 1198, by John de Matha and Felix de Valois. The Trinity fraternity, originally of fifteen persons, was instituted at Rome by St. Philip Neri, in 1548. An act to exempt from penalties persons denying the doctrine of the Trinity was passed in England in 1813.

**TRIPLE ALLIANCE.** This celebrated treaty of alliance was ratified between the States-General and England, against France, for the protection of the Spanish Netherlands; Sweden afterwards joining the league, it was known as the Triple Alliance, Jan. 28, 1668.

**TRIUMPHS.** The triumph was a solemn honor done generals of armies after they had won great victories, by receiving them into the town with great magnificence and public acclamations. Among the Romans there were two sorts—the great, that was called simply the triumph; and the little, styled the ovation. They also distinguish triumphs into land and sea triumphs, accordingly as the battles were fought. See *Ovation*.

**TRIUMVIRI.** Three magistrates appointed equally to govern the Roman state with absolute power. These officers gave a fatal blow to the expiring independence of the Roman people, and became celebrated for their different pursuits, their ambition, and their various fortunes. The first triumvirate, B. C. 60, was in the hands of Julius Caesar, Pompey, and Crassus, who at the expiration of their office kindled a civil war. The second and last triumvirate, B. C. 43, was under Augustus, Mark Antony, and Lepidus, through whom the Romans totally lost their liberty. Augustus disagreed with his colleagues, and after he had defeated them, he made himself absolute in Rome. The triumvirate was in full force at Rome for about 12 years. See *Rome*.

**TROUBADOURS OR JONGLEURS.** They first appeared in the ninth century, and were so encouraged by the patronage of the court of Poitou, and by several powerful princes, that they spread in process of time throughout Europe. They cultivated poetry and music, and refinement followed in their steps, greatly improving the taste and temper of the times. To the troubadours we owe Latin and French poetry.

**TROY.** The history of Troas, or Phrygia Minor, is at best but obscure, and more particularly so in times prior to the reign of Dardanus, who came hither from Italy (or Crete) about the year 1506 B. C., and married the daughter of Teucer, prince of the country, whom he succeeded. Dardanus built a city, and named it, after himself, Dardania: Troas, the second in succession from Dardanus, changed the name to Troy; and Ilus, his successor, converted it into Ilium.

|                                                                                                        |            |                                                                                                                                                                                        |            |

| Teucer succeeds his father . . . . .                                                                   | 1502       | Reign of Priam or Podarces . . . . .                                                                                                                                                   | 1224       |
| Dardanus succeeds Teucer, and builds the city of Dardania . . . . .                                    | 1480       | Rape of Helen, by Alexander Paris, son of Priam, 20 years before the sacking of Troy.— <i>Homer's Iliad</i> , book xxiv., line 964, <i>Pope's edit.</i> . . . .                        | 1204       |
| Reign of Erichonius . . . . .                                                                          | 1449       | Commencement of the invasion of the Greeks to recover Helen . . . . .                                                                                                                  | 1133       |
| Reign of Troas, from whom the people are called Trojans . . . . .                                      | 1374       | Troy taken and burned in the night of the 11th of June, i. e. 23d of the month Thargelion.— <i>Parian Marbles</i> . 408 years before the first Olympiad.— <i>Apollodorus</i> . . . . . | 1184       |
| The rape of Ganymede . . . . .                                                                         | 1341       | <i>Aeneas</i> arrives in Italy.— <i>Lenglet</i> . . . . .                                                                                                                              | 1183       |
| Ilus, son of Troas, reigns . . . . .                                                                   | 1314       |                                                                                                                                                                                        |            |
| Reign of Laomedon . . . . .                                                                            | 1260       |                                                                                                                                                                                        |            |
| Arrival of Hercules in Phrygia; Hesione delivered from the sea-monster.— <i>Blair, Usher</i> . . . . . | 1225       |                                                                                                                                                                                        |            |

Some time after the destruction of old Troy, a new city was built, about thirty stadia distant from the old site; but though it bore the same name, and received ample donations from Alexander the Great in his Asiatic expe-

dition, it never rose to much importance, and in the age of Strabo was nearly in ruins.—*Priestley*.

**TROY WEIGHT.** The Romans left their ounce, now our avoirdupois ounce, in Britain.—*Arbuthnot*. The present ounce of this weight was brought from Grand Cairo into Europe, about the time of the Crusades, A. D. 1095. It was first adopted at Troyes, a city of France, whence the name; and is used to weigh gold, silver and precious stones. The troy weight, Scots, was established by James VI. (our James I.) in 1618.

**TROYES, TREATY OF,** between England, France, and Burgundy, whereby it was stipulated that Henry V. should marry Catherine, daughter of Charles VI., be appointed regent of France, and after the death of Charles should inherit the crown, May 24, 1420. The French were driven from Troyes by the allied armies, Feb. 7; it was retaken by Napoleon, Feb. 23; and was finally reoccupied by the allies, March 4, 1814.

**TRUMPET.** Some of the Greek historians ascribe the invention of the trumpet to the Tyrrhenians, and others to the Egyptians. It was in use in the time of Homer, but not at the time of the Trojan war. First torches, then shells of fish, sounded like trumpets, were the signals of primitive wars.—*Potter*. The speaking-trumpet is said to have been used by Alexander the Great in 335 B. C. Trumpets were first sounded before the king in the time of Offa, king of Mercia, A. D. 790. Speaking-trumpets were improved by Kircher in 1652. Made by Salland, 1654. Philosophically explained by Moreland, 1671.

**TUESDAY.** The third day of the week, so called, as it is supposed, from *Tuisco*, or *Tiw*, a Saxon deity, that was particularly worshipped on this day. Tuesday, in Latin *Dies Martis*, was called the third day among the Jews. See *Week Days*.

**TUILERIES, PARIS.** One of the royal palaces of that city, commenced by Catharine de Medici, after the plans of Philibert de Lorme, A. D. 1564; continued by Henry IV.; and finished by Louis XIV. This palace was the scene of great events during the three memorable revolutions, particularly those of 1789 and 1848.

**TULIPS.** They came to England from Vienna, A. D. 1578, and have always been among our most esteemed flowers. They became an object of commerce in the 16th century; and it is recorded in the register of the city of Alenmaer, in Holland, that in the year 1639, 120 tulips, with the offsets, sold for 90,000 florins; and in particular, that one of them, called the *viceroi*, sold for 4203 guilders! The States at last put a stop to this extravagant and ruinous passion for flowers. The tulip-tree, *Liriodendron tulipifera*, was carried to England from America, about 1663.

**TUNBRIDGE-WELLS.** The celebrated springs here were first discovered by Dudley lord North, who had retired into the neighborhood in the last stage of consumption, and became perfectly restored to health by the use of its waters, A. D. 1606.

**TUNIS AND TRIPOLI.** The former stands near where Carthage was built. The territories of both formed part of the celebrated Carthaginian state, and were entirely destroyed by the Romans after the third Punic war, 148 B. C. Besieged by Louis IX. of France, 1270. It remained under African kings till taken by Barbarossa, under Solymán the Magnificent. Barbarossa was expelled by Charles V.; but the country was recovered by the Turks, under Selim II. Taken, with great slaughter, by the emperor Charles V., when 10,000 Christian slaves were set at liberty, 1535. The bey of Tunis was first appointed in 1570. Tunis was reduced by admiral Blake, on the bey refusing to deliver up the British captives, 1656.

**TURBAN.** The head-dress of many of the Eastern nations, consisting of two parts, a cap and a sash, the latter artfully wreathed about the head. The sash of the Turk's turban is white linen; that of the Persians, red woollen. These are the distinguishing marks of their different religions. Sophi, king of Persia, being of the sect of Ali, was the first who assumed the red color; to distinguish himself from the Turks, who are of the sect of Omar.

**TURIN.** The French besieged this city in 1706; but prince Eugene defeated their army, and compelled them to raise the siege. In 1798, the French republican army took possession of Turin, seized all the strong places and arsenals of Piedmont, and obliged the king and his family to remove to the island of Sardinia. In 1799, the French were driven out by the Austrians and Russians; but shortly afterwards the city and all Piedmont surrendered to the French. In 1814, it was delivered up to the allies, when they restored it to the king of Sardinia.

**TURKEY.** The Turks themselves were originally a tribe of Tartars; but by reason of the number of people whom they conquered, and with whom they became incorporated, the modern Turks must be regarded as a mixture of many races of men.

States                                                                                                                        | - May 7, 1830    |
| War with Russia                                                                                                     | - April 26, 1828  | St. Jean d'Acre taken by Ibrahim Pacha son of Mehemet Ali                                                                                        | - July 2, 1832   |
| The emperor Nicholas takes the field against the Turks                                                              | - May 20, 1828    | He defeats the army of the sultan in Syria, with great loss                                                                                      | - July 30, 1832  |
| The Russian emperor arrives before Varna                                                                            | - Aug. 5, 1828    | A series of successes brings the army of Ibrahim Pacha within eighty leagues of Constantinople, and the sultan has recourse to the aid of Russia | - Jan. 1833      |
| Battle of Akhalzic                                                                                                  | - Aug. 24, 1828   | A Russian force enters the Turkish capital                                                                                                       | - April 3, 1833  |
| Fortress of Bajazet taken                                                                                           | - Sept. 9, 1828   | Treaty with Russia, offensive and defensive                                                                                                      | - July 8, 1833   |
| The sultan leaves his capital for the camp, bearing with him the sacred standard                                    | - Sept. 25, 1828  | Office of grand vizier abolished by the sultan                                                                                                   | - March 30, 1838 |
| Dardanelles blockaded                                                                                               | - Oct. 1, 1828    | Insurrection in Wallachia                                                                                                                        | June 18, 1848    |
| Surrender of Varna                                                                                                  | - Oct. 15, 1828   | Mehemet Ali dies at Alexandria                                                                                                                   | Aug. 2, 1849     |

## TURKISH EMPERORS.

|                                                          |                                                                                     |
|----------------------------------------------------------|-------------------------------------------------------------------------------------|
| 1296 Ossman, or Ottoman I.                               | and his uncle restored.                                                             |
| 1325 Orcham, his youngest son.                           | 1622 Mustapha I.; again deposed and succeeded by his grandson.                      |
| 1359 Amurath I., his son; assassinated.                  | 1623 Amurath IV., succeeded by his brother.                                         |
| 1388 Bajazet I., his son; died in prison.                | 1640 Ibrahim, strangled by the Janizaries, succeeded by his son.                    |
| 1397 Isa Belis; killed by his brother.                   | 1655 Mahomet IV., deposed; succeeded by his brother.                                |
| 1403 Solymán; killed by his brother.                     | 1687 Solymán III.; succeeded by his brother.                                        |
| 1410 Musa; strangled by his brother.                     | 1691 Achmet II.; succeeded by his nephew.                                           |
| 1413 Mahomet I.; succeeded by his son.                   | 1695 Mustapha II., eldest son of Mahomet IV., deposed and succeeded by his brother. |
| 1421 Amurath II.; succeeded by his son.                  | 1703 Achmet III.; deposed.                                                          |
| 1451 Mahomet II.; left the empire to his two sons.       | 1730 Mahomet V.; succeeded by his brother.                                          |
| 1481 Co-racius, his grandson; succeeded by his father.   | 1754 Osman II.; succeeded by his brother.                                           |
| 1481 Xemin; obliged to abdicate in favor of his brother. | 1757 Mustapha III.; succeeded by his brother.                                       |
| 1481 Bajazet II.; deposed by his son.                    | 1774 Abellhamet, or Achmet IV.                                                      |
| 1520 Solymán, the Magnificent.                           | 1789 Selim III.                                                                     |
| 1566 Selim II.; succeeded by his son.                    | 1807 Mustapha IV.                                                                   |
| 1512 Selim; succeeded by his son.                        | 1808 Mah. Khan II.                                                                  |
| 1574 Amurath III.; succeeded by his son.                 | 1839 Abdul-Medjid, June 27.                                                         |
| 1595 Mahomet III.; succeeded by his son.                 |                                                                                     |
| 1604 Achmet; succeeded by his brother.                   |                                                                                     |
| 1617 Mustapha I.; succeeded by his nephew.               |                                                                                     |
| 1617 Osman I.; strangled by the Janizaries.              |                                                                                     |

**TURKEYS AND GUINEA FOWLS.** First brought to England A. D. 1524, and to France in 1570. Turkeys are natives of America, and were, consequently, unknown to the ancients. Mr. Pennant has established this fact by various particulars in the history of these birds; evincing that they are natives neither of Europe, Asia, nor Africa; a circumstance since placed beyond controversy, by the researches of Mr. Beckmann. Wild turkeys are met with in flocks of some thousands in parts of the new world, and except being larger do not differ from ours.—*Smyth.*

**TURNING.** According to Pliny this art was known to the ancients, by whom articles of wood, ivory, iron, and gold were formed. The precious vases,

enriched with figures in half relief, which at this day adorn the cabinets of the antiquary and curious, were produced by turning. The lathes made for turnery in England are, many of them, wonderful in their machinery; and in some of our dock-yards, blocks and other materials for our ships of war are now produced by almost instantaneous processes, from rough pieces of oak, by the machinery of Mr. Brunel.

**TURNPIKES.** See *Tolls*. Turnpike-gates for exacting tolls, which were otherwise previously collected, were set up in the reign of Charles II., 1663.—*Chalmers*. The statutes relating to turnpike-roads are very numerous.

**TUSCANY.** This country was created into a dukedom, A. D. 1530. It came into the Austrian family in 1737. It was seized by the French in March 1799. Ferdinand IV., the grand duke, was dispossessed by France, and his dominions given to Louis, son of the king of Spain, with the title of king of Etruria, February 26, 1801. He died June 30, 1803; and soon afterwards this state was transformed into an appendage to the crown of Italy; but was restored to Austria in 1814. The present grand-duke Leopold II. (cousin to the emperor), ascended June 18, 1824.

|                                                           |                                                                             |
|-----------------------------------------------------------|-----------------------------------------------------------------------------|
| Disturbances and revolutions of 1847-8                    | The chambers meet.                                                          |
| began at Leghorn - Sept. 2, 1847                          | Provisional government proclaimed, Feb. 9, 1849                             |
| Grand-duke grants a national militia.                     |                                                                             |
| The grand-duke granted a liberal constitution - Feb. 1848 | Leghorn attacked and carried by Tuscan troops - May 10, 1849                |
| Insurrection at Leghorn - Sept. 5, 1848                   | The grand-duke re-enters Florence and resumes his authority - July 27, 1849 |
| The grand-duke flees from Florence                        |                                                                             |

**TWELFTH-DAY.** The church-festival called the Epiphany, or manifestation of Christ to the Gentiles. See *Epiphany*. The custom of drawing king and queen on this day was borrowed from the Greeks and Romans, who, on the tabernacle, or Christmas festivals, drew lots for kings, by putting a piece of money in the middle of a cake, which whoever found, was saluted as king.

**TYLER, WAT, HIS INSURRECTION.** It arose in the opposition of the people to the poll-tax, which was levied in 1378. Owing to the indecent rudeness of one of the collectors to Tyler's daughter, with a view to prove her of sufficient age (fifteen) to pay the tax (Tyler striking him dead for the offence), the provoked populace gathered upon Blackheath to the number of 100,000 men. The king, Richard II., invited Tyler to a parley at Smithfield, where the latter addressed the king in a somewhat menacing manner, now and again lifting up his sword. His insolence raised the indignation of the mayor, Walworth, who stunned Tyler with a blow of his mace, and one of the knights attending the king dispatched him. The death of their leader awed the multitude, to whom Richard promised a charter, and they dispersed, 1381.

**TYRE.** This great city was first built by Agenor. Another city was built 1257 B. C. It was besieged by the Assyrians, 719 B. C., and they retired from before it, after a siege of upwards of five years, 713 B. C. Taken by Nebuchadnezzar, 572 B. C., and the city demolished, when the Tyreans removed to an opposite island, and built a new and magnificent city. It was taken by Alexander with much difficulty, and only after he had joined the island to the continent by a mole, after a siege of seven months, Aug. 20, 332 B. C.—*Strabo*. Two of the most atrocious acts in the history of human crimes were the siege and destruction of Tyre by Alexander, and of Jerusalem by Titus. Histories which laud such monsters ought to be consigned to the flames.—*Phillips*.

**TYRE, ERA OF.** Began on the 19th of October, 125 B. C., with the month Hyperbeteus. The month was the same as those used in the Grecian era, and the year is similar to the Julian year. To reduce this era to ours, sub-

tract 124; and if the given year be less than 125, deduct it from 125, and the remainder will be the year before Christ.

## U.

**UBIQUARIANS.** A sect of Lutherans which arose and spread through Germany and other countries, and who believed the natural body of Christ to be every where present. This sect arose under Brentius, about A. D. 1540.

**UKRAINE.** The name signifies a frontier. By a treaty between Russia and Poland, these states divided the Ukraine in 1693. Poland having the west side of the Dnieper, and Russia the east. But the whole country (the borders of Poland, Russia, and Little Tartary) was assigned to Russia by the treaty of Partition in 1795.

**ULM, PEACE OF,** by which Fredrick V. lost Bohemia (having been driven from it previously), July 3, 1620. Ulm was taken by the French in 1776. Great battle between the French and Austrians, in which the latter, under general Mack, were defeated with dreadful loss, by marshal Ney, whose victory was consummated by the surrender of Ulm, and 36,000 men, the flower of the Austrian army, Oct. 17, 19, 1805. From this time the ruin of the confederates, and grandeur and power of Napoleon, had their date.

**UMBRELLA.** Described in early dictionaries as "a portable pent-house to carry in a person's hand to screen him from violent rain or heat." Umbrellas are very ancient: it appears, by the carvings at Persepolis, that umbrellas were used at very remote periods by the Eastern princes. Niebuhr, who visited the southern parts of Arabia, informs us that he saw a great prince of that country returning from a mosque, preceded by some hundreds of soldiers, and that he and each of the princes of his numerous family caused a large umbrella to be carried by his side. The old china-ware in our pantries and cupboards show the Chinese shaded by an umbrella. It is said that the first person who used an umbrella in the streets of London was the benevolent Jonas Hanway, who died in 1786.\*

**UNCTION, EXTREME.** Unction was frequent among the Jews. At their feasts, and other times of rejoicing, they anointed sometimes their whole body, and at other times their head or feet only: their kings and high priests were anointed at their inauguration; they also anointed the vessels of the temple to consecrate them. None of the emperors, it is said, were anointed before Justinian, Aug. 1, A. D. 527. As a religious rite, extreme unction was in common use, A. D. 550. St. Asaph was the first who received unction from the pope, 590.—*Bayle*. It is administered in dying cases as *extreme unction*. See *Anointing*.

**UNIFORMS.** Military uniforms were first used in France, "in a regular man-

---

\* For a long while it was not usual for men to carry them without incurring the brand of effeminacy. At first, a single umbrella seems to have been kept at a coffee-house for extraordinary occasions—lent as a coach or chair in a heavy shower, but not commonly carried by the walkers. The *Female Tatler* advertises "The young gentleman belonging to the Custom-house who, in fear of rain, borrowed the umbrella from *Wilks's Coffee-house*, shall the next time be welcome to the maid's patters." As late as 1778, one John Macdonald, a footman, who wrote his own life, informs us, that he had "a fine silk umbrella, which he brought from Spain; but he could not with any comfort to himself use it, the people calling out 'Frenchman! why don't you get a coach!'" The fact was, the hackney-coachmen and chairmen, joining with the true *esprit de corps*, were clamorous against this portentous rival. The footman in 1778, gives us some farther information. "At this time, there were no umbrellas worn in London, except in noblemen's and gentlemen's houses, where there was a large one hung in the hall to hold over a lady if it rained, between the door and her carriage." This man's sister was compelled to quit his arm one day from the abuse he drew down on himself and his umbrella. But he adds, that "he persisted for three months, till they took notice of this novelty. Foreigners began to use theirs, and then the English. Now it is become a great trade in London."—*New Monthly Magazine*.

ner," by Louis XIV., 1668. In England the uniform was soon afterwards adopted. For an account of naval uniforms, see *Naval Uniforms*.

**UNIFORMITY, ACT OF.** An Act of Uniformity passed 1 Elizabeth, 1559. But the statute known as the Act of Uniformity was passed 13 and 14 Charles II., 1661, 2. It enjoined uniformity in matters of religion, and obliged all clergy to subscribe to the thirty-nine articles, and use the same form of worship, and same book of common prayer. This act caused upwards of 2000 conscientious ministers to quit the Church of England, and take their lot among the dissenters, who thereby received so large an addition to their numbers that they may be considered as the fathers of the dissenting interest.

**UNION OF THE CROWNS.** The crowns of England and Scotland were united by the accession of James VI. of Scotland as James I. of England, March 24, 1603. The legislative union of the two kingdoms was attempted in 1604, but the project failed. It was again attempted, but again failed, in 1670. In the reign of Anne it was once more tried, and in the end with better success. Commissioners were appointed, the articles discussed, and, notwithstanding great opposition made by the Tories, every article in the union was approved by a great majority, first in the House of Commons, and afterwards by the peers, July 22, 1706, and ratified by the Scottish parliament, Jan. 16, 1707. It became a law, May 1, same year.

**UNION WITH IRELAND.** The UNION OF GREAT BRITAIN AND IRELAND, proposed in the Irish parliament, Jan. 22, 1799. The act passed in the British parliament, July 2, 1800.

**UNITARIANS.** This sect began A. D. 1550. The Unitarians believe in and worship only one self-existent God, in opposition to those who, besides the Father, worship his Son Jesus. They arose under Servetus. This learned man, excited by the discussions of the reformers, began to read the Scriptures, and conducted his researches with so free a spirit, that he printed a tract in disparagement of the orthodox doctrine of the Trinity. In 1533, proceeding to Naples through Geneva, Calvin induced the magistrates to arrest him on a charge of blasphemy and heresy: and refusing to retract his opinions, he was condemned to the flames, which sentence was carried into execution, October 27, 1553. Servetus is numbered among those anatomists who made the nearest approach to the doctrine of the circulation of the blood, before Harvey established that doctrine. In the United States, especially in New England, the Unitarians form a large, intelligent, and influential portion of the community. The celebrated philanthropist and eloquent writer, Dr. W. E. Channing, was a Unitarian.

**UNITED KINGDOM OF GREAT BRITAIN AND IRELAND.** The British realm was so named, on the union with Ireland, Jan. 1, 1801, when a new imperial standard was hoisted on the Tower of London and Castle of Dublin. See *Union*.

**UNITED PROVINCES, THE SEVEN.** Established by throwing off the Spanish yoke, A. D. 1579. The revolted states, with William, prince of Orange, at their head, after long deliberations at the Hague, published an edict excluding king Philip from any sovereignty, right, or authority over the Netherlands. The deputies from the provinces of Holland, Zealand, Utrecht, Friesland, Groningen, Overysse, and Guelderland, met at Utrecht, Jan. 23, 1579; signed a treaty for their mutual defence; appointed the prince of Orange as their stadtholder; and formed the alliance ever since known as the "Union of Utrecht," the basis of the commonwealth so renowned by the appellation of the "Seven United Provinces." Their independence was acknowledged in 1607. United to France in 1796. Louis Bonaparte was crowned king by the authority of Napoleon, June 5, 1806. Louis abdicated.

July 1, 1810. Restored to the house of Orange, and Belgium annexed Nov. 18, 1813. Belgium separated from Holland, and Leopold of Saxe-Coburg elected king, July 12, 1831. See *Holland* and *Belgium*.

UNITED STATES OF AMERICA. See *America*; and the separate States, *Maine*, &c. The first colonial Congress, for the redress of grievances, consisting of delegates from the several colonies, met at New York, June 7, 1765. The Continental Congress at Philadelphia adopts Declaration of Rights, 1774; revolutionary war commenced at Lexington, April 19, 1775. See *War*. Declaration of Independence adopted by the Congress, July 4, 1776. The title of "*United States*" adopted by Congress, Sept. 9, 1776. Independence acknowledged by Great Britain in the Treaty of Paris, Sept. 23, 1783. Constitution adopted Sept. 17, 1787. War against Great Britain declared by Congress, June 19, 1812. Treaty of peace signed at Ghent, Dec. 3, 1814. War with Mexico commenced April, 1846. Treaty of peace signed May 30, 1848. See *Wars of the United States*, &c.; also *Naval Battles*; also *Administrations*, *Exports*, *National Debt*, *Treaties*, *Population*, &c. [The various occurrences in the history of the United States are given more at large under that head in the *Tabular Views* in this vol., page 122, *et. seq.*]

UNIVERSALISTS. Those who believe in the final salvation of all men. Sects of Universalists existed in various countries and ages. The learned and celebrated Dr. Tillotson appears from some of his sermons to have adopted the opinion of this universal salvation.—*Johnson*. Certain it is, about 1691, he entertained a design for forming a new book of homilies; and a sermon which he preached before the queen (Mary) against the absolute eternity of hell torments, involved this doctrine.

UNIVERSITIES. They sprang from the convents of regular clergy, and from the chapters of cathedrals in the church of Rome. The most ancient universities in Europe are those of Oxford, Cambridge, Paris, Salamanca, and Bologna. The British universities were vested with the lands of ex-Catholics, and permitted to send members to Parliament by James I. The following are the principal universities in Europe:

|                                                                           |        |                                   |        |
|---------------------------------------------------------------------------|--------|-----------------------------------|--------|
| Aberdeen founded                                                          | - 1494 | Dublin                            | - 1591 |
| Abo, Finland                                                              | - 1640 | Edinburgh, founded by James VI.   | - 1582 |
| Aix, 1409; re-established                                                 | - 1603 | Erfurt, Thuringia; enlarged       | - 1390 |
| Alba Julia, Transylvania                                                  | - 1629 | Florence, Italy; enlarged         | - 1438 |
| Altorf, Franconia                                                         | - 1581 | Frankfort-on-the-Oder             | - 1506 |
| Andrew's, St., Scotland                                                   | - 1411 | Fribourg, Germany                 | - 1460 |
| Angers, chiefly law                                                       | - 1393 | Geneva                            | - 1365 |
| Anjou, 1349; enlarged                                                     | - 1364 | Glasgow                           | - 1450 |
| Avignon, France                                                           | - 1388 | Göttingen                         | - 1734 |
| Bamberg                                                                   | - 1585 | Granada, Spain                    | - 1537 |
| Baale, Switzerland                                                        | - 1458 | Gripswald                         | - 1547 |
| Berlin                                                                    | - 1812 | Groningen, Friesland              | - 1614 |
| Besançon, Burgundy                                                        | - 1540 | Halle, Saxony                     | - 1694 |
| Bologna, Italy                                                            | - 423  | Heidelberg                        | - 1346 |
| Bruges, French Flanders                                                   | - 1665 | Ingoldstadt, Bavaria              | - 1573 |
| Caen, Normandy                                                            | - 1417 | Jena, or Sala, Thuringia          | - 1548 |
| Cambridge, began, 626—according to<br>others, 900. See <i>Cambridge</i> . |        | Kiel, Holstein                    | - 1665 |
| Cambridge, New England, projected                                         | - 1630 | King's College, London            | - 1829 |
| Cologne, in Germany, re-founded                                           | - 1389 | Königsberg, Prussia               | - 1544 |
| Compostella, Spain                                                        | - 1517 | Leipsic, Saxony                   | - 1409 |
| Coimbra, Portugal                                                         | - 1391 | Leyden, Holland                   | - 1575 |
| Copenhagen, 1497; enlarged                                                | - 1539 | Lima, in Peru                     | - 1614 |
| Cordova, Spain                                                            | - 968  | Lisbon, 1290; removed to Coimbra  | - 1391 |
| Cracow, Poland, 700; enlarged                                             | - 1402 | London University                 | - 1826 |
| Dijon, France                                                             | - 1722 | Louvaine, Flanders, 926; enlarged | - 1427 |
| Dillingen, Swabia                                                         | - 1565 | Lyons, France                     | - 830  |
| Dole, Burgundy                                                            | - 1426 | Mechlin, Flanders                 | - 1440 |
| Douay, French Flanders                                                    | - 1562 | Mentz                             | - 1482 |
| Dresden, Saxony                                                           | - 1694 | Montpelier                        | - 1196 |
|                                                                           |        | Moscow                            | - 1754 |

UNIVERSITIES IN UNITED STATES. See *Colleges.*

**UNKNOWN TONGUE.** A disturbance in the Rev. Mr. Irving's chapel, in London, occasioned by a Miss Hall interrupting a discourse on prophecy, by holding forth in what was denominated the "*Unknown Tongue.*" She was removed to the vestry. On the same evening, a Mr. Taplin rose, and commenced, with the permission of Mr. Irving, a violent harangue in the same unknown language. A scene of most alarming confusion ensued, the whole congregation rising from their seats in affright, and the females screaming, while Mr. Irving listened with the most profound attention to the ravings of the *inspired teacher*, October 16, 1831. From this period, much of the same mummery, followed by a translation into English rhapsody, was played off; and large crowds assembled, not on Sundays only, but as early as six o'clock on the mornings of week-days also, some to be edified by prophetic spirits, and some to laugh at the ravings of fanatics.—*Ann. Register.*

**URANUS.** This planet, with its satellites, was discovered by Herschel, by whom it was called the Georgian planet, in honor of his majesty George III. The name of Herschel is also given to it, in compliment to its illustrious discoverer, by the astronomers of Great Britain; but by foreigners it is usually called Uranus. It is about twice as distant from the sun as the planet Saturn; and was discovered on the 13th March, 1781.

**USURY.** Forbidden by parliament, 1341. Two shillings per week were given for the loan of twenty, in 1260. This was at the rate of 43l. 6s. 8d. per annum for 100l., which was restrained by an act, 1275, against the Jews. Until the fifteenth century no Christians were allowed to receive interest of money, and Jews were the only usurers, and, therefore, often banished and persecuted (see *Jews*). By the 37th of Henry VIII. the rate of interest was fixed at 10 per cent., 1545. This statute confirmed by the 13th Elizabeth, 1570. Reduced to 8 per cent., 21 James I., 1623, when the word *interest* was first used for the word *usury*. Reduced to 5 per cent., 13 Anne, 1714. See *Interest*.

**UTRECHT, TREATY OF, &c.** The Union of the Seven United Provinces began here (see *United Provinces*), A. D. 15 9. The celebrated Treaty of Utrecht, which terminated the wars of queen Anne, was signed by the ministers of Great Britain and France, as well as of all the other allies, except the ministers of the empire. The most important stipulations of this treaty were the security of the Protestant succession in England, the disuniting the

French and Spanish crowns, the destruction of Dunkirk, the enlargement of the British colonies and plantations in America, and a full satisfaction for the claims of the allies, April 11, 1713. Utrecht surrendered to the Prussians, May 9, 1787; and was possessed by the French, Jan. 18, 1795.

## V.

**VACCINE INOCULATION.** *Variola vaccina*, discovered by Dr. Jenner. He made the first experiment in vaccination, by transferring the *pus* from the pustule of a milk-maid, who had caught the cow-pox from the cows, to a healthy child, in May 1796. Dr. Jenner subsequently published the result to the world, and the cure became general in 1799. The cure was introduced Jan. 21, in that year. The genuine cow-pox appears, in the form of vesicles, on the teats of the cow. Dr. Jenner received 10,000*l.* for the discovery from parliament in 1802; and the first national institution for the promotion of the cure, called the Royal Jennerian Institution was founded Jan. 19, 1803. Vaccination was practised throughout all Europe previously to 1816.

**VAGRANTS.** After being whipped, a vagrant was to take an oath to return to the place where he was born, or had last dwelt for three years, 22 Henry VIII., 1530. A vagrant a second time convicted, to lose the upper part of the gristle of his right ear, 27 Henry VIII., 1535; and a third time convicted, death. By 1 Edward III., a vagabond to be marked with a V. and be a slave for two years. Vagrants were punished by whipping, jailing, boring the ears, and death for a second offence, 14 Elizabeth, 1571. The milder statutes were those of 17 George II.; 32, 35, and 59 George III. The laws against vagrancy are still very severe in England, and operate unequally as respects the character of the offender.

**VALENCIA.** Its university was founded, it is said, in the 13th century, and was revived in 1470. Valencia was taken by the earl of Peterborough in 1705, but was soon lost again. It was taken from the Spaniards by the French, under Suchet, with a garrison of more than 16,000 men, and immense stores, Jan. 9, 1812.

**VALENCIENNES, SIEGE OF.** This city was besieged from May 23 to July 14, when the French garrison surrendered to the allies under the duke of York, 1793. It was retaken, together with Condé, by the French, on capitulation, the garrison and 1100 emigrants made prisoners, with immense stores, viz. —300 pieces of cannon, one million pounds of gunpowder, eight millions of florins in specie, six millions of livres, 1000 head of cattle, and vast quantities of other provisions, Aug. 30, 1794.

**VALENCAY, TREATY OF,** between Napoleon of France and Ferdinand VII. of Spain, whereby the latter was put in full possession of that kingdom, on agreeing to maintain its integrity. This celebrated treaty was signed December 8, 1813.

**VALENTINE'S DAY.** The practice of "choosing a Valentine," as it is called, on this day, is too well known to need explanation. The origin of the custom has been much controverted; it is indisputably of very ancient date. Valentine was a presbyter of the church, who suffered martyrdom under Claudius II. at Rome, A.D. 271. It is said that on this day the birds choose their mates; whence, probably, came the custom of young people choosing Valentines or particular friends on the feast of Valentine.

**VALENTINIANS.** This sect of enthusiasts were followers of the opinions of one Valentine, a priest, who, upon being disappointed of a bishopric,

forsook the Christian faith, and published that there were thirty gods and goddesses, fifteen of each sex, which he called *Æones*, or *Ages*. He taught in the second century, and published a gospel and psalms: to these his followers added several other errors, declaring there was no obligation to suffer martyrdom; some declared against baptism, and others practised it in a peculiar manner, and all indulged themselves in licentiousness.

**VANCOUVER'S VOYAGE.** Captain Vancouver served as a midshipman under captain Cook; and a voyage of discovery, to ascertain the existence of any navigable communication between the North Pacific and North Atlantic oceans being determined on, he was appointed to command it. He sailed in 1790, and returned September 24, 1795. He compiled an account of this voyage of survey of the Northwest coast of America, and died in 1798.

**VANDALS.** The Vandal nations began their ravages in Germany and Gaul, A. D. 406-414. Their kingdom in Spain was founded in 411. They invaded and conquered the Roman territories in Africa, under Genseric, who took Carthage, Oct. 24, 439. They were driven out, and attacked in turn by the Saracen Moors. The Vandali overran a vast portion of Europe and spread devastation wherever they appeared.

**VAN DIEMEN'S LAND.** This country was discovered by Tasman in 1633. It was visited by Furneaux in 1773; by captain Cook in 1777; and was deemed the south extremity of New Holland until 1799. A British settlement was established on the south-east part, within the mouth of the Derwent, and named Hobart Town, which is the seat of government, 1804.

**VASSALAGE.** See *Feudal Laws* and *Villanage*. Vassalage was introduced by the Saxons, and its slavery increased under William I. Under the Norman princes there were vassal boors and free boors; those who were sold with the land, and those who were free to choose an employer. To this day the distinction prevails in some countries, and particularly in Russia, where the vassal boors are divided into classes; as boors belonging to the sovereign; mining boors, who are sold with the property; and private boors, who belong to the nobility, and perform the labor on their estates. In England, a vassal did homage to a lord on account of land, &c., held of him in fee. Vassalage was abolished in Hungary in October 1785; in Holstein, in May 1797; and Courland, in Sept. 1818.

**VATICAN.** The magnificent palace of the pope at Rome, adjoining St. Peter's said to contain 7000 rooms. In this palace, the library, founded A. D. 1448, is noted for its collection of MSS., but the number of books is comparatively moderate. See *Libraries*. The phrase "thunders of the Vatican" was first used by Voltaire, 1748.

**VENEZUELA.** When the Spaniards landed here in 1499, they observed some huts built upon piles, in an Indian village named Cora, in order to raise them above the stagnated water that covered the plain; and this induced them to give it the name of Venezuela, or Little Venice. This state declared in congressional assembly the sovereignty of its people, in July 1814. It separated from the federal union and declared itself sole and independent in 1830. See *Colombia*.

**VENI, VIDI, VICI.**—"I came, I saw, I conquered." This well-known sentence formed the whole of Cæsar's dispatch to the Roman senate when he vanquished Pharnaces, king of Cimmerian Bosphorus, 47 B. C. See *Zela, Battle of*.

**VENICE.** So called from the Venetii who inhabited its site, when it was made a kingdom by the Gauls, who conquered it about 356 B. C. Marcellus con-

gated it for the Roman republic, and slew the Gaulish king, 221 B. C. The islands on which the city is built began to be inhabited, A. D. 421, by Italians, who fled here as a place of safety from the Goths, and other barbarous nations, when they ravaged Italy. The first house was erected on the morass by Entinopus, by whom the people of Padua were assisted in building the eighty houses which first formed the city.—*Priestley*. Venice was first governed by a doge (Anafesto Paululio), A. D. 697. The republic was not completely founded until 803. The city reduced to ashes, 1101. The ceremony of the doges of Venice marrying the Adriatic was instituted by pope Alexander III. in 1173. Venice carried on a vast commerce until the discovery of America, and a passage to the East Indies by the Cape, gave it another direction, about 1500. By the treaty of Campo Formio, the territory to the north and west of the Adige were ceded to Austria, and the rest was annexed to what the French then styled the Cisalpine Republic, 1797. This disposition was altered by the treaty of Presburg, and the whole country annexed to the kingdom of Italy, 1805. Venice returned under the power of Austria in 1814. The city declared a free port, Jan. 24, 1830.

**VENTRILOQUISM.** Persons who had this art were by the Latins called Ventriloqui, and by the Greeks, Engastrimythoi, *i. e.* people that speak out of their bellies, or who have the art of throwing out the voice in an extraordinary manner. Exhibitors of this kind have appeared in England in various ages, but some of extraordinary capabilities in their art exhibited in the last century. Mr. Thomas King is said to have been the first man whose experimental philosophy, shown in this line, excited great wonder, about 1716. One of the most accomplished professors of ventriloquism that ever appeared in France or England, was M. Alexandre, about 1822.

**VENUS.** This planet's transit over the sun, it was ascertained by Horrox, in 1633, would take place Nov. 24, 1639. He was the first who predicted, or rather calculated this passage, from which he deduced many useful observations. Maskelyne was sent to St. Helena to observe her transit, in Jan. 1761. Captain Cook made his first voyage, in the *Endeavor*, to Otaheita, to observe a transit of Venus, in 1769. See NOTE to article *Cook's Voyages*. The diurnal rotation of Venus was discovered by Cassini in 1712. This planet will not be again so brilliant as in 1769 to our globe until 1874.

**VERMONT,** one of the United States, first settled by colonists from Massachusetts, 1723. The territory was claimed by New Hampshire, from 1741 to 1764: claimed also by New-York, and granted to that colony by parliament in 1664. Owing to these conflicting claims, the state was not admitted into the confederacy during the Revolution, but it still performed its part in that struggle. The British defeated at Bennington by gen. Stark, in 1777. Claims of New-York withdrawn on payment of \$50,000, in 1790. The state admitted into the Union, 1791. Population in 1790, was 85,589; in 1810, 217,895; in 1830, 280,679; in 1840, 291,948.

**VERSAILLES, PALACE OF.** In the reign of Louis XIII., Versailles was only a small village, in a forest thirty miles in circuit; and here this prince built a hunting-seat in 1630. Louis XIV., in 1687, enlarged it into a magnificent palace, which was finished in 1708, and was the usual residence of the kings of France till 1789, when Louis XVI. and his family were removed from it to Paris. Louis Philippe appropriated the whole of the immense building

to a grand national museum of paintings and statues, dedicated *à tous les gloires de France*; and freely opened to the public.

**VERSAILLES, PEACE OF.** The definitive treaty of peace between Great Britain and the United States, signed at Paris; when the latter power was admitted to be sovereign and independent. On the same day, the definitive treaty was signed at Versailles between Great Britain, France, and Spain, Sept. 3, 1783. In pursuance of the treaty of Versailles, Pondicherry and Carical, with the former possessions in Bengal, were restored to France. Trincomalle at the same time restored to the Dutch.

**VERSE, BLANK.** Blank verse and the heroic couplet, now in general use for grave or elevated themes, are both of comparatively modern date. Surrey translated part of *Virgil's Æneid* into blank verse, which is the first composition of the kind, omitting tragedy, extant in the English language; and the other measure was but little affected till the reign of Charles II. The verse previously used in our grave compositions was the stanza of eight lines, the *ottava rima*, as adopted with the addition of one line by Spenser (in his *Faery Queen*), who probably borrowed it from Ariosto and Tasso, the Italian language being at that time in high repute. Boccaccio first introduced it into Italy in his heroic poem *La Teseide*, having copied it from the old French *chansons*.—*Metropolitan*. Trissino is said to have been the first introducer of blank verse among the moderns, about 1508.—*Vossius*. See *Poetry*.

**VESTA.** The planet Vesta (the ninth) was discovered by Dr. Olbers, of Bremen, on March 28, 1807. She appears like a star of the sixth magnitude.—*Annual Register*.

**VESTALS.** Priestesses of the goddess Vesta, who took care of the perpetual fire consecrated to her worship. This office was very ancient, as the mother of Romulus was one of the vestals. Æneas is supposed to have first chosen the Vestals. Numa, in 710 B. C., first appointed four, to which number Tarquin added two. They were always chosen by the monarchs; but after the expulsion of the Tarquins, the high-priest was intrusted with the care of them. As they were to be virgins, they were chosen young, from the age of six to ten; and if there was not a sufficient number that presented themselves as candidates for the office, twenty virgins were selected, and they upon whom the lot fell were obliged to become priestesses. The vestal Minutia was buried alive for violating her virgin vow, 337 B. C. The vestal Sextilia was buried alive for incontinence, 274 B. C.; and the vestal Cornelia Maximiliana on the same charge, A. D. 92.—*Bibliothèque Universelle*.

**VESUVIUS, MOUNT.** The dreadful eruption of Mount Vesuvius, when it emitted such a quantity of flame and smoke that the air was darkened, and the cities of *Pompeii* and *Herculaneum* were overwhelmed by the burning lava, A. D. 79. More than 250,000 persons perished by the destruction of those cities; the sun's light was totally obscured for two days throughout Naples; great quantities of ashes and sulphureous smoke were carried not only to Rome, but also beyond the Mediterranean into Africa; birds were suffocated in the air and fell dead upon the ground, and the fishes perished in the neighboring waters, which were made hot and infected by it: this eruption proved fatal to Pliny the naturalist. Herculaneum was discovered in 1737, and many curious articles have been dug from the ruins since that time; but every thing combustible had the marks of having been burned by fire. Numerous eruptions have occurred, causing great devastation and loss of lives. In 1631 the town of Torre del Greco, with 4000 persons, and a great part of the surrounding country, were destroyed. One of the most dreadful eruptions ever known took place suddenly, Nov. 24, 1759. The violent burst in 1767 was the thirty-fourth from the time of Titus, when

Pompeii was buried. One in 1794 was most destructive: the lava flowed over 5000 acres of rich vineyards and cultivated lands, and the town of Torre del Greco was a second time burned; the top of the mountain fell in, and the crater is now nearly two miles in circumference. There have been several eruptions since.

**VETOES OF THE PRESIDENTS OF THE UNITED STATES.** The power of cancelling acts of Congress by executive veto, was exercised as follows:—by Washington, twice; Madison, four times; Monroe, once; Jackson, five times; Tyler, three times; Polk, twice. Bill relating to steam-vessels in the navy vetoed by president Tyler, and afterwards passed by vote of two thirds of both houses, and became a law: the first instance of the kind, February 20, 1845. River and Harbor bill, vetoed by president Polk, August 3, 1846. French Spoliation Indemnity bill, by the same, Aug. 8, 1846.

**VIENNA.** The former capital of the German empire, and from 1806 the capital of the Austrian dominions only. Vienna was made an imperial city in 1136, and was walled and enlarged with the ransom paid for Richard I. of England, 40,000*l.*, in 1194. Besieged by the Turks under Solymán the Magnificent, with an army of 300,000 men: but he was forced to raise the siege with the loss of 70,000 of his best troops, 1529. Again besieged in 1683, when the siege was raised by John Sobieski, king of Poland, who totally defeated the Turkish army of 100,000, which had cannonaded the city from July 24 to the beginning of November. Vienna was taken by the French, under prince Murat, Nov. 14, 1805; and evacuated January 12, following. They again captured it, May 13, 1809; but restored it once more on the conclusion of peace between the two countries, Oct. 14, same year. Conference of the ministers of the allies and France, September 28, 1814. Congress of sovereigns, Oct. 2, 1814. See *Austria* and *Hungary*. See next articles.

**VIENNA, TREATY OF, WITH SPAIN.** The celebrated treaty signed between the emperor of Germany and the king of Spain, by which they confirmed to each other such parts of the Spanish dominions as they were respectively possessed of, and by a private treaty the emperor engaged to employ a force to procure the restoration of Gibraltar to Spain, and to use means for placing the Pretender on the throne of Great Britain. Spain guaranteed the Pragmatic Sanction, April 30, 1725.

**VIENNA, TREATY OF ALLIANCE,** between the emperor of Germany, the king of Great Britain, and Holland, by which the Pragmatic Sanction was guaranteed, and the disputes as to the Spanish succession terminated (Spain acceded to the treaty on the 22d of July); signed March 16, 1731.

**VIENNA, TREATY OF WITH FRANCE.** A definitive treaty of peace between the emperor of Germany and king of France, by which the latter power agreed to guarantee the Pragmatic Sanction, and Lorraine was ceded to France; signed Nov. 18, 1738.

**VIENNA, PEACE OF,** between Napoleon of France and Francis (II. of Germany) I. of Austria. By this treaty Austria ceded to France the Tyrol, Dalmatia, and other territories, which were shortly afterwards declared to be united to France under the title of the Illyrian Provinces, and engaging to adhere to the prohibitory system adopted towards England by France and Russia, October 14, 1809.

**VIENNA, TREATIES OF.** The treaty of Vienna between Great Britain, Austria, Russia, and Prussia, confirming the principles on which they had acted by the treaty of Chaumont, March 1, 1814; signed March 23, 1815. The treaty of Vienna between the king of the Low Countries on the one part, and Great Britain, Russia, Austria, and Prussia, on the other, agreeing to

the enlargement of the Dutch territories, and vesting the sovereignty in the house of Orange, May 31, 1815. The treaty of Vienna: Denmark cedes Swedish Pomerania and Rugen to Prussia, in exchange for Lauenburg, June 4, 1815. The federative constitution of Germany signed at Vienna, June 8, 1815.

**VILLAIN.** The name of a vassal under the Norman princes, his hard labor being the tenure by which he lived upon the land. Of and pertaining to the *vill* or lordship; was a servant during life, and was devisable as chattels in the feudal times. Queen Elizabeth gave the principal blow to this kind of severe service, by ordering her bondsmen of the western counties to be made free at easy rates, A. D. 1574.—*Stowe's Chron.*

**VIMEIRA, BATTLE OF,** between the British, under sir Arthur Wellesley, and the whole of the French and Spanish forces in Portugal, under marshal Junot, duke of Abrantes, whom the British signally defeated, August 21, 1808. For this victory the British hero and the officers and soldiers under his command were voted the thanks of parliament, the first of many similar honors that marked sir Arthur's (now duke of Wellington's) triumphant career.

**VINCENT'S, St.** This was long a neutral island; but at the peace of 1763, the French agreed that the right to it should be vested in the English. The latter, soon after, engaged in a war against the Caribs, on the windward side of the island, who were obliged to consent to a peace, by which they ceded a large tract of land to the British crown. The consequence of this was, that in 1779 they greatly contributed to the reduction of this island by the French, who, however, restored it in 1783. In 1795 the French landed some troops, and again instigated the Caribs to an insurrection, which was not subdued for several months. The great eruption of the Soufrier mountain, after the lapse of nearly a century, occurred in 1812.

**VINE.** The vine was known to Noah. A colony of vine-dressers from Phœcia, in Ionia, settled at Marseilles, and instructed the South Gauls in tillage, vine-dressing, and commerce, about 600 B. C. Some think the vines are aborigines of Languedoc, Provence, and Sicily, and that they grew spontaneously on the Mediterranean shores of Italy, France, and Spain. The vine was carried into Champagne, and part of Germany, A. D. 279. The vine and sugar-cane were planted in Madeira in 1420. It was planted in England in 1552; and in the gardens of Hampton-court palace is an old and celebrated vine, said to surpass any known vine in Europe. See *Grapes*, and *Wine*.\*

**VINEGAR.** Known nearly as soon as wine. The ancients had several kinds of vinegar, which they used for drink. The Roman soldiers were accustomed to take it in their marches. The Bible represents Boaz, a rich citizen of Bethlehem, as providing vinegar for his reapers, into which they might dip their bread, and kindly inviting Ruth to share with them in their repast: hence we may infer that the harvesters, at that period, partook of this liquid for their refreshment; a custom still prevalent in Spain and Italy. It is conjectured that the vinegar which the Roman soldiers offered to our Saviour at his crucifixion was that which they used for their own drinking.

---

\* The following is a tradition in relation to the vine:—When Adam planted the first vine, and left it, Satan approached it, and said, "Lovely plant! I will cherish thee;" and thereupon taking three animals, a lamb, a lion, and a hog, he slayed them at the root of the tree, and their blood has been imbibed by the fruit to this day. Thus, if you take one goblet of wine, you are cheered by its influence, yet are mild and docile as the lamb; if you take two goblets, you become furious, and rave and bellow like the lion; and if you drink of the third goblet, your reason sinks, and, like the hog, you wallow in the mire.—*Ashie*.

There was, however, a kind of potent vinegar, which was not proper for drinking till diluted.

**VIOL AND VIOLIN.** As the lyre of the Greeks was the harp of the moderns, so the viol and vielle of the middle ages became the modern violin. The viol was of various sizes formerly, as it is at present and was anciently very much in use for chamber airs and songs. That of three strings was introduced into Europe by the jugglers of the thirteenth century. The violin was invented towards the close of the same century.—*Abbé Lenglet*. The fiddle, however, is mentioned as early as A. D. 1200, in the legendary life of St. Christopher. It was introduced into England, some say, by Charles II.

**VIRGIN.** The Assumption of the Virgin is a festival in the Greek and Latin churches, in honor of the miraculous ascent of Mary into heaven, according to their belief, August 15, A. D. 45. The Presentation of the Virgin, is a feast celebrated November 21, said to have been instituted among the Greeks in the eleventh century; its institution in the West is ascribed to Gregory XI., 1372. A distinguished writer says: "The Indian incarnate god Chrishna, the Hindoos believe, had a virgin-mother of the royal race, and was sought to be destroyed in his infancy, about 900 years B. C. It appears that he passed his life in working miracles and preaching, and was so humble as to wash his friends' feet; at length dying, but rising from the dead, he ascended into heaven in the presence of a multitude. The Cingalese relate nearly the same things of their Budda."—*Sir William Jones*.

**VIRGINIA,** daughter of the centurion L. Virginius. Appius Claudius, the decemvir, became enamored of her, and attempted to remove her from the place where she resided. She was claimed by one of his favorites as the daughter of a slave, and Appius, in the capacity and with the authority of judge, had pronounced the sentence, and delivered her into the hands of his friend, when Virginius, informed of his violent proceedings, arrived from the camp. The father demanded to see his daughter, and when this request was granted, he snatched a knife and plunged it into Virginia's breast, exclaiming, "This is all, my daughter! I can give thee, to preserve thee from the lust of a tyrant." No sooner was the blow given than Virginius ran to the camp with the bloody knife in his hand. The soldiers were astonished and incensed, not against the murderer, but the tyrant, and they immediately marched to Rome. Appius was seized, but he destroyed himself in prison, and prevented the execution of the law. Spurius Oppius, another of the decemvirs, who had not opposed the tyrant's views, killed himself also; and Marcus Claudius, the favorite of Appius, was put to death, and the decemviral power abolished, 449 B. C.

**VIRGINIA.** One of the United States; sometimes called the "Old Dominion," having been settled, April, 1607, at Jamestown, on James river—the first white settlement in the United States. Named Virginia in honor of queen Elizabeth, who had granted the country to Sir Walter Raleigh. A settlement attempted by Raleigh but failed, and the grant was vacated on his attainder and execution. The country granted by James I. to two companies, the London and the Plymouth. Jamestown settled by the former, and named in honor of their royal patron. The colony suffered much from the Indians, and by various disasters; proved loyal during the English revolution; was the first to proclaim Charles II. on his restoration; established the Church of England by law, 1662; took an early and prominent part in the struggle for independence. Surrender of the British army under Cornwallis, at Yorktown, October 19, 1782. Constitution of the United States adopted June 25, 1788, by 89 to 79. Virginia has given birth to six presidents of the United States, viz: Washington, Jefferson, Madison, Monroe,

Harrison, and Taylor; and also, Patrick Henry, John Marshall, and many distinguished patriots. Population in 1790 was 747,610; in 1810, 974,622; in 1830, 1,211,272; in 1840, 1,239,737, including 448,937 slaves.

**VISIER OR VIZIER, GRAND.** An officer of the Ottoman Porte, first appointed in 1370. Formerly this officer governed the whole empire immediately under the grand seignior; he is sometimes called the grand seignior's lieutenant, or vicar of the empire; at his creation, the prince's seal is put into his hand, upon which is engraven the emperor's name, which he places in his bosom, and carries away with him.—*Knolles*.

**VITTORIA, BATTLE OF.** One of the most brilliant victories recorded in the annals of England, obtained by Wellington over the French army commanded by Jerome Bonaparte and marshal Jourdan, June 21, 1813. Marshal Jourdan lost 151 pieces of cannon, 451 wagons of ammunition, all his baggage, provisions, cattle, and treasure, with his baton as a marshal of France. Continuing the pursuit on the 25th, Wellington took Jourdan's only remaining gun!

**VOLCANOES.** In different parts of the earth's surface, there are above 200 volcanoes, which have been active in modern times. The eruptions of Mount Etna are recorded as early as 734 B. C. by authentic historians. See *Etna*. The first eruption of Vesuvius was in A. D. 79. See *Vesuvius*. The first eruption of Hecla is said to have occurred A. D. 1004. For an account of the awful eruption of this volcano in 1783, see *Iceland*. In Mexico, a plain was filled up into a mountain more than a thousand feet in height by the burning lava from a volcano in 1759. A volcano in the isle of Ferro broke out, Sept. 13, 1777, which threw out an immense quantity of red water, that discolored the sea for several leagues. A new volcano appeared in one of the Azore islands, May 1, 1808.

**VOLUNTEERS.** This species of force armed in England, in apprehension of the threatened invasion of revolutionary France, 1794. Besides their large army, and 85,000 men voted for the sea, England subsidized 40,000 Germans, raised the militia to 100,000 men, and armed the citizens as volunteers. Between the years 1798 and 1804, when this force was of greatest amount, it numbered 410,000 men, of which 70,000 were Irish. The English volunteers were, according to official accounts, 341,600 on Jan. 1, 1804. In the United States, on the breaking out of the Mexican war, Congress authorized the enlistment of 50,000 volunteers. A much larger number responded, but less than 30,000 were actually needed or enrolled.

**VOYAGES.** The first great voyage, or voyage properly so called, was by order of Necho, pharaoh of Egypt, when some Phœnician pilots sailed from Egypt down the Arabic Gulf, round what is now called the Cape of Good Hope, entered the Mediterranean by the Straits of Gibraltar, coasted along the north of Africa, and at length arrived in Egypt, after a navigation of about three years, 604 B. C.—*Blair, Herodotus*. The first voyage round the world was made by a ship, part of a Spanish squadron which had been under the command of Magellan (who was killed at the Philippine Island in a skirmish) in 1519-20. The era of voyages of discovery was the end of the eighteenth century. See *Circumnavigators*, and *North-West Passage*.

## W.

**WAGES IN ENGLAND.** The wages of sundry workmen in England were first fixed by act of parliament, 25 Edward III., 1350. Haymakers had but one penny a day. Master carpenters, masons, tylers, and other coverers of houses, had not more than 3d. per day (about 9d. of our money); and their

servants,  $1\frac{1}{2}d.$ —*Viner's Statutes*. By the the 23d Henry VI., 1444, the wages of a bailiff of husbandry was 23s. 4d. per annum, and clothing of the price of 5s. with meat and drink; chief hind, carter, or shepherd, 20s., clothing 4s.; common servant of husbandry, 15s., clothing 40d.; woman-servant, 10s., clothing 4s. By the 11th Henry VII., 1495, there was a like rate of wages, only with a little advance; as, for instance, a free mason, master carpenter, rough mason, bricklayer, master tyler, plumber, glazier, carver, or joiner, was allowed from Easter to Michaelmas to take 6d. a day, without meat and drink; or with meat and drink 4d.; from Michaelmas to Easter, to abate 1d. A master having under him six men was allowed 1d. a day extra. The following were the

WAGES OF HARVEST-MEN IN ENGLAND AT DIFFERENT PERIODS.

| Year.   |                  | s. d. | Year.   |                  | s. d. | Year.   |                  | s. d. |
|---------|------------------|-------|---------|------------------|-------|---------|------------------|-------|
| In 1350 | <i>per diem.</i> | 0 1   | In 1688 | <i>per diem.</i> | 0 8   | In 1788 | <i>per diem.</i> | 1 4   |
| In 1460 | ditto            | 0 2   | In 1716 | ditto            | 0 9   | In 1794 | ditto            | 1 6   |
| In 1568 | ditto            | 0 4   | In 1740 | ditto            | 0 10  | In 1800 | ditto            | 2 0   |
| In 1632 | ditto            | 0 6   | In 1760 | ditto            | 1 0   | In 1840 | ditto            | 3 0   |

WAGRAM, BATTLE OF, between the Austrian and French armies, in which the latter was completely victorious, and the former entirely overthrown. The slaughter on both sides was dreadful; 20,000 Austrians were taken by the French, and the defeated army retired to Moravia, July 5, 1809. This battle led to an armistice, signed on the 12th; and on Oct. 24, to a treaty of peace, by which Austria ceded all her sea-coast to France, and the kingdoms of Saxony and Bavaria were enlarged at her expense. The emperor was obliged also to yield a part of his plunder of Poland in Galicia to Russia. The emperor also acknowledged Joseph Bonaparte as king of Spain.

WAKEFIELD, BATTLE OF, IN ENGLAND, between Margaret, the queen of Henry VI., and the duke of York, in which the latter was slain, and 3000 Yorkists fell upon the field. The death of the duke, who aspired to the crown, seemed to fix the good fortune of Margaret; but the earl of Warwick espoused the cause of his son, the earl of March, afterwards Edward IV., and the civil war that was continued from that time devastated all England. This battle was fought December 31, 1460.

WAKES. Every church at its consecration received the name of some particular saint; this practice existed among the Romans and Britons, and was continued among the Saxons.—*Whitaker*. Women were hired among the ancient Romans to weep at funerals: they were called *Carinæ*. The Irish howl originated from this Roman outcry at the decease of their friends. They hoped thus to awaken the soul, which they supposed might lie inactive.

WALDENSES. The persecution of this sect in the beginning of the thirteenth century led to the establishment of the Holy Office or Inquisition. Pope Innocent III. had commissioned some monks to preach against the heresies of the Waldenses in Narbonne and Provence; but the Catholic bishops were at first jealous of this mission, armed as it was with great power, and the feudal chiefs refused to obey the orders of the legates. A.D. 1203-4. One of the monks, the first inquisitor, Peter Chateaufort, having been assassinated, the aspiring pontiff called on all the neighboring powers to march into the heretical district. All obstinate heretics were placed at the disposal of Simon de Montfort, commander of this crusade, and the whole race of the Waldenses and Albigenses were ordered to be pursued with fire and sword. Neither sex, age, nor condition was spared; the country became a wilderness, and the towns heaps of smoking ruins. Such was the era of the Inquisition. Dominic de Guzman was constituted first inquisitor-general, 1208.

**WALES.** After the Roman emperor Honorius quitted Britain, Vortigern was elected king of South Britain, and he invited over the Saxons to defend his country against the Picts and Scots; but the Saxons perfidiously sent for reinforcements, consisting of Saxons, Danes, and Angles, by which they made themselves masters of South Britain, and most of the ancient Britons retired to Wales, and defended themselves against the Saxons, in its inaccessible mountains, about A. D. 447. In this state Wales remained unconquered till Henry II. subdued South Wales in 1157: and in 1282 Edward I. entirely reduced the whole country, putting an end to its independency by the death of Llewellyn, the last prince. The Welsh, however, were not entirely reconciled to this revolution, till the queen happening to be brought to bed of a son at Carnarvon in 1284, Edward with great policy styled him prince of Wales, which title the heir to the crown of Great Britain has borne almost ever since. Wales was united and incorporated with England by act of parliament, 27 Henry VIII. 1535. See *Britain*.

**WALES. PRINCE OF.** The first prince of this title was Edward, the son of Edward I., who was born in Carnarvon castle on the 25th April. 1284. Immediately after his birth he was presented by his father to the Welsh chieftains as their future sovereign, the king holding up the royal infant in his arms, and saying, in the Welsh language, "*Eich Dyn*," literally in English, "This is your man," but signifying, "This is your countryman and king." These words were afterwards changed, or corrupted, as some historians assert, to "*Ich Dien*," which is the motto attached to the arms of the prince of Wales to this day. Owing to the premature death of his elder brother, this prince succeeded to the throne of England, by the title of Edward II., in 1307.—*Myvyrian Archæology. Hist. Wales*. For another and very different account of the origin of the motto "*Ich Dien*," see the article under that head.

**WALLOONS.** The people who fled to England from the persecution of the cruel duke of Alva, the governor of the Low Countries for Philip II. of Spain. On account of the duke's religious proscriptions, those countries revolted from Philip, 1566.—*Mariana's Hist. of Spain*. The Walloons were well received in England. A large Protestant church was given to them by queen Elizabeth, at Canterbury, and many of their posterity still remain in this part of England.—*Pardon*.

**WALPOLE'S ADMINISTRATIONS.** Mr. Walpole (afterwards sir Robert, and earl of Orford) became first lord of the treasury in 1715. He resigned, on a disunion of the cabinet, in 1717, bringing in the sinking fund bill on the day of his resignation. Resumed as head of the ministry, on the earl of Sunderland retiring, in 1721; and continued as premier until 1742, when his administration was finally shaken by its unpopular endeavors for some time previously to maintain peace with Spain.

**WANDERING JEW.** The following is the strange account given of this personage:—His original name was Calaphilus, Pontius Pilate's porter. When they were dragging Jesus out of the door of the Judgment-hall, he struck him on the back, saying, "Go faster, Jesus! go faster; why dost thou linger?" Upon which Jesus looked on him with a frown, and said, "I am indeed going; but thou shalt tarry till I come." Soon after he was converted, and took the name of Joseph. He lives for ever; but at the end of every hundred years falls into a fit or trance, upon which when he recovers, he returns to the same state of youth he was in when our Saviour suffered, being about thirty years of age. He always preserves the utmost gravity of deportment. He was never seen to smile. He perfectly remembers the death and resurrection of Christ.—*Cabmet's Hist. of the Bible*.

**WARS.** War is called by Erasmus "the malady of princes." Scriptural writers date the first war as having been begun by the impious son of Cain 3563 B. C. Osymandyas of Egypt was the first warlike king; he passed into Asia, and conquered Bactria, 2100 B. C.—*Usher*. He is supposed by some to be the Osiris of the priests. The most famous siege recorded in the annals of antiquity was that of Troy, 1193—1184 B. C. The longest siege was that of Azoth, 647 B. C. The most famous sortie was that of the Plateans from their city, 428 B. C. It is computed that from the beginning of the world to the present time, no less than 6,860,000,000 of men have perished in the field of battle, being about seven times as many of the human species as now inhabit our whole earth.

**WARS, CIVIL, OF GREAT BRITAIN.** The most remarkable civil wars of Great Britain are the following:—That of A. D. 1215–16. The war of the barons against Henry III., 1565; of the usurpation of Henry IV., 1400; of the White and Red Roses, or houses of York and Lancaster, from 1452 to 1471. The war between Richard III. and Henry VII., 1485. The war against Charles I. from 1642 to 1651. The Scottish civil war under the Pretender, 1715–16; that under the Young Pretender, 1745. In Ireland, that under Tyrone, 1599; under O'Neill, 1641; and that produced by the great rebellion, 1798.

**WARS, FOREIGN, OF GREAT BRITAIN.** The wars in France, in which England was involved for nearly two centuries, arose from the dukes of Normandy being kings of England. They held Normandy as a fief of the crown of France; and when William I. conquered England, it became an English province, but was lost in the reign of king John, 1204. The wars with France were many; the English princes gained bloody victories at Cressy, Poitiers, and Agincourt; but they were finally driven out of France in the reign of Henry VI., and lost Calais, by surprise, in the reign of Mary. It was to the English people a fortunate loss; but the rival policy and interests of the two governments have, ever since then, caused half as many years of war as peace. See the countries respectively, *Battles*, &c.

The general peace of Ryswick between England, Germany, Holland, France, and Spain, was signed by the ministers of these powers, at the palace of Ryswick, Sept. 20, 1697. It concluded this last war.

THE GREAT MODERN AND EXPENSIVE WARS OF GREAT BRITAIN.

WARS, FOREIGN, OF GREAT BRITAIN—*continued.*

War with the United States, July 14, 1774.  
Peace of Paris, Nov. 30, 1782.  
War with France, Feb. 6, 1778. Peace of  
Paris, Jan. 20, 1783.  
War with Spain, April 17, 1780. Closed  
same time, Jan. 20, 1783.  
War with Holland, Dec. 21, 1780. Peace  
signed Sept. 2, 1783.

War of the *Revolution*, Feb. 1, 1793. Peace  
of Amiens, March 27, 1802.  
War against Bonaparte, April 29, 1803. Fi-  
nally closed, June 18, 1815.  
War with the United States, June 18, 1812.  
Peace of Ghent, Dec. 24, 1814.  
For the wars with India and China, see those  
countries respectively.

In the war against Bonaparte, the great powers of Europe leagued sometimes with, and sometimes against Great Britain. England spent 65 years in war, and 62 in peace, in the 127 years previous to the close of the last war in 1815. In the war of 1688, she spent 36 millions sterling; in the war of the *Spanish Succession*, 62 millions; in the *Spanish war*, 54 millions; in the *Seven Years' war*, 112 millions; in the *American war*, 136 millions; in the war of the *French Revolution*, 464 millions; and in the war against Bonaparte, 1159 millions; thus forming a total expenditure for war, in 127 years (from the Revolution in 1688 to the downfall of Napoleon in 1815), of 2023 millions of pounds sterling. M. de Pradt estimates the loss of life sustained by the French forces in the six campaigns of the Peninsular war at six hundred thousand men. The loss sustained by the Spaniards and their allies was probably as great. During the war many districts of the Peninsula were from time to time laid waste by the contending armies, and the inhabitants were victims to all the calamities and horrors thus produced. The total destruction of human beings in this last war must have amounted to one million two hundred thousand.

WAR, REVOLUTIONARY, ending in the independence of the United States, commenced by the battle of Lexington, April 19, 1775. See *Battles*. Ended by the Treaty of Paris, 1783. This war cost \$135,193,700.

## WAR, THE, OF 1812, between the United States and Great Britain:

First difficulty respecting the search of  
American vessels - - - - - 1806  
Chesapeake United States frigate fired  
on - - - - - 1807  
Non-intercourse act passed - - - - - 1809  
United States frigate President, engaged  
the British sloop-of-war Little Belt  
May 16, 1811  
President Madison's war message to  
congress - - - - - June 1, 1812

War declared - - - - - June 19, 18  
Gen. H. Dearborn appointed comman-  
der-in-chief.  
[See *Battles* and *Naval Battles*.]  
The war opposed in New England, and  
levies of troops refused by Mass.,  
Conn., and R. I.  
Treaty of peace ratified - Feb. 17, 1815

WAR AGAINST ALGIERS, to punish piracies, &c., declared by the United States, 1815. Commodores Decatur and Bainbridge captured two Algerine vessels and "conquered a peace," July 4,

WAR BETWEEN THE UNITED STATES AND MEXICO. [The annexation of Texas to the United States having been completed by the vote of the senate of Texas, Dec. 22, 1845.]

American army of occupation, (3500)  
under Gen. Taylor took post on the  
Rio Grande opposite Matamoras,  
March 28, 1846  
First collision—a reconnoitring party  
of 70 from American army under Col.  
Thornton, fired upon and taken pri-  
soners by the Mexicans - April 24, 1846  
Gen. Taylor defeats the Mexicans at  
Palo Alto, loses 48 killed and 126  
wounded. Mexicans, 262 killed and  
355 wounded - May 8-9, 1846  
Bill passed both houses of Congress U.  
S., declaring that war with Mexico

already existed, by act of that power,  
and authorizing 50,000 volunteers  
- May 12, 1846  
Monterey taken by Com. Sloat, July 6, 1847  
Santa Fe occupied by Gen. Kearney  
- Aug. 18, 1846  
Mexican ports on the Pacific blockaded  
by Com. Stockton - - Aug. 19, 1846  
Battle of Monterey, 4700 Americans  
under Taylor, 10,000 Mexicans under  
Ampudia. Monterey surrendered. A-  
merican loss, 120 killed 368 wounded,  
Mexican much greater - Sept. 21-23, 1846

WAR WITH MEXICO, *continued.*

- Stevenson's California regiment sailed from New-York - Sept. 26, 1846
- Tobasco bombarded by com. Perry, Oct. 25, 1846
- Tampico occupied by com. Connor, Nov. 14, 1846
- Col. Doniphan with 450 Missouri volunteers defeated 1100 Mexicans at Barito, the latter losing 63 killed and 150 wounded. American loss 6 wounded.
- Gen. Kearney defeats the "revolted" Californians, at San Gabriel, &c. Jan. 8, 1847
- Major Borland, Cassius M. Clay, Major Gaines, and 80 men, taken prisoners by the Mexicans at Encarnacion, Jan. 23, 1847
- Revolt against Americans in N. Mexico, American governor Bent and five others murdered - Jan. 14, 1847
- 1500 N. Mexican Indians and Mexicans defeated by col. Price - Jan. 24, 1847
- Battle of Buena Vista: Americans 4759 mostly volunteers, under gen. Taylor and gen. Wool; and Mexicans 22,000 under Santa Anna; latter defeated and loss 6000 killed and wounded; American loss 267 killed and 456 wounded, Feb. 22-23, 1847
- Battle of Sacramento; American col. Doniphan, 924 men, defeated 4000 Mexicans under Herridea, latter loss 300 killed, 300 wounded and 40 prisoners; American loss, 1 killed and 8 wounded - Feb. 23, 1847
- Vera Cruz surrendered to gen. Scott and com. Perry; American loss 65 killed and wounded - March 29, 1847
- Alvarado surrendered to lieut. Hunter, April 2, 1847
- Battle of Cerro-Gordo; Americans 8500 under gen. Scott, defeat 12,000 Mexicans under Santa Anna; 5 generals and 3000 men, taken prisoners by Scott: American loss 250, Mexican 350.
- Taspan taken by com. Perry, April 18, 1847
- Battles of Contreras and Churubusco, American gen. Smith drives the Mexicans from these fortified posts towards Mexico, losing 1066 killed and wounded; Mexican loss 6000 - Aug. 20, 1847
- Armistice agreed upon; broken by the Mexicans. Hostilities recommenced Sept. 7, 1847
- Battle of Molino del Rey; American gen. Worth carried the fortifications defended by 14,000 Mexicans under Santa Anna. American loss, 787 killed and wounded; Mexican loss 3000, Sept. 8, 1847
- Battle of Chapultepec, a height near Mexico, carried by American generals Worth, Quitman, and Pillow, (under gen. Scott) after a loss of 862 Sept. 12-13, 1847
- This was followed by the surrender of the city of Mexico - Sept. 14, 1847
- Col. Childs with 400 men and 1800 sick in hospitals besieged 28 days at Puebla, but compelled the Mexicans to raise the siege - Oct. 12, 1847
- Contribution of \$600,000 levied in Mexico for protecting public property in the city - Sept. 17, 1847
- City of Huamantla captured by American gen. Lane, who defeats Santa Anna. American loss, 24 killed and wounded; Mexican loss 150, Oct. 9, 1847
- Port of Guayamas bombarded and captured by American frigate Congress, and sloop Portsmouth - Oct. 20, 1847
- A tax levied upon the states of Mexico, and duties &c. laid to the amount of about \$3,000,000 - Dec. 31, 1847
- Gen. Scott superseded by Gen. Butler, Feb. 18, 1848
- Treaty of peace ratified at Queretaro, by the Hon. A. H. Sevier and N. Clifford, for the United States, and the foreign Mexican minister, Signor De la Rosa - May 30, 1848
- American troops finally withdrawn from the city of Mexico, - June 12, 1848

**WARSAW.** Late the metropolis of Poland. The diet was transferred to this city from Cracow, in 1556. Warsaw surrendered to Charles XII. in 1703. It has been a great prey to war of late years. In the beginning of 1794, the empress of Russia put a garrison into this city, in order to compel the Poles to acquiesce in the usurpations she had in view; but this garrison was expelled by the citizens, with the loss of 2000 killed and 500 wounded, and 36 pieces of cannon, April 17, 1794. The king of Prussia besieged Warsaw in July 1794, but was compelled to raise the siege in September, same year. It was taken by the Russians in the November following. See *next article*. Warsaw was constituted a duchy and annexed to the house of Saxony in August, 1807; but the duchy was overrun by the Russians in 1813, and soon afterwards Warsaw again became the residence of a Russian viceroy. The late Polish revolution commenced here, November 29, 1830. See *Poland*.

**WARSAW, BATTLES OF.** The Poles suffered a great defeat in a battle with the Russians, Oct. 10. 12, 1794; and Suwarrow, the Russian general, after the siege and destruction of Warsaw, cruelly butchered 30,000 Poles, of all ages and conditions, in cold blood, Nov. 8, 1794. The battle preceding the

surrender was very bloody; of 26,000 men, more than 10,000 were killed, nearly 10,000 were made prisoners, and 2000 only escaped the fury of the merciless conqueror. Battle of Growchow, near Warsaw, in which the Russians were defeated, and forced to retreat with the loss of 7000 men, Feb. 20, 1831. Battle of Warsaw, when, after two days' hard fighting, the city capitulated, and was taken possession of by the Russians. Great part of the Polish army retired towards Plock and Modlin. This last battle was fought Sept. 7 and 8, 1831.

**WARSAW, TREATIES OF.** The treaty of alliance of Warsaw, between Austria and Poland, against Turkey, in pursuance of which John Sobieski assisted in raising the siege of Vienna (on the 18th of September following), signed March 31, 1683. Treaty of Warsaw, between Russia and Poland, February 24, 1768.

**WASHINGTON.** The capita. of the United States, founded in 1791, and first made the seat of government in 1800. The house of representatives was opened for the first time, May 30, 1808. Washington was taken in the late war by the British forces under general Ross, when the Capitol and the President's house were consumed by a general conflagration, the troops not sparing even the national library, August 24, 1814. General Ross was soon afterwards killed in a desperate engagement at Baltimore, Sept. 12, following. See *United States*.

**WASHINGTON, GEORGE.** Born Feb. 22, 1732; in the expedition of Braddock against fort Du Quesne 1755; appointed commander-in-chief of the American army 1775; elected president of Convention for forming Constitution 1787; elected President of the United States 1789; again in 1793; died 1799. Washington monument at New York, corner-stone laid, Oct. 19, 1847. National monument to Washington, corner-stone laid July 4, 1848; osation by Robt. C. Winthrop. Virginia monument to Washington, corner-stone laid by President Taylor, Feb. 22, 1849.

**WATCHES.** They are said to have been first invented at Nuremberg, A. D. 1477; although it is affirmed that Robert, king of Scotland, had a watch about A. D. 1310. Watches were first used in astronomical observations by Purbach, 1500. Authors assert that the emperor Charles V. was the first who had any thing that might be called a watch, though some call it a small table-clock, 1530. Watches were first brought to England from Germany in 1577.—*Hume*. Spring pocket-watches (watches properly so called) have had their invention ascribed to Dr. Hooke by the English, and to M. Huygens by the Dutch. Dr. Derham, in his *Artificial Clockmaker*, says that Dr. Hooke was the inventor; and he appears certainly to have produced what is called the pendulum watch. The time of this invention was about 1658; as is manifest, among other evidences, from an inscription on one of the double-balance watches presented to Charles II., viz., "Rob. Hooke inven. 1658. T. Tompion fecit, 1675." Repeating watches were invented by Barlowe, 1676. Harrison's time-piece was invented in 1735; improved 1739, 1749, 1753. In 1759, he made the time-piece which procured him the reward of 20,000*l.*, offered by the Board of Longitude, 1763. Watches and clocks were taxed in 1797. The tax was repealed in 1798. See *Clocks*.

**WATER.** Thales of Miletus, founder of the Ionic sect, looked upon water (as also did Homer, and several of the ancient philosophers) as being the original principle of every thing besides, about 594 B. C.—*Stanley*. It is the universal drink of man. The ancients usually diluted their wines with much water; and Hesiod prescribes three measures of water to one of wine in summer.—*Madame Dacier*. In the Roman church water was first mixed

with the sacramental wine, A. D. 122.—*Lenglet*. "Honest water is too weak to be a sinner; it never left a man in the mire."—*Shakspeare*.

**WATER-CLOCKS.** The first instruments used to measure the lapse of time, independently of the sunshine, were *clepsydræ* or water-clocks. These were most probably vessels of water, with a small hole through the bottom; through this hole the water ran out in a certain time, possibly an hour; after which the vessel was again filled to be emptied as before. This invention was a manifest improvement on the old sun-dials, whose perpendicular gnomon gave hours of different length at the various seasons of the year. Something similar to the hour-glass was occasionally used; and Alfred the Great, probably ignorant of these methods, adopted the burning of a taper as a measure of time.

**WATER-MILLS.** Used for grinding corn, invented by Belisarius, the general of Justinian, while besieged in Rome by the Goths, A. D. 555. The ancients parched their corn, and pounded it in mortars. Afterwards mills were invented, which were turned by men and beasts with great labor; and yet Pliny mentions wheels turned by water.

**WATER TOFANA, OR WIVES' POISON.** See article *Poisoning*. The poison so freely administered by Italians in the 17th century, called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution of crystallized arsenic. The secret of its preparation was conveyed to Paris, where the marchioness de Brinvilliers poisoned her father and two brothers; and she with many others was executed, and the preparers burnt alive.—*Phillips*.

**WATERLOO, BATTLE OF.** The greatest victory ever won by British arms, and the most decisive and happy in its consequences. In this great battle the French army, with Napoleon as its chief, was signally overthrown by the British and allies under the duke of Wellington, June 18, 1815. Napoleon attacked the British, whom he expected to overwhelm by superior numbers, but they maintained their ground, and repulsed the enemy from about nine in the morning till seven at night, when the French line began to waver. The commander then gave orders to charge; a total rout ensued, and Blücher, who opportunely came up at this juncture, joined in the pursuit. On both sides the carnage was immense; but that of the French was double the amount of the British. Napoleon quitted the wreck of his flying army, and returned to Paris, where he attempted, after the destruction of three great armies, to raise a fourth; but finding this impossible, his abdication followed. See *Bonaparte* and *France*.

**WATER-SPOUT.** Whirlwinds and water-spouts proceed from the same cause, the only difference being that water-spouts pass over the water, and whirlwinds over the land.—*Dr. Franklin*. Two water-spouts fell on the Glatz mountains in Germany, and caused dreadful devastation to Hautenbach, and many other villages; a prodigious number of houses were destroyed, and many persons perished, July 13, 1827. A water-spout at Glanflask, near Kil-

larney, in Ireland, passed over a farm of Mr. John Macarthy, and destroyed his cottage, two other farmhouses, and other buildings, of which not a vestige remained. In this catastrophe seventeen persons perished. August 4, 1831.

**WAX.** This substance came into use for candles in the twelfth century; and wax candles were esteemed a luxury in 1300, being but little used. In China, candles of vegetable wax have been in use for centuries. See *Candleberry*. Wax candles are made very cheap in America, from the berry of a particular species of myrtle, which yields excellent wax, of a green color. Sealing-wax was not brought into use in England until about 1556. The wax-tree, *Ligustrum lucidum*, was brought from China before 1794.

**WE.** The common language of kings is *we*, which plural style was begun with king John, A. D. 1199.—*Coke's Instit.* Before this time sovereigns used the singular person in all their edicts.—*Idem.* The German emperors and French kings used the plural about A. D. 1200.—*Henault.* It is now the style royal of all monarchs. In the articles of public journals they also adopt the plural, indicating that what they write proceeds from a plurality of pens.

**WEALTH.** This is a relative term; for as there is only a certain amount of property in a country, so the possession of a large share by one man is the poverty of others. The wealth of individuals is therefore no benefit to the country, while as to others it is the cause of their poverty. The instances of wealth in the early ages are many and most extraordinary. The night-iest conflagration of wealth on record is that of Sardanapalus, where riches amounting to one thousand four hundred millions sterling were destroyed.—*Athenæus.* Cæcilius Isidorus died at Rome possessed of 4116 slaves, 3600 oxen, 200,000 head of other cattle, and three millions of our money in coin, 8 B. C.—*Univ. Hist.*

**WEAVING.** The art of weaving appears to have been practised in China from the earliest antiquity—more than a thousand years before it was known in Europe or Asia. Poets assign the art to the spider. Women originally spun, wove, and dyed; and the origin of these arts is ascribed, by ancient nations, to different women as women's arts. The Egyptians ascribed it to Isis; the Greeks, to Minerva; and the Peruvians, to the wife of Manco Capac. In most eastern countries, the employment of weaving is still performed by the women. Our Saviour's vest, or coat, had not any seam, being woven from the top throughout, in one whole piece. Perhaps, says Dr. Doddridge, this curious garment might be the work and present of some pious women who attended him, and ministered unto him of their substance, *Luke* viii. 3. The print of a frame for weaving such a vest may be seen in *Calmet's Dictionary*, under the word *Vestments*.

**WEAVING IN ENGLAND.** Two weavers from Brabant settled at York, where they manufactured woollens, which, says king Edward, "may prove of great benefit to us and our subjects," 1331. Flemish dyers, cloth-drappers, linen-makers, silk-throwsters, &c. settled at Canterbury, Norwich, Colchester, Southampton, and other places, on account of the duke of Alva's persecution, 1567.

**WEDGWOOD WARE.** A fine species of pottery and porcelain, produced by Mr. Josiah Wedgwood, of Staffordshire, 1762. The manufactories for this ware were employed 10,000 families in England. Previously to 1763, most of the superior kinds of earthenwares were imported from France.

**WEDNESDAY.** The fourth day of the week, so called from a Saxon idol, called Woden, supposed to be Mars, worshipped on this day. The name given to our Wednesday by the Saxons was Woden's day, which was afterwards corrupted to Wednesday. See *next article*.

**WEEK.** The space of seven days, supposed to be first used among the Jews, who observed the sabbath every seventh day; they had three sorts of weeks, the first the common one of seven days, the second of years, which was seven years, the third of seven times seven years, at the end of which was the jubilee. All the present English names are derived from the Saxon:—

| <i>Latin.</i>  | <i>English.</i> | <i>Saxon.</i>  | <i>Presided over by</i> |
|----------------|-----------------|----------------|-------------------------|
| Dies Saturni,  | Saturday,       | Saterne's day, | Saturn.                 |
| Dies Solis,    | Sunday,         | Sun's day,     | The sun.                |
| Dies Lunæ,     | Monday,         | Moon's day,    | The moon.               |
| Dies Martis,   | Tuesday,        | Tiw's day,     | Mars.                   |
| Dies Mercurii, | Wednesday,      | Woden's day,   | Mercury.                |
| Dies Jovis,    | Thursday,       | Thor's day,    | Jupiter.                |
| Dies Veneris,  | Friday,         | Friga's day,   | Venus.                  |

**WEIGHTS AND MEASURES.** These, and the stamping of gold and silver money, were invented by Phydron, tyrant of Argos, 895 B. C. *et seq.*—*Arundelian Marbles.* Weights were originally taken from grains of wheat, the lowest being still called a grain.—*Chalmers.* The standard measure was originally kept at Winchester by the law of king Edgar, A. D. 972. Standards of weights and measures were provided for the whole kingdom of England by the sheriffs of London, 8 Richard I., 1197. A public weighing-machine was set up in London, and all commodities ordered to be weighed by the city-officer, called the weigh-master, who was to do justice between buyer and seller, statute 3d Edward II., 1309.—*Stowe.* The first statute, directing the use of avordupois weight, is that of 24 Henry VIII., 1532.—*Philosophical Transactions*, vol. 65, art. 3. The French adopt the metre of 3.28084, or the 10 millionth part of the distance from the Pole to the Equator, as the standard of measure; and the kilogramme, equal to 2,255 pounds avordupois, as the standard of weight.

**WESLEYAN METHODISTS.** A large body of Christians, whose sect was founded by an excellent and pious man, John Wesley. In 1730 he and his brother, with a few other students, formed themselves into a small society for the purpose of mutual edification in religious exercises. So singular an association excited considerable notice, and among other names bestowed upon the members, that of Methodists was applied to them. Mr. Wesley went to Georgia in America, in 1735, with a view of converting the Indians. On his return to England, he commenced itinerant preacher, and gathered many followers; but the churches being shut against him, he built spacious meeting-houses in London, Bristol, and other places. For some time he was united with Mr. Whitefield; but differences arising on account of the doctrine of election, they separated, and the Methodists were denominated according to their respective leaders. Mr. Wesley was indefatigable in his labors, and almost continually engaged in travelling over England, Wales, Scotland, and Ireland. His society was well organized, and he preserved his influence over it to the last. He died in London in 1791.

**WEST INDIES.** Discovered by Columbus, St. Salvador being the first land he made in the new world, and first seen by him in the night between the 11th and 12th Oct., 1492. See *the Islands respectively.*

**WESTERN EMPIRE.** The Roman empire was divided into Eastern and Western by Valentinian and Valens, of whom the former had the western portion, or Rome, properly so called, A. D. 364. Odoacer, a chief of the Heruli, entered Italy, defeated Orestes, took Rome and Ravenna, deposed Augustulus, and assumed the title of king of Italy. August 23, which ended the Western empire, 507 years after the battle of Actium, A. D. 476. See *Eastern Empire.*

**WESTMINSTER ABBEY.** As regards this magnificent cathedral, the miraculous stories of monkish writers and of ancient historians have been que

tioned by sir Christopher Wren, who was employed to survey the present edifice, and who, upon the nicest examination, found nothing to countenance the general belief that it was erected on the ruins of a pagan temple. Historians, agreeably to the legend, have fixed the era of the first abbey in the sixth century, and ascribed to Sebert the honor of erecting it. This church becoming ruinous, it was splendidly rebuilt by Edward the Confessor, between A. D. 1055 and 1065; and he stored it with monks from Exeter. Pope Nicholas II. about this time constituted it the place for the inauguration of the kings of England. The church was once more built in a magnificent and beautiful style by Henry III. In the reigns of Edward II., Edward III., and Richard II., the great cloisters, abbot's house, and the principal monastic buildings were erected. The western parts of the nave and aisles were rebuilt by successive monarchs, between the years 1340 and 1483. The west front and the great window were built by those rival princes, Richard III. and Henry VII.; and it was the latter monarch who commenced the magnificent chapel which bears his name, and the first stone of which was laid Jan. 24, 1502-3. The abbey was dissolved, and made a bishopric, 1541; and was finally made a collegiate church by Elizabeth, 1560.

**WESTMINSTER HALL.** One of the most venerable remains of English architecture, first built by William Rufus in 1097, for a banqueting-hall; and here in 1099, on his return from Normandy, "he kept his feast of Whitsuntide very royally." Richard II. held his Christmas festival in 1397, when the number of the guests each day the feast lasted was 10,000.—*Slove*. The courts of law were established here by king John.—*Idem*. Westminster-hall is universally allowed to be the largest room in Europe unsupported by pillars: it is 270 feet in length, and 74 broad. The hall underwent a general repair in 1802.

**WESTPHALIA.** This duchy belonged, in former times, to the duke of Saxony. On the secularization of 1802, it was made over to Hesse Darmstadt; and in 1814, was ceded for an equivalent to Prussia. The kingdom of Westphalia, one of the temporary kingdoms of Bonaparte, composed of conquests from Prussia, Hesse-Cassel, Hanover, and the smaller states to the west of the Elbe, created December 1, 1807, and Jerome appointed king. Hanover was annexed March 1, 1810. This kingdom was overturned in 1813.

**WESTPHALIA, PEACE OF,** signed at Munster and at Osnaburgh, between France, the emperor, and Sweden; Spain continuing the war against France. By this peace the principle of a balance of power in Europe was first recognised: Alsace given to France, and part of Pomerania and some other districts to Sweden; the Elector Palatine restored to the Lower Palatinate; the civil and political rights of the German States established; and the independence of the Swiss Confederation recognised by Germany, October 24, 1648.

**WHALE FISHERY OF THE UNITED STATES.** In 1845 this trade employed 650 vessels, aggregate tonnage 200,000 tons,—cost, \$20,000,000; manned by 17,500 officers and seamen. "Commercial history furnishes no parallel to this whaling fleet—it is larger than those of all other nations combined."—*Speech of Mr. Grinnell*.

**WHEAT AND FLOUR.** The amount exported by the United States, from 1790 to 1838, was 10,283,471 bushels,—average, 209,666 bushels per annum. In 1845 the amount exported was valued at \$5,735,372; in 1846, \$13,350,644. This was exclusive of Corn, Rye, &c. The amount was greatly increased by the scarcity in Europe, especially in Ireland.

**WHITE FRIARS.** These were an order of Carmelite mendicants, who took

their name from Mount Carmel, lying southwest of Mount Tabor, in the Holy Land. They pretended that Elijah and Elisha were the founders of their order, and that Pythagoras and the ancient Druids were professors of it. At first they were very rigid in their discipline, but afterwards it was moderated, and about the year 1540 divided into two sorts, one following and restoring the ancient severities, and the other the milder regimen. They had numerous monasteries throughout England: and a precinct in London without the Temple and west of Blackfriars, is called *Whitefriars* to this day, after a community of their order, founded there in 1245.

**WHITEHALL, LONDON.** Originally built by Hubert de Burgh, earl of Kent, before the middle of the 13th century. It afterwards devolved to the archbishop of York, whence it received the name of York-place, and continued to be the town residence of the archbishops till purchased by Henry VIII. of cardinal Wolsey, in 1530. At this period it became the residence of the court. Queen Elizabeth, who died at Greenwich, was brought from thence to Whitehall, by water, in a grand procession. It was on this occasion, CAMDEN informs us, that the following quaint panegyric on her majesty was written:—

“ The queen was brought by water to Whitehall,  
At every stroke the oars did *tears* let fall.  
More clung about the barge: fish under water  
Wept out their *eyes of pearl*, and swam blind after.  
I think the bargemen might, with easier thighs,  
Have rowed her thither in her people's eyes;  
For howsoe'er, thus much my thoughts have scann'd,  
She had come by *water*, had she come by *land*.”

In 1697, the whole was destroyed by an accidental fire, except the banqueting-house, which had been added to the palace of Whitehall by James I., according to a design of Inigo Jones, in 1619. In the front of Whitehall Charles I. was beheaded, Jan. 30, 1649. George I. converted the hall into a chapel. 1723-4. The exterior of this edifice underwent repair between 1829 and 1833.

**WHITSUNTIDE.** The festival of Whitsunday is appointed by the church to commemorate the descent of the Holy Ghost upon the apostles: in the primitive church, the newly-baptized persons, or catechumens, used to wear white garments on Whi'sunday. This feast is movable, and sometimes falls in May and sometimes in June; but is always exactly seven weeks after Easter. Rogation week is the week before Whitsunday; it is said to have been first instituted by the bishop of Vienne in France, and called Rogation week upon account of the many extraordinary prayers and preparatory petitions made for the devotion of Holy Thursday for a blessing on the fruits of the earth, and for averting the dismal effects of war and other evils.

**WICKLIFFITES.** The followers of John Wickliffe, a professor of divinity in the university of Oxford. He was the father of the Reformation of the English church from popery, being the first who opposed the authority of the pope, the jurisdiction of the bishops, and the temporalities of the church, in 1377. Wickliffe was protected by John of Gaunt, Edward's son and Richard's uncle, yet virulently persecuted by the church, and rescued from martyrdom by a paralytic attack, which caused his death, Dec. 31, 1384, in his 60th year.—*Mortimer*.

**WILDFIRE.** An artificial fire, which burns under water. The French call it *feu Grecquois*, because it was discovered by the Greeks, by whom it was first used, about A. D. 660. Its invention is ascribed to Callinicus of Heliopolis.—*Nouv. Dict.* See article *Greek Fire*.

**WILKES' NUMBER.** The designation given to the 45th number of a paper styled the *North Briton*, published by John Wilkes, an alderman of London. He commenced a paper warfare against the earl of Bute and his administration, and in this particular copy, printed April 23, 1763, made so free a use of royalty itself, that a general warrant was issued against him by the earl of Halifax, then secretary of state, and he was committed to the Tower. His warfare not only deprived him of liberty, but exposed him to two duels; but he obtained £1,000 damages and full costs of suit for the illegal seizure of his papers. He further experienced the vengeance of the court of King's Bench, and both houses of parliament, for the libel, and for his obscene poem "An Essay on Woman;" and was expelled the commons and outlawed; he was, however, elected a fifth time for Middlesex in October 1774, and the same year served the office of lord mayor; but was overlooked in a subsequent general election, and died in 1797.

**WILLS, LAST, AND TESTAMENTS.** Wills are of very high antiquity. See *Genesis*, c. 48. Solon introduced them at Athens, 578 B. C. There are many regulations respecting wills in the Koran. The Romans had this power, and so had the native Mexicans; so that it prevailed at least in three parts of the globe. Trebatius Testa, the civilian, was the first person who introduced codicils to wills at Rome, 31 B. C. The power of bequeathing lands by the last will or testament of the owner, was confirmed to English subjects, 1 Henry I., 1100; but with great restrictions and limitations respecting the feudal system; which were taken off by the statute of Henry VIII., 1541.—*Blackstone's Commentaries*. The first will of a sovereign on record is stated (but in error) to be that of Richard II., 1399. Edward the Confessor made a will, 1066.

**WIND-MILLS.** They are of great antiquity, and some writers state them to be of Roman invention; but certainly we are indebted for the wind-mill to the Saracens. They are said to have been originally introduced into Europe by the knights of St. John, who took the hint from what they had seen in the crusades.—*Baker*. Wind-mills were first known in Spain, France, and Germany, in 1299.—*Anderson*. Wind saw-mills were invented by a Dutchman, in 1633, when one was erected near the Strand, in London.

**WINDOWS.** See *Glass*. There were windows in Pompeii, A. D. 79, as is evident from its ruins. It is certain that windows of some kind were glazed so early as the third century, if not before, though the fashion was not introduced until it was done by Bennet, A. D. 633. Windows of glass were used in private houses, but the glass was imported 1177.—*Anderson*. In England about 6000 houses now have fifty windows and upwards in each; about 275,000 have ten windows and upwards; and 725,000 have seven windows, or less than seven. The window-tax was first enacted in order to defray the expense of and deficiency in the re-coining of gold, 7 William III., 1695.

**WINDSOR CASTLE.** A royal residence of the British sovereigns, originally built by William the Conqueror, but enlarged by Henry I. The monarchs who succeeded him likewise resided in it, till Edward III., who was born here, caused the old building, with the exception of three towers at the west end, to be taken down, and re-erected the whole castle, under the direction of William of Wykeham. He likewise built St. George's chapel. Instead of alluring workmen by contracts and wages, Edward assessed every county in England to send him so many masons, tilers, and carpenters, as if he had been levying an army. Several additions were made to this edifice by succeeding sovereigns; the last by George IV.

**WINES.** The invention of wine is given to Noah.—*Abbé Lenglet*. The art of

making wine from rice is ascribed to the Chinese to their king, Ching Nong, about 1998 B. C.—*Univ. Hist.* The art of making wine was brought from India by Bacchus, as other authorities have it. Hosea speaks of the wine of Lebanon as being very fragrant.—*Hosea*, xiv. 7. Our Saviour changed water into wine at the marriage of Cana in Galilee.—*John* ii. 3, 10.

“The conscious waters saw their God, and blush’d.”—*Addison*.

No wine was produced in France in the time of the Romans.—*Bossuet*. Spirits of wine were known to the alchymists.—*Idem*. Concerning the acquaintance which our progenitors had with wine, it has been conjectured that the Phœnicians might possibly have introduced a small quantity of it; but this liquor was very little known in our island before it was conquered by the Romans. Wine was sold in England by apothecaries as a cordial in A. D. 1300, and so continued for some time after, although there is mention of “wine for the king” so early as 1249; and we are even sent to a much earlier period for its introduction and use in Britain. In 1400 the price was twelve shillings the pipe. A hundred and fifty butts and pipes condemned for being adulterated, were staved and emptied into the channels of the streets by Rainwell, mayor of London, in the 6th of Henry VI., 1427.—*Stowe’s Chron.* The first importation of claret wine into Ireland was on June 17, 1490. The first act for licensing sellers of wine in England passed April 25, 1661. In 1800 England imported 3,307,460 gallons of all kinds of wine. In 1815, the United Kingdom imported 4,306,528 gallons. In 1830 were imported 6,879,558 gallons; and in the year ending Jan. 5, 1840, were imported 9,909,056 gallons, of which 7,000,486 were for home consumption.—*Parl. Rel.*

**WIRE.** The invention of drawing wire is ascribed to Rodolph of Nuremberg, A. D. 1410. Mills for this purpose were first set up at Nuremberg in 1563. The first wire-mill in England was erected at Mortlake in 1663.—*Mortimer*. The astonishing ductility which is one of the distinguishing qualities of gold, is no way more conspicuous than in gilt wire. A cylinder of 48 ounces of silver, covered with a coat of gold weighing only one ounce, is usually drawn into a wire two yards of which only weigh one grain; so that 98 yards of the wire weigh no more than 49 grains, and one single grain of gold covers the whole 98 yards; and the thousandth part of a grain is above one-eighth of an inch long.—*Halley*. Eight grains of gold covering a cylinder of silver are commonly drawn into a wire 13,000 feet long; yet so perfectly does it cover the silver, that even a microscope does not discover any appearance of the silver underneath.—*Boyle*.

**WIRTEMBERG.** One of the most ancient states of Germany, and most populous for its extent. The dukes were Protestant until 1772, when the reigning prince became a Catholic. Wirtemberg has been repeatedly traversed by hostile armies, particularly since the revolution of France. Moreau made his celebrated retreat Oct. 23, 1796. The prince of Wirtemberg married the princess royal of England, daughter of George III., May 17, 1797. This state obtained new acquisitions in territory in 1802 and 1805. The elector assumed the title of king Dec. 12, 1805, and was proclaimed Jan. 1, 1806. His majesty, as an ally of France, lost the flower of his army in Russia, in 1812. The kingdom obtained a free constitution in 1819. The king granted liberty of the press, March 2, 1848.

**WISCONSIN.** One of the western United States was organized out of the North West Territory, and received a territorial government in 1836; admitted into the Union as a state Feb. 9, 1847. Population in 1830, 80,945: chiefly emigrants from the northern and middle states.

**WITCHCRAFT.** The punishment of witchcraft was first countenanced by the

church of Rome; and persons suspected of the crime have been subjected to the most cruel and unrelenting punishments. In tens of thousands of cases, the victims, often innocent, were burnt alive, while others were drowned by the test applied; for if, on being thrown into a pond, they did not sink, they were presumed witches, and either killed on the spot, or reserved for burning at the stake. Five hundred witches were burnt in Geneva, in three months, in 1515. One thousand were burnt in the diocese of Como in a year. An incredible number in France, about 1520, when one sorcerer confessed to having 1200 associates. Nine hundred were burnt in Lorraine, between 1580 and 1595. One hundred and fifty-seven were burnt at Wurtzburg, between 1627 and 1629, old and young, clerical, learned, and ignorant. At Lindheim, thirty were burnt in four years, out of a population of 600; and more than 100,000 perished, mostly by the flames, in Germany. Grandier, the parish priest of Loudun, was burnt on a charge of having bewitched a whole convent of nuns, 1634. In Bretagne, twenty poor women were put to death as witches, 1654. Disturbances commenced on charges of witchcraft in Massachusetts, 1648-9; and persecutions raged dreadfully in Pennsylvania in 1683. Maria Renata was burnt at Wurtzburg in 1749. At Kalisk, in Poland, nine old women were charged with having bewitched, and rendered unfruitful, the lands belonging to that palatinate, and were burnt Jan. 17, 1775.—*Ann. Reg.* Five women were condemned to death by the Bramins, at Patna, for sorcery, and executed Dec. 16, 1802.—*Idem.*

**WITCHCRAFT AND CONJURATION IN ENGLAND.** Absurd and wicked laws were in force against them in Great Britain in former times, by which death was the punishment, and thousands of persons suffered both by the public executioners and the hands of the people. A statute was enacted declaring all witchcraft and sorcery to be felony without benefit of clergy, 33 Henry VIII., 1541. Again, 5 Elizabeth, 1562, and 1 James, 1603. Barrington estimates the judicial murders for witchcraft in England in 200 years at 30,000. The English condemned and burnt the beautiful and heroic Joan of Arc, the Maid of Orleans, as a sorceress, A. D. 1431. See *Joan of Arc*. Sir Matthew Hale burnt two persons for witchcraft in 1664. Three thousand were executed in England under the long parliament. Northamptonshire and Huntingdon preserved the superstition about witchcraft later than any other counties. Two pretended witches were executed at Northampton in 1705, while the *Spectator* was in course of publication in London, and five others sever. years afterwards. In 1716, Mrs. Hicks and her daughter, aged nine, were hanged at Huntingdon. In Scotland, thousands of persons were burnt in the period of about a hundred years. Among the victims were persons of the highest rank, while all orders in the state concurred. James I. even caused a whole assize to be prosecuted for an acquittal. This king published his *Dialogues of Dæmonologie* first in Edinburgh, and afterwards in London.\* The last sufferer in Scotland was in 1722, at Dornoch. The laws

---

\* All persons at court who sought the favor of James, praised his *Dæmonologie*; and parliament, to flatter him, made its twelfth law against witchcraft in 1603. By this statute death was inflicted on sorcerers in these words: "If any person shall use any invocation or conjuration of any evil or wicked spirit—shall entertain, employ, feed, or reward any evil or cursed spirit—take up any dead body to employ in witchcraft, sorcery, or enchantment—or shall practise, or shall exorcise, any sort of witchcraft, sorcery, &c., whereby any person shall be killed, wasted, consumed, pined, or lamed." This being the law of the land, no person presumed to doubt the existence of witchcraft; hence Shakspeare gave countenance to the error, and the learned bishop Hall mentions a place where, he said, there were more witches than houses. Allaying of ghosts, driving out evil spirits, and abjuring witches became in consequence, for a century, a profitable employment to the clergy of all denominations. Witch-finders existed, too, as public officers; and, besides the public executions, which disgraced every assizes, multitudes of accused were destroyed by popular resentment.—*Phillips.*

against witchcraft had lain dormant for many years, when an ignorant person, attempting to revive them, by finding a bill against a poor old woman in Surrey for the practice of witchcraft, they were repealed, 10 George II., 1736.—*Viner's Abridgment*.

**WITENA-MOT, OR WITENA-GEMOT.** Among our Saxon ancestors, this was the term which was applied to their deliberations, and which literally signified the assembling of the wise men in the great council of the nation. A witena-mot was called in London, A. D. 833, to consult on the proper means to repel the Danes. This name was dropped about the period of the Norman conquest, and that of parliament adopted. See *Parliament*.

**WOLVES.** These animals were very numerous in England. Their heads were demanded as a tribute, particularly 300 yearly from Wales, by king Edgar, A. D. 961, by which step they were totally destroyed.—*Carte*. Edward I. issued his mandate for the destruction of wolves in several counties of England, A. D. 1289. Ireland was infested by wolves for many centuries after their extirpation in England; for there are accounts of some being found there so late as 1710, when the last presentment for killing wolves was made in the county of Cork. Wolves still infest France, in which kingdom 834 wolves and cubs were killed in 1828-9. When wolves cross a river, they follow one another directly in a line, the second holding the tail of the first in its mouth, the third that of the second, and so of the rest. This figure was, on this account, chosen by the Greeks to denote the year, composed of twelve months following one another, which they denominated *Lycabas*, that is, the march of the wolves.—*Abbé Pluche*.

**WOMAN.** Among the ancient Greeks and Romans, women seem to have been considered merely as objects of sensuality and domestic convenience, and were commonly devoted to seclusion and obscurity; it was not until the northern nations had settled themselves in the provinces of the Roman empire that the female character assumed new consequence. They brought with them the respectful gallantry of the North, and a complaisance towards females which inspired generous sentiments hitherto little known to the polished nations of antiquity, and which ultimately led to the institution of chivalry. England is called the paradise of women; Spain, their purgatory; and Turkey, their hell. The following lines beautifully describe Adam's first sight of Eve:

"He laid him down and slept—and from his side  
A woman in her magic beauty rose;  
Dazzled and charmed, he called that woman 'bride,'  
And his first sleep became his last repose."—*Besser, translated by Bowring*.

The following distinguished men, though married, were unhappy in that state: Aristotle, Socrates, Pittacus, Periander, Euripides, and Aristophanes. Among the moderns: Boccaccio, Dante, Milton, Steele, Addison, Dryden, Molière, Racine, Sterne, Garrick, and lord Bacon.—*Woman; as she is, and as she should be*. Among the most beautiful eulogies on woman is the following, addressed to a lovely Italian nun by an English nobleman:

"Die when you will, you need not wear,  
At heaven's court, a form more fair  
Than beauty at your birth has given;  
Keep but the lips, the eyes we see,  
The voice we hear, and you will be  
An angel ready-made for heaven!"—*Lord Herbert*.

**WOOD-CUTS, OR WOOD-ENGRAVING.** See article *Engraving on Wood*. The invention is ascribed by some to a gun-smith of Florence; by others, to Reuss, a German, A. D. 1460; but it has an earlier origin, as shown in the article referred to. Brought to perfection by Durer and Lucas. Brought

to great perfection by Bewick, Nesbitt, Anderson, &c., in 1789-1799; and more recently by Cruikshank, and others.

**WOOL.** Dr. Anderson, in a memorial subjoined to the "Report of the Committee of the Highland Society," proves, from indisputable records, that from the earliest times down to the reign of queen Elizabeth, the wool of Great Britain was not only superior to that of Spain, but accounted the finest in the universe; and that even in the times of the Romans, a manufacture of woollen cloths was established at Winchester for the use of the emperors. In later times, wool was manufactured in England, and is mentioned in A. D. 1185, but not in any quantity until 1331, when the weaving of it was introduced by John Kempe and other artisans from Flanders. This was the real origin of the English wool manufactures, Edward III., 1331.—*Rymer's Fœdera*. The exportation prohibited, 1337. The exportation of English wool, and the importation of Irish wool into England, prohibited, 1696. The non-exportation law repealed, 1824.

**WOOLLEN CLOTH.** The manufacture of cloth was known, it is supposed, in all civilized countries, and in very remote ages, and probably of linen also. Woollen cloths were made an article of commerce in the time of Julius Cæsar, and are familiarly alluded to by him. They were made in England before A. D. 1200, and the manufacture became extensive in the reign of Edward III., 1331. They were then called Kendal cloth, and Halifax cloth. See preceding article. Blankets were first made in England about A. D. 1340.—*Camden*. No cloth but of Wales or Ireland to be imported into England, 1463. The art of dyeing brought into England, 1608. See article *Dyeing*. Medleys, or mixed broad-cloth, first made, 1614. Manufacture of fine cloth begun at Sedan, in France, under the patronage of cardinal Mazarine, 1646. British and Irish woollens prohibited in France, 1677. All persons obliged to be buried in woollen, or the persons directing the burial otherwise to forfeit 5*l.*, 29 Charles II., 1678. The manufacture of cloth greatly improved in England by Flemish settlers, 1688. Injudiciously restrained in Ireland, 11 William III., 1698. The exportation from Ireland wholly prohibited, except to certain ports of England, 1701. English manufacture encouraged by 10 Anne, 1712, and 2 George I., 1715. Greater in Yorkshire in 1785, than in all England at the Revolution.—*Chalmers*.

QUANTITY AND DECLARED VALUE OF CLOTHS EXPORTED FROM GREAT BRITAIN IN THE FOLLOWING YEARS:—

| Quantity.      | 1800.      | 1825.      | 1830.      | 1840.      |
|----------------|------------|------------|------------|------------|
| Pieces - -     | 1,022,838  | 1,741,983  | 1,747,036  | 2,143,796  |
| Yards - -      | 4,213,677  | 7,798,610  | 5,561,877  | 8,170,642  |
| Declared value | £3,914,661 | £6,194,926 | £4,608,592 | £5,921,116 |

**WORCESTER, BATTLE OF,** in the Civil War, fought between the Royalist army and the forces of the parliament, the latter commanded by Cromwell. A large body of Scots had marched into England with a view to reinstate Charles II., but Cromwell signally defeated them; the streets of the city were strewn with the dead, the whole Scots army having been either killed or taken prisoners. This famous battle afforded Cromwell what he called his *crowning mercy*. Charles with difficulty escaped to France. Of 8000 prisoners, most were sent to bond-service in the American colonies. September 3, 1651.

**WORLD.** According to Julius Africanus, as quoted by Gibbon, the world was created September 1, 5508 B. C. Most chronologers, however, mention the year 4004 B. C. as the period of its first existence. The Jews celebrate the 19th of September as the day of the creation, and some suppose that it was created in spring. Its globular form was first suggested by Thales of Miletus, about 640 B. C. The first geographical table and map of the world was

made by Anaximander, about 560 B. C.—*Pliny*. Discoveries of Pythagoras and his system, about 539 B. C.—*Stanley*. The magnitude of the earth calculated by Eratosthenes, 240 B. C. The system of Copernicus promulgated, A. D. 1530. Map of the world on Mercator's projection, in which the earth is taken as a plane, 1556. The notion of the magnetism of the earth started by Gilberd, 1583. Magnitude of the earth determined by Picart, 1669.

**WORMS, DIET OF.** The celebrated imperial diet before which Martin Luther was summoned, April 4, 1521, and by which he was proscribed. Luther was met by 2000 persons on foot and on horseback, at the distance of a league from Worms. Such was his conviction of the justice of his cause, that when Spalatin sent a messenger to warn him of his danger, he answered, "If there were as many devils in Worms as there are tiles upon the roofs of its houses, I would go on." Before the emperor, the archduke Ferdinand, six electors, twenty-four dukes, seven margraves, thirty bishops and prelates, and many princes, counts, lords, and ambassadors, Luther appeared, April 17th, in the imperial diet, acknowledged all his writings and opinions, and left Worms, in fact, a conqueror. But Frederick the Wise advised him to seclude himself to save his life, which he did for about ten months, and his triumph was afterwards complete.

**WORSHIP.** Athotes, son of Menès, king of Upper Egypt, is said to have been the author of religious worship: he is supposed to be the *Copt* of the Egyptians, and the *Tolh* or *Hermes* of the Greeks; the *Mercury* of the Latins, and the *Teutates* of the Celts or Gauls, 2112 B. C.—*Usher*. Religious worship had an origin in most tribes and nations, in their ignorance of the causes of natural phenomena. Benefits were ascribed to a good spirit, and evils to a bad one. This primary idea was enlarged and diversified by dreaming during imperfect sleep, or thinking while the volition was torpid, and by illusions of the senses, which led to belief in ghosts, signs, and omens, and these causes were augmented by enthusiasts.—*Phillips*. In all nations, whether civilized or barbarous, worship prevails, but is purest in Protestant states.—*Sherlock*.

**WORSHIP IN ENGLAND.** In England were many forms of worship at the period of the Roman invasion. The first Saxons were idolaters, and dedicated to their gods groves of the tallest trees and thickest forests, and there worshipped them without building any temples to them, or representing them by any figures or images. Our days of the week are named after Saxon divinities—the Sun, Moon, Tuesco, Woden, Thor, Friga, and Saturn. Easter is named from their goddess Eostre; and Christmas was from their great festival Geoli. Faul, or Fola, was their dreaded enemy; and they believed in elves and fairies, sorcery and witchcraft. The Saxon religion was afterwards mingled with the Christian; but the former was in time wholly superseded by the latter, and in the end, the Reformation introduced our present pure and simple mode of worship. In Scotland, the benign influence of the Reformation soon put aside all other forms. The following is a remarkable document, given in M'Crie's *Life of John Knox*, (Blackwood, Edinburgh, 1831,) relating to the removal of images from Catholic places of worship in Scotland, at the period of the Reformation:—

"To our traist friendis, the Lairds of Arntilly and Kinvaid.

"Traist friends, after maist hartie commendacion, we pray you fail not to pass incontinent to the kyrk of Dunkeld, and tak down the haill images thereof, and bring furth to the kyrkzard, and burn thaym openly. And siclyle cast down the altaris, and purge the kyrk of all kynd of monuments of idolatrye. And this ye fail not to do, as ze will do us singular empleseur ;

and so committis you to the protection of God. From Edinburgh, the xii of August, 1560.

"Fail not, bot ze tak guid heyd that neither the dasks, windocks, nor durris, be ony ways hurt or broken—either glassin wark or iron wark.

"AR. ERGYLL,  
"JAMES STEWART  
"RUTHVEN."

**WORSTED.** A species of woollen fabric, being spun wool, which obtained its name from having been first spun in a town called Worsted, in Norfolk, in which the inventor lived, and where manufactures of worsted are still extensively carried on, 14 Edward III., 1340.—*Anderson*. Worsted-stocking knave is a term of reproach or contempt used by Shakspeare.

**WRECKS OF SHIPPING.** The wreckers of Cornwall are the inhabitants of a few parishes, on the rocky coast, between Mount's Bay and the Lizard. When a wreck takes place, thousands assemble with axes, hatchets, crow-bars, &c.; and many women and children fight, by habit, for the plunder, utterly regardless of the sufferers.—*Phillips*. The loss of merchant and other ships by wreck upon lee-shores, coasts, and disasters in the open sea, was estimated at Lloyd's, in 1800, to be about an average of 365 ships a year. In 1830, it appeared by *Lloyd's List*, that 677 British vessels were totally lost, under various circumstances, in that year. The annual loss varies; but it is always many hundreds.

SOME OF THE MOST REMARKABLE SHIPWRECKS.

|                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                             |

This stupendous vessel grounded in Dundrum bay, on the east coast of Ireland - Sept. 22, 1846                  |
| Of the <i>Poland</i> from New York to Havre, struck by lightning, May 16, 1840                                                                                                                                                                                                                                                                                                                     | Of the United States sloop of war <i>Boston</i> , on the Bahamas - Nov. 16, 1845                                                                            |
| Of the <i>President</i> steamer, from New York to Liverpool, with fifty passengers on board; sailed on March 11, encountered a terrific storm two                                                                                                                                                                                                                                                  | Of the United States brig <i>Somers</i> , capsized in a squall, off Vera Cruz; 39 drowned - Dec. 8, 1846                                                    |
|                                                                                                                                                                                                                                                                                                                                                                                                    | Of the West India mail packet <i>Tweed</i> ; about 90 souls perished - Feb. 19, 1847                                                                        |
|                                                                                                                                                                                                                                                                                                                                                                                                    | Of the ship <i>Ocean Monarch</i> , of Boston, burnt near Liverpool; 170 lives lost, Aug. 24, 1848                                                           |
|                                                                                                                                                                                                                                                                                                                                                                                                    | Of the barque <i>Charles Bartlett</i> , run down at sea by steamer <i>Europa</i> ; 134 lives lost - June 27, 1849                                           |
|                                                                                                                                                                                                                                                                                                                                                                                                    | See <i>Fires</i> , and <i>Steam Vessels</i> .                                                                                                               |

It is estimated at Lloyd's that about 170 British registered vessels are annually lost; 360 are annually rendered unfit for service; and 1100 experience serious damage, requiring extensive repairs, exclusively of the ordinary wear and tear.

**WRITING.** Pictures were undoubtedly the first essay towards writing. The most ancient remains of writing which have been transmitted to us are upon hard substances, such as stones and metals, used by the ancients for edicts, and matters of public notoriety. Athotes, or Hermes, is said to have written a history of the Egyptians, and to have been the author of hieroglyphics, 2112 B. C.—*Usher*. Writing is said to have been taught to the Latins by Europa, daughter of Agenor, king of Phœnicia, 1494 B. C.—*Thucydides*. Cadmus, the founder of Cadmea, 1493 B. C., brought the Phœnician letters into Greece.—*Vossius*. The commandments were written on two tables of stone, 1491 B. C.—*Usher*. The Greeks and Romans used waxed table-books, and continued the use of them long after papyrus was known. See *Papyrus*, *Parchment*, *Paper*. "I would check the petty vanity of those who slight good penmanship, as below the notice of a scholar, by reminding

them that Mr. Fox was distinguished by the clearness and firmness, Mr. professor Porson by the correctness and elegance, and sir William Jones by the ease and beauty, of the characters they respectively employed."—DR. PARR.

## X.

**XANTHUS, SIEGE OF**, by the Romans under Brutus. After a great struggle, and the endurance of great privations, the inhabitants, being no longer able to sustain themselves against the enemy, and determined not to survive the loss of their liberty, set fire to their city, destroyed their wives and children, and then themselves perished in the conflagration. The conqueror wished to spare them, but though he offered rewards to his soldiers if they brought any of the Xanthians alive into his presence, only 150 were saved, much against their will; 42 B. C.—*Plutarch*.

**XENOPHON, RETREAT OF**. Xenophon surnamed the *Attic Muse*, led in the memorable retreat of the Greeks, one of the most celebrated events in ancient history. The Greeks were mercenaries of the younger Cyrus, after whose defeat and fall at the battle of Cunaxa, they were obliged to retreat; but Xenophon kept them in a compact body, and retreated through Asia into Thrace. The Greeks proceeded through various fierce and barbarous nations, surmounted all the obstacles and dangers that arose at every step, and accomplished their arduous enterprise, after repeated triumphs over toils, fraud, and force. This retreat is esteemed the boldest and best-conducted exploit on record; 401 B. C.—*Vossius*.

**XERXES' CAMPAIGN IN GREECE**. Xerxes entered Greece in the spring of 480 B. C. with an army, which, together with the numerous retinue of servants, eunuchs, and women that attended it, amounted, according to some historians, to 5,283,220 souls. But Herodotus states the armament to have consisted of 3000 sail, conveying 1,700,000 foot, besides cavalry, and the mariners, and attendants of the camp. This multitude was stopped at Thermopylæ, by the valor of 300 Spartans under Leonidas. Xerxes, astonished that such a handful of men should oppose his progress, ordered some of his soldiers to bring them alive into his presence; but for three successive days the most valiant of the Persian troops were defeated, and the courage of the Spartans might perhaps have triumphed longer if a base Trachinian, named Ephialtes, had not led a detachment to the top of the mountain, and suddenly fallen upon the devoted band. The battle of Thermopylæ (*which see*) was the beginning of the disgrace of Xerxes, Aug. 7, 480 B. C. The more he advanced, the more he experienced new disasters. His fleet was defeated at Artemisium and Salamis, and he hastened back to Persia, leaving Mardonius, the best of his generals, behind, with an army of 300,000 men. The rest that had survived the ravages of war, famine, and pestilence, followed Xerxes on his route home.

**XERXES' BRIDGE**. The famous bridge of Xerxes across the Hellespont, the strait which joins the Archipelago and the sea of Marmora. It was formed by connecting together ships of different kinds, some long vessels of fifty oars, others three-banked galleys, to the number of 360 on the side towards the sea, and 818 on that of the Archipelago; the former were placed transversely, but the latter, to diminish the strain on their cables, in the direction of the current, all secured by anchors and cables of great strength. On extended cables between the lines of shipping were laid fast-bound rafters, over these a layer of unwrought wood, and over the latter was thrown earth: on each side was a fence, to prevent the horses and

beasts of burthen from being terrified by the sea, in the passage from shore to shore. This wonderful work was completed, it is said, in one week, 480 B. C.

## Y.

**YEAR.** The Egyptians, it is said, were the first who fixed the length of the year. The Roman year was introduced by Romulus 738 B. C.; and it was corrected by Numa 713 B. C., and again by Julius Cæsar, 45 B. C. See *Calendar*. The solar or astronomical year was found to comprise 365 days, 5 hours, 48 minutes, 51 seconds and 6 decimals, 265 B. C. The sidereal year, or return of the same star, is 365 days, 6 hours, 9 minutes, and 11 seconds. A considerable variation prevailed generally among the nations of antiquity, and still partially prevails, with regard to the commencement of the year. The Jews dated the beginning of the sacred year in the month of March; the Athenians in the month of June; the Macedonians on the 24th Sept.; the Christians of Egypt and Ethiopia on the 29th or 30th of August; and the Persians and Armenians on the 11th of that month. Nearly all the nations of the Christian world now commence the year on the 1st of January. Charles IX. of France, in 1654, published an arrêt, the last article of which ordered the year for the time to come to be constantly and universally begun, and written on and from January 1. See *New Style*, &c.

**YEAR, LUNAR.** This is the space of time which comprehends twelve lunar months, or 454 days, 8 hours, 48 minutes, and was in use among the Chaldeans, Persians, and ancient Jews. Once in every three years was added another lunar month, so as to make the solar and lunar year nearly agree. But though the months were lunar, the year was solar; that is, the first month was of thirty days, and the second of twenty-nine, and so alternately; and the month added triennially was called the second Adar. The Jews afterwards followed the Roman manner of computation.

**YEAR OF OUR LORD.** The first sovereign who adopted this distinction was Charles III., emperor of Germany: he added "In the year of our Lord" to his reign, A. D. 879. It was followed by the French kings, and afterwards by the English; and is the mode of designating the year from the birth of the Redeemer in all Christian countries. See *Eras*.

**YEAR, PLATONIC.** The doctrine of the Platonic year was believed among the Chaldeans, and in the earliest ages. It is that space of time at the end whereof all the planets are to return to the same point from whence they set out, and have the same aspects and configurations one upon another. Some affirm this return to be in 15,000 common years, others in 36,000. The ancient heathens were of opinion, that when this period was completed, the world would be renewed again, and the departed souls re-enter their bodies, and go through a second course of being.

**YEAR, SABBATICAL.** This was every seventh year, among the Jews. In this year the people were enjoined by the law to let the ground lie fallow and have rest. Every seventh Sabbatical year, or every forty-ninth year was called the JUBILEE YEAR, when was joy and rejoicing; all debts were forgiven, and slaves set at liberty, and it was usual to return to the original families all estates and property that had been sold or mortgaged.—*Hist. Jews*.

**YEAR, SIBERIAN, AND IN LAPLAND.** The year in the northern regions of Siberia and Lapland, is described in the following calendar, as given by a recent traveller:—

June 23, Snow melts.  
 July 1, Snow gone.  
 July 9, Field quite green.  
 July 17, Plants at full growth.

July 25, Plants in flower.  
 Aug. 2, Fruits ripe.  
 Aug. 10, Plants shed their seed.  
 Aug. 18, Snow.

The snow then continues upon the ground for about ten months, from August 18th of one year, to June 23d of the year following, being 309 days out of 365; so that while the three seasons of spring, summer, and autumn, are together only fifty six days, or eight weeks, the winter is of forty-four weeks' duration in these countries.

**YEAR AND A DAY.** A space of time, in law, that in many cases establishes and fixes a right, as in an estray, on proclamation being made, if the owner does not claim it within the time, it is forfeited. The term arose in the Norman law, which enacted that a beast found on another's land, if unclaimed for a year and a day, belonged to the lord of the soil. It is otherwise a legal space of time.

**YELLOW FEVER,** THE, visited the city of New York in the years 1741, 1742, 1791, 1795, 1798, 1799, 1800, 1803, 1805, 1819, and 1822. The deaths by that disease were as follows: 732 in 1795; 2086 in 1798 (population, 55,000); 670 in 1803; 280 in 1805; 23 in 1819; 366 in 1822. In 1805, 37,000 of the inhabitants (out of 76,000, the whole population) fled from the city. In 1804, 40 persons died with it at Brooklyn, but New York escaped. Philadelphia was nearly desolated by it in 1793, and again in 1798. 4041 persons died in 1793, and 17,000 fled from the city (population, 50,000). In 1798, the mortality was great, and 50,000, out of 70,000 inhabitants, fled. Several thousand died, and the greatest number of deaths in one day was 117. Baltimore suffered from this disease in 1798, 1819, and 1821. New Orleans and Havana have it annually. In several of the islands of the West Indies in 1732, 1739, and 1745. It broke out in Spain in Sept. 1803. The yellow fever was very violent at Gibraltar in 1804 and 1814; in the Mauritius, July 1815; at Antigua, in Sept. 1816; and it raged with dreadful consequences at Cadiz, and the Isle of St. Leon, in Sept. 1819. The yellow fever rages more or less every year or two at Charleston, New Orleans, and other southern cities of the United States. It first appeared at Rio Janeiro in 1849-50, where it proved fatal to many thousands.

**YOKE.** The ceremony of making prisoners pass under it, was first practised by the Samnites towards the Romans, 321 B. C. This disgrace was afterwards inflicted by the Romans upon their vanquished enemies.—*Abbé Lenglet, Dufresnoy.*

**YORK.** The *Eboracum* of the Romans, and one of the most ancient cities of England. Here Severus held an imperial court, A. D. 207; and here also Constantius kept a court, and his son Constantine the Great was born, in 274. York was burnt by the Danes, and all the Normans slain, 1069. York received its charter from Richard II., and the city is the only one in the British kingdoms, besides London and Dublin, to whose mayors the prefix of *lord* has been granted.

**YORK, ARCHBISHOPRIC** OF, the most ancient metropolitan see in England, being, it is said, so made by king Lucius, about A. D. 180, when Christianity was first, although partially, established in England. But this establishment was overturned by the Saxons driving out the Britons. When the former were converted, pope Gregory determined that the same dignity should be restored to York, and Paulinus was made archbishop of this see, about A. D. 622. York and Durham were the only two sees in the north of England for a large space of time, until Henry I. erected a bishopric at Carlisle, and Henry VIII. another at Chester. York was the metropolitan see of the Scottish bishops; but during the time of archbishop Nevil, 1464, they withdrew their obedience, and had archbishops of their own. Much dispute arose between the two English metropolitans about precedence, as, by pope Gregory's institutions, it was thought he meant, that which ever of them was

first confirmed, should be superior; appeal was made to the court of Rome by both parties, and it was determined in favor of Canterbury; but York was allowed to style himself primate of England, while Canterbury styles himself primate of *all* England. York has yielded to the church of Rome eight saints, and three cardinals; and to the civil state of England, twelve lord chancellors, two lord treasurers, and two lord presidents of the north. It is rated in the king's books, 39 Henry VIII., 1546, at 1609*l.* 1*9s.* 2*d.* per annum.—*Beatson*.

**YORK CATHEDRAL, ENGLAND.** This majestic fabric was erected at different periods, and on the site of former buildings, which have again and again been destroyed by fire. The first Christian church erected here, which appears to have been preceded by a Roman temple, was built by Edwin, king of Northumbria, about the year 630. It was burnt for the third time in 1137, along with St. Mary's Abby, and 39 parish churches in York. Archbishop Roger began to build the choir in 1171, but it was by many hands, and with the contributions of many families, and of multitudes who were promised indulgences for their liberality, that this magnificent fabric was completed, about 1361. It was set on fire by Jonathan Martin, a lunatic, and the roof of the choir and its internal fittings destroyed, Feb. 2, 1829; the damage estimated at 60,000*l.*, was repaired in 1832.

**YORK AND LANCASTER, WARS OF THE HOUSES OF.** The first battle between these houses was that of St. Albans, fought May 22, 1455. The last was that of Tewkesbury, fought May 4, 1471. In these battles the Yorkists, or *White Roses*, were victorious against the house of Lancaster, or the *Red Roses*. But in the sixteen years between these two dates, more than thirty great battles were fought with different success, and half the country was depopulated, and nearly the whole of the nobility exterminated. See *Roses*.

**YORKTOWN.** A village in Virginia, memorable for the surrender of the British army under lord Cornwallis, consisting of 7000 men, to the Americans and their allies under Washington and count Rochambeau, Oct. 19, 1781. This event decided the contest for independence in favor of the Americans.

**YUCATAN,** adopted a constitution as a republic (having declared its independence of Mexico), May 16, 1841.

## Z.

**ZAMA, BATTLE OF,** between the two greatest commanders in the world at the time, Hannibal and Scipio Africanus. It was won by Scipio, and was decisive of the fate of Carthage; it led to an ignominious peace which was granted the year after, and closed the second Punic war. The Romans lost but 2000 killed and wounded, while the Carthaginians lost, in killed and prisoners, more than 40,000; some historians make the loss greater; B. C. 202.

**ZANTE.** This island, with the rest of the islands now forming the Ionian republic, was subject to Venice prior to the French Revolution; but the whole group were ceded to France by the treaty of Campo Formio (*which see*), October 17, 1797. They were taken by a Russian and Turkish fleet, and were erected into an independent republic by the name of the Seven Islands, in 1799. They fell into different hands in the course of the succeeding year, and were surrendered to the French by the Russians, together with Ragusa, August 14, 1807. They submitted to the British army, October 3, 1809. In the arrangements at the congress of Vienna, in 1815, they were put under the protection of Great Britain. The treaty was ratified 2.

Paris for that purpose, between Great Britain and Russia, November 5, 1815. The new constitution was ratified by the prince regent, February 22, 1817.

**ZANZALEENS.** This sect rose in Syria, under Zanzalee, A. D. 535; he taught that water by baptism was of no efficacy, and that it was necessary to be baptized with fire, by the application of a red-hot iron. The sect was at one time very numerous.—*Ashe*.

**ZE, ZOW, ZIERES.** For *ye, you, and yours*. The letter *z* was retained in Scotland, and was commonly written, for the letter *y*, so late as the reign of queen Mary, up to which period many books in the Scottish language were printed in Edinburgh with these words, A. D. 1543.

**ZEALAND, NEW, IN THE PACIFIC.** Discovered by Tasman in 1642. He traversed the eastern coast, and entered a strait where, being attacked by the natives soon after he came to anchor, he did not go ashore. From the time of Tasman, the whole country, except that part of the coast which was seen by him, remained altogether unknown, and was by many supposed to make part of a southern continent, till 1770, when it was circumnavigated by captain Cook, who found it to consist of two large islands, separated by the strait. The introduction of potatoes into New Zealand has saved many lives, for the natives give this root a decided preference to human flesh, under every circumstance, except that of wreaking vengeance on a chief of the foe whom they have taken in battle. Captain Cook, in 1773, planted several spots of ground on this island with European garden-seeds; and in 1777, he found a few fine potatoes, greatly improved by change of soil.

**ZELA, BATTLE OF,** in which Julius Cæsar defeated Pharnaces, king of Pontus, son of Mithridates. Cæsar, in announcing this victory, sent his famous dispatch to the senate of Rome, in three words: "*Veni, vidi, vici*"—"I came, I saw, I conquered," so rapidly and easily was his triumph obtained. This battle concluded the war; Pharnaces escaped into Bosphorus, where he was slain by his lieutenant, Asander; and Pontus was made a province of Rome, and Bosphorus given to Mithridates of Pergamus, 47 B. C.—*Sue. Cæs.*

**ZELICHOW, BATTLE OF,** between the Polish and Russian armies, one of the most desperate and bloody battles fought by the Poles in their late struggle for the freedom of their country. The Russians, who were commanded by general Diebitch, were defeated, losing 12,000 men in killed, wounded, and prisoners; and Diebitch narrowly escaped being taken in the pursuit of his flying army, April 6, 1831.

**ZENO, SECT OF,** founded by Zeno. This sect also took the name of Stoic, from a public portico, so called, from which the philosopher delivered his harangues. It was the most famous portico in Athens, and was called by way of eminence, *Stoa*, the porch. See *Stoics*. In order to form his own school of philosophy, and to collect materials for a new system, Zeno had attended the schools of various masters, and among others he offered himself as a disciple of Polemo. This philosopher, aware of Zeno's object, said, "I am no stranger, Zeno, to your Phœnician arts. I perceive that your design is to creep slyly into my garden, and steal away my fruit." He taught about 312 B. C.

**ZINC.** The discovery of this metal, so far as the fact is known, is due to the moderns. It is said to have been long known in China, however, and is noticed by European writers as early as A. D. 1231; though the method of extracting it from the ore was unknown for nearly five hundred years after. A mine of zinc was discovered on lord Ribblesdale's estate, Craven, Yorkshire, in 1809. Zincography was introduced in London shortly after

the invention of lithography became known in England, in 1817. See *Lithography*.

**ZODIAC.** The obliquity of the zodiac was discovered, its twelve signs named, and their situations assigned them in the heavens, by Anaximander, about 560 B. C. The Greeks and Arabians borrowed the zodiac from the Hindoos, to whom it has been known from time immemorial.—*Sir William Jones*. The invention of geographical maps, and of sun-dials, belongs also to Anaximander.—*Pliny*.

**ZOE, REIGN OF.** This extraordinary woman, daughter of the emperor Constantine IX., married Romanus, who, in consequence, succeeded to the throne of the Eastern empire, A. D. 1028. Zoe, after intriguing with a Paphlagonian money-lender, caused her husband Romanus to be poisoned, and afterwards married her favorite, who ascended the throne under the name of Michael IV., 1034. Zoe adopted for her son Michael the Fifth, the trade of whose father (careening vessels) had procured him the surname of Calaphates, 1041. Zoe and her sister, Theodora, were made sole empresses by the populace; but after two months, Zoe, although she was sixty years of age, took for her third husband Constantine X., who succeeded to the empire in 1042. See *Eastern Empire*.

**ZOOLOGY.** The animal kingdom was divided by Linnæus into six classes, viz :—*Mammalia*, which includes all animals that suckle their young; *Aves*, or birds; *Amphibia*, or amphibious animals; *Pisces*, or fishes; *Insecta*, or insects; *Vermes*, or worms; A. D. 1741. From this period the science of zoology has had many distinguished professors, the most illustrious of whom was the baron Cuvier, who died in Paris, May 13, 1832. The Zoological Gardens of London were opened in April 1827; the society was chartered March 27, 1829.

**ZUINGLIANS.** The followers of Ulrichus Zuinglius. This zealous reformer, while he officiated at Zurich, declaimed against the church of Rome and its indulgences, and effected the same separation for Switzerland from the papal dominion, which Luther had for Saxony. He procured two assemblies to be called; by the first he was authorized to proceed, and by the second the ceremonies of the Romish church were abolished, 1519. Zuinglius, who began as a preacher, died in arms as a soldier: he was slain in a skirmish against the Popish opponents of his reformed doctrines, in 1531. The reformers who adhered entirely to Zuinglius were called after his name and also Sacramentarians.

**ZURICH.** It was admitted to be a member of the Swiss confederacy, of which this canton was made the head, A. D. 1351. Cession of Utznach, 1436. This was the first town in Switzerland that separated from the church of Rome, in consequence of the opposition given by Zuinglius to a Franciscan monk sent by Leo X., to publish indulgences here, 1519, *et seq.* A grave-digger of Zurich poisoned the sacramental wine, by which eight persons lost their lives, and many others were grievously injured, Sept. 4, 1776. The French were defeated here, losing 4000 men, June 4, 1799. The Imperialists were defeated by Massena, the former losing 20,000 men in killed and wounded, Sept. 24, 1799. See *Switzerland*.

## LITERARY CHRONOLOGY.

[*From the Companion to the British Almanac, with additions.*]

THE following Chronological List of Authors is in extension of the Catalogue furnished in the *Companion* of 1831, differing from it by adding to the name of each author the title of his most important production, or some word expressive of the nature of his works.

In order to show the various literary character of each age the catalogue is divided into three columns: the first containing those authors who have drawn chiefly from their own sources, as poets and novelists; the second those who treat on matters of fact, as history and geography; and the third, the philosophic and scientific writers. Where an author has written in different styles, his name will be found in the column to which his most distinguished productions appertain. The Hebrews having, almost without exception, treated on speculative subjects, the triple division does not extend to them.

The dates of birth and death are appended to each name, where they could be ascertained. In other cases, the situation of the name will show nearly the time when each author has flourished.

### HEBREW.

[The words in italics between parentheses are the familiar appellations of the preceding persons; they are formed from the first letters of each word composing their names. For example, the Jews call Maimonides *Rambam*, from the four initial letters of his full name, Rabbi Moses ben Maimon. J<sup>m</sup> Tof, in like manner, is called *Ritba*, from the words Rabbi Yom Tof bar Abraham.]

| B. C. |                                                  | B. C. |                                                                                                                                                                           |
|-------|--------------------------------------------------|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1500  | Moses, 1572—1452.                                | 100   | Nechoniah ben Hakkanah, 'Sepher habahir,' the illustrious book. The most ancient of Rabbinical books. Cabbalistic.                                                        |
|       | Phinehas, supposed author of the book of Joshua. |       | Jonathan, 'Targum,' or Chaldee paraphrase of the Bible.                                                                                                                   |
| 1100  | David, 1085—10815.                               | A. D. |                                                                                                                                                                           |
| 1000  | Solomon, 1033—975.                               | 0     | Onkelos, 'Targum.'                                                                                                                                                        |
| 800   | Jonah, <i>d.</i> 761.                            |       | Josephus, <i>b.</i> 35.                                                                                                                                                   |
|       | Amos.                                            | 100   | Akiba, <i>d.</i> 120. The Mishna has been incorrectly attributed to him.                                                                                                  |
|       | Hosea.                                           |       | Shimeon ben Jochai ( <i>Rashbi</i> ). The 'Zohar,' a celebrated cabbalistic Commentary on the Pentateuch is usually attributed to him, but was composed by his disciples. |
|       | Joel.                                            |       | Jose ben Chilpheta, 'A History of the World.'                                                                                                                             |
|       | Obadiah.                                         |       | Nathan of Babylon, 'Pirke aboth,' the sayings of the fathers. Ethics.                                                                                                     |
|       | Micah.                                           |       | Eliezer, 'Pirke Eliezer,' the sayings of Eliezer, a History of the World.                                                                                                 |
|       | Isaiah, <i>d.</i> 681.                           |       | Judah Hakkadosh, 'Mishna,' the oral traditions of the Jews, which, with the Gemara or Commentary, constitutes the Babylonian Talmud.                                      |
|       | Nahum.                                           |       |                                                                                                                                                                           |
| 700   | Habakkuk.                                        |       |                                                                                                                                                                           |
|       | Zephaniah.                                       |       |                                                                                                                                                                           |
|       | Jeremiah.                                        |       |                                                                                                                                                                           |
| 600   | Baruch.                                          |       |                                                                                                                                                                           |
|       | Ezekiel.                                         |       |                                                                                                                                                                           |
|       | Daniel.                                          |       |                                                                                                                                                                           |
|       | Zechariah.                                       |       |                                                                                                                                                                           |
|       | Haggai.                                          |       |                                                                                                                                                                           |
| 500   | Ezra.                                            |       |                                                                                                                                                                           |
|       | Nehemiah, <i>d.</i> 430.                         |       |                                                                                                                                                                           |
|       | Malachi.                                         |       |                                                                                                                                                                           |
| 300   | Jesus, son of Sirach.                            |       |                                                                                                                                                                           |

- Raf, supposed author of the 'Siphra,' a commentary on Leviticus, and of the 'Siphre,' a commentary on Numbers and Deuteronomy.
- 200 Ushaya, 'Bereshith Rabba,' a Commentary on the Mishna.
- Author of the 'Mechilta,' a Commentary on Exodus.
- Jochanan, 'Talmud of Jerusalem.'
- 300 Rabba bar Nachmon, 'Rabboth,' Commentaries on the Bible.
- 400 Rabasha, began the 'Gemara,' a Commentary on the Mishna.
- Martemar, continued the 'Gemara.'
- 500 Abina, completed the 'Gemara.'
- 800 Simeon Hejara, 'Great decisions,' jurid.
- Judah bar Nachman (*Ribban*), Compendium of the preceding.
- 980 Saadia Gaon, 'Philosopher's Stone,' 'Book of Faith,' 'Grammar,' &c.
- Sherira, 'The Book of Answers,' history.
- 1000 Samuel Haccohen, *d.* 1034.
- Joseph Ching, Grammarian.
- Judah Barzelloni, 'Rights of Women,' juridic.
- Joseph ben Gorion (*Ribag*), 'Compendium of Hebrew History.'
- Moses Aben Ezra, *d.* 1080. Grammarian.
- Isaac of Cordova, *d.* 1094. 'Chest of Spices.'
- 1100 Alphe, *d.* 1103. 'Compendium of the Talmud.'
- Nathan, *d.* 1106. 'Talmudic and Chaldee Lexicon.'
- Solomon Jarchi (*Rashi*), Grammarian, *d.* 1105. 'Tongue of the Learned.'
- Joseph ben Meir (*Ribam*), *d.* 1141. 'Commentary on Talmud.'
- Juda the Levite, 'Sepher Cosri,' philosophical.
- Abraham Aben Ezra, very learned Commentaries on the Bible.
- Tam, *d.* 117. 'Sepher Hajashar,' the Book of Righteousness.
- Samuel ben Meir (*Rashbam*), *d.* 1171. 'Commentary on the Talmud.'
- Benjamin of Tudela, *d.* 1173. 'Travels.'
- Samuel, 'Book of Piety,' Ethics and Theology.
- Isaac bar Abba, Grammarian.
- Moses Kimhi, Grammarian.
- David Kimhi (*Radak*), Grammarian.
- Abraham bar Dior (*Rabad*), *d.* 1199. Cabbalist.
- Abraham ben David (*Rabad*), Jurist.
- Moses ben Maimon (*Rambam*), 1131-1205. 'Yad Hazaka,' the strong hand, a very celebrated Commentary on the Talmud, &c. (This author is better known by his Latinized name, Maimonides.)
- 1200 Abraham bar Chasdai, Ethics.
- Eliakim, Ceremonies.
- Baruch Miggarmisa, Laws, Ceremonies.
- Eliezer Miggarmisa, Ethics, Commentaries.
- Asher, Compendia of Talmud.
- Perez Haccohen (*Haraph*), Cabbalist.
- Moses ben Nachman (*Ramban*), *d.* 1260. 'Law of Man,' a celebrated book on Ceremonies, &c.
- Moses Mikkotsi, 'Great Book of Precepts,' 'Compendium of Talmud.'
- Isaac ben Solomon, *d.* 1268. 'Proverbs and Fables.'
- Nissim, *d.* 1268. 'Book of Homilies.'
- Isaac ben Joseph, *d.* 1270. 'Book of Precepts.'
- Moses Aben Tybon, Translator of Mathematical and Philosophical works from the Greek and Arabic.
- Solomon ben Adras (*Rashba*), Theology.
- Meir, Meditations, on 'Maimonides.'
- Menachem Rekanat, *d.* 1290. 'Reason for the enactment of the Laws of Moses.'
- Bechai, 'Commentary on Pentateuch.'
- 1300 Shimson, *d.* 1312. 'Intro. to the Talmud.'
- Isaac Israeli, 'Foundation of the World,' History.
- Judah, son of Benjamin, Ritual.
- Mordechai, 'Compendium of Talmud.'
- Isaac Dura, 'On Forbidden and Permitted Food.'
- Aaron Haccohen, 'The Way of Life.'
- Jerucham, 'Book of Rectitude.'
- Jacob ben Asher, 'The Four Orders,' a Ritual of much authority.
- David Abudraham, astronomy.
- Levi ben Gerson (*Rabba*), *d.* 1370. 'Commentary on the Law.'
- Menachen Aben Serach, *d.* 1375. Ritual.
- Isaac ben Sheshat (*Ribash*), 'Questions and Answers on Various Subjects.'
- Moses Haccohen, 'Help of Faith.'

## LATIN AND ITALIAN.

[The Latin ceased to be a spoken language about the sixth century, but was in almost universal use throughout Europe as the language of composition until the thirteenth century, when the modern languages began to appear.

As long as the literature of the West was almost exclusively confined to Italy we have arranged all authors who wrote in Latin under the same head; but about the sixth century they will be found under those countries where their works were published, whatever the language in which they wrote.]

## RUSSIAN.

[The Russian has been in use as the language of literature scarcely more than a century. Almost all books used in Russia were written in the ancient Slavonic tongue, which does not greatly differ from Russian, but more closely resembles the languages spoken in Serbia, and in the other provinces near the Save and Danube. The first printing-office in Russia was established in 1563.]

| E. A. Poe, 1811—1849, Poems,<br>Tales.                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# HEATHEN DEITIES, AND OTHER FABULOUS PERSONS,

WITH THE

## HEROES AND HEROINES OF ANTIQUITY.

### A

*Abbaris*, a Scythian, priest of Apollo.  
*Abe'dna*, a goddess of voyages, &c.  
*Abretanus*, a surname of Jupiter.  
*A'bron*, a very voluptuous Grecian.  
*Abylla*, a famous mountain in Africa.  
*Acan'tha*, a nymph beloved by Apollo.  
*Acastus*, the name of a famous hunter.  
*Acelus*, one of the priests of Bacchus.  
*Acha'menes*, the first king of Persia.  
*Acho'tes*, a trusty friend of Æneas.  
*Ach'eron*, a son of Titan and Terra, changed into a river of hell for assisting the Titans in their war against Jupiter.  
*Achil'les*, son of Peleus, king of Thrace, and Thetis, a goddess of the sea, who, being dipped by his mother in the river Styx, was invulnerable in every part except his right heel, by which she held him; after signaling himself at the siege of Troy, for his valor, as well as cruelty, he was at length killed by Paris with an arrow.  
*Acid'alia* and *Armatia*, names of Venus.  
*Acidallus*, a famous fountain of Boeotia.  
*A'cis*, a Sicilian shepherd, killed by Polyphemus, because he rivalled him in the affections of Galetia.  
*Ac'mon*, a famous king of the Titans.  
*Ac'ratus*, the genius of drunkards at Athens.  
*A'iaon*, a celebrated hunter, who, accidentally discovering Diana bathing, was by her turned into a stag, and devoured by his own hounds.  
*Admetus*, a king of Thessaly.  
*Adonis*, the incestuous offspring of Cinyras and Myrrha, remarkably beautiful, beloved by Venus and Proserpine.  
*Adrast'ea*, the goddess Nemesis.  
*Æ'acus*, one of the infernal judges.  
*Æ'ga*, Jupiter's nurse, daughter of Olenus.  
*Æge'us*, a king of Attica, giving name to the Ægean sea by drowning himself in it.  
*Ægi'na*, a particular favorite of Jupiter.  
*Æ'gis*, a Gorgon, whom Pallas slew.  
*Æ'gle*, one of the three Hesperides.  
*Æ'gon*, a wrestler famous for strength.  
*Ægyptus*, son of Neptune and Lybia.  
*Æ'glo*, one of the three Harpies.  
*Æne'as*, son of Anchises and Venus.  
*Æolus*, the god of the winds.

*Æolus*, one of the four horses of the sun.  
*Æsculap'ius*, a Roman god of riches.  
*Æsculap'ius*, the god of physic.  
*Æthal'ides*, a son of mercury.  
*Æ'thon*, one of the four horses of the sun.  
*Æ'theus*, a title of Vulcan.  
*Æ'tol'os*, a son of Endymion and Diana.  
*Agamem'non*, a brother of Menelaus, chosen captain-general of the Greeks at the siege of Troy.  
*Aganippe*, daughter of the river Permessus, which flows from mount Helicon.  
*Agel'or*, the first king of Argos.  
*Agem'ria*, the goddess of industry.  
*Agelas'tus* and *Agesil'aus*, names of Pluto.  
*Agla'ia*, one of the three Graces.  
*A'jaz*, one of the most distinguished princes and heroes at the siege of Troy.  
*Albu'nea*, a famous sybil of Tripoli.  
*Alci'des*, a title of Hercules.  
*Alci'nous*, a king of Corcyra.  
*Alci'oneus*, a giant slain by Hercules.  
*Alci'ope*, a favorite mistress of Neptune.  
*Alcme'na*, the wife of Amphitryon.  
*Alecto*, one of the three Furies.  
*Alectryon*, or *Gallus*, a favorite of Mars.  
*Al'mus*, and *Alum'nus*, titles of Jupiter.  
*Alo'a*, a festival of Bacchus and Ceres.  
*Alw'us*, a giant who warred with Jupiter.  
*Amalthæ'a*, the goat that suckled Jupiter.  
*Ambarvalle*, a spring sacrifice to Ceres.  
*Ambrosia*, the food of the gods.  
*Am'mon*, a title of Jupiter.  
*Amphiar'us*, son of Apollo and Hypermnestra, a very famous augur.  
*Amphime'don*, one of the suitors of Penelope.  
*Amphi'on*, a famous musician.  
*Amphitrite*, the wife of Neptune.  
*Amyntor*, a king of Epirus.  
*Ana'tis*, the goddess of prostitution.  
*Ance'us*, a king of Arcadia.  
*Andro'geus*, the son of Minos.  
*Androm'ache*, the wife of Hector.  
*Androm'eda*, the daughter of Cepheus and Cassiope, who, contending for the prize of beauty with the Nereides, was by them bound to a rock and exposed to be devoured by a sea monster; but Perseus slew the monster, and married her.  
*Ange'rona*, the goddess of silence.

*An'na*, the sister of Pygmalion and Dido.  
*Antæas*, a giant son of Neptune and Terra; he was squeezed to death by Hercules.  
*Anteros*, one of the names of Cupid.  
*Antever'ia*, a goddess of women in labor.  
*Anthia*, and *Arg'hea*, titles of Juno.  
*Anubis*, an Egyptian god with a dog's head.  
*Aonides*, a name of the Muses.  
*Aoad'ria*, and *Aphroditis*, titles of Venus.  
*A'pis*, son of Jupiter and Niobe, called also, Serapis, and Osiris: he first taught the Egyptians to sow corn and plant vines; after his death they worshipped him in the form of an ox, a symbol of husbandry.  
*Arch'ne*, a Lydian princess, turned by Minerva into a spider, for presuming to vie with her at spinning.  
*Areth'usa*, the daughter of Nereus.  
*Argent'nius*, and *Æscul'nius*, gods of wealth.  
*Argo*, the ship that conveyed Jason and his companions to Colchis, and reported to have been the first man-of-war.  
*Argonauts*, the companions of Jason.  
*Argus*, son of Aristor, said to have had a hundred eyes; also an architect, who built the ship Argo.  
*Ar'ad'ne*, daughter of Minos, who, from love, gave Theseus a clue of thread to guide him out of the Cretan labyrinth: being afterwards deserted by him, she was married to Bacchus, and made his priestess.  
*Arimas'pi*, a warlike people of Scythia.  
*Ar'ion*, a lyric poet of Methymna.  
*Ariste'us*, son of Apollo and Cyrene.  
*Aristom'eeus*, a cruel Titan.  
*Aristoph'anes*, a comic poet, born at Lindus, a town of Rhodes.  
*Arte'mis*, the Delphic sybil; also Diana.  
*Ascle'pia*, festivals of Æsculapius.  
*Asco'lia*, feasts of Bacchus, celebrated in Attica.  
*Aster'ia*, daughter of Ceus.  
*Astrap'us*, and *Ataby'rus*, Jupiter.  
*Astra'ia*, the goddess of justice.  
*Astrol'ogus*, a title of Hercules.  
*Æsty'anax*, the only son of Hector.  
*Æstypal'ea*, daughter of Phœnix.  
*At'e*, the goddess of revenge.  
*Atlant'es*, a savage people of Ethiopia.  
*Atlas*, a king of Mauritania.  
*Æt'ropos*, one of the three Fates.  
*Aver'nus*, a lake on the borders of hell.  
*Averrunc'us*, a god of the Romans.  
*Aug'elas*, a king of Elis, whose stable of 3000 oxen was not cleansed for 30 years, yet Hercules cleansed it in one day.  
*Avistuper*, a title of Priapus.  
*Au'rea*, a name of Fortuna.  
*Auro'ra*, the goddess of morning.  
*Autol'ean*, a general of the Crotonians.  
*Autum'nus*, the god of fruits.

## B

*Bac'chus*, the god of wine.  
*Bap'ta*, the goddess of shame.  
*Barba'ia*, a title of Venus and Fortuna.  
*Bas'sareus*, a title of Bacchus.  
*Bal'tus*, a herdsman, turned by Mercury into a loadstone.  
*Bau'cis*, an old woman, who, with her husband Philemon, entertained Jupiter and Mercury, travelling over Phrygia, when all others refused.

*Beller'o'phon*, son of Glaucus, king of Eph'ra, who underwent numberless hardships for refusing an intimacy with Schenobæa, the wife of Pretus, king of Argos.  
*Bello'na*, the goddess of war.  
*Berecyn'thiu' Mæ'ter*, a title of Cybele.  
*Bereu'ice*, a Grecian lady, who was the only person of her sex permitted to see the Olympic games.  
*Ber'gion*, a giant, slain by Jupiter.  
*Bib'lia*, the wife of Duillius, who first instituted a triumph for naval victory.  
*Bil'ceps*, and *Bil'frons*, names of Janus.  
*Bisul'tor*, a name of Mars.  
*Bil'thon*, a remarkably strong Grecian.  
*Boli'na*, a nymph rendered immortal for her modesty and resistance of Apollo.  
*Bo'na Del'a*, a title of Cybele, and Fortuna.  
*Bo'nus Dal'mon*, a title of Priapus.  
*Bo'reas*, son of Æstræus and Heribæia, generally put for the north wind.  
*Bre'vis*, a title of Fortuna.  
*Bri'reus*, a monstrous giant, son of Titan and Terra: the poets feign him to have had a hundred arms and fifty heads.  
*Bri'mo*, and *Bulbastic*, names of Hecate.  
*Bris'eis*, daughter of Brises, priest of Jupiter, given to Achilles upon the taking of Lyrnessus, a city of Troas, by the Greeks.  
*Brev'ites*, a maker of Jupiter's thunder.  
*Bro'theus*, a son of Vulcan, who threw himself into mount Ætna, on account of his deformity.  
*Bruna'lia*, feasts of Bacchus.  
*Bubo'na*, the goddess of oxen.  
*Busi'tor*, a son of Neptune, and a most cruel tyrant; he was slain by Hercules.  
*Byb'lis*, the daughter of Miletus.

## C

*Cabar'ni*, priests of Ceres.  
*Cab'iri*, priests of Cybele.  
*Cal'brus*, a god of the Phæsielitæ.  
*Cal'cus*, a son of Vulcan.  
*Cad'mus*, son of Agenor and Telephessa, who, searching in vain for his sister, built the city of Thebes, and invented 16 letters of the Greek alphabet.  
*Cad'u'ceus*, Mercury's golden rod or wand.  
*Cæl'ca*, and *Conser'atrix*, titles of Fortuna.  
*Cæc'ulus*, a robber, son of Vulcan.  
*Cæl'neas*, a title of Jupiter.  
*Cal'chas*, a famous Greek soothsayer.  
*Calisto*, the daughter of Lycaon.  
*Callio'pe*, the muse of heroic poetry.  
*Calyp'so*, daughter of Oceanus and Thetis, who reigned in the island of Ogygia, where she entertained and became enamored of Ulysses, on his return from Troy.  
*Cam'bles*, a gluttonous king of Lydia.  
*Camby'ses*, the son of Cyrus, and king of the Medes and Persians.  
*Camæ'na*, and *Carna*, goddess of infants.  
*Cal'nes*, a title of the Furies.  
*Can'opus*, an Egyptian god.  
*Car'dua*, a household goddess.  
*Carmen'ta*, a name of Themis.  
*Car'na*, a Roman goddess.  
*Carya'tis*, a title of Diana.  
*Cas'pii*, a people of Hyrcania, who were said to starve their parents to death when 70 years old, and to train up dogs for war.

## D

*Cassan'dra*, a daughter of Priam and Hecuba, endowed with the gift of prophecy by Apollo.  
*Castalides*, the Muses, from the fountain Castalus, at the foot of Parnassus.  
*Cas'tor*, son of Jupiter and Leda, between whom and his brother Pollux immortality was alternately shared.  
*Cel'tius*, a tutelar god to grown persons.  
*Ce'crop's*, the first king of Athens.  
*Ce'læ'no*, one of the three Harpies.  
*Cen'taurs*, children of Ixion, half men, half horses, inhabiting Thessaly.  
*Cepha'lus*, the son of Mercury and Hersa.  
*Cel'pheus*, a prince of Arcadia and Ethiopia.  
*Ceraw'nus*, a title of Jupiter.  
*Ce'berus*, a dog with three heads and necks, who guarded the gates of hell.  
*Ceræ'al'ia*, festivals in honor of Ceres.  
*Ce're's*, the goddess of agriculture.  
*Ce'rus*, or *Se'rus*, the god of opportunity.  
*Chal'cea*, festivals in honor of Vulcan.  
*Char'ites*, a name of the Graces.  
*Cha'tron*, the ferryman of hell.  
*Chi'mera*, a strange monster of Lycia, which was killed by Bellerophon.  
*Chi'tron*, the preceptor of Achilles.  
*Chro'mis*, a cruel son of Hercules.  
*Chrysæ'o'rius*, a surname of Jupiter.  
*Chry'sis*, a priestess of Juno and Argos.  
*Cir'ce*, a famous enchantress.  
*Cir'ria*, a cavern of Phocis, near Delphi, whence the winds issued which caused a divine rage, and produced oracular responses.  
*Cithæ'r'ides*, a title of the Muses.  
*Clau'sina*, a name of Venus.  
*Clau'sius*, or *Clu'sius*, a name of Janus.  
*Cleo'medes*, a famous wrestler.  
*Cl'io*, the Muse presiding over history, and patroness of heroic poets.  
*Cl'otho*, one of the three Fates.  
*Clytemnæ's'tra*, daughter of Jupiter and Leda, killed by her son, Orestes, on account of her adultery with Ægisthus.  
*Cocy'tus*, a river of hell, flowing from Styx.  
*Coli'na*, the goddess of hills.  
*Compita'l'ia*, games of the household gods.  
*Co'mus*, the god of festivals and merriment.  
*Concor'd'ia*, the goddess of peace.  
*Conser'vator*, and *Cus'tos*, titles of Jupiter.  
*Con'sus*, a tide of Neptune.  
*Corti'na*, the covering of Apollo's tripos.  
*Coryban'tes*, and *Cure'tes*, priests of Cybele.  
*Cre'on*, a king of Thebes.  
*Cri'nis*, a priest of Apollo.  
*Cri'nis'sus*, a Trojan prince, who could change himself into any shape.  
*Cra'sus*, a rich king of Lydia.  
*Cro'n'ia*, festivals in honor of Saturn.  
*Ctes'ibus*, a famous Athenian parasite.  
*Cu'nia*, the goddess of new-born infants.  
*Cu'pid*, son of Mars and Venus, the god of love, smiles, &c.  
*Cyc'lops*, Vulcan's workmen, with only one eye in the middle of their forehead.  
*Cybele*, the wife of Saturn.  
*Cyc'nus*, a king of Liguria; also a son of Neptune, who was invulnerable.  
*Cyllen'ius*, and *Camil'lus*, names of Mercury.  
*Cynoceph'al'a*, a people of India, said to have heads resembling those of dogs.  
*Cyn'thia*, and *Cyn'thius*, Diana, and Apollo.  
*Cyparissæ'a*, a title of Minerva.  
*Cyp'ria*, *Cythere'a*, titles of Venus.

*Dædal'ion*, the son of Lucifer.  
*Dæd'alus*, an artificer of Athens, who formed the Cretan labyrinth, and invented the auger, axe, glue, plumb-line, saw, and masts and sails for ships.  
*Dæ'mon*, the sincere friend of Pythias.  
*Dæ'mon*, *Bœ'nus*, *Dithyram'bus*, and *Dionus't'ius*, titles of Bacchus.  
*Dæ'næ*, the daughter of Acrisius, king of Argos, seduced by Jupiter in the form of a golden shower.  
*Dana'ides*, or *Bettides*, the fifty daughters of Danaus, king of Argos, all of whom, except Hypermnestra, killed their husbands, the sons of their uncle Ægyptus, on the marriage night: they were therefore condemned to draw water out of a deep well with sieves, so that their labor was without end or success.  
*Daph'ne*, a nymph beloved by Apollo.  
*Darda'nus*, the founder of Troy.  
*Dæ'res*, a very ancient historian who wrote an account of the Trojan war.  
*De'a Syrt'ia*, a title of Venus.  
*Dec'ima*, a title of Lachesis.  
*Deian'tira*, the wife of Hercules.  
*Deida'mia*, a daughter of Lycomedes, king of Scyros, by whom Achilles had Pyrrhus, while he lay concealed in woman's apparel in the court of Lycomedes, to avoid going to the Trojan war.  
*Delap'ela*, a beautiful attendant on Juno.  
*Deiph'obe*, the Cumean sybil.  
*Deiph'obus*, a son of Priam and Hecuba.  
*Del'ia*, *Del'ius*, Diana and Apollo.  
*Del'as*, the island where Apollo was born.  
*Dell'phi*, a city of Phocis, famous for a temple and an oracle of Apollo.  
*Dell'phicus*, *Didymæ'us*, titles of Apollo.  
*Dem'ades*, an Athenian orator.  
*Der'bices*, a people near the Caspian Sea, who punished all crimes with death.  
*Deuca'l'ion*, son of Prometheus, and king of Thessaly, who, with his wife Pyrrha, was preserved from the general deluge, and repopled the world.  
*Dever'tra*, the goddess of breeding women.  
*Diag'oras*, a Rhodian, who died for joy, because his three sons had on the same day gained prizes at the Olympic games.  
*Dia'na*, the goddess of hunting, &c.  
*Di'do*, daughter of Belus, the founder and queen of Carthage, whom Virgil fables to have burnt herself through despair, because Æneas left her.  
*D'ies*, and *Dies'piter*, titles of Jupiter.  
*Din'dyme*, *Dindymæ'ne*, titles of Cybele.  
*Dion'ed'es*, a king of Ætolia, who gained great reputation at Troy, and, accompanied by Ulysses, carried off the Palladium; also a tyrant of Thrace.  
*Di'one*, one of Jupiter's mistresses.  
*Dionys'tia*, feasts in honor of Bacchus.  
*Dioscu'ri*, a title of Castor and Pollux.  
*Di'ræ*, a title of the Furies.  
*Dis*, a title of Pluto.  
*Discord'ia*, the goddess of contention.  
*Domidu'ca*, a title of Juno.  
*Domidu'cus*, and *Domit'tius*, nuptial gods.  
*Dom'ina*, a title of Proserpine.  
*Dry'ades*, nymphs of the woods and forests.

## E

*Echion*, a companion of Cadmus.  
*Echo*, daughter of Aer and Tellus, who pined away for love of Narcissus.  
*Edonides*, priestesses of Bacchus.  
*Educa*, a goddess of new born infants.  
*Egeira*, a title of Juno; also a goddess.  
*Electra*, the daughter of Agamemnon and Clytemnestra, who instigated Orestes to revenge their father's death on their mother and her adulterer Ægisthus.  
*Eleus*, and *Eleutherise*, titles of Bacchus.  
*Eleusinia*, feasts in honor of Ceres and Proserpine.  
*Eloides*, nymphs of Bacchus.  
*Empusa*, a name of the Gorgons.  
*Endymion*, a shepherd of Caria, who, for insolently soliciting Juno, was condemned to a sleep of 30 years; Luna visited him by night in a cave of mount Latmus.  
*Eniallus*, a title of Mars.  
*Enyo*, the same as Bellona.  
*Epeus*, the artist of the Trojan horse.  
*Epigones*, the sons of the seven worthies who besieged Thebes, a second time.  
*Epilæna*, sacrifices to Bacchus.  
*Epistrophia*, and *Erycina*, titles of Venus.  
*Epizephriti*, a people of Locris, who punished those with death that drank more wine than physicians prescribed.  
*Eralto*, the muse of love-poetry.  
*Erebus*, an infernal deity, son of Chaos and Nox; a river of hell.  
*Eræne*, a river whose waters inebriated  
*Eriothonius*, a king of Athens, who, being lame and very deformed in his feet, invented coaches to conceal his lameness.  
*Erinyes*, a common name of the furies.  
*Eros*, one of the names of Cupid.  
*Erosstratus*, the person who, to perpetuate his name, set fire to the celebrated temple of Diana at Ephesus.  
*Eteocles*, and *Polyntices*, sons of Œdipus, who violently hated, and at last killed each other.  
*Evadne*, daughter of Mars and Thebe, who threw herself on the funeral pile of her husband Cananeus, from affection.  
*Eucrates*, a person remarkable for shuffling, duplicity, and dissimulation.  
*Eumenides*, a name of the Furies.  
*Euphrosyne*, one of the three Graces.  
*Eurypha*, the daughter of Agenor, who, it is said, was carried by Jupiter, in the form of a white bull, into Crete.  
*Euryale*, one of the three Gorgons.  
*Eurydice*, the wife of Orpheus.  
*Eurytome*, an infernal deity.  
*Euterpe*, the muse presiding over music.  
*Euthymus*, a very famous wrestler.

## F

*Fabula*, the goddess of lies.  
*Fabulinus*, a god of infants.  
*Falma*, the goddess of report, &c.  
*Fascinum*, a title of Priapus.  
*Fates*, the three daughters of Nox and Erebus. Clothos, Lachesis, and Atropos, intrusted with the lives of mortals, &c.  
*Faulna*, and *Faulua*, names of Cybele.  
*Faulmus*, the son of Mercury and Nox, and father of the Fauns, rural gods.

*Feb'rua*, *Flor'ida*, *Fluo'nia*, titles of Juno.  
*Fel'rua*, a goddess of purification.  
*Feltrius*, a title of Pluto.  
*Felicitas*, the goddess of happiness.  
*Fer'culus*, a household god.  
*Feretrius*, and *Fulminator*, titles of Jupiter.  
*Fero'nia*, a goddess of woods.  
*Fesso'nia*, a goddess of wearied persons.  
*Fid'lius*, the god of treaties.  
*Flamines*, priests of Jupiter, Mars, &c.  
*Flora*, the goddess of flowers.  
*Fuviales*, or *Potamides*, nymphs of rivers.  
*For'nax*, the goddess of corn and bakers.  
*Fortuna*, or *Fortune*, the goddess of happiness, &c., said to be blind.  
*Fulvies*, or *Eumenides*, the three daughters of Nox and Acheron, named Alecio, Megara, and Tisiphone, with hair composed of snakes, and armed with whips, chains, &c.

## G

*Galatæa*, daughter of Nereus and Doris, passionately beloved by Polyphemus.  
*Gallii*, castrated priests of Cybele.  
*Gallus*, or *Alectrion*, a favorite of Mars, and changed by him into a cock.  
*Gamelia*, a title of Juno.  
*Ganges*, a famous river of India.  
*Gany'mede*, the cup-bearer of Jupiter.  
*Gelasinus*, the god of mirth and smiles.  
*Gelo'ni*, a people of Scythia, who used to paint themselves in order to appear more terrible to their enemies.  
*Genii*, guardian angels.  
*Genius*, a name of Priapus.  
*Ger'yon*, a king of Spain, who fed his oxen with human flesh, and was therefore killed by Hercules.  
*Glaucopis*, a name of Minerva.  
*Glaucus*, a fisherman made a sea god by eating a certain herb: also the son of Hippolochus, who exchanged his arms of gold for the brazen ones of Diomedes.  
*Gnos'sis*, a name of Ariadne.  
*Gordius*, a husbandman, but afterwards king of Phrygia, remarkable for tying a knot of cords on which the empire of Asia depended, in so very intricate a manner, that Alexander the Great, unable to unravel it, cut it to pieces.  
*Gorgons*, the three daughters of Phorcys and Ceta, Medusa, Euryale, and Stheno, who could change into stone those whom they looked on; Perseus slew Medusa, the principal of them.  
*Gorgoph'orus*, a title of Pallas.  
*Gra'ces*, Aglaia, Thalia, and Euphrosyne, the daughters of Jupiter and Eurytomb; attendants on Venus and the Muses.  
*Gradi'vus*, a title of Mars.  
*Gyl'ges*, a Lydian, to whom Candaules, king of Lydia, showed his queen naked, which so incensed her that she slew Candaules, and married Gyges; also a shepherd, who by means of a ring could render himself invisible.

## H

*Had'es*, a title of Pluto.  
*Hamazo'bi*, a people of Scythia, who lived in carts, and removed from place to place as necessity required.

*Harmolnis*, a famous artist of Troy.  
*Harpalyce*, a very beautiful maid of Argos.  
*Harpies*, three monsters, Aello, Celæno, and Ocypete, with the faces of virgins, bodies of vultures, and hands armed with monstrous claws.  
*Harpocrates*, the Egyptian god of silence.  
*Hebe*, the goddess of youth.  
*Hebrus*, a river in Thrace.  
*He'catus*, a title given to Jupiter by Theseus.  
*Hecate*, Diana's name in hell.  
*Hector*, a son of Priam and Hecuba, and the most valiant of all the Trojans.  
*Hecuba*, the wife of Priam.  
*Hegelsius*, a philosopher of Cyrene, who described the miseries of life with such a gloomy eloquence, that many of his auditors killed themselves through despair.  
*Helena*, the wife of Menelaus, the most beautiful woman in the world, who, running away with Paris, occasioned the Trojan war.  
*Hel'enus*, a son of Priam and Hecuba.  
*Helicon*, a famous mountain of Bœotia, dedicated to Apollo and the Muses.  
*Hera'ia*, sacrifices to Juno.  
*Hercules*, the son of Jupiter and Alcmena, remarkable for his numerous exploits and dangerous enterprises.  
*Herib'ia*, the wife of Astreus.  
*Her'mæ*, statues of Mercury.  
*Herm'es*, a name of Mercury.  
*Herm'ione*, a daughter of Mars and Venus, married to Cadmus; also a daughter of Menelaus and Helena, married to Pyrrhus.  
*He'ro*, a beautiful woman of Sestos, in Thrace, priestess of Venus; Leander, of Abydos, loved her so tenderly that he swam over the Hellespont every night to see her; but being at length unfortunately drowned, she threw herself into the sea, through despair.  
*Heredotus*, a very famous historian of Halicarnassus.  
*Herophil'a*, the Erythræan sybil.  
*Hersili'a*, the wife of Romulus.  
*Hesperus*, or *Vesper*, the evening star.  
*Hesperides*, the daughters of Hesperus; Ægle, Arethusa, and Hesperethusa, who had a garden bearing golden apples, watched by a dragon, which Hercules slew, and bore away the fruit.  
*He'sus*, a name of Mars among the Gauls.  
*Hip'pias*, a philosopher of Elis.  
*Hippocent'pi*, Neptune's horses.  
*Hippocrene*, a fountain at the bottom of mount Helicon, dedicated to Apollo.  
*Hippolytus*, the son of Theseus and Antiope or Hippolyte, who refused intimacies with his stepmother Phædro. At the request of Diana, Æsculapius restored him to life, after he had been thrown from his chariot, and dragged through the woods till he was torn in pieces.  
*Hippo'na*, the goddess of horses and stables.  
*Histo'ria*, the goddess of history.  
*Horten'sis*, a name of Venus.  
*Ho'rus*, a title of the sun.  
*Hostili'na*, a goddess of corn.  
*Hy'ades*, the seven daughters of Atlas and Æthra; Ambrosia, Eudora, Coronis, Pasitoe, Plexaris, Pytho, and Tyche. They were changed by Jupiter into seven stars.  
*Hy'bla*, a mountain in Sicily, universally famous for its thyme and bees.

*Hy'dra*, a serpent, which had seven heads, or as some say nine, others fifty, killed by Hercules in the lake Lerna.  
*Hyge'ia*, the goddess of health.  
*Hy'lus*, the son of Hercules and Dejanire.  
*Hy'men*, the god of marriage.  
*Hyperion*, a son of Cœlus and Terra.  
*Hypsip'yle*, a queen of Lemnos, who was banished for preserving her father when all the other men of the island were murdered by their kindred.

## I

*Iacchus*, a name of Bacchus.  
*Ianthe*, the beautiful wife of Iphigeneia.  
*Iap'etus*, a son of Cœlem and Terra.  
*Iar'bas*, a cruel king of Mauritania.  
*Ica'rius*, the son of Oœbalus, who, having received from Bacchus a bottle of wine, went into Attica, to show men the use of it; but, making some shepherds drunk, they thought he had given them poison, and therefore threw him into a well.  
*Ica'rus*, the son of Dædalus, who, flying with his father out of Crete into Sicily, and soaring too high, melted the wax of his wings, and fell into the sea, thence called the Icarian sea.  
*Ida*, a mountain near Troy.  
*Ida'a Mater*, a name of Cybele.  
*Ida'i Dact'yl'i*, a priest of Cybele.  
*Ida'ia*, a name of Venus.  
*Id'mon*, a famous soothsayer.  
*Ido'thea*, Jupiter's nurse.  
*Il'ione*, the eldest daughter of Priam.  
*Ili'sus*, a river in Attica.  
*I'us*, the son of Tros and Callirrhoe, from whom Troy was called Ilium.  
*Imperator*, a name of Jupiter.  
*In'achis* and *I'ses*, names of Io.  
*I'no*, daughter of Cadmus and Hermiones, and wife of Athamas.  
*Intercido'na*, a goddess of breeding women.  
*Interdu'ca*, and *Ju'dga*, names of Juno.  
*In'ubus*, and *Incl'ubus*, names of Pan.  
*Io*, daughter of Inachus, transformed by Jupiter into a white heifer; but afterwards resuming her former shape, was worshipped as a goddess by the Egyptians, under the name of Isis.  
*Iph'iclus*, the twin brother of Hercules.  
*Iphige'nia*, daughter of Agamemnon and Clytemnestra, who, standing as a victim ready to be sacrificed to appease the rage of Diana, was, by that goddess, transformed into a white hart, carried to Tauris, and made her priestess.  
*Iphis*, a prince of Cyprus, who hanged himself for love; also a daughter of Lygdamas.  
*Iph'itus*, son of Praxionides, who instituted Olympic games to Hercules.  
*Iris*, the daughter of Thaumas; she was Juno's favorite companion, and her messenger on affairs of discord, &c.  
*Itys*, the son of Tereus and Progne, murdered and served up by his mother at a banquet before Tereus, in revenge for his having violated her sister Philomela.  
*Ixi'on*, the son of Phlegyas, who was fastened in hell to a wheel perpetually turning round, for boasting that he had lain with Juno.

## J

*Janitor*, and *Juno'nus*, titles of Janus.  
*Ja'nus*, the first king of Italy, son of Apollo and Creusa.  
*Jai'son*, a Thessalian prince, son of Æson, who by Medea's help brought away the golden fleece from Colchis.  
*Jocasta*, the daughter of Creon, who unwittingly married her own son, Œdipus.  
*Ju'no*, the sister and wife of Jupiter.  
*Ju'no*, *Infer'na*, a name of Proserpine.  
*Juno'ness*, guardian angels of women.  
*Jup'iter*, a son of Saturn and Ops—the supreme deity of the heathen.  
*Jup'iter Secun'dus*, a name of Neptune.  
*Jup'iter Ter'tius*, *Infer'nus*, or *Styg'ius*, several appellations given to Pluto.  
*Juven'ta*, a goddess of youth.

## L

*La'chesis*, one of the three Fates.  
*Laci'nia*, and *Luci'lia*, titles of Juno.  
*Lactu'ra*, or *Lactu'ina*, a goddess of corn.  
*Le'strig'iones*, cannibals of Italy, who roasted and ate the companions of Ulysses.  
*La'tius*, a king of Thebes, killed unwittingly by his own son, Œdipus.  
*La'mia*, a name of the Gorgons.  
*Laocoon*, a son of Priam and high-priest of Apollo: he and his two sons were killed by serpents for opposing the reception of the wooden horse into Troy.  
*Lapis*, or *Lapid'eus*, titles of Jupiter.  
*Lar'es*, sons of Mercury and Lara, worshipped as household gods.  
*Lar'ernus*, a household god.  
*Laver'na*, a goddess of thieves.  
*Lean'der*, see Hero.  
*Le'da*, daughter of Thestias, and wife of Tyndarus, seduced by Jupiter in the shape of a swan.  
*Lemoni'ades*, nymphs of meadows, &c.  
*Le'næ*, priestesses of Bacchus.  
*Ler'na*, a marsh of Argos, famous for a Hydra, killed there by Hercules.  
*Le'the*, a river of hell, whose waters caused a total forgetfulness of things past.  
*Lepa'na*, a goddess of new born infants.  
*Libi'tina*, the goddess of funerals.  
*Li'nus*, son of Apollo and Terpsichore.  
*Luben'tia*, the goddess of pleasure.  
*Luce'ifer*, son of Jupiter and Aurora, made the morning star.  
*Lu'na*, Diana's name in heaven.  
*Luper'calia*, feasts in honor of Pan.  
*Luper'ci*, priests of Pan.  
*Lycæon*, a king of Arcadia, turned by Jupiter into a wolf.

## M

*Ma'ia*, loved by Jupiter, and by him turned into a star to avoid Juno's rage.  
*Managen'e'ta*, a goddess of women in labor.  
*Manti'ra*, a goddess of corn.  
*Manti'rna*, and *Me'na*, nuptial goddesses.  
*Mari'na*, *Me'lanis*, *Mer'tetrix*, *Migon'i'tis*, and *Mur'cia*, titles of Venus.  
*Mars*, the god of war.

*Mausol'us*, a king of Caria, who had a most magnificent tomb erected to him by his wife Artemisia.  
*Mede'a*, daughter of Ætes, king of Colchis, a famous sorceress, who assisted Jason to obtain the golden fleece.  
*Meditri'na*, a goddess of grown persons.  
*Medu'sa*, the chief of the three Gorgons.  
*Me'ga'ra*, one of the three Furies.  
*Megalen'sia*, festivals in honor of Cybele.  
*Mega'ra*, the wife of Hercules.  
*Melan'i'ra*, a name of Venus.  
*Me'lia*, nymphs of the fields.  
*Me'tus*, a name of Hercules.  
*Melo'na*, the goddess of honey.  
*Melpomene*, the muse of tragedy.  
*Mem'non*, a king of Abydos.  
*Menala'us*, a famous Centaur.  
*Menela'us*, the husband of Helena.  
*Men'tha*, a mistress of Pluto.  
*Men'tor*, the governor of Telemachus.  
*Mer'cury*, the messenger of the gods, inventor of letters, and god of eloquence, merchandise, and robbers.  
*Mero'pe*, one of the seven Pleiades.  
*Me'das*, a king of Phrygia, who entertained Bacchus, or, as some say, Silenus, had the power given him of turning whatever he touched into gold.  
*Milo*, a wrestler of remarkable strength.  
*Minal'iones*, attendants on Bacchus.  
*Miner'ca*, the goddess of wisdom.  
*Min'os*, a king of Crete, made, for his extraordinary justice, a judge of hell.  
*Minotaur*, a monster, half man, half beast.  
*Min'yæ*, a name of the Argonauts.  
*Mnemosyne*, the goddess of memory.  
*Mol'mus*, the god of railleury, wit, &c.  
*Mon'e'ta*, a title of Juno.  
*Morpheus*, the god of sleep, dreams, &c.  
*Mors*, the goddess of death.  
*Mul'ciber*, a title of Vulcan.  
*Mul'ses*, nine daughters of Jupiter and Mnemosyne, born on mount Pierus, mistresses of all the sciences, presidents of musicians and poets, and governesses of the feasts of the gods; Calliope, Clio, Erato, Euterpe, Melpomene, Polyhymnia, Terpsichore, Thalia, and Urania.  
*Mu'ta*, the goddess of silence.

## N

*Nania*, the goddess of funeral songs.  
*Na'iades*, nymphs of the rivers, &c.  
*Narcis'sus*, a very beautiful youth, who, falling in love with his own shadow in the water, pined away into a daffodil.  
*Natio*, and *Nand'na*, goddess of infants.  
*Nam'ia*, a country of Elis, famed for a terrible lion killed there by Hercules.  
*Nem'esis*, the goddess of revenge.  
*Nept'une*, the god of the sea.  
*Ne'reides*, sea nymphs.  
*Ne'rio*, the wife of Mars.  
*Niceph'orus*, a title of Jupiter.  
*Ni'nus*, the first king of the Assyrians.  
*Ni'obe*, daughter of Tantalus, and wife of Amphi'on, who, preferring herself to Latona, had her 14 children killed by Diana and Apollo, and wept herself into a statue.  
*No'mius*, a name of Apollo.

*Nox*, the most ancient of the deities; she was even reckoned older than Chaos.

## O

*Obsequens*, a title of Fortuna.  
*Occator*, the god of harrowing.  
*Oceanus*, an ancient sea god.  
*Ocyrote*, one of the three Harpies.  
*Oedipus*, son of Laius and Jocasta, and king of Thebes, who solved the riddle of the Sphinx, unwittingly killed his father, married his mother, and at last ran mad, and tore out his eyes.  
*Omphale*, a queen of Lydia, with whom Hercules was so enamored, that she made him submit to spinning and other unbecoming offices.  
*Orerthus*, a name of Pluto.  
*Opigena*, a name of Juno.  
*Ops*, a name of Cybele.  
*Orbona*, a goddess of grown persons.  
*Orestes*, the son of Agamemnon.  
*Orion*, a great and mighty hunter.  
*Orpheus*, son of Jupiter and Calliope, who had great skill in music, and was torn in pieces by the Menades, for disliking the company of women after the death of his wife Eurydice.  
*Orythia*, a queen of the Amazons.  
*Ostris*, see Apis.

## P

*Pactolus*, a river of Lydia, with golden sands and medical waters.  
*Pæon*, and *Phæbus*, names of Apollo.  
*Pales*, the goddess of shepherds.  
*Pallia*, feasts in honor of Pales.  
*Palladium*, a statue of Minerva, which the Trojans imagined fell from heaven, and that their city could not be taken whilst that remained in it.  
*Pallas*, and *Pylothia*, names of Minerva.  
*Pan*, the god of shepherds.  
*Pandora*, the first woman made by Vulcan, and endowed with gifts by all the deities; Jupiter gave her a box containing all manner of evils, war, famine, &c., with hope at the bottom.  
*Panope*, one of the Nereids.  
*Palphia*, a title of Venus.  
*Parce*, a name of the Fates.  
*Paris*, or *Alexander*, son of Priam and Hecuba, a most beautiful youth, who ran away with Helena, and occasioned the Trojan war.  
*Parnassus*, a mountain of Phocis, famous for a temple of Apollo, and being the favorite residence of the Muses.  
*Partunda*, a nuptial goddess.  
*Pastophori*, priests of Isis.  
*Patareus*, a title of Apollo.  
*Patellina*, a goddess of corn.  
*Patulcius*, a name of Janus.  
*Patuleius*, a name of Jupiter.  
*Parentia*, and *Polina*, goddesses of infants.  
*Pegasus*, a winged horse belonging to Apollo and the Muses.  
*Pellonia*, a goddess of grown persons.  
*Penates*, small statues or household gods.

*Penelope*, daughter of Icarus, celebrated for her chastity and fidelity during the long absence of Ulysses.  
*Perseus*, son of Jupiter and Danae, who performed many extraordinary exploits by means of Medusa's head.  
*Phæacidæ*, ancient gods of Greece.  
*Phæton*, son of Sol (Apollo) and Climene, who asked the guidance of his father's chariot for one day, as a proof of his divine descent; but unable to manage the horses, set the world on fire, and was therefore struck by Jupiter with a thunderbolt into the river Po.  
*Phallica*, feasts of Bacchus.  
*Philammon*, a skillful musician.  
*Pilomella*, daughter of Pandion, king of Athens, who was ravished by her brother-in-law, Tereus, and was changed into a nightingale.  
*Phineas*, son of Agenor, and king of Paphlagonia, who had his eyes torn out by Boreas, but was recompensed with the knowledge of futurity; also a king of Thrace, turned into a stone by Perseus, by the help of Medusa's head.  
*Phlegethon*, a boiling river of hell.  
*Phlegon*, one of the four horses of Sol.  
*Phlegya*, a people of Bœotia, destroyed by Neptune, on account of their piracies and other crimes.  
*Phæbas*, the priestess of Apollo.  
*Phæbus*, a title of Apollo.  
*Phænix*, son of Amyntor, who being falsely accused of having attempted the honor of one of his father's concubines, was condemned to have his eyes torn out; but was cured by Chiron, and went with Achilles to the siege of Troy.  
*Picumnus*, a rural god.  
*Pilumnus*, a god of breeding women.  
*Pindus*, a mountain in Thessaly.  
*Pitho*, a goddess of eloquence.  
*Pleiades*, the seven daughters of Atlas and Pleione; Maia, Electra, Taygete, Asterope, Merope, Halecyone, and Celæno; they were changed into stars.  
*Pluto*, the god of hell.  
*Plutus*, the god of riches.  
*Pollux*. See Castor.  
*Polydamas*, a famous wrestler.  
*Polydus*, a famous prophet and physician.  
*Polyhymnia*, the muse of rhetoric.  
*Polyphemus*, a monstrous giant, son of Neptune, with but one eye in the middle of his forehead.  
*Pomona*, the goddess of fruits and autumn.  
*Poseidon*, a name of Neptune.  
*Prænestina*, a name of Fortuna.  
*Præstes*, a title of Jupiter and Minerva.  
*Proxiles*, a famous statuary.  
*Pritham*, son of Laomedon, and father of Paris, Hector, &c.; he was the last king of Troy.  
*Prothe*, wife of Tereus, king of Thrace, and sister of Philomela; she was turned into a swallow.  
*Prometheus*, son of Iapetus, who animated a man that he had formed of clay, with fire, which, by the assistance of Minerva, he stole from heaven, and was therefore chained by Jupiter to mount Caucasus, with a vulture continually preying upon his liver.  
*Propylæa*, a name of Hecate.  
*Proserpine*, the wife of Pluto.

*Proteus*, a sea god, who could transform himself into any shape.

*Psyche*, a goddess of pleasure.

*Pylades*, the constant friend of Orestes.

*Pyramus*, and *Thisbe*, two lovers of Babylon, who killed themselves with the same sword, and occasioned the turning the berries of the mulberry-tree, under which they died, from white to red.

*Pryætis*, one of the four horses of the sun.

*Pyrrhus*, son of Achilles, remarkable for his cruelty at the siege of Troy.

*Pythion*, a huge serpent, produced from the mud of the deluge, which Apollo killed, and in memory thereof, instituted the Pythian games.

*Pythionissa*, the priestess of Apollo.

## Q

*Quad'rifrons*, a title of Janus.

*Quiles*, a goddess of grown persons.

*Quetadlis*, and *Quetlus*, names of Pluto.

*Quinquatria*, feasts of Pallas.

## R

*Recl'us*, a title of Bacchus.

*Re'dux*, and *Relgia*, titles of Fortune.

*Reg'ina*, a title of Juno.

*Rhadaman'thus*, one of the three infernal judges.

*Rhe'a*, a title of Cybele.

*Rhe'a-syl'via*, the mother of Romulus.

*Rob'igus*, a god of corn.

*Rom'ulus*, the first king of Rome.

*Rum'ina*, a goddess of new-born infants.

*Runc'ina*, the goddess of weeding.

*Rusi'na*, a rural deity.

## S

*Saba'zia*, feasts of Proserpine.

*Sa'tii*, the 12 frantic priests of Mars.

*Salmon'eus*, a king of Elis, struck by a thunder-bolt to hell for imitating Jupiter's thunder.

*Sal'us*, the goddess of health.

*Sanc'us*, a god of the Sabines.

*Sator*, and *Sorrit'or*, rural gods.

*Saturnalia*, feasts of Saturn.

*Satur'nus*, or *Saturn*, the son of Cœlus and Terra.

*Sat'yrs*, the attendants of Bacchus, horned monsters, half men, half goats.

*Scyl'ron*, a famous robber of Attica.

*Se'ia*, and *Seget'ia*, goddesses of corn.

*Sell'i*, priests of Jupiter.

*Sen'tia*, a goddess of married women.

*Sera'pis*. See *Apis*.

*Sile'nus*, the foster-father and companion of Bacchus, who lived in Arcadia, rode on an ass, and was drunk every day.

*Sil'mis*, a famous robber, killed by Hercules.

*Sis'yphus*, the son of Æolus, killed by Theseus, and doomed incessantly to roll a huge stone up a mountain in hell for his perfidy and numerous robberies.

*Sol*, a name of Apollo.

*Som'nus*, the god of sleep.

*Sphinx*, a monster, born of Syphon, and Echidna, who destroyed herself because Ædipus solved the enigma she proposed.

*Stalla*, a goddess of grown persons.

*Sten'tor*, a Grecian, whose voice is reported to have been as strong and as loud as the voices of 50 men together.

*Sthe'no*, one of the three Gorgons.

*Styx*, a river of hell.

*Sua'da*, a nuptial goddess.

*Summa'nus*, a name of Pluto.

*Syl'vanus*, a god of woods and forests.

*Sytrens*, sea monsters

## T

*Ta'cita*, a goddess of silence.

*Tantalus*, a king of Paphlagonia, who, serving up to table the limbs of his son, Pelops, to try the divinity of the gods, was plunged to the chin in a lake of hell, and doomed to everlasting thirst and hunger, as a punishment for his barbarity and impiety.

*Tartarus*, the place of the wicked in hell.

*Taur'us*, the bull, under whose form Jupiter carried away Europa.

*Telch'ines*, priests of Cybele.

*Telemachus*, the only son of Ulysses.

*Tem'pe*, a most beautiful valley in Thessaly, the resort of the gods.

*Ter'minus*, the god of boundaries.

*Terpsich'ore*, the muse of music, &c.

*Ter'ror*, the god of dread and fear.

*Thalia*, the muse of comedy.

*Thel'mis*, the daughter of Cœlum and Terra, the goddess of laws, oracles, &c.

*Thes'pis*, the first tragic poet.

*Thet'is*, daughter of Nereus and Doris, and goddess of the sea.

*Thyr'sus*, the rod of Bacchus.

*Ti'phys*, the pilot of the ship Argo.

*Trisiph'one*, one of the three Furies.

*Tritan*, son of Cœlum and Terra, and the elder brother of Saturnus, or Saturn.

*Tma'trius*, a title of Jupiter.

*Triton*, Neptune's trumpeter.

*Tritonia*, a name of Minerva.

*Tro'ilus*, a son of Priam and Hecuba.

*Troy*, a city of Phrygia, famous for holding out a siege of ten years against the Greeks, but they at last captured and destroyed it.

*Tuteli'na*, a goddess of corn.

*Ty'ro*, one of the Nereids.

## U

*Ulys'ses*, son of Laertes and Anticlea, and king of Ithaca, who, by his subtlety and eloquence, was eminently serviceable to the Greeks in the Trojan war.

*Unx'ia*, a title of Juno.

*Ura'nia*, the muse of astronomy.

## V

*Vacu'na*, the goddess of idle persons.

*Vagitanus*, a god of little infants.

*Vallonia*, a goddess of valleys.

*Ven'tia*, a wife of Neptune.

*Venus*, the goddess of love, and beauty.

*Vergillæ*, a name of the Pleiades.

*Verticor'dia*, a name of Venus.

*Vertum'nus*, the god of spring.

*Ves'ta*, the goddess of fire.

*Viat'es*, deities of the highways.

*Vibilia*, the goddess of wanderers.

*Virgmen'sis*, a nuptial goddess.

*Vir'go*, a name of Astrea and Fortune.

*Virilis*, and *Viscal'ta*, titles of Fortune.

*Viriplaca*, an inferior nuptial goddess, who reconciled husbands to their wives; a temple, at Rome, was dedicated to her, whither the married couple repaired after a quarrel, and returned together friendly.

*Vitul'ta*, the goddess of mirth.

*Volu'sia*, a goddess of corn.

*Vul'can*, the god of subterraneous fire.

# X

*Xan'thus*, one of the horses of Achilles, born of

the harpy Celeno, a river near Troy, called also Scamander.

# Z

*Za'greus*, a title of Bacchus.

*Zeph'yrus*, son of Æolus and Aurora, who passionately loved the goddess Flora, and is put for the west wind.

*Zetes*, and *Calais*, sons of Boreas and Orythia, who accompanied the Argonauts, and drove the Harpies from Thrace.

*Zettus*, a son of Jupiter and Antiope, very expert in music.

*Zelus*, a title of Jupiter.

## BIOGRAPHICAL INDEX.

**N. B.** This list of remarkable persons, from the earliest period to the present time, is not of course intended to include every name mentioned in history, but merely the most important in their several departments. The names of *Sovereigns* are referred to occasionally only, as full lists are given in their proper place.

This list may be useful in two ways, viz :

First, as an *Index* to the names mentioned in the Chronological Tables in this volume; and

Secondly, to indicate, by reference to those tables, the chief political events and contemporary public characters during the life of each person in the list.

Thus : **SOCRATES**, the Greek philosopher, was born 470, and died 400 B. C. The tables on page 20 to 24, show who lived, and what happened, during the seventy years of Socrates' life.

**MILTON** was born A. D. 1608, one year after the first settlement at Jamestown, Virginia; six years after the East India Company was founded; five years after James I. ascended the throne; the same year that the Protestant Union was formed in Germany; one year before Gustavus Adolphus became king of Sweden; two years before Louis XIII. became king of France. He was 12 years old when the Puritans first landed at Plymouth; he was 17 when Charles I. succeeded James, and he was 41 years old when Charles was beheaded. Among his contemporaries were Lord Bacon, Inigo Jones, Jeremy Taylor, Algernon Sydney, Sir C. Wren, Butler, Waller, Dryden, Henry More, Baxter, and Boyle, in England : Peter Stuyvesant, Winthrop, Cotton, and Eliot, in America : Richelieu, Mazarine, Colbert, Rubens, Kepler, Des Cartes, Molière, Corneille, Racine, Pascal, on the Continent. He died A. D. 1674, nine years after the great plague in London, 14 years after Charles II. was restored, and 7 years after New-York was ceded to the English.

And thus of any person mentioned in the Index—a great variety of particulars may be found at a glance, on referring to the tables.

\* \* No living persons are mentioned, except some of the most noted in Europe.

**ABBREVIATIONS.**—See *List in the Introduction*. Bar. (*Barbarian*), includes several different nations, some not entirely civilized. f. is used for *flourished*. The dates before Christ are indicated by B. C.—all others are A. D.—In some cases the dates are necessarily left blank.

| NATION. | NAME AND PROFESSION.                                                       | BORN.      | DIED.      |
|---------|----------------------------------------------------------------------------|------------|------------|
| Dan.    | Aagesend, Svind, historian . . . . .                                       | f. 1188    |            |

# ADDENDA

## TO

# THE WORLD'S PROGRESS.

(DECEMBER, 1851.)

[In addition to a brief record of the more important occurrences and statistics of the years 1850 and 1851, the following pages contain some corrections of errors in the previous editions. Some other inaccuracies have been corrected in the body of the work. In selecting the names for the Biographical Index, it was difficult to draw the line. While it was desirable to include those names which the general reader would be likely to look for, there was still no space for all those to be found in a biographical dictionary: in endeavoring to condense the list, however, many names were omitted (some from mere oversight) which, on a further collation, are now added to this appendix.

It will be obvious, however, that whatever care and diligence may be bestowed upon a volume of this kind, entire perfection and completeness cannot reasonably be expected; and, in acknowledging the gratifying reception so promptly given to the book, the editor begs to say, that he will be greatly obliged by any essential additions or corrections which may be contributed for future editions.]

### ADMINISTRATIONS OF THE UNITED STATES—(p. 152) On the death of President Taylor, July 9, 1850.

MILLARD FILLMORE, of New-York (Vice-President) became President. He appointed, soon after, the following Cabinet, viz. :

|                     |                                            |                      |
|---------------------|--------------------------------------------|----------------------|
| Daniel Webster,     | Massachusetts,                             | Secretary of State.  |
| Thomas Corwin,      | Ohio,                                      | Secretary of Treas.  |
| Charles M. Conrad,  | Louisiana,                                 | Secretary of War.    |
| William A. Graham,  | North Carolina,                            | Sec. of the Navy.    |
| A. H. H. Stewart,   | Virginia,                                  | Sec. of Interior.    |
| Nathan K. Hall,     | New-York,                                  | Post Master Gen.     |
| John J. Crittenden, | Kentucky,                                  | Attorney General.    |
| William R. King,    | Alabama, was elected Pres't of the Senate, |                      |
|                     | and became acting Vice Pres't of U. S.     |                      |
| Howell Cobb,        | Georgia ( <i>continued in office</i> ), }  |                      |
| Linn Boyd,          | Kentucky, Dec. 1851. }                     | Speakers of H. Reps. |

**AFRICA.** The British forces defeated with considerable loss in their engagement with the Caffres of South Africa, Dec. 29, 1850. The Caffres attack Fort White, Cape of Good Hope, Jan. 3, 1851, but are repulsed, with loss of 20 killed. Jan. 7—the Caffres, in their attack on Fort Beaufort, are completely routed, and their chief Hermanus and his son killed. 3000 Caffres attack the colonists near Fort Hare, Jan. 23, but are driven back with loss of 100 killed. Feb. 23d—Col. Somerset burns Fort Hamilton, which had been abandoned by the British, killing 90 Caffres, and taking 230 prisoners. J. G. Richardson, the African traveller, dies at Ungurta, six days distance from Kouka, the capital of Bornou, March 4, 1851.

**ANGLO-SAXONS.** It may be assumed, on the most moderate data, that upwards of 51,000,000 of the human race now speak the language of Shakspeare, Bacon, and Newton.

**ARCTIC EXPEDITION.** Dispatches received by British Government, Sept., 1851, confirming the statement that traces of Sir J. Franklin's party had been discovered, showing that they had passed their first winter, 1845-6, in the bay between Beechey Island and Cape Riley, and that their departure had been sudden. The vessels, *Advance* and *Rescue*, nobly dispatched by Mr. Grinnell in aid of this expedition in May, 1850, were frequently in communication with the British party, and returned to New-York Oct., 1851.

**ADVERTISEMENTS.** The number of advertisements in the 159 London papers, in 1850, was 891,650, the duty on which at 1s. 6d. each, amounted to £66,873 15s. In the 222 provincial papers, 875,631 advertisements; in 102 Irish papers, 236,128; and in the Scottish papers, 249,141. The *Times* supplement, Jan. 23, 1851, contained 1706 advertisements, one page of which, embracing six columns, yielded £108.

**AGRICULTURE, U. S., 1851.** The following are the number of farms in several states, as reported in the last census:—

|              |       |         |            |       |        |
|--------------|-------|---------|------------|-------|--------|
| New-York     | - - - | 174,234 | Maryland   | - - - | 21,950 |
| Pennsylvania | - - - | 127,733 | New Jersey | - - - | 24,504 |
| Ohio         | - - - | 146,821 | Delaware   | - - - | 6,225  |
| Indiana      | - - - | 101,973 | Michigan   | - - - | 34,699 |
| Virginia     | - - - | 76,794  | Wisconsin  | - - - | 22,062 |
| Illinois     | - - - | 71,062  | Iowa       | - - - | 15,500 |
| Kentucky     | - - - | 77,290  |            |       |        |

**ALABAMA.** Nov., 1851. The governor, in his message, recommends a discriminating tax on all articles from those states that continue slave agitation. The population of this state, 1850, according to census returns, was:—White, 426,515; Free colored, 2,250. Total free, 428,765; Slaves, 342,894. Fed. Rep. Pop. 634,501.

**ALFRED THE GREAT.** A medal commemorative of the 1000th anniversary of this monarch was struck in 1849, with the legend, "Alfred and his children, the British Empire, United States and Anglo-Saxons every where!"

**ALMANACS.** The almanac was canonized as *St. Almachius*, in the Roman Calendar.—*H. Wharton's Life of Loyola*, 1688. Almanacs first printed at Constantinople, Sept., 1806. Regiomantus supposed to be indebted for his formula, 1474, to the Persian almanacs.—*Encyc. Metrop.* The popular almanac in Shakspeare's time was that of Leonard Digges.—*C. Knight*. In 1851, Dr. McGowan, laboring in China for the Missionary Union, prepared a philosophical almanac in the language of that country, exhibiting to the Chinese the realities of science, and particularly detailing the principles of the Magnetic Telegraph.—*N. Y. Express*. See *World's Progress*, p. 162.

**AMERICAN FLAG.** Previous to 1776 the colors used in this country exhibited a snake with 13 rattles, in a crimson ground interlaced with white, by

some supposed in compliment to France, but more recently by others as representing those in the armorial bearings of Gen. Washington. A description of this flag is given in a London paper, published in 1776. On the 14th June, in the succeeding year, the American Congress "Resolved, that the flag of the 13 United States be 13 stripes, alternate red and white; that the union be 13 stars, white, on a blue field—representing 'a new constellation.'" A new "star-spangled banner" made its appearance on the river Thames (London), October, 1851, showing five stars emblematical of the British colonies New South Wales, Victoria (Hong Kong), South Australia, Van Dieman's Land, and West Australia.

**AMERICAN LITERATURE.** The first English work written in America was Sandy's *Translation of the Metamorphoses*; Dr. W. Vaughan's poem of the *Golden Fleece* was written about the same time. Jocelyn, who wrote the *New England Rarities*, and his *Two Voyages*, brought over a version of part of the *Psalms*, by Quarles, which, if approved by the Minister at Boston, was to have succeeded *Sternhold and Hopkins* in the New World. The first work printed was the "*Freeman's Oath*," Cambridge, 1639; the second an *Almanac*, calculated for New England, by Pierce, a mariner; and the third "*The Psalms, newly turned into metre*."—*Dr. Holmes's American Annals*.

**AMUSEMENTS, PUBLIC,** New York, April, 1851.

|                                          |   |   |   |   |   |   |   |   |        |
|------------------------------------------|---|---|---|---|---|---|---|---|--------|
| Nine Theatres, with audiences nightly of | - | - | - | - | - | - | - | - | 15,900 |
| Four Minstrel Concerts                   | " | " | - | - | - | - | - | - | 2,300  |
| Three Panoramas,                         | " | " | - | - | - | - | - | - | 600    |

Nightly audiences at Public Amusements in New-York .....18,800

The average nightly receipts, exclusive of Astor Opera House (not obtained), amounted to \$5,800.

**AMUSEMENTS, LONDON.** The amount annually expended in London for sight-seeing, theatres, &c., is estimated at about *four millions sterling*.—*Art Journal*.

**ARMY, (STANDING), U. S. A.** June, 1850, the regular army of the United States, including 882 commissioned officers, consisted of 10,320 men: distributed, eastern division, in the Atlantic States; western, west of the Alleghanies; and the Pacific division in Oregon and California. Expenses of the war department year ending June 30, 1849, partially including those of the Mexican war, amounted to \$17,290,936.

**ARMIES, EUROPEAN, 1851.** Great Britain, 114,451, infantry and cavalry effective; France, 408,000 (exclusive of National Guards, who number over 2,000,000); Russia, 674,000; Austria, 405,000; Prussia, 121,000, which last with Austria, has an effective organization of the *Landwehr*, similar to the National Guards of France.

**ARMORIES, U. S.** There are five armories in the United States, viz.: Harper's Ferry, Virginia; Springfield, Massachusetts; Alleghany, Pennsylvania; Washington, District of Columbia; and Watervliet, New-York. For the fiscal year ending January 30, 1850, the manufactory of weapons of war is reported as 28,115 percussion muskets; 2,000 percussion cavalry musketoons; 2,676 percussion rifles; 110,487 flint lock muskets altered to percussion.

**ASTRONOMY.** The planet Uranus, was discovered through observation of the perturbations of Jupiter and Saturn; and similar movements in Uranus led M. Leverrier to determine by calculation the existence of a new planet. This remarkable theoretic conclusion was verified on the night of Sept. 23d, 1846, by M. Galle, at Berlin, the new planet (*Neptune*) being found in the position and with the diameter announced by Leverrier; one of the noblest achievements of modern times. M. Arago calculates the distance of

this planet from the sun at 1,250,000,000 leagues, or about 3,125,000,000 miles! Periodic time nearly 166 years. Its volume is about two hundred and thirty times that of the earth. Thus, during the year 1846, the bounds of our solar system have been nearly doubled. The discovery of Neptune marks, in a signal manner, the maturity of astronomical science. The *Parthenope*, a new planet discovered by M. de Gasparis, at Naples, May, 1850; the name of the *Victoria*, discovered by Mr. Hind in same year, was changed for that of *Clio*; the *Egeria* planet, discovered by de Gasparis, at Naples, November, 1850. Another discovered by Mr. G. P. Bond, of Cambridge, United States, August, same year; and one by Dr. Peterson, of Altona, situate near the North Pole.

**ATTORNEY-GENERAL, U. S. A.** Appointed by the President, and is one of the members of the Cabinet. He is the legal adviser of the executive government. The first attorney-general of the United States was William Bradford, appointed by Washington. 1789. (See *Administrations*.) There are also District Attorneys for the United States, appointed by the President, for the several districts in each State of the Union. In each State there is also an attorney-general of the State; in some States appointed by the governor and legislature, in others elected by the people.

**AUSTRIA.** Ultimatum of the Austrian government delivered at Berlin, Nov. 6, 1850, directing that Prussia evacuate Hesse, dissolve the Erfurt league, &c., which is replied to by the Prussian king signing an order for calling out the whole military force of the monarchy. The Russian ambassador at Vienna, Nov. 11, announces that the continuance of the Russian policy in the electorate will be considered by his government a *causus belli*. Protest of France, and remonstrance of Lord Palmerston at Vienna, Dec. 1850, against the proposed extension of the Germanic confederation beyond the Alps. The Austrians complete their military possession of Hamburg, Jan. 31, 1851, and Feb. 2, proclaim their resumption of seigniorial rule of the King of Denmark. The Emperor establishes a council of the empire by imperial decree, April 1851. The German diet, July 17, in answer to Lord Palmerston's protest against annexing the non-German provinces of Austria to the German Federation, reply "that no foreign interference should be allowed in a purely Germanic question." August 20, the Emperor, by cabinet letters, declares "that his ministers are responsible to no other political authority than the throne," and the minister-president is directed to take into consideration the possibility of carrying out the constitution of March, 1849.

**BALLOONS.** Mr. Green and the Duke of Brunswick in April 1851, crossed the British channel from Hastings, and in 5 hours landed safely near Boulogne; greatest altitude mid-channel was 4000 feet. Mr. Green ascended on horseback from Vauxhall, July 1850; since then M. Poitevin has made several ascents *en-cheval*, and in a carriage and pair (July 1851), sometimes accompanied by his wife, &c.—In one ascent he carried up a live ostrich. Lt. Gale (the Mazeppa of the Bowery Theatre) left Bordeaux with his balloon Sept. 1850, and was found dead the next morning in a field, dreadfully mutilated. Several hazardous ascensions have since been made in France, one by an aeronaut with his head downwards.

**BALTIMORE, U. S. A.** Population, by the census of 1850, 169,000, being a gain of 66 per cent. in ten years.

**BANKS, PENNY.** These were first instituted at Greenock in Scotland. Of 5,000 deposits the aggregate amount of nearly £1,100 gives an average of about 4s. 6d. each. In London and the provincial towns they are becoming very popular. In Whitechapel, 8000 deposits in nine months showed an accumulation of nearly £2,000 or about 5s. each.

**BANKS IN THE U. S. 1851.** The following tables it is believed exhibit the number, capital and general condition of the Banking interests in this country, to March 1851.

|                                | No. Bks. | Circulation.  | Specie.      | Capital.      |

*American Almanac*, 1852.

**BOOKS, GERMAN.**—Since the Easter Fair at Leipsic, 1851, not less than 3,860 new books had been published, up to Nov.; and 1150 were then in preparation for issue.—*Illus. News.*

**BOOKS, LONDON**, 1850 about 4,400 were published, of which the Papal Question furnished 180 *in one month*; fiction, 500; law, 250; and travels, 200; the remainder miscellaneous.—*Illus. News.*

**BRITISH MUSEUM.** The total income for the year 1850, was £55,686 17s. 1d.; and the actual expenditure within the same period, £47,463 5s. 10d.

**BOSTON, U. S. A.** Population by the census of 1850, 135,000, being an increase of 42,000, or about 45 per cent. in ten years.

**BRIDGES.** The Suspension Bridge over the Niagara river, near the Falls, completed July 28, 1848. C. E. Ellett was the engineer. The Britannia Tubular Bridge, over the Menai Straits, between Caernarvon and the Isle of Anglesea, completed October, 1850, Mr. Stephenson engineer, at an outlay of nearly £600,000. A suspension bridge over the Ohio, at Wheeling, span 1010 feet, being 152 feet longer than the Friburg bridge, Switzerland, was completed by Mr. Ellett, 1850. Remington's bridge, at Montgomery, Ala., on the same plan as that he exhibited in London about two years ago, though slight in appearance, is of extraordinary merit for its strength and ingenuity. The floating bridge, for passage of railroad cars across Lake Champlain, went into operation 1st Sept., 1851.

**BRITAIN, GREAT, AND BRITISH ISLES.** The returns of *forty thousand* enumerators show the population of this country, in March 1851, to be, males 10,192,721; females, 10,743,747, being an increase during the last 50 years of 98 per cent.; the average of annual rate of increase during that period, is 1.37. This amount is exclusive of absent soldiers and sailors, the number of whom is estimated at 167,604. In Scotland, the rate of increase for the

half century preceding 1851, is 78 per cent. ; present population, 2,865,421. The population in Ireland 6,515,794, compared with that of 1841, viz., 8,175,124, shows a total decrease of 1,659,330 souls. The returns of the British metropolis, including parts of Middlesex, Surrey and Kent, give a total population of 2,361,640, the preponderance in which is females.—*Parliamentary Returns*.

**BUILDING (BENEFIT) SOCIETIES.** First established at Kircudbright, Scotland, 1815; after 1830 they increased rapidly.—*Scratchley's Treatise on B. B. Societies*. Several have been in successful operation in New-York since 1848.

**CALCULATING MACHINE.** A very superior one exhibited in the Crystal Palace, 1851, by J. A. Staffel, of Warsaw. This extraordinary machine was the effect of ten years undiminished study and application; by it any errors may be corrected and the operator warned of any surplus calculation.—*Illus. News*.

**CALIFORNIA, STATE OF, U. S. A.** Constitution ratified by the people, Nov. 13, 1849. The State admitted into the Union by vote of the United States Senate, Aug. 13, 1850, and on Sept. 9, 1850, the California Senators, Dr. Wm. M. Gwin and Col. J. C. Fremont, took their seats. The number of emigrants, to California, passing Fort Laramie, and registered to June 20, 1850, are, men, 32,740; women, 494; children, 591; of mules, 6,725; oxen, 21,418; cows, 3,185; horses, 23,798; and wagons, 7,586. The census returns for 1850, indicate a white population of 165,000 and 1,800 colored, making the fractional representative enumeration 74,000 and thus securing a second Representative in Congress.—*Daily Times*. First overland party of the season, 1851, arrives at Placerville July 17, in 77 days from St. Joseph's. Gov. McDougal issues a proclamation, July 21, against "Vigilance Committees," calling upon all good citizens to sustain the laws. From Jan. to 31 Oct. 1851, inclusive, the number of vessels at Boston, New York, Philadelphia, Baltimore, and New Orleans, show an evident decrease in the clearances and cargoes for that country.—*Boston Price Current*. Great fire in San Francisco, Sept. 17, 1850, loss \$300,000; more than 200 houses destroyed by fire in Nevada City, estimated loss, \$1,300,000. Another fire at San Francisco May. 3, 1851, several lives lost and many injured, 2,500 buildings consumed, and from one to five millions of property destroyed. A fire at Stockton, May 14, total loss \$1,500,000. Shock of an earthquake felt at San Francisco, May 15. Jenkins hung at San Francisco and the police driven back by the "Vigilance Committee," June 10, 1851. Another fire (the sixth) at San Francisco, June 22, 500 houses burned, and \$3,000,000 property consumed. "Jim Stuart" hung at San Francisco, July 11, 1851, being the second execution by the "Vigilance Committee." At Sacramento, Aug. 21, a prisoner under sentence of death, but reprieved by the Governor, is forcibly executed by the citizens. Aug. 24, Whittaker and McKenzie taken by force from the jailer at San Francisco, and publicly executed by the "Vigilance Committee." Aug. 30, a fire consumes part of Marysville, California. *California Fleet*.—The whole number of clearances from the United States for California, in the year 1850, was 565, of which 181 were from New York, and 170 from Boston.

**CANADA.** A memorial for annexation to the United States received, in five hours, the signatures of 300 merchants, land-owners, and professional men, in Montreal, Oct. 10, 1850.

**CARDINAL WISEMAN**, born at Seville, created cardinal January, 1848, public assumption in London, 1850. The operations of the Catholics arising from this creation produced great excitement in England. A London bookseller issued a catalogue of more than 1700 English works on Popery, which he offered for sale.—*See Westminster*.

**CARPETS IN NEW-YORK.** Prior to 1760 they were not known, but in the papers of that date Matthew Wilders advertises a variety imported from Scotland.—*Noah's S. Times*.

**CATHOLICS, 1851.** Prelates in the U. States—Archbishops, 16; Bishops, 85; Vicars Apostolic, 10.—*Ami de Religion*. The total income received by three Catholic institutions in Low. Canada, was stated by the Montreal Courier, of March, 1851, to be larger than the whole Provincial revenue. Real estate in the Papal dominions is stated at \$195,000,000.—*Il Cattolico Cristiano (Maltese paper)*, 1851. The number of Catholics in the United States is estimated at 1,233,350 (*Am. Almanac*), while the entire Catholic population of the world, Greek and Roman, is judged by Ungewitter and Dr. Baird to amount to nearly 200,000,000. The great "aggregate meeting" of Roman Catholics from all parts of the United Kingdom for inauguration of the Catholic Defence Association, held at Dublin, August 19th, 1851. The Duke of Norfolk, whose ancestors for centuries observed the Roman Catholic faith, secedes to the Protestant Church, Sept., 1851.

**CHICAGO.** From the returns of eight of the largest establishments in this city, the business operations for 1851 were:—Cattle slaughtered, 30,800; barrels beef packed, 59,600; barrels tallow, 7,342; hides, 30,800; tons of salt used, 2,023; number of hands employed, 463.—*Chicago Trib. and N. Y. Daily Times*.

**CHILL.** Suspension of "discriminating duties" upon Chilian vessels determined by U. States Nov. 1, 1850, so long as the equality of maritime imposts is maintained between the two countries. Don Manuel Montt inaugurated President, Sept. 18, 1851.

**CHINA.** The progress of the disturbance in the southern provinces excites serious alarm in the Imperial Court, Pekin, June 23, 1851.

**CHOLERA** appeared on the island of Jamaica, West Indies, in the autumn of 1850, and before the 1st December, more than 6,000 persons had fallen victims. It also appeared in California, Oct. 22, 1850. In the city of Mexico, 2,700 persons died of cholera in four weeks—May and June, 1850.

**CHURCH OF ENGLAND.** Great excitement and agitation in England respecting a dispute on doctrine between the Bishop of Exeter and Rev. Dr. Gorham, one of his clergy. The Privy Council's decision in favor of the latter, afterwards ratified by the courts, March 8, 1850. According to evidence of Mr. Baines before Committee H. Commons, 1851, there were in Gt. Britain 13,193 places of worship dissenting from the tenets of the Established Church; to which may be added R. Catholic chapels 597, minor sects and Jews 550; making the total of nonconformist churches 14,340.

**CINCINNATI,** the "Queen of the West," had by the census of 1850, a population of 115,590. In 1840, it was 46,382. Increase, in ten years, 69,208, or about 150 per cent.

**CLOCKS.** Between 200,000 and 300,000 clocks are manufactured annually in the State of Connecticut; the brass works being made by machinery with mathematical precision. Chauncey Jerome of N. Haven makes upwards of 800 per day, some of which he sells at *sixty cents* each wholesale, warranted. An astronomical clock exhibited in Crystal Palace, by Dr. Henderson of Liverpool, requires winding up but once in a century. It was commenced in 1844, and finished for the Great Exhibition.—*Illus. News*.

**COALS.** Comparative view of the areas of coal lands, and the production, in 1845, of the six principal producing countries.

| Countries.       | Square Miles.<br>of Coal For-<br>mation. | Tons of Fuel<br>produced in<br>1845. | Relative<br>parts of<br>1,000. | Official estimated Value at the<br>Places of Production. |                       |

*Scientific American.*

The very general substitution of coal for wood as fuel, and its employment in the manufacture of iron and in the production of steam and gas, have, of late years, given an amazing impulse to the trade in this article. Coal was discovered in Mansfield, Massachusetts, about 1835, but the efforts to render the same available were only efficiently applied by the Mansfield Mining Co. in 1848, which establishment it is expected will work the mine to much public advantage. The main shaft is 171 feet from the surface, and four other shafts lead from this, making the entire length 1,100 feet.—*Boston Traveller*. The amount of Pennsylvania anthracite coal sent to market in 1850 was 3,127,083 tons. Coal-field found at Port Philip, V. D. Land, June, 1851, surpassing any of those in the sister colonies.

**COAL, GT. BRITAIN.** The present home consumption is about thirty-two millions of tons annually: export about six millions.—*Anderson's "Course of Creation."*

**COD FISHERY.** The total amount of tonnage employed in the cod fishery of Marblehead, Mass., from 1794 to 1850, was 28,233,507. Number of vessels rating over fifty tons each, 3147; under fifty tons, 1007. Vessels lost in 1846, eleven.—*N. Y. Sun*.

**COFFEE AND TEA.** Value of imported into the United States of America,

|                                      |         |              |       |              |
|--------------------------------------|---------|--------------|-------|--------------|
| For the year ending, June 30, 1849:— | Coffee, | \$9,058,352; | Teas, | \$4,071,789. |
| "                                    | "       | 1850: "      | "     | 4,719,232.   |
| "                                    | "       | 1851: "      | "     | 4,798,005.   |

*Courier.*

**COINAGE OF THE U. S. MINT AND BRANCHES.** for the year ending December 31, 1849. Gold, value \$9,007,761; silver, \$2,114,950; copper, \$41,984; total, \$11,164,695. The amount of coinage at Philadelphia, 1851, from January to November 5 inclusive, was: gold, \$46,139,131; silver, \$246,650; silver three cent pieces, \$146,653; copper, \$91,988; total, \$46,624,422. The California gold deposited at the Mint during that period was \$42,512,588.—*Tribune*.

**COMMERCE, INTERNAL,** of the United States, 1851. The aggregate value of the lake trade, as appears by returns made at the bureau of Topographical Engineers, amounts to the enormous sum of \$186,485,269, or more, by \$40,000,000, than the whole foreign export trade of the country. The aggreg-

gate tonnage is 203,041 tons, of which 35,904 is foreign. The net value of the commerce of the western rivers is \$256,233,820; the value of vessels, \$18,661,500. The gross value of the internal commerce of the United States may be estimated at \$795,654,744.

**COMMERCIAL TONNAGE**, THE, of England is stated at 3,130,000 tons. If so, the United States will stand as the first commercial nation in the world, as her tonnage on the 30th of June, 1850, was as follows: registered tonnage in foreign trade, 1,585,711 tons; vessels in coasting trade, 1,797,824 tons; fishing vessels, 151,918; in whale fishery, 146,016 tons. Total, 3,681,469 tons.

**CONVENTION** of Delegates from Southern States in defence of the slaveholding interest, at Nashville, June 3, 1850; and again November 12, 1850.

**COPPER**. The Connecticut mines are stated by Professor Silliman to extend over thirty miles south of Bristol, and would employ, if thoroughly worked, 30,000 miners. The net profits in 1849 were \$120,000; and the yield increases in value every foot the miners proceed. From Lake Superior the shipments of copper, till the close of navigation, 1850, were 2,680,000 lbs.—*Ann. Scientific Discovery*.

**COSTUME**, **BLOOMER**. The male costume was entirely adopted by Miss Webster, an agriculturist of Belgium, in 1850; and a partial modification by Mrs. Bloomer, of Seneca Falls, New-York, in 1851. Attempts have been made for its general adoption, both in this country and in England; but the propriety of female opinion has hitherto been against it.

**COTTON**. First exported from this country to Liverpool in 1784, when eight bales were seized by the customs, who disputed its positive shipment from the United States. In 1791 the exports to Great Britain were about 2,000,000; the shipments now made exceed 800,000,000 lbs. With the exception of Liverpool, more cotton is shipped from New Orleans to Boston than to any other part of the world.—*V. Flax-Cotton*. The quantity received in England from the United States has increased from seventy millions of pounds in 1849, to nearly one hundred and twenty millions in 1850; the former being about 9 per cent. of the whole quantity imported by that country, the latter about 18 per cent.—*Morning Express*. The ratios of cotton imported by Great Britain in the five years 1844-49 were: America 78½ per cent., India 10½, Brazil 7, Egypt, 3½, West Indies and miscellaneous 0½ per cent. "If we could derive a larger supply than we now do from our own colonies, equally good and cheap with that from the United States, it would be nationally beneficial in many ways."—*Companion to British Almanac*, 1851. The exports of cotton from the United States in 1850 were valued at \$72,000,000. The value of entire product of United States cotton goods for year ending June 30, 1851, was \$61,859,184.—*Herald*.

**COTTON SPINDLES** in operation in Europe and America, 1851. The following is the estimated number of spindles in actual operation: Great Britain, 17,500,000; France, 4,300,000; United States, 2,500,000; Zollverein States, 815,000; Russia, 700,000; Switzerland, 650,000; Belgium, 420,000; Spain, 300,000; Italy, 300,000. Total, 28,985,000.

**COTTON MANUFACTURES** in the United States. It is estimated that the annual product of all the cotton mills in the United States is 250,000,000 yards, and the consumption of cotton 600,000 bales; 100,000 bales of which are consumed south of the Potomac and in the Western States. The value of this amount of cotton when manufactured, is supposed to be upwards of sixty-seven millions. Convention of cotton planters at Macon, Georgia, October 28, 1851.

**CUBA.** Trial of General Lopez and others, engaged in the Cuban expedition, commenced in Circuit Court, New Orleans, December 17, 1850. General Quitman, of Mississippi, arrested by United States Marshal February 3, 1851, on charge of setting on foot a military expedition against Cuba; he issues a paper to the people of Mississippi, resigning his office as Governor. Proclamation by the President United States, April 25, warning all persons within jurisdiction of the States from aiding or engaging in any expedition against Cuba. Arrest of O'Sullivan and others, April 26, on charge of being concerned in a Cuban military expedition then fitting out in New-York. Steamer Pampero, with Lopez and 400 to 500 volunteers, sails from New Orleans, Aug. 3; disembark at Cabanos on the 12th; Col. Crittenden, on his route to join Lopez then in advance, is attacked by 500 Spanish troops and his forces scattered. Lopez having repulsed Gen. Enna, at Las Posas, retreats to the mountains; is taken by bloodhounds on the 29th, and publicly garotted at Havana, September 1. Col. Crittenden puts to sea, but is captured with 50 of his comrades on the 15th Aug.; the whole are carried to Havana and shot the next day. The remaining followers of Lopez, after enduring great privations, are captured or surrender, and all but three or four condemned by the governor to 10 years' labor on the public works in Spain, for which country they are shipped September 1, under escort. Great excitement at New Orleans, Aug. 21, growing out of the above; the Spanish residents attacked, and the Spanish Consul placed in city prison for safety. Mr. J. S. Thrasher, late editor of the "Faro Industrial," arrested at Havana, and after a trial resulting in his conviction, sent to Spain 24th Nov., 1851. The American prisoners in Spain pardoned by the Queen, Dec. 1851.

**DAGUERREOTYPES.** Of the innumerable variety of specimens of this Art, those of the United States are considered superior for brilliancy and execution. It is estimated that not less than 15,000 persons are connected with this Art in the U. States, and that the amount of material annually consumed in their operations exceeds \$900,000. The nearest approach to success in Daguerreotypes in natural colors is that of M. Niépce the original inventor of the Art—Daguerre having only perfected the discoveries of that gentleman. Daguerre died in Paris, July 1851. Hill's "discoveries" in colored Daguerreotypy decided by a committee of "New York State Daguerreotype Association," 18th Nov. 1851, to be "an unmitigated delusion."

**DEBTS OF THE STATES IN THE AMERICAN UNION, 1851.** In round numbers the debts of the different States for the year 1851, are estimated as follows:—

Maine, \$850,000; New Hampshire, \$76,790; Vermont, none; Massachusetts, \$6,000,000; Rhode Island, none; Connecticut, none; New-York, \$24,000,000; New Jersey, \$67,000; Pennsylvania, \$40,000,000; Delaware, none; Maryland, \$15,000,000; North Carolina, \$977,000; South Carolina, \$2,300,000; Georgia, \$1,800,000; Florida, none; Alabama, \$8,900,000; Mississippi, \$7,270,000; Louisiana, \$16,283,000; Texas, \$11,000,000; Arkansas, \$3,850,000; Tennessee, \$3,337,000; Kentucky, \$4,497,000; Ohio, \$49,000; Indiana, \$6,530,000; Illinois, \$5,590,565; Michigan, \$2,800,000; Missouri, \$156,000; Iowa, \$55,000; Wisconsin, none; California, \$650,000.

**DECLARATION OF INDEPENDENCE.** In March 1851 the Legislature of North Carolina accepted a Report affirming as a well-ascertained historical fact that the celebrated *Mecklenburg Declaration* was published in June, 1775,—large portions of which were embodied in Mr. Jefferson's Declaration of the following year. A resolution was passed that the Governor cause to be transmitted the block of marble presented by Lincoln county for the Washington Monument with the arms of the State and the following inscription sculptured thereon,—“North Carolina, Declaration of Independence, Mecklenburg, May 20, 1775.

## DEMOCRACY of England, France and the United States—Compared.

| Country.  | Pop.       | No. Votes. | Votes<br>to<br>Pop. | Country.       | Pop.       | No. Votes. | Votes<br>to<br>Pop. |
|-----------|------------|------------|---------------------|----------------|------------|------------|---------------------|
| England,  | 17,000,000 | 630,721    | 1 in 26             | Great Britain  | 28,650,000 | 839,371    | 1 in 42             |
| Wales,    | 850,000    | 37,924     | 1 in 23             | and Ireland,   | 34,000,000 | 250,000    | 1 in 137*           |

**DENMARK.** Battle of Idstedt, between the Danes and Schleswig-Holsteiners, received in England from India, July, 1850. The actual value of this Diamond tested by Mr. Jeffrey's tables is £260,000. It is however exceeded by the famous Portugal Diamond, weighing 1,680 carats; this Diamond has never been cut or polished, and is valued by the Portuguese Government at £5,644,000! The Durra-i-Noor or *Sea of Light*, the property of the East India Company, a blue Diamond belonging to the Queen, another in Mr. Hope's collection (177 grs.) with several parti-colored, and a green diamond owned by the King of Saxony, are among the most remarkable gems of the present day. Several pink diamonds were exhibited in the "Crystal Palace," also a *Black* diamond weighing 350 carats, the property of Mr. Joseph Mayer.

**DIAMONDS.** The Koh-i-noor, or "*Mountain of Light*," valued at £2,000,000, received in England from India, July, 1850. The actual value of this Diamond tested by Mr. Jeffrey's tables is £260,000. It is however exceeded by the famous Portugal Diamond, weighing 1,680 carats; this Diamond has never been cut or polished, and is valued by the Portuguese Government at £5,644,000! The Durra-i-Noor or *Sea of Light*, the property of the East India Company, a blue Diamond belonging to the Queen, another in Mr. Hope's collection (177 grs.) with several parti-colored, and a green diamond owned by the King of Saxony, are among the most remarkable gems of the present day. Several pink diamonds were exhibited in the "Crystal Palace," also a *Black* diamond weighing 350 carats, the property of Mr. Joseph Mayer.

**DIRECTORY, NEW YORK CITY.** The earliest published was in 1786, a small volume of 82 pages, printed by Shepherd Kollock, Wall street; the names of the individuals and firms include about 900, and occupy 33 pages, the remainder being filled with general statistics of the City, U. S. Government, Post Office regulations, &c. In his address the Editor states it was the "first Directory ever attempted in this country." The N. Y. Hist. Society possesses a complete set from its first publication to 1851.

**DOLLAR.** This word is said to have originated from the following circumstance. In 1516 a silver mine was discovered at St. Joachim's Thal (or dale) in Bohemia, the proprietor of which issued a number of silver pieces which were called Joachim's *Thaler*; by subsequent corruptions this word became *Dollar*, the mark \$ is simply a monogram of the letters P. S.—i. e, *Peso* the Spanish word for Dollar.

**DRAMATIC FUND ASSOCIATION.** This benevolent institution for the relief of decayed or disabled members of the profession, in this country, was founded in New York, April 1848.

**EARTH, ROTATION OF THE.** M. Foucault's public demonstration in Paris, May 1851, of the rotation of the earth, was preceded by a similar exhibition by M. Guyot, Paris, 1836.

**EDUCATION.** General convention of the friends of education in the United States, at Philadelphia, Oct. 19, 1849, and again, Aug. 1850. The report of the Board of Education of New York, for 1851, shows the number of children attending the 207 schools in that district, as 107,363. Yearly outlay, \$274,794; average expense of each child for the scholastic year of 204 days, is \$6 86. The London Athenæum in referring to this report states that the governmental cost of each criminal in Great Britain is, from first to last, nearly £400! and nobly endorses that great truth in political economy,

\* Before the late revolution. At the election in December, 1851, the suffrage was nominally 'universal,' and the number of votes was about 8,000,000.

that "The cheapest system of police is education!" Students in New-York Free Academy, 1851, 382; professors and tutors 17.—*F. A. Catalogue* (See *Schools*.) In the United States there are 217 colleges and professional schools, 120 colleges proper, 43 theological, 17 law, 37 medicine. Of the colleges 13 are Baptist, 8 Episcopalian, 13 Methodist, and 11 Roman Catholic. The number of volumes in the different collegiate libraries is 871,800.—*American Almanac*.

**ELECTRIC TELEGRAPH.** The crude idea was started by Schwenter, a German, in 1636.—*Lond. Philos. Jour.* In 1684 the celebrated Hooke presented a communication to the Royal Society, "showing how to communicate one's mind at great distances, not by *sound* but by *sight*!"—*Chambers*. In 1774, Le Sage of Geneva submitted a plan for an electric telegraph, to Frederick the Great, as "the monarch best capable of realizing it." In 1787, Lomond, of Paris, exhibited to Arthur Young "an alphabet of motions" appertaining to an electric telegraph; the distances to be accomplished by which, Young expressly states, "depended solely on the length of the wires." In Jan. 1851, *twenty-two thousand miles* of a continuous telegraphic route, extending from Halifax, N. S., to New Orleans, and as far West as Dubuque, Iowa, was accomplished as follows: Professor Morse's principle, 12,000 miles; Messrs. House and Bain 10,000 miles.—*Scien. American*. Dec. 2, 1851, a dispatch of 34 words was sent from New York to New Orleans, a distance of 1,900 miles, and an answer received in *less than five minutes*; the whole distance traversed being 3,800 miles.—*N. Y. Commercial*. Bakewell's copying electric telegraph experimented on, Apr. 1851, gave fac-similes of autographs, at the rate of 120 to 150 letters per minute. The submarine telegraph between Dover and Calais, completed Oct. 17, opened for public use Nov. 13, 1851. United States brig Dolphin, sailed Oct. 1851, upon her expedition to run a line of soundings for telegraphic purposes across the Atlantic.

**EMIGRATION to the U. S. A.** Passengers arrived in the year ending June 30, 1849, 299,610, of whom 213,736 landed at New York; in 1850 the number was 315,333, of whom 212,796 landed in New York.

**ENGLAND.** Resignation of the Russell Ministry Feb. 22, 1851; after several unsuccessful attempts by Lord Stanley to form a cabinet, Lord J. Russell and his colleagues resumed their ministerial functions. Second reading of the prohibited Affinity Marriage Bill, lost in the House of Peers, Feb. 25, by a vote of 16 to 50; Lord Campbell and the Ecclesiastical Bench voting in the majority. Great Exhibition, May 1st, *which see*. Banquet to royal and foreign commissioners of Great Exhibition, on board American steamer Atlantic at Liverpool, by Mr. W. Brown, M. P., July 12, 1851. Oath of Abjuration (Jew) Bill, passed by the Commons, is refused a second reading in the House of Lords, July 17, by a majority of 36. July 18, Alderman Salomons, the Jewish member for Greenwich, not permitted to take his seat. (Case in abeyance.) Resignation of Lord Palmerston, Sec. for Foreign Affairs, Dec. 1851.

**ENVELOPES FOR LETTERS.** Delarue's machine in London completes no less than 396,000 daily, the cutting, folding, and gumming, being performed by one single operation.—*Illus. News*. Dr. Hawes' three machines at Worcester, Mass., complete, count and pack 36,000 per day, and preparations are making for a contract of 120,000 daily.—*W. Spy*.

**ERIE CANAL ENLARGEMENT.** The passage of this bill defeated in the New York Senate April 16, 1851, by the withdrawal and resignation of twelve of the democratic members. The bill passed by new Legislature, 1851.

**ERIE RAILROAD.** This great undertaking, extending from N. Y. city to

Dunkirk, 469 miles, was opened by President Fillmore, Mr. Webster, &c., 15th May, 1851. Original charter 1832; cost nearly \$20,000,000; first regular journey 19th May, 1851, the whole distance being completed in 17 hours, or nearly 27½ miles per hour.

**EXHIBITION, GREAT, LONDON**, opened by the Queen, May 1, closed Oct. 11, 1851. This building, erected for the exhibition of the "World's Industry" in arts, manufactures, &c., covered nearly nineteen acres, being four times the size of St. Peter's at Rome. It was erected from the designs of Joseph Paxton, almost entirely of glass and iron; the cubic contents of the building were 33,000,000 feet; height of the transept, 108 feet.—

|                                                                   |          |
|-------------------------------------------------------------------|----------|
| Total cash receipts from privileges, season tickets and visitors, | £505,107 |
| Of which \$356,808 25 was taken in the 1s. days.                  |          |
| Expenses and appropriations,                                      | 355,000  |

|                                                                                                                                                                                                                         |             |           |

| Number of Exhibitors,                                                                                                                                                                                                   |             | 17,000    |
| <i>Council Medals</i> awarded to Great Britain, 79; Germany, 12; Austria, 4; Belgium, 2; Tuscany, 2; Spain, 1; France, 56; United States, 5; Russia, 3; Switzerland, 2; Holland, 1; Rome, 1; and Turkey, 1. Total, 169. |             |           |

*Jury Medals*, of which 9 were awarded to U. S., 2,918.

The number of letters received by the acting Commissioners during their official session was *Thirty-seven Thousand!*

It is not a little to the honor of the United States that the articles combining the greatest utility were exhibited by American citizens; *McCormic's Reaping Machine* being one of the most important and successful.

**PLOSIONS, FIRES, EARTHQUAKES, &c.** Portuguese frigate, Donna Maria II., of 32 guns, accidentally destroyed by explosion at Macao, China, Oct. 29, 1850, when 188 of the 244 men on board perished. At Fredericton, N.B., near 300 houses destroyed by fire, Nov. 11, 1850. A terrible hurricane at Cape Girardeau, Mo., Nov. 27, 1850, and many of the principal buildings destroyed. Steamer Anglo-Norman, on a pleasure trip, explodes at New Orleans, Dec. 13, 1850, nearly 100 persons killed, wounded and missing. Violent storm, Boston and vicinity, March 17, 18, 19, 1851, unusual rise of tide, and great damage to property on wharves. Earthquake at Valparaiso, South America, April 2, the most violent since that of 1822, few lives lost, but great destruction of property. Great storm on the whole sea-coast of Massachusetts, April 15, 16, 17, greatly exceeding the injuries of the preceding month. The city of Amalfi, and neighboring towns southeast of Naples, visited by a series of shocks by earthquake July 14, and 3,000 persons supposed to have perished. Volcanic eruptions from 8 craters, in the mountains of Martinique, West Indies, Aug. 5. Tornado, attended with great injury to buildings, &c., at St. Louis, Mo., Aug. 15; this was preceded by storms and freshets in Iowa and Tennessee. On the 17th great damage to shipping at Castries, St. Lucia, by an extraordinary commotion of the sea. A destructive tornado passed over Waltham, West Cambridge, and Medford, Mass., Aug. 22, doing much damage in its progress. Same day a violent storm blew down and unroofed buildings, &c., at Tallahassee, Florida.

**EXPORTS AND IMPORTS, U. S. A.** Year ending June 30, 1849, imports \$147,857,439, exports \$145,755,820; excess of imports, \$2,101,619. Imports for year ending June 30, 1850, \$178,138,318. Year ending June 30, 1851, imports \$210,000,000, exports \$188,000,000; excess of imports \$22,000,000. Specie imported same period, \$5,000,000; do. exported, chiefly California gold, \$29,000,000. The amount of imports in 1850, for articles of dress and personal ornament, was stated by *N. Y. Express* to be \$18,476,768.

**EXPORTS OF GREAT BRITAIN AND IRELAND, 1849, £58,848,042**—being an in-

crease of £9,902,717 over those of 1848. Of the exports there were:—To British Colonies, £16,594,087; China, £1,445,959; United States of America, £9,564,909; Cuba, £733,169; Brazil, £2,067,299; Mexico and Central South America, £3,757,463. In 1850 the British exports were, to United States, £14,891,951, and to forty-four other countries, £37,847,035; total exports, 1850, £71,367,885.—*Parl. Returns*. Imports by Great Britain, 1851, amount exclusive of London was, England, £6,691,629; Scotland, £1,951,981; Ireland, £2,055,925.—*Illus. News*.

**FIRES.** At San Francisco, \$1,500,000 worth of property destroyed, Dec. 24, 1849. Another at same place, May 4, 1850; 200 buildings, value \$4,000,000, destroyed. Another at same place, 300 houses, &c., value \$5,000,000 burnt, June 14, 1850.—*See Explosions*.

**FIRE-ANNIHILATORS.** The Water Bomb for extinguishing fires, invented by Zachary Greyl, a German, 1721; another by an English chemist, 1823, Phillips's annihilator, experimented with in New York, 1851. Salomon's gas engine exhibited, Cincinnati, Sept. 1851; and one by W. Lay, at Philadelphia, same year. First fire engines in New-York, brought from London, 1713, with hooks and ladders.

**FLAX-COTTON.** M. Claussen's patent, in 1850, for a new preparation of hemp, under the title of cotton-flax, having excited much attention. extensive preparations were made in Great Britain and Ireland, for the cultivation of flax for the new material. A sample of 60 tons manufactured for a Manchester house,  $\frac{3}{4}$  flax and  $\frac{1}{4}$  cotton, was considered decidedly successful, when the British Board of Trade agreed to purchase a company's produce of 100,000 acres, at the rate of £12 per acre. In the western states, and particularly Ohio, the subject excited great interest, as a branch of trade well suited for the agricultural facilities of that district.

**FLOGGING IN THE NAVY.** Bill to abolish it passed the House of Representatives of the United States, 131 to 29, Sept. 19, 1850. Mr. Brodhead of Pennsylvania, presented a petition in Senate, Dec. 17, 1851, praying for "restoration of flogging in the United States Navy."

**FLORIDA.** 1851. White population 47,167; free colored 925; slaves, 39,309; total 87,401. Farms in cultivation 4,304; manufacturing establishments producing annually upwards of \$500,121.—*Census Returns*.

**FRANCE.** 1849. Nov. 9, M. Poussin, French minister to the U. S., having been dismissed by the American government, sails for France. Nov. 12, trial of the political offenders of June 1848 ends at Versailles; 11 are acquitted, 20 convicted and sentenced—17 to transportation for life, 3 to imprisonment for five years. Nov. 15, Ledru Rollin and 30 other accused persons, absent from trial, are sentenced to transportation for life. 1850, Jan. 1. The President creates his uncle Jerome a marshal of France. April 15, 300 soldiers drowned at Angiers by the fall of a bridge. May 16, the French ambassador recalled from London in consequence of a difficulty connected with an English claim on Greece. May 31, new electoral law restricting the right of suffrage, passed. June 21, an arrangement with England on the Greek dispute. June 24, dotation bill, giving the President 2,160,000 francs per ann., passed. Dec. the French government protests, at Vienna, against the proposed extension of the Germanic Confederation beyond the Alps. 1851, Jan. 3, the Ministry resign. Feb. 8, the Presidential Dotation Bill proposing an additional grant of 1,800,000 francs, rejected in the assembly. March 25, Declaration at Honolulu of arrangement of difficulties between the Hawaiian government and the French republic. July 5, report of sub-committee on petitions, for revision 741,011; for revision and prolongation of powers 370,511; for prolongation of powers 12,103; total signatures 1,123,165. July 19, question of

revision of French Constitution again taken in Assembly, when the minority was declared 97 less than the three-fourths required by the constitution. Dec. 1, Revolution in France; Louis Napoleon by a *coup d'état* seizes the reins of government, dissolves the National Assembly; declares a state of siege; arrests the Members of the Assembly; constitutes an entire new Ministry. The President proposes the instant restoration of universal suffrage; an immediate election by people and army of a President, to hold office for ten years, to be supported by a council of state, and two houses of Legislature. The revolution creates an intense excitement. Dec. 10, the vote of the army shows a large majority for Louis Napoleon. Resistance to the usurpation is shown in various parts of France, but the overwhelming power of the army, and a "state of siege" in 33 departments, crushes all open opposition. Dec. 20, the election, under various controlling influences, results in the confirmation of Louis Napoleon as President for 10 years, by a vote of about seven millions out of eight millions. The French census of 1851 shows a total population of 35,500,000. The number of foreigners domiciled, of all nations, exceeds 1,000,000, of which 75,000 are British, or about one-half the British residents previous to the revolution of 1848.

**GAS.** First introduced in U. S. in City of Baltimore 1820, and shortly after in Boston, New York and Philadelphia.—*Sci. American*. Opposed in Italy by the Pope (Gregory XVI.) as "subversive of religion" in suppressing the sale of wax candles for the shrines.—*Gas Journal*. Water Gas discovered by Lavoisier, circa 1790.—*Sci. American*. Paine's Water Gas spoken of during the last 5 or 6 years, but appears to have been accomplished by the French Chemists. Superior gas from wood and fibrous matter, the discovery of a German, used at the R. R. Depot at Munich, 1851. In 1847 the expense of gas at the London Gen. Post Office was £3,047; increased facilities by the Gas Co. gradually reduced the charges in 1850, when the whole amount paid by the Post Office was £1,485.

**GEORGIA.** Population in 1850 was,—white, 513,083; free colored, 2,586; slaves, 362,966; federal representative pop. 733,448.—*Census Returns*.

**GERMANY.** The Archduke John resigns his office as head of the central power at Frankfort, Dec. 20, 1849. The Schleswig-Holsteiners under Gen. Willisen, engage the Danes at Idstedt, in a bloody but indecisive battle, July 25, 1850. The Schleswig-Holsteiners attempt to take Frederickstadt, but are repulsed by the Danes and lose 500 men, Oct. 5, 1850. Difficulties in Hesse-Cassel, between the Elector and his people, in regard to the mode of taxation. Austria and Prussia respectively send armies to the Electorate, to take opposite parts in the struggle; but they are soon after withdrawn, without collision, Sept.—Nov. 1850.

**GIPSIERS.** A company from England arrived in Cecil county, Maryland, in March 1851, bringing with them all their wandering habits and peculiarities.

**GLOBES, MONSTER.** Originally exhibited in Paris 1823, and a more perfect one by M. Guérin in 1844, which he styled the Géorama.—*Art. Jl* Wyld's Monster Globe erected in London 1851, employed 300 men nearly 30 days in fitting up the interior.—*Ill. News*.

**GOLD.** Received from California, in port of New York, 1851,

|                     |             |                         |             |
|---------------------|-------------|-------------------------|-------------|
| January, . . . . .  | \$2,890,903 | July, . . . . .         | \$3,094,311 |
| February, . . . . . | 4,363,471   | August, . . . . .       | 4,105,689   |
| March, . . . . .    | 1,351,055   | September, . . . . .    | 3,237,460   |
| April, . . . . .    | 2,023,119   | October, . . . . .      | 3,756,241   |
| May, . . . . .      | 2,282,338   | Nov. to 21st, . . . . . | 5,238,813   |
| June, . . . . .     | 3,975,355   |                         |             |

Gold discovered at *Ophir*, Bathurst District, Australia, by Mr. Hargreaves, in Feb. 1851; and at Port Philip, in June, same year. One piece weighed

3 lbs. 10 oz.; and Dr. Kerr found in one day over 102 lbs., value £4000 sterling. The diggings are estimated at 300 miles in extent. Gold mines reported to be discovered in the province of Gerona, Spain, Oct. 1851. Nearly £750,000 sterling was raised in London, Nov. 1851, for California and Australian gold mining operations.

**GREECE.** Lord Palmerston's note to the Greek government, Nov. 1851, produces great sensation at Athens, and the ministerial crisis likely to end in favor of the Russian party.

**GUN COTTON.** Discovered by Prof. Schoenbein, in Germany, 1846, but its practical utility for mining purposes supersedes its use in fire-arms.

**GUTTA PERCHA.** Previous to 1844, the very name of gutta percha was unknown to European commerce. In that year two cwt. was shipped experimentally from Singapore. The exportation of gutta percha from that port rose in 1845 to 169 piculs (the picul is 1330 lbs.); in 1846, to 5,364; in 1847, to 9,292; and in the first seven months of 1848, to 6,768 piculs. In the first four and a half years of the trade, 21,598 piculs of gutta percha, valued at \$274,190, were shipped at Singapore, the whole of which were sent to England, with the exception of 15 piculs to Mauritius, 470 to the continent of Europe, and 922 to the United States. The great variety of articles for domestic use, the ornamental arts, &c., to which this material has been applied, has given employment to thousands, not only in the factories of our own and other countries, but also to the gatherers in the Indian Archipelago, with whom it at present constitutes one of their most profitable articles of export.

**HAMBURGH.** Occupied by 4,000 Austrian troops, Jan. 1851.

**HATS, STRAW.** This branch of trade is principally carried on in Massachusetts. At Medfield the value of Bonnets made in 1851 was \$134,000; Foxboro' for the same period, \$122,000; and in Franklin \$160,000. In Boston city alone there are over 300 sewers.

**HESSIAN FLY.** This plague to agriculturists was introduced into this country by the foreign mercenaries on Long Island, 1777, from their baggage or in the forage of their horses.

**HUMAN RACE.** Dr. Pickering enumerates eleven different races, of which the names and numbers, supposing the whole human family to be 900,000,000, are as follows:

|                    |             |                     |           |
|--------------------|-------------|---------------------|-----------|
| White, - - - -     | 350,000,000 | Abyssinian, - - - - | 3,000,000 |
| Mongolian, - - - - | 300,000,000 | Papuan, - - - -     | 3,000,000 |
| Malayan, - - - -   | 120,000,000 | Negrillo, - - - -   | 3,000,000 |
| Telingan, - - - -  | 60,000,000  | Australian, - - - - | 500,000   |
| Negro, - - - -     | 55,000,000  | Hottentot, - - - -  | 500,000   |
| Ethiopian, - - - - | 5,000,000   |                     |           |

Dr. P. supposes that there have been at least two centres whence these different races have been derived, one in Asia and the other in Africa; he does not support the original unity of the races in one parent stem.—See *Pickering's Races of Men*, 1851. Professor Agassiz contends for a primitive ubiquity, or different types of humanity co-existent in different climes and countries.

**HUNGARY.** The fortress of Comorn surrenders to the Austrians, September 27, 1849. Count Louis Batthyani, late prime minister of Hungary, shot at Pesth, at the sole urgency of Haynau, October 7, 1849. In his visit to London, September, 1850, Haynau was attacked and severely maltreated for his cruelty in the late Hungarian war. General Bem dies at Aleppo, December 9. The Austrian government and the Ottoman Porte, in Feb., 1851, conclude on a general amnesty towards the Hungarian refugees, eight only excepted, amongst whom is Kossuth. Mr. Charles Brace, an American, im-

prisoned in Hungary May 23, on a charge of being an agent of Ujhazy and Cretz, and travelling with revolutionary books, &c., for the purpose of exciting rebellion. The authorities of Pesth. November 15th, forbid the distribution of all foreign journals, including those intended for editors of newspapers, until decision is received as to what papers, &c., shall be admitted. Louis Kossuth, ex-governor of Hungary, after a series of vicissitudes, during which he was nobly protected by the Ottoman Porte, visits England on his route to this country, landing at New-York, December 5, 1851. where, as in England, he was received with every demonstration of friendship and liberality, in return for his great exertions to procure the freedom of his native country. His arrival in New-York was known, per telegraph, at Milwaukee, 1,000 miles distant, in less than fifteen minutes. Great Kossuth-procession, Saturday, December 6th, 1851. This was followed by a public banquet, professional dinners, &c., &c.; Kossuth's semi-official interview with the President at Washington, December 31. He is formally presented to the Senate of the United States, January 5, 1852.

**ILLINOIS**, Population of in 1850 was,—white, 846,104; colored, 5,366; farms in cultivation, 76,208; dwelling-houses, 146,544; manufactories producing annually \$500 and upwards, 3,099.—*Census Returns*.

**INDEX** Expurgatory. In 1850 the "Congregation of the Index" among other works placed on their pages Professor Vericour's (Cork College) "Historical Annals of Christian Civilization."—*Illustrated News*. In 1851, D'Harmonville's "Dict. de Dates," 1844, Professor Whateley's "Elements of Logic," and Henry's "Historical Institutions of Egyptians," were added to the list. The last author, however, "made due submission to the Church."—*Giornale di Roma, April*, 1851.

**INDIA**, British. A fourth presidency contemplated by Great Britain, Nov. 1851, and a proposal to remove the seat of government from Calcutta to Lahore.

**INDIANA**, 1850. White population, 983,634; free colored, 5,100. Total, 988 734. Farms in cultivation, 93,896; manufactories producing annually \$500 and upwards, 4,326.—*Census Returns*.

**INDIA RUBBER**. The natives of Hindostan were the first to collect this substance, which was introduced into England in 1735, for the purpose of removing pencil marks from paper.—*Athen*. In 1772 a cubical one-half inch of this substance cost 3s. sterling. Mr. Macintosh, of England, was the first to manufacture the prepared gum for its present innumerable applications. Cuirasses of vulcanized rubber were introduced in the French army, 1851, and said to be bullet-proof (?) The daily product of India rubber shoes, made in the United States, is calculated at 15,000, at an annual profit of nearly \$200 000.—*Farmer and Mechanic*.

**INOCULATION**. The small-pox was introduced into the United States about 1517; and so late as the year 1769 we find the practice of inoculation prohibited by law in Virginia.

**IOWA**. The population of this territory, according to census returns 1850, was 192 214, and the aggregate valuation of taxable property \$22,623,334, being an increase of \$4,114,567 since 1849.—*American Almanac*.

**IRON**, United States, 1851.

|                                              | Annually.   |
|----------------------------------------------|-------------|
| Mine at Salisbury, Conn., yields, -          | 3,000 tons, |
| Dutchess and Columbia Co., N. Y., -          | 20,000 "    |
| Essex Co., -                                 | 15,000 "    |
| Clinton Co., -                               | 3,000 "     |
| Franklin Co., -                              | 600 "       |
| St. Lawrence Co., -                          | 2,000 "     |
| Value of Iron produced in the U. S., 1835, - | \$6,000,000 |
| " " " " 1837, -                              | 7,700,000   |

The iron ores in Ohio, Kentucky, Tennessee, Illinois, Maryland, and Virginia, from recent inspections, are found to be inexhaustible.—*Sci. American*. In the Gentleman's Magazine, 1783, is a recommendatory article of *cast iron*, then in its infancy, which is there said to be "capable of being carried to a great extent."

**JESUITS.** In 1851 this body published in Italy a "*Catechism Filosofo*," or dialogue on Monarchical Constitutions, containing instructions for kings, how far they may go with a safe conscience in breaking promises made to their people.—*Edin. Rev.*

**JEWS.** Of the original twelve tribes, two only are at present known; the tribes of Judah and Benjamin. The Spanish and Portuguese Jews are the descendants of Judah; the Jews of Germany and Northern Europe are of the tribe of Benjamin—*Art Jour.* Dr. Raphael (lecture N. Y., May, 1851), states that with the exception of Josephus, who wrote in Greek, and M. Jost, who wrote in German, about 1841, the Jewish historians from the first century (A.D.), to the nineteenth, invariably wrote in the Hebrew language. Dr. Lykins, of the Pottawattamie Reservation, exhibited in the office of Indian Department, Washington, in Dec. 1851, a Jewish *frontlet*, containing portions of the Pentateuch, which he received from Pategwe, a Pottawattamie Indian, in whose family it had been from time immemorial. There were originally two of these indexes of Jewish faith, one of which was irrecoverably lost in crossing a river.—*Nat. Intel.* This curious discovery may perhaps be considered as strengthening the opinion of the late Major Noah, that the American Indians are descended from the lost tribes of the Jewish people.

**KAFFIR (OR CAFFRE) WAR,** in South Africa, against the British Colonists; Jan., Feb. 1851, several engagements and many lives lost.—*See Africa*.

**KENTUCKY.** The census returns show the population in 1850 to have been 987,950; of whom 776,713 were free, and 211,237 slaves. The increase compared with returns of 1840, is, free, 179,143; slaves, 28,979; total, 208,122. The first white man who *built* in Kentucky, was James Harrod, in 1774, at Harrod's Station, near the present town of Harrodsburg.

**KOSSUTH.**—*See Hungary*.

**LAND OWNERS.** It is a remarkable fact, that of all the constitutional states of Europe or America, Great Britain is the country in which the people hold the smallest stake in the soil. France with a population of 32,560,034, has 10,896,682 landed proprietors, or one in three. The United States, with a population of 20,000,000, has 5,000,000 proprietors, or one in four. Belgium, with a population of 5,022,677, has 950,723 proprietors, or one in five. Holland, a commercial and shipping country, with a population of 3,500,000, has 400,000 proprietors, or one in nine. Sweden, with a population of 3,874,203, has 300,000 proprietors, or one in twelve. While Great Britain and Ireland, with a population of 27,041,050, have only 633,421, or one in forty of the population, including freeholders and copyholders, with a direct interest in the soil.

**LANDS (PUBLIC) OF THE U. S. A.** Within the limits recognized by treaties and cessions (see American Almanac, 1850, p. 179), the public lands covered an estimated area of 1,584,000,000 acres. To the 30th Sept. 1849, 146,000,000 acres had been sold, leaving unsold an area of 1,438,000,000 acres, which land, in large bodies of detached tracts, is found in the several States and Territories above mentioned. The system for surveying and disposing of the public lands was established by the act of 20th May, 1785, and has continued to the present time but with slight modifications, viz.; every township of six square miles is to be divided into 36 sections, of one mile square, each

section generally containing 640 acres. The lands are then proclaimed by the President for sale, at public auction, at not less than \$1 25 per acre, and such as hereafter remain unsold may be purchased at private sale at that rate.—*American Almanac*.

*Quantity of Public Land sold, and the amount paid for it, in each Year, from 1833 to the Third Quarter of 1850.*

| Years. | Acres.        | Dollars.      | Years. | Acres.        | Dollars.        |
|--------|---------------|---------------|--------|---------------|-----------------|
| 1833   | 3,856,227·56  | 4,972,284·84  | 1843   | 1,605,264·06  | 2,016,044·30    |
| 1834   | 4,658,218·71  | 6,099,981·04  | 1844   | 1,754,763·13  | 2,207,678·04    |
| 1835   | 12,564,478·85 | 15,999,604·11 | 1845   | 1,843,527·05  | 2,470,303·17    |
| 1836   | 20,074,870·92 | 25,167,833·06 | 1846   | 2,263,730·81  | 2,904,637·27    |
| 1837   | 5,601,103·12  | 7,007,523·04  | 1847   | 2,521,305·59  | 3,296,404·08    |
| 1838   | 3,414,907·42  | 4,305,564·64  | 1848   | 1,887,553·04  | 2,621,615·26    |
| 1839   | 4,976,382·87  | 6,464,556·79  | 1849   | 1,329,902·77  | 1,756,890·42    |
| 1840   | 2,236,889·74  | 2,789,637·53  | 1850*  | 869,082·32    | 1,129,186·50    |
| 1841   | 1,164,796·11  | 1,463,364·06  |        |               |                 |
| 1842   | 1,129,217·58  | 1,417,972·06  | Total† | 73,752,221·65 | \$94,191,279·21 |

\* Embracing only three quarters of the year. † Total for eighteen years and three quarters.

**LANGUAGE.** Ethnography has furnished conclusive evidence that the family of American languages have had a common origin with those of Asia. The unity of all human language must be considered as establishing an identical unity of all the human races; all dialects must be regarded as dialects of one now lost.—*Dr. Smyth's Unity of Human Races*.

**LAW.** The number of Lawyers in the United States, in March 1851, was 21,979, or about one to every fifteen hundred inhabitants.—*Monthly Law Magazine*. Estimating their average receipts at \$1000 per annum, their aggregate income would reach within a fraction of *twenty-two millions of dollars*. In 1851 there were in New York, 4,740 lawyers; in Pennsylvania, 1,848; in Ohio, 2,031; in Massachusetts, 1,132; in Kentucky, 1,066; and in Georgia, 908.—*Livingston's Law Register*.

**LETTERS.** The number of letters transmitted in the following European countries annually, were estimated, in March 1851, as follows:—

|              | Population. | Letters.    | Pr. Head. |
|--------------|-------------|-------------|-----------|
| England,     | 29,000,000  | 320,000,000 | 11·       |
| France,      | 36,000,000  | 108,000,000 | 3·        |
| Prussia,     | 16,500,000  | 45,000,000  | 2·7       |
| Switzerland, | 2,408,000   | 13,600,000  | 5·6       |
| Austria,     | 37,000,000  | 23,000,000  | 0·6       |

Being rather more than *half a letter* for each inhabitant of the Austrian dominions.

*London Watchman, Vide P. Office.*

**LIBRARIES** in United States, 1851. Professor Jewett, of the Smithsonian Institute, shows the number of libraries to March, 1851, to be 10,640, and the aggregate number of volumes 3,641,765. Of these, Harvard comprises 83,000; Philadelphia and Loganian, 60,000; Congressional, 50,000; Boston Athenæum, 56,000. The aggregate number of volumes in 182 of the largest libraries was stated by Mr. Evans, before the select committee, British House of Commons, to be 1,294,000. The Legislature of New-York, in 1851, voted an appropriation of \$75,000 for the erection of a State library in the rear of the capitol at Albany. Among the donations to this library is one from Austria of the Pater Noster in upwards of 600 languages and dialects. A large portion of the valuable library of Congress destroyed by fire in the Capitol, Dec., 1851:

**LINEN.** The average annual import of linens into the United States is estimated at about \$6,500,000. The only manufactory in the United States is that of Mr. Stevens, at Webster, Massachusetts. In 1840 the flax crop in all the States north of the Ohio river, and including Maryland, covered some

four millions of acres, averaging 350 lbs. flax lint per acre; of which about one-third is fit for linen fabric; the remainder, say 130lbs., being available for paper bagging, &c. The excess of profit in the culture of flax compared with cotton, is shown by *N. Y. Tribune*, April, 1851, to be nearly 50 per cent.

**LIGHTHOUSES.** In July, 1850, the lighthouse establishment of the United States numbered 315 lights in lighthouses, and 40 floating-lights, attended in all by 346 keepers, exhibiting over 3,000 lamps, and supported at an annual expense of \$141,153.

**LITHOGRAPHY.** A process for printing in oil by different stones, according to the colors required, was invented by Mr. Kronheim, of Pater noster Row, London, in March, 1851.

**LOCKS.** Mr. Chubb, of London, stated before the Society of Arts in Jan., 1851, that the basis of all security in modern locks is found in the old Egyptian, the original of the patent tumbler lock:—*Illustrated News*. His lock, however, was picked by the celebrated Mr. Hobbs, of New-York, during the session of the Great Exhibition, 1851. Day and Newell's *parantoptic* lock, exhibited in the Crystal Palace, is susceptible of 1,307,647,368,000 changes; the time required for effecting the whole of which would consume 13,000,000 years.

**LOTTERIES.** The Maryland Convention of 1851 passed a resolution abolishing all lotteries and their attendant evils, after April, 1859.

**MANHATTAN.** This term, as applied to the island on which the city of New-York stands, is taken from the name given by the Indians to the original Dutch settlement in 1621, and means "*the place where they (the Indians) all got drunk!*"

**MANUFACTURES.** The increase of manufacturing industry in Great Britain in sixty years, is shown by the following table of the raw materials used in that kingdom:

|                   | In 1790.       | In 1849.        |
|-------------------|----------------|-----------------|
| Wool, . . . . .   | 3,245,352 lbs. | 76,756,183 lbs. |
| Silk, . . . . .   | 1,253,445 "    | 6,881,861 "     |
| Hemp, . . . . .   | 592,306 "      | 1,061,273 "     |
| Flax, . . . . .   | 257,222 "      | 1,806,786 "     |
| Cotton, . . . . . | 30,574,374 "   | 758,841,650 "   |

See "Cotton," &c.

**MARYLAND.** The new Constitution of this State went into operation on 4th July, 1851, and from its general acceptance promises greatly to increase the prosperity of the State. Population by the census of 1850, 582,506, of which 89,800 were slaves.

**MASKS.** Before the introduction of females on the British stage, masks were used in the representation of female characters, by the male actors who were no longer youthful.—*Knight's Shakspeare*. They were also employed by female actors in the early stage of the English drama, and also by women when travelling. Miss Livingston, of New-York, who married Nicholas Bayard, about 1749, when she rode out in cold weather, or went sleighing, wore a black velvet mask, with a silver button or mouthpiece to keep it on.

**MASSACHUSETTS.** The polls, population, and valuation, for the last four decennary terms, are as follows. viz.:

|                 | Polls.  | Population. | Valuation.    |
|-----------------|---------|-------------|---------------|
| 1820, . . . . . | 122,715 | 523,287     | \$153,644,265 |
| 1830, . . . . . | 150,691 | 610,408     | 208,908,107   |
| 1840, . . . . . | 185,908 | 718,592     | 299,878,327   |
| 1850, . . . . . | 245,142 | 994,665     | 597,936,969   |

The relative increase of polls, population, and property, during the above periods, omitting fractions, is as follows:

|               |     | Polls. |     | Population. |     | Valuation.   |
|---------------|-----|--------|-----|-------------|-----|--------------|
| 1820 to 1830, | - - | 28,000 | - - | 47,000      | - - | \$55,000,000 |
| 1830 to 1840, | - - | 35,000 | - - | 108,000     | - - | 91,000,000   |
| 1840 to 1850, | - - | 57,000 | - - | 255,000     | - - | 299,048,666  |

In this State systematic beggary is unknown. The poor are provided for by law, and for this purpose not less than 204 comfortable alms-houses are sustained at the public charge. The number of persons relieved or supported as paupers, in the year 1850, was 25,981, and of these 12,334 were foreigners, the larger portion being from Ireland. The weekly cost of each pauper in alms-houses was \$1.08½; out of alms-houses, \$0.98. Estimated value of pauper labor in alms-houses, \$17,966. Of paupers by reason of idiocy, the number was 969; while that from intemperance in themselves, or through others, was not less than 14,674. Number of public schools in this State, 1850, was 3,878; scholars in summer, 176,344; in winter schools, 194,403. Male teachers, 2,442; female do., 5,985. Average expense each scholar in Massachusetts is nearly \$8. Value of public school-houses in 1848 was \$2,750,000, of which amount \$2,200,000 had been expended since 1838. Criminal prosecutions in 1850 were 3,764, of which the convictions were 1,907. Of the banks in Massachusetts, there are 29 in Boston, and 97 in various parts of the State; cash capital, independent of other resources, \$36,925,050; circulation, \$17,005,826. The commerce and manufactures of Mass. have advanced 100 per cent. in the last ten years—*Am. Al.*; the importations more than doubled, and its tonnage has increased more than 50 per cent. The wealth of Boston and its suburbs, in 1840, was \$120,000,000; in 1850 it had increased to nearly \$270,000,000. The annual value of the boots and shoes manufactured in Massachusetts is estimated at \$18,000,000.

**MEDICINE.** The first medical school established in the U. S. was commenced in Philadelphia in 1768; this was closed during the first war with Great Britain. First medical degrees conferred were by King's College, New York, 1769. Thatcher's "Brief Guide on Small Pox and Measles," Mass., 1677, was the first medical work published in this country. Inoculation for small pox introduced by Dr. Z. Boylston of Boston, 1677, having first experimented on his own son; Dr. B. Van Beuren first practised inoculation in New-York. The first recorded *post-mortem* examination in America was that of Gov. Slaughter, by Dr. Johannes Kutbyl and five other physicians of New-York, in 1691; and the first medical meeting was held in New Brunswick, N. J., 1766.—*Lit. World.*

*Medical Students, full Session, N. Y., 1851.*

*Med. Gaz.*

At the Female Med. College, Philadelphia, June, 1851, there were forty students. *Doctor or Doctress* Elizabeth Blackwell practises at this present (for females and children) in N. York city.

**MESMERISM.** In 1776, F. A. Mesmer of Germany first made public his doctrine of a subtle fluid produced by planetary influence acting on the nervous system of the animal frame. Franklin and Dr. Bailly exposed the futility of animal magnetism, which theory, however, has been lately revived, both in this country and Europe. Among others who have made themselves conspicuous in favoring this absurdity, is the celebrated Miss Martineau.—*Haydn.*

**METEORIC** Stone falls at Charlotte, N. C., accompanied by explosion, &c., Oct. 31, 1849.

**METHODISTS.** The general "Book Concern" of this body was first estab-

lished at Philadelphia in 1800,—Ezekiel Cooper, Agent; it was subsequently removed to New-York. The unfortunate dissension between the Northern and Southern Methodist Conferences on the question of Slavery was brought to trial in New-York in May, 1851, and by decision of Judge Nelson, of U. S. Circuit Court, in Nov. of that year, judgment was given confirming the full right and title of the Southern Conference to their proportion of the profits of the General Book Concern, the value in 1845 being \$750,000. The case will be moved to the Superior Court.

**MEXICO.** Gen. Arista inaugurated president of republic of Mexico, Jan. 15, 1851. The initial boundary point between Mexico and the U. States, established on the right bank of the Rio Grande, in 32° 22' north latitude, by the American and Mexican commissioners, and a monument recording same, erected April 24, 1851. Herrera, ex-president of Mexico, dies in that city May 15, 1851. Gen. Carvajal's insurrection in Northern Mexico—his attack on Metamoras Oct. 20, 1851.

**MEXICAN WAR** with the United States. Mr. Corwin, Sec. of the Treasury, estimates the direct and indirect cost of this war to the U. S. at nearly \$300,000,000.

**MICHIGAN.** The population of this state in 1850 was—Whites, 393,156; Free colored, 2,547; Federal Rep. Population, 395,703.—*Census Returns*.

**MILITIA, U. S.** The Army Register for 1851, gives the aggregate number of the militia force throughout the States as 2,006,456, this does not include Iowa, California, Minnesota, Oregon, Utah, and New Mexico, from which there are no returns. Of the volunteer companies included in the militia returns, New-York city furnishes 170, each of which averages 60 members.

**MILITARY BOUNTY LAND BILL**, passed the House of Representatives, U. S. June 25, 1850. It gives 160 acres of land for 12 months' service in the war of 1812 and the Mexican and Indian wars.

**MILITARY, U. S.** The number of officers, non-commissioned officers, privates, &c., attached to the army of the U. States on 1st January, 1851, was 10,334.

**MINNESOTA.** The first Territorial legislature closes its session of sixty days Nov. 1, 1849. The census returns show the population of this territory in 1850 to be—white, 6,038; colored, 39—total, 6,077; farms in cultivation, 157; manufactories producing annually \$500 and upwards, 5.

**MISSISSIPPI.** The literal translation of the aboriginal name is *Great River*; the Indian title is written variously by the early journalists; Marquette spells it “*Missoissippi*,” Hennepin “*Meschasipi*.” Sape is river, running water; the prefix means “*great*,” “*big*.”—*Christ. Rev.*

The Population of Mississippi in 1850 was:

|                           | Whites. | Slaves. |
|---------------------------|---------|---------|
| North District, . . . . . | 170,459 | 134,508 |
| South “ . . . . .         | 129,550 | 177,060 |
| Totals, . . . . .         | 300,009 | 311,568 |

The Mississippi Legislature in the session of 1850 abolished the common-law form of pleadings, for a system similar to that of chancery or civil law, and appointed a special officer for making up the “*Mississippi Reports*,” to the exclusion of all other reporters. These reports are in future to be printed by the State only.—*Am. Almanac*.

**MORMONS.** The number of Mormons in England and U. S. early in 1851 was estimated at 300,000. Twenty-five hundred left the former country for Deseret in the spring of that year.—*Athen'm*. In April, 1851, their elders and preachers were gathering converts to their principles in Italy and Switzerland, and especially among the Waldenses; also at Paris. Their

celebrated "Bible," professed to have been delivered to Joe Smith, was really written by Rev. Sol. Spaulding, about 1812, as a supposed history of some ancient mounds in Ashtabula co., Ohio. The MS. is said to have been borrowed by one of the Mormons, who copied it and subsequently printed the same.—*Athen.* A copy of this "Bible" in the English, French, and Danish languages, was intended for exhibition in the Crystal Palace, 1851.

**MORTALITY, NEW-YORK.** Deaths—4,042 men—3,683 women—6,798 boys, and 5,234 girls—total, 19,755. Greatest mortality in a single month in July when 2,364 persons deceased; lowest in June, when 1,385 died. Deaths in 1850, were 16,978—increase 1851, 2,777.—*N. Y. Commercial.*

**MOUNTAINS, FORMATION OF.** Prof. Gorini of the University of Lodi, in Oct. 1851, by a remarkable process, illustrated the formation of mountains by melting a secret composition, and allowing it gradually to consolidate, during which process portions continue to ooze up in gradual elevations, forming ranges and chains of hills exactly corresponding in shape with those which are found on the earth.—*Lon. Times.*

**MUSIC.** Jenny Lind, the "Swedish Nightingale" gave her first concert in America at Castle Garden, New York, 1850. The proceeds of her 100 subsequent concerts in the U. States and Havana, were estimated at \$800,000.

**MURDER.** John W. Webster, Professor of Chemistry in Harvard College, executed in Boston for the murder of Dr. Geo. Parkman (Nov. 1849,) August 30, 1850.

**NATIONAL ACADEMY OF DESIGN, N. Y.** Instituted 1826; number of members originally limited to 35; but now increased to 50.—*Art Jour.*

**NAVY, OF THE U. S.** The Naval power Sept. 1, 1851, consisted of the Pennsylvania, 120 guns; 10 Ships of line, 74 guns each; the Independence Razee, 54 guns; 12 Frigates of 1st class, 44 guns each; 2 Frigates of 2d class, 36 guns each; 21 Sloops of war, 20 guns each; 1 do. 18 guns, and 4 of 16 guns each; 4 Brigs of 10 guns each; 3 Schooners, 4 guns; 5 Steam Frigates, 30 guns (including the Mississippi); the Powhatan—number of guns not returned; 3 Steamers 1st class 7 guns; 3 do. 2d class 8 guns, and 4 do. number of guns not returned, with 5 store Ships and Brigs, 24 guns.

**NAVY, BRITISH.** The Naval force of the United Kingdom for 1850, comprised six hundred and seventy-one Ships of war, either in ordinary or commission, varying from two to one hundred and twenty guns each; of this number one hundred and seventy-eight are armed Steamers, of one hundred to three hundred horse-power engines, constructed on the most approved principles for active sea service. This fleet, the largest of any maritime power on the globe, employs in time of peace 35,000 to 50,000 able-bodied seamen, 2,000 strong lads, and 13,000 royal marines.

**NEW ENGLAND.** "In 1630 the whole of New England contained but 300 inhabitants, which, in a century afterwards, had increased to 160,000, and may at this day be given at nearly three millions. The capital of New England, in 1720, contained 12,000 inhabitants; in 1820, 43,000; in 1830, 78,000; and in 1850, 135,000. Boston, in 1789, was proud of two stage coaches, which employed twelve horses; she was prouder still in 1800, of twenty-five stage coaches, which employed one hundred horses; in 1847, these twenty-five coaches had risen into two hundred and fifty coaches and omnibuses, employing one thousand six hundred horses, without taking into account seven railways, which provide, daily, accommodation for 7,000 passengers. The first newspaper published in the colonies, was issued in 1704, in this same city of Boston, and a third newspaper published in the same town, in 1721, under the title of the *New England Courant*, could not maintain itself, though it had very warm advocates, being supported by the Hell-fire Club;

at this moment there are in Boston sixteen daily news-papers, with a circulation of 36,000 copies, and fifty weekly news-papers with a circulation of 223,000—to say nothing of semi-weekly papers, and semi-monthly papers, and monthly, quarterly, and annual publications.—*Extract from Sir H. Bulwer's Speech before N. Eng. Society, Dec. 22, 1850.*

**NEW HAMPSHIRE.** The returns of the 7th census (1850) show a population of 317,997; in 1840 it was 234,574; gain in 10 years 33,423, being an increase of nearly 12 per cent.

|                                           |           |              |              |

|                                           |           | 15,087 28    | 4,547 80     |

Number of Banks in N. Hampshire is 22; cash capital independent of other resources, \$2,501,000; circulation \$2,012,837.—*Am. Almanac.*

**NEW JERSEY.** The total free population of this State, according to the 7th census (1850) was 488,552, viz 466,283 white and 22,269 colored; of the old slave population but 119 remaining. The number of children receiving public instruction in 1851 was 75,245, at the average cost per quarter of \$2 10 each pupil. The appropriations and receipts for school purposes was \$152,578 62; amount expended \$99,560 13; whole available school fund was \$377,929 85.—*Am. Almanac.* Transit duties levied upon merchandise and passengers, for the year 1850, and paid into the State Treasury was \$75,511—viz., Delaware & Raritan Canal \$20,289; Camden & Amboy Rail-Road & Transportation Co., \$41,421; New Jersey R. R. & Trans'n Co., \$13,261.

**NEWSPAPERS.** The newspaper press of a country may be regarded as the surest index to its intellectual condition. The census of 1850 shows the number of newspapers in the United States to be 2,800, of which 2,000 are published in the free, and 800 in the slave states. About 850 are Whig; 750 Opposition; 70 Freesoil or anti-slavery; 20 Agricultural; 40 Temperance; 200 Religious; and 870 neutral and miscellaneous. New York state publishes 443 papers; Pennsylvania 328; Massachusetts 212; and Ohio 300.—*Census Returns.* In the Austrian dominions it appears there are but 10 newspapers; 24 in Spain; 20 in Portugal; 30 in Asia; 14 in Africa (?); 65 in Belgium; 85 in Denmark; 90 in Russia and Poland; 300 in Prussia; and 320 in other Germanic States. Of the London papers it is stated that the daily circulation of the Times, in 1846, was 28,594; other papers 38,999; but in 1850 the Times had run up to 38,019 daily copies, while the circulation of all the other papers was only 24,116. The London Illustrated News, in 1849; rose to a weekly circulation of 69,000. Of the newspapers published in the United Kingdom, 159 are issued in London; 222 in the English provinces; 110 in Scotland; and 102 in Ireland. The duty paid for the different advertisements in these, in 1850, was £163,038! In July, 1851, Burgess, an Englishman, issued the first number of a Persian Journal, with all the features of a general newspaper, under the patronage of the prime minister of that country.—*N. Y. Tribune.*

**NEW YORK CITY.** The census of 1850 shows a population of 517,849, being an increase in ten years of 205,000, or about 66 per cent; including Brooklyn, Williamsburg, and other suburbs, properly belonging to New York, the entire population was about 700,000. The manufacturing capital employed in this city, annually, according to the last census, is \$105,218,308. Number of children in the Public and Ward schools in 1850, was 105,378. Dreadful accident in 9th Ward school, Nov. 20, 1851, through a false alarm of fire, when 43 children were killed, and 59 injured; there were 1,800 children in the school at the time of the accident, under the superintendence of 24 teachers!

**NEW MEXICO.** This Territory, according to the census returns, 1850, has a white population of 61,632; colored 17. Farms in cultivation 3,750; manufacturing producing annually \$500, and upwards, 20.

**NEW ORLEANS.** Population shown by the census returns, 1850, was 119,285.—*Am. Alma.* Number of deaths, same year was 7,819, of which 1,389 were by cholera. The St. Charles Hotel destroyed by fire, Mar. 18, 1851.

**NICARAGUA.** General Munoz, ex-minister of war, deposes President Pineda and his cabinet, at Leon; sends them prisoners to Tigre Islands, and elects Albaunaz president. The senate assembles at Grenada, and elects Montenegro president, Aug. 4, 1851. Steamer Prometheus arrives at New York from San Juan, the Atlantic terminus of the Nicaragua route, Aug. 12, 1851, then for the first time opened.

**NORTHWEST PASSAGE.** The Investigator and Enterprise, Sir James Ross's vessels, arrive in London, on their return from their fruitless Arctic Expedition, Nov. 11, 1849. Another expedition, under Captains Collinson and McClure, sails from Woolwich, Jan. 11, 1850. Another, under Capt. Penny and Capt. Stewart, from Peterhead, April 13, 1850. Another under Capt. Austin, 4 vessels from Greenhithe, May 4, 1850. Another, under Sir John Ross, from Lochryan, May 24, 1850.—*See Arctic Expedition.*

**OHIO.** The total population of this state in 1850, was 1,980,408; viz., white 1,956; colored 24,300. Farms in cultivation 143,887; manufacturing establishments producing annually over \$500, 10,550; houses, 336,098.—*Census Returns.* In 1850 the wheat crop of Ohio amounted to 30,000,000 bushels. April, 1851, completed 62 years since the first band of white settlers entered Ohio.

**OCEANS.** Edrisi, the Nubian, writing in the 12th century of the Atlantic, says: "There is no mariner who dares to enter into its deep waters, or if they have done so, keep along its coasts, fearful of departing from them."—*Irving's Columbus.* Lieut. Goldsborough (U. S. ship Saratoga), in Dec., 1850, found soundings in the Atlantic 128° 21' south, at 3½ miles; but Sir James Ross in 1848, in lat. 15° 3' south, long. 26° 14', run out 4,600 fathoms, or nearly 5½ miles, without finding a bottom; this appears to be the greatest depth satisfactorily obtained. In May, 1851, Lieut. Rodgers, U. S. navy, in Gulf Stream, 30 miles S.W. from Key West, sounded at 730 fathoms; but at another point at a depth of 3,000, the line was cut off, "supposed by a sword-fish."—*Tribune.* The entire surface of the sea is estimated at 150 millions of square miles, the Pacific covering 78 millions, the Atlantic 25 millions, and the Mediterranean one million. The waters of the Mediterranean and the Red Sea are exactly on a level.—*Tribune.* Mr. Stephenson (Brit. Ass., 1850), from actual experiment, found the force of the waves is 1½ ton per square foot, in the German Ocean; and nearly double that force in the waves of the Atlantic.—*Household Words.* Dr. Scoresby (Brit. Ass., 1850), stated the height of the waves of the Atlantic, from the trough to the crest, to be 43 feet, and their average velocity a fraction over 32 miles an hour; thus confirming Mr. Scott Russel's observations in 1845.

**OMNIBUSES, &c.** The number licensed to carry passengers, in New-York in the year 1851, was 586; hacks 320.—*Marshal's Returns.*

**PARLIAMENT (BRITISH).** The House of Commons first meets in the new building at Westminster, May, 1850. Baron Rothschild, a Jew, claims his seat as member elect for London, but his claim is postponed, August 5, 1850. Mr. Alderman Salomons, Jewish member for Greenwich, refused his seat in the Commons, July 18, 1851, the question still in abeyance.

**PATENTS, AMERICAN.** The number of patents granted by the office at Washington, from 1790 to 1850 inclusive, is 16,296.

**PENCILS.** Gessner first describes the "pencil of plumbago, in wooden handles," in 1565.—(*Fossils*.) Pettus (Fleta Minor) speaks decidedly of pencils "inclosed in fir or cedar," in 1683. M. Conté, of Paris, made great improvements in 1795. Mordan's "ever-pointed pencil" was patented about 1820. Philip Crabbe, the first manufacturer of lead pencils by machinery, died in his 100th year, in London, May, 1851.—*Tribune*.

**PENS, STEEL.** The largest factors are Gillott's, of Birmingham, who employ nearly 1,000 hands, for the conversion of 2½ tons of steel into 35,000 gross of pens weekly! In 1820-1 the first gross of three-slit pens was sold wholesale for £7 4s.; in 1851 a superior article could be furnished at 3s. 6d. to 5s per gross, while the commonest pens can be rendered at *twopence the gross*! Gillott's house exhibited in the Crystal Palace, 1851, a giant pen of thirty-six inches in length, and close to this was a small glazed frame containing 15,840 steel pens, the whole weighing only *one ounce*. The greatest number of these pens are sent to the United States.—*Illus. News*.

**PENNSYLVANIA.** The population exhibited by the 7th census, 1850, was 2,311,681; the banking capital, \$18,675,484 14; tax on dividends, \$153,877 14; tax on corporation stocks, \$70,008 86; ratio of tax, 12; in 1849 the ratio was 14.—*Herald*. Total revenue for year ending November 30, 1851, was \$5,645,678 74; total expenditures during the same period \$4,780,667 53.

**PHILADELPHIA, U. S. A.** By the census of 1850 this city and suburbs contains 406,353 inhabitants. Increase in ten years, 148,221, or about 57 per cent. In the city and county there are 258 public schools, with 45,383 children, under the instruction of 81 male and 646 female teachers. The total school expenditure for the year 1850 was \$332,433 21, being an average of \$6 46 each child. Manufacturing capital of this city in 1850, according to census returns, was \$33,000,000, and the annual products \$61,000,000. Duties received at custom-house, 1851, Jan. to Nov. inclusive, \$3,532,982, against \$3,213,031 in corresponding period of preceding year.—*Tribune*.

**PLANK ROADS.** The first plank road in Canada was laid down in 1836, and in New-York in 1837. Plank roads in operation, Jan. 1, 1851:

|                        | Canada.   | New-York.   |
|------------------------|-----------|-------------|
| Number of roads,       | —         | 19          |
| Number of miles,       | 442       | 2,106       |
| Average cost per mile, | \$1,750   | \$1,833     |
| Total cost,            | \$773,500 | \$3,860,292 |

Very nearly four millions of dollars have been expended in New-York upon these roads, and the resulting advantages are immense. The Troy and Lansingburg road pays 10 per cent. dividend, which is generally believed to be the case with all the others, with the exception of the Utica and Burlington, which yields 20 per cent. None of the stocks are in the market.—*Kingsford*.

**POSTAGE, Gt. BRITAIN.** The gross revenue of the Post Office for the year ending Jan. 5, 1850, was £2 213,149; the cost of management, £1,307,248; the net revenue, after deducting charges other than management, was £840,787. [An ample proof of the advantage of cheap postage.] The number of Money Orders issued was 4,248,891, the representative value, £8,152,643. The value of commission on the issue was £70,670; the amount of expenses incurred was £70,248. The total amount of the charge for packet service in the year was £748,296. The value of bank notes, checks, and money orders found in letters returned to the Dead Letter office, for the two years ending 5 Jan., 1851, amounted to £1,245,158 8s. 5d., the whole of which was regularly entered and indexed, and is returnable to the claimant, on proving his title to same.

## POPULATION, UNITED STATES OF AMERICA, viz.:

| STATES.           | 1850.<br>TOTAL POPULATION. |         | 1840.<br>POPULATION. |         | Increase per cent. since<br>1840. |

\*. The highest rates of increase in the Free States for the last 10 years were in Wisconsin, 884 per ct.; Iowa, 347 per ct.; Michigan, 86 per ct.; Illinois, 77 per ct. The highest in the Slave States were, in Arkansas, whites, 111 per ct.; Missouri, whites, 83 per ct.; Florida, 6

per ct.; Mississippi, 62 per ct. The highest increase of Slaves was in Arkansas, 135 per ct.; Mississippi, 54 per ct.; Missouri, 50 per ct. The *lowest* rate in the Free States was, in Vermont, 7 per ct.; New Hampshire, 11 per ct. The lowest in the Slave States of whites, was in South Carolina, 6 per ct.; North Carolina, 14½ per ct.

In North Carolina, South Carolina, Georgia, Alabama, and Arkansas, the Slaves have increased more than the Whites. In all the other States the proportion of Slaves has diminished, especially in Maryland, Virginia, and Kentucky.

*General ratio of increase of the whole United States.*

|                           |       |   |   |   |          |       |
|---------------------------|-------|---|---|---|----------|-------|
| From 1830 to 1840, white, | 34·72 | - | - | - | Colored, | 23·81 |
| " 1840 to 1850            | 38·20 | - | - | - | "        | 26·16 |

The centre of Representative population in 1790, was 46 miles north and 22 east of Washington, in Baltimore county, Maryland. In 1800, the centre was 64 miles north and 30 west of Washington, in Adams county, Pennsylvania. In 1820, it was 47 miles north and 71 west of Washington, in Morgan county, Virginia. In 1830, it was 43 miles north and 108 west of Washington, in Marion County, Virginia. By these calculations, the accuracy of which we see no reason to question, the representative power, in its rapid and accelerated movement westward, has for fifty years kept nearly the same parallel of latitude. In that time it has moved 10 miles south, and 182 miles westward. The advance westward was as follows:

|                   |   |   |           |                   |   |   |           |
|-------------------|---|---|-----------|-------------------|---|---|-----------|
| From 1790 to 1800 | - | - | 13 miles. | From 1820 to 1830 | - | - | 37 miles. |
| " 1800 to 1810    | - | - | 39 "      | " 1830 to 1840    | - | - | 52 "      |
| " 1810 to 1820    | - | - | 41 "      |                   |   |   |           |

The calculation is that the census of 1850 will show the centre of representative population in the State of Ohio.

PHYSICIANS were formerly ecclesiastics. It was during the nunciate of Cardinal d'Etouteville in France, in 1452, that he obtained permission for them to marry.—*Menage*. Sir William de Butts, physician to Henry VIII., and mentioned as such by Shakspeare, was paternal ancestor of Mrs. Sherwood, the popular authoress, who died in Sept., 1851.

POET-LAUREATE (England). Alfred Tennyson appointed Nov., 1850.

POST OFFICE, U. S. A. Year ending June 30, 1849; length of mail routes 167,703 miles; amount of annual transportation, in miles, 42,544.069; gross revenue \$4,905,176; net revenue \$426,127. In 1850, the length of mail routes was 178,672 miles; revenue \$5,552,971; expenditures \$5,212,953; of which amount the transportation charges were \$2,965,786.

|                                                                 |   |   |   |   |                |
|-----------------------------------------------------------------|---|---|---|---|----------------|
| The actual receipts during the year ending June 30, 1851, were, | - | - | - | - | \$6,786,493 22 |
| Less amount received for Brit. Postages,                        | - | - | - | - | 58,626 44      |

Gross Revenue for the year, - - - - - \$6,727,866 78

Being an increase of \$999,006 41 over the proper revenues of the preceding year. The ordinary expenditure of the department, year ending June 30, 1851, was \$6,024,566 79. Number of post offices in 36 states, and District Columbia in 1837, was 19,604.—*P. Mas. Gen. Report*.

POST OFFICE, NEW YORK. For the quarter ending Sept. 30, 1851, there were received by steamers and packet ships 577,885 letters and 261,426 papers; despatched by mail per steamer and ship, during same period, papers 305,448; letters 584,038; which latter, added to the daily average correspondence, shows the receipt and transmission of nearly 7 millions of letters by the New York office, in three months. During same quarter, 5,100 official letters were received, and 3,018 written and despatched. In addition to all this, 637 Dead Letters were sent to the proper office at Washington, containing property of value, gold dust, bank bills, drafts, &c., in amounts varying from \$1 to \$10,000, a large portion of which were returned to the writers, and the balance remain subject to the order of the proper owners. Increase of business under the new law is 10 per cent., and about 75 per cent. of all letters are prepaid. Number of stamps sold to Sept. 30. was 1,475,555.

PROTESTANTISM IN U. S. In the year 1800, the Episcopal Church, the oldest in the Union, numbered 320 churches; 260 ministers; 16,000 members; and 7 bishops. In 1850 it had increased fourfold, viz.: churches, 1,560; ministers, 1,504; members, 73,000; bishops, 28. The congregation lists in 1850, comprised 1,971 churches; 1,687 ministers; and 197,175 members. The Baptists enumerated 13,455 churches; 9,018 ministers; and 948,867 members. Pres-

byterians 4 General Assemblies; 65 Synods; 360 Presbyteries; 4,578 ministers; 1,014 students and licentiates; 5,672 churches; and 490,259 members, being an increase of eleven-fold since 1800. The various bodies of Methodists speaking the English language, had, in 1850, 30,000 places of worship; 6,000 regular preachers; 8,000 local preachers; and more than a million and a quarter of members. The Methodist Protestant churches of German origin, have 1,827 regular and 559 local preachers; 5,356 congregations; and 333,000 members. The orthodox Friends had 300 congregations. More than 10,000 places of worship were erected in 1849, and \$1,670,150 were paid in voluntary subscriptions to ministers.—*Dr. Baird before Lon. Evan. Soc.* To these may be appended the following, viz. :—

**PRUSSIA.** New edict against the press enforced; 37 journals forbidden to pass through the post, June 5, 1850. The treaty of Olmutz announced at Berlin, Dec. 3, 1850. May 31, 1851, Inauguration of Rauch's Colossal Equestrian statue of Frederick the Great, Berlin. In Oct., 1851, the question of the admission of Jews to judicial office, brought to a partial termination by their permission to study law.—*Illus. News.*

**PYRAMIDS.** M. Persigny, in his "Destination," &c., "des Pyramides," lately published in France, appears to have made the nearest approach to the original design of these structures, viz., that they were intended as a barrier to arrest the progress of the sands from the desert, and thus to preserve the cultivated fields of Egypt from destruction. The great Pyramid at Ghizeh it is stated was first opened by the Caliph Al Mamoun, in the expectation of discovering treasure; when the people murmured at their disappointment, he ordered a sum of money to be secretly deposited, which, on its discovery by the laborers, is said to have satisfied their cupidity.

**RAILWAYS IN THE UNITED STATES OF AMERICA, Jan. 1850.**

\* The estimate on page 154\* was erroneous.

Railroad Jubilee at Burlington, Vt., celebrating the union by railroad of the waters of the lakes and the Atlantic, June 25, 1850. N. Y. & Erie R. Road opened with appropriate ceremonies, through the entire line, May 14, 1851. The Hudson River R. Road Co., organized March, 1847, road completed, Oct., 1851, at a cost of \$6,666,681.

**RAILWAYS, SOUTH AMERICA.** The first Railway in PERU, from Callao to Lima, six miles, was opened Nov., 1850.

**RAILWAYS, GREAT BRITAIN.** During the year 1849, about 870 miles of new railways were opened in the United Kingdom, viz.: 630 miles in England, 108 in Scotland, and 132 in Ireland. The following table gives the progress of railways since 1844, with the average receipts per mile per week:

| Years. | Miles open. | Per mile per week. | Years. | Miles open. | Per mile per week. |
|--------|-------------|--------------------|--------|-------------|--------------------|
| 1844   | 1,770       | £64                | 1848   | 4,178       | £50                |
| 1845   | 2,033       | £67                | 1849   | 4,983       | £46                |
| 1846   | 2,498       | £64                | 1850   | 6,075       | £44                |
| 1847   | 3,375       | £56                |        |             |                    |

The number of rail-road passengers in England and Wales in 1846, was 35,000,000; in 1850, 53,000,000; total United Kingdom in 1850, 66,000,000.—*Herald*. The great Russian rail-road, from Moscow to St. Petersburg, was opened Nov 13, 1851, the distance 420 miles, being run through in 18 hours, 23½ miles per hour.—*London Paper*.

**RELIGIOUS denominations in the United States, according to returns made 1844—51, and by estimate.**

REVENUE AND EXPENDITURE (Great Britain), year ending Jan. 5, 1850.  
Revenue, £52,951,748. Expenditure, £50,853,622.

RICE. First planted in South Carolina, 1693, and has been grown in that state every year since that period.

RIOTS. At Philadelphia, between a set of white "rowdies," called "killers," and negroes. Military called out; 4 persons killed; 11 wounded; 4 houses burned, Oct. 10, 1849. Riot at Hoboken. N. J., between Germans and "short boy" rowdies from N. York, May 26, 1851. Riot at New Orleans in reference to Cuban affairs—the Spanish Consul's house attacked, and also those of the Spanish residents, Aug. 21, 1851. Christiana Treason trial, at Philadelphia, Nov., 1851; Hanneaway and others acquitted Dec. 11, but the murderers of Mr. Gorsuch sent to Lancaster for trial.

ROMAN CATHOLICS. The appointment by the pope of several R. C. bishops and archbishops in England, causes great excitement in that country, and an indignant letter from Lord John Russell, the premier, Nov., 1850. A statistical account from the Vicar General's office at Rome, in April, 1851, shows the ecclesiastical body of that city to consist of 34 bishops, 1,240 secular and 1,892 regular priests, and 1,467 monks. The schools and seminaries under their supervision were 321.—See *Eccl. States*.

ROME. The Council of State at Rome announces a political amnesty, excepting from it, however, the late Triumvirate, the chiefs of the assembly, and the military leaders, and about 13,000 persons supposed to be implicated in the late movements, Sept. 18, 1849. The pope returns to Rome, April 19, 1850. The total population of Rome in April, 1851, was 170,824.—*Vicar Gen'l's Office*. In 1848 the population numbered 179,000, and a proportional diminution is shown in the returns of the other Roman States.—*Herald*. In Oct. 1851, a mixed commission of cardinals, prelates, merchants, &c., and simple workmen, was formed by the Pope, for the examination and amendment, where susceptible, of all corporate laws.—*Illus. News*.

RUSSIA. The Russian troops repeatedly defeated by the Circassians, June 1851.

RUSSIAN ARMY, 1851. Infantry, 640,384; cavalry, 101,902; artillery, 41,902; adding to the above the engineer staff, the entire force amounts to 810,000

effective troops. Other accounts, however, place the actual number of military fit for service no higher than 300,000 men, and of these a quarter must be kept in Poland.—*Triester Zeitung*.

**SAN FRANCISCO, Commerce of.** The amount of duties collected at San Francisco, in the quarter ending Sept. 30, 1851, as compared with the corresponding quarter of the year 1850.

|                  | 1850.              | 1851.              |

10,368

**SCHOOLS**, originally kept in the porches of churches. Even so late as 1624, John Evelyn, then four years old, was taught by "one Frier at the church-porch of Wotton."—*E's Diary*. The *ragged* schools, for the instruction of destitute children in England, originated with John Pounds, a poor cripple and shoemaker at Portsmouth, who, while laboring for his daily sustenance, found time to instruct the vagabond children of his neighborhood. He died, "deplored by all his scholars and their relatives, Jan., 1839." Infant schools originated about 1780, with Oberlin, pastor of Waldbach (Germ.); and in England were first put in operation in 1815, by James Buchanan, one of the masters engaged by Robert Owen at Lanark. Wilderspin's plans were subsequent to the above.—*West. Review*. Sabbath schools were partially in operation previous to the great effort of Mr. Raikes, through the instrumentality of Miss Walker, a Quaker lady of Tottenham, near London, and the Rev. Mr. Lindsay and wife, of Catterick, Yorkshire.—*Nor. of Scot. Gaz.* The first S. school in the United States is said to have been established by Mrs. Archibald Lake, in the stockade in Marietta, Ohio, March, 1791.

**SEWING MACHINES.** Invented 1848, and brought to general use by the large tailoring establishments. A machine, with the attention of one girl, will sew six overcoats per day.—*Sci. Am.*

**SHANGHAI.** The population trading with this Chinese port is between 60,000,000 and 80,000,000. The teas grown here are the finest in the world, and its supplies to foreign countries are about seven-eighths of the whole product exported from the empire. The amount sent forward from China in 1850, is given officially as follows: To Russia, 7,000,000 lbs.; France, 2,000,000 lbs.; Holland, 3,000,000 lbs.; Great Britain, 52,000,000 lbs.; and the U. States, 30,000,000 lbs.; the total valuation of which shipments cannot fall far short of \$30,000,000. The rich silk fabrics of Suchan are brought to Shanghai, as well as numerous other articles of valuable traffic, all of which may be more readily purchased here than at Canton, which port receives its principal export supplies from the former. The importance of Shanghai as a port of entrance for the American merchant offers incalculable advantages.—See *N. Y. Courier*.

**SHIPPING, U. S. A.** Vessels built and tonnage thereof in the U. S.: year ending June 30, 1849. Ships, 198; brigs, 148; schooners, 623; sloops and canal boats, 370; steamers, 206. Total, 1,547. Aggregate tonnage, 3,535,000. Iron cylinder masts first fitted in a Dutch E. Indiaman at Liverpool, March, 1851. Amount of tonnage of American vessels engaged in foreign trade, for year ending 30th June, 1850, was entered 2,573,016; cleared, 2,632,788. Foreign tonnage during same period entered, 1,775,623; cleared, 1,728,214. Number of vessels built in 1850 was 1,360. their total tonnage 272,218 54-95. In 1851 the total U. S. tonnage was 3,772,439, including the whaling vessels, 181,644; vessels built, 1,367. Massachusetts total tonnage engaged in foreign and domestic trade, 694,402; New-York, 1,041,013; Oregon (smallest), 1,063.—*M. Courier*. The clipper ship "Flying Cloud," Capt. Cressy, left New-York June 2, 1851, and arrived at San Francisco, August 20, making the trip round Cape Horn in the unprecedented short space of 90 days; the shortest passage on record. In three days the F. C. made 992 miles.

**SLAVE-TRADE.** Official returns made to the foreign office in London show that from the year 1840 to the year 1848, inclusive, 594 vessels, containing 37,824 slaves, were captured by the British squadron, and 556 of them condemned. It has been estimated by the English statician McQueen, that the loss sustained by slave-traders in consequence of the captures or presence of African cruisers, from the year 1800 to 1847, was £30,240,000.

**SLAVERY, U. S. A.** Renewed agitation of this subject caused by the passage and enforcement of the "Fugitive Slave Bill" (passed by Congress in Aug., 1850). In several instances, the claims for fugitive slaves are resisted or defeated in the Northern States, but without serious collision or bloodshed; Sept., Dec., 1850. By decision of Judge Hoadly, Superior Court, Cin., in Oct., 1851, this law was pronounced as "opposed to the spirit and letter of the Constitution of the U. S." The *Boston Post* of Dec., 1850, states that the original Fugitive Slave Law was drafted by Geo. Cabot, of Mass., Nov. 1792, and passed unanimously by the Senate on the 18th of Jan'y following, by a majority of 41. A Papal Bull of Dec., 1839, prohibits all traffic in human beings by subjects of Roman Catholic States.—*Wade's Brit. Hist.*

**SPAIN.** Queen Isabella personally opens the Cortes in the new palace, in the Plaza de Cervantes, Oct. 31, 1850. At Madrid, Nov., 1851, the commissioners for regulating the liberty of the press refuse to assent to the ministerial proposition of seizing newspapers before publication.

**STAGES.** In 1749 there was a daily stage route between Newark, N. J., and New-York, during the summer months only. The number of passengers in one season was considered large at 3,000; the number of passengers over the railroad to the same place was, in 1850, 959,000!

**STEAM ENGINE.** A patent was granted in England in 1618, for a steam—or as it is there designated, a "fire-engine, for taking ballast out of rivers and for raising fresh water." It is supposed to have been an invention brought from Italy, where it is stated to have been anteriorly used. Brancas, an Italian philosopher, published at Rome, in 1629, a book on the subject.—*Wade's Brit. Hist.* A complete steam-engine, weighing only three fourths of an ounce, and capable of full motion, was finished and intended for exhibition at the Crystal Palace by an ingenious mechanic of Saddleworth, Yorkshire, in Feb., 1851.—*Illus. News*. The tubular boiler was invented by Col. John Stevens, Hoboken, N. J., 1805.

**STEAM NAVIGATION, U. S. A.** The steamer Atlantic, 3,500 tons, the first of the Collins' line, sailed for Liverpool, from New York, April 27, 1850. Steam communication between Philadelphia and Liverpool opened by the "City of Glasgow," arrived at Philadelphia, Jan. 1, 1851. The first steamer

that ever crossed the Atlantic was the "Savannah," 350 tons, from Savannah, Geo., to Liverpool, which port she reached 20th July, 1819.—*Marwade's Com. Report.* The first steamboat that ascended the Mississippi was commanded by Capt. Henry M. Shreeve, who subsequently invented the steam snag-boat; he died in 1851. The number of steamboats on the Western waters in 1850 was estimated at 575, investing a capital of \$60,000,000, and employing 15,000 hands. The annual cost to the U. S. government of the Steam Mail Service in 1850. was distributed as follows:—Collins' line, New York and Liverpool, \$385,000; Ocean Steam Navigation Company, New York and Bremen, \$200,000; do., do., do., New York and Havre, \$150,000; New York, Havana and New Orleans, \$290,000; Panama and Oregon line, \$199,000; Charleston and Havana line, \$50,000.—Total, \$1,274,000. The first steamer on Lake Nicaragua began its trips January, 1851. Duty paid by Cunard steamers at Boston, in 1847, was \$1,199,971 78; in 1850, \$1,322,383 30. Marine Steam Force of Great Britain in 1851 was—147 ships, including 3 in Canada, and 32 iron steamers, 11 ranging from 1,547 to 1,980 tons. A discovery in 1851 of a work in the archives of Venice, of a treatise on "Navigation by Fire," by M. Gantier, Mem. Roy. Soc. Paris, shows that the professor's plans for steam navigation were exhibited by him to the Venetian Republic in 1756.

**STEAMBOAT BUILDING.** The annual report on commerce and navigation, gives the following aggregate of the number of steamboats built in the United States since 1824—twenty-five years, in periods of five years each:

|                    |           |                    |           |
|--------------------|-----------|--------------------|-----------|
| From 1824 to 1829, | - - - 194 | From 1844 to 1849, | - - - 960 |
| " 1829 to 1834,    | - - - 304 |                    |           |
| " 1834 to 1839,    | - - - 504 | Total,             | - 2,492   |
| " 1839 to 1844,    | - - - 522 |                    |           |

Two-thirds of these were built in the West, one-sixth of them in Ohio.

**STEAM AND POWDER EXPLOSIONS.** The most fatal accident of this nature in 1849 was that of the steamboat Louisa, at N. O., Nov. 15, when 60 persons were killed and 92 wounded and missing. During 1850 the number of steamboats lost in the Western waters was 53, and 64 seriously injured. Nearly 700 persons lost their lives, and \$1,500,000 of property was destroyed. Some of the most prominent accidents by explosion in 1850 and 1851, were:—

| March 15,    | Victoria Coalpit,                                                                                           | Scotland,             | 61          |
| " 27,        | Cotton mill,                                                                                                | Stockport, Eng.,      | 14          |
| August 2,    | Disillery,                                                                                                  | Harrison, Ohio,       | 15          |
| September 8, | Balloon, 1 mile high, exploded near London; the 4 passengers providentially escaped without serious injury. |                       |             |
| " 21,        | Steamer Jackson (35 injured),                                                                               | Shawneetown, Ill.,    | 7           |
| " 25,        | — Brilliant,                                                                                                | Bayou Sara, La.,      | many.       |

**SUGAR.** A hundred years ago the Jesuits brought a few bundles of cane from Hispaniola, and planted them in the second municipality of New Orleans.

In 1759 the first sugar-mill was erected. In 1840 the number of slaves employed in the sugar culture was 148,890, and the product was 119,947 hogsheads, of 1,000 pounds each, and 600,000 gallons of molasses.—*Mobile Register*.

TEA. Quantity imported into Great Britain in 1849, 53,460,751 lbs. The duty upon it amounted to £5,471,671. This is an increase of nearly 50 per cent. over the imports of 1840.

TELEGRAPH, THE SNAIL. The actuality of telegraphic communication by medium of magnetism in snails, experimentally demonstrated by Prof. Gregory of Edinburgh, May, 1851.

TELEGRAPH—see "*Electric*."

TEMPERANCE SOCIETIES. The benevolent influence of these associations may be estimated from the fact that the amount of taxation in the state of New York, in 1850, occasioned by pauperism and crime resulting from intemperance, was nearly \$2,600,000, and the amount for the entire Union during that period, and resulting from the evils of intemperance, was over \$16,000,000. The daily expenditure in the 5,000 drinking places in New York is calculated at over \$40,000.—*Mr. Foster's Speech at Tripler Hall*, March, 1851.—Father Matthew, the "Apostle of Temperance," after visiting numerous states in the Union during two years, and administering over 600,000 pledges, sailed for Liverpool in steamer Pacific, Nov. 8, 1851.

TEXAS. The question of the boundary line between Texas and New Mexico, after much excitement and discussion, is settled by the payment of \$10,000,000 by the U. S. to Texas, as indemnity for the territory claimed by New Mexico, Sept., 1850. Population in 1850, 188,403, including 53,346 slaves.

TIDES. The highest known are in the Bay of Fundy, Newfoundland, and the Bay of Tonquin, Cochin China.—*Q. Rev.*, 1819. That of the former rises 60 feet; the tide at Chepstow (Monmouth, Eng.) rises 70 feet.—*Illus. News*. That of Baffin's Bay only 4 feet.—*Capt. Ross*, 1819. Seeds dropped accidentally into the sea in the W. Indies, were subsequently found on the shores of the Hebrides.—*Dr. Walker to Lord Kames*.—See *Oceans*.

TIGRE (Island of), Central America, seized by Mr. Chatfield, British Consul, with an armed force, for the "British Queen," Oct. 17, 1849; but the claim was not enforced, and was settled in the "Nicaragua Treaty," signed at Washington, by Clayton and Bulwer, June, 1850.

TURKEY. Battle between the Turks and Syrians, who had revolted against the Turkish recruiting system—Syrians defeated with loss of 1,000 men, 1850. Explosion on board the Neiri Schevket, line of battle ship, at Constantinople, 1,000 persons killed, Oct. 23, 1850.

UNION MEETINGS. Gov. Quitman of Miss., addresses a *disunion meeting* with some opposition, at Natchez, Oct 7, 1850. A similar meeting in Yazoo city votes down the resolutions proposed. A convention for amending the constitution of Indiana, assembles at Indianapolis, Oct. 7. A great union meeting at Mobile, Ala., Oct. 8. Convention for amending constitution assembles at Richmond, Va., Oct. 14. A union festival in compliment to Mr. Clay, at Lexington, Ky., Oct. 17. A Woman's Rights convention held in Worcester, Mass., Oct. 23. A great union meeting at Dayton, Ohio, Oct. 26, and an immense meeting for like purpose in New York, Oct. 30. Convention to amend constitution of Maryland, meets in Annapolis, Nov. 4; another at Concord, N. H., for revising constitution of that state, Nov. 6; and one at Manchester, N. H., Nov. 20. A great union meeting at Philadelphia, Nov. 21. One at Bath, Me., Dec. 16. Convention of Delegates from Southern

Rights Association, of S. Carolina, at Charleston, May 8; adjourns after resolving "that with or without co-operation they are for dissolution of the Union!"

UTAH TERRITORY OF U. S. A territorial government provided by Congress, Sept. 9, 1850. The territory is bounded on the west by California, north by Oregon, east by the summit of the Rocky Mountains, and south by the parallel of 37° N. The act provides the sum of \$5,000 for a library.

VENEZUELA. Gen. J. G. Monagas elected president for four years, Jan. 20, 1851.

VIRGINIA. According to the census returns, the real estate, &c., of Virginia, 1850, was \$530,000,000, viz. :—Real estate, \$278,000,000; value of slaves, \$147,000,000; other personal estate, \$105,000,000. The returns further show that nearly 83,000 white persons over the age of 21, can neither read nor write! The new Constitution of this state adopted 1851, in the 111th article has the following clause: "And no person shall have a right to vote who is of unsound mind, or a pauper, or a non-commissioned officer in the service of the United States." Population of 1850, 1,421,081, including 473,026 slaves.

WAMPUM. This material as a representative circulating medium, was borrowed by the people of Plymouth, Mass., from the Manhattan Dutch, and was found very profitable in their traffic with the eastern Indians, and subsequently among the colonists generally. Three of the blackbeads and six of the white, were considered as equivalent to a penny; and for convenience' sake, they were strung in lengths of certain value from one penny to 5 shillings, in white; and from twopence to ten shillings in black; as the quantity in circulation increased, the value depreciated and the number of beads to the penny was augmented.—*See Hildreth's U. S. America*, 1850.

WARS, MODERN. Those of the 17th century, were wars of religion; of the 18th century, of conquests and dynasties; of the 19th, of monarchs against the people.—*Berlin Corres. N. Y. Com.* The actual cost of the late Mexican war is estimated at \$300,000,000. The wars of Europe from 1783 to 1815, are estimated at \$15,000,000,000. The late Hungarian war left 25,000 widows, and 80,000 orphans of soldiers, almost entirely without food, shelter, or clothing.

WASHINGTON, D. C. Population in 1810, 8,201, in 1820, 13,248, in 1830, 18,827, in 1840, 23,364, in 1850, about 42,000.

WASHINGTON'S FAREWELL ADDRESS. The original MS. was sold at auction in Philadelphia, to a citizen of New York, for \$2,300, February 12, 1850.

WESTMINSTER, ARCHBP. OF. Nicholas Wiseman, having been created Cardinal by the Pope, is installed as Roman Catholic Archbishop of Westminster, Nov., 1850. This, in addition to Dr. Ullathorne's enthronement as R. C. bishop of Birmingham, in Oct., together with the parcelling out of all England into Roman dioceses, created great excitement, and petitions from every quarter of the United Kingdom were addressed to the Queen and government, praying their resistance to the "monstrous usurpation."

WHALE FISHERY. Registered tonnage employed in this branch of commerce, 1850, was 146,016. Fish and sperm oil exported during the year ending June 30, 1850, \$1,809,115. The average yield of a polar whale is about 120 barrels oil.

WILLIAM THE CONQUEROR. Inauguration of the statue of this renowned monarch at Falaise, Normandy, his native place, Oct. 26, 1851.

WISCONSIN. The population of this State is shown by the census returns,

1850, to be: white, 304,565; colored, 626; total, 305,191. Farms in cultivation, 20,177; manufactories producing annually \$500, and upwards, 1,273.

**WOOL.** The imports of wool into the U. S. for fiscal year 1850, amounted to \$1,681,691; and for same period 1851, \$3,833,160.—*Courier*.

**WORSHIP, FORMS OF.** The Jews and Quakers wear their hats during worship, Protestants and Catholics remove them.—The Mohammedans wear their turbans, but put off their shoes on entering their mosques, evidently from their Prophet's adoption of many of the Jewish customs.—*See Exodus iii. 5.* It is particularly worthy of remark that the Mohammedans invariably remove from their persons all jewelry, and articles of adornment previous to the commencement of their prayers.

**WRECKS, &c.** The number of vessels belonging to the U. S. lost during the year ending June, 1848, was 585; value, \$2,021,495; value of cargoes, \$2,501,771; total number of lives lost in connection with them, 477. The Caleb Grimshaw. Liverpool and N. Y. packet ship, burnt at sea; 60 passengers lost on a raft; 339 rescued by Capt. David Cook of Nova Scotia, Nov. 12, 1849.

Minot's Ledge lighthouse carried away, April 17, '51, and the two assistant keepers drowned. Steamship Union lost on her passage from San Francisco to Panama, July 5, '51; passengers and gold dust saved.

**YACHTING.** The Yacht America, built by Steers of New-York, 204 tons bur., after winning the "cup of all nations" at Cowes, I. of Wight, England, and out-sailing the British yacht Britannia, Aug., 1851, was sold by Messrs Stevens to Capt. Blaquiere for £5,000!

**YANKEE.** The derivation of this word is generally accredited to the Indian pronunciation of the word English, which they render *Yengeese*.—In New-York it is applied to the New Englanders; in the South to all the Northerners; and in Europe to all Anglo-Americans.—In a curious book on the Round Towers of Ireland, published some years ago, the origin of the term Yankee-Doodle was said to have been traced to the Persian phrase *Yanki downiah*, or "Inhabitants of the New World." Layard, in his "Nineveh," also mentions *Yanghi-dunia* as the Persian name of America.—*Illus. News*.

**YUCATAN.** Intelligence received at New Orleans, Jan. 3, 1851, that a battle between the whites and Indians in Yucatan resulted in the victory of the latter, 300 of the whites being killed.

**ZINC.** The *Soc. Indust. Nationale* in Paris, granted to M. Leclair, 1846, a medal of gold worth 3000 francs, for his substitution of zinc for white lead in the formation of painter's color, the use of which latter has been attended with so much danger to health.—*Art Journal*. White paint prepared from zinc is much used of late in the U. States, and has hitherto been greatly approved.

## PAINTING.

**PAINTING.** Chronological Table of the most celebrated Painters, arranged in Schools and Ages, from the revival of the art, 1600, to the commencement of the Nineteenth Century.

(From Bell's Edition of Bredow's Tables of Universal History.)

1. **FLORENTINE SCHOOL.**—Style elevated and bold, seeking rather to be admired than to please; sometimes gigantic; neglects coloring and grace.—1240, Cimabue; 1236, Giotto; 1211, Andrea Taffi; 1400, Massolino; 1402, Massacio; 1431, Filippo Lippi; 1432, Andrea Verrochio, Andrea Castagna, Pisanello; 1443, Ghirlandajo; 1445, LEONARDO DA VINCI; 1469, Bartolommeo di San Marco; 1471, Baldassarre Peruzzi; 1474, Michael Angelo Buonarroti; 1484, Dominico Beccafumi; 1488, Andrea del Sarto; 1493, Jacopo Carrucci da Pontorno; 1496, Del Rosso; 1500, Perino del Vaga; 1509, Daniel da Volterra; 1510, Francesco Salviati; 1510, Giorgio Vasari; 1545, Antonio Tempesta; 1559, Luigi Cardi; 1563, Francesco Vanni; 1578, Matteo Rosselli; 1596, Pietro Berretini, called Pietro da Cortona; 1611, Pietro Testa; 1615, Benvenuto da Garofoli; 1616, Carlo Dolce; 1666, Benedetto Lutti; 1695, Giovan' Geronimo Servandoni; 1702, Pompeo Battoni.

2. **ROMAN SCHOOL.** carries invention and design to the highest perfection by the analytical study of the antique and of nature; heads of the most sublime beauty; coloring and chiaro oscuro less perfect. 1513, Bernardino Pinturichio; 1446, Pietro Perrugino; 1483, Raffael; 1488, G. F. Penni; 1492, Giulio Romano; 1528, Frederico Barocci; 1529, Taddeo Zuccherro; 1543, Frederico Zuccherro; 1589, Dominico Petti; 1594, Nicholas Poussin; 1598, Giovan' Lorenzo Bernini; 1599, Andrea Sacchi; 1600, Claude Gelée, called Claude of Lorraine; 1602, Ceriozzi; 1605, G. B. Salvi, called Il Sassoferatto; 1613, Gaspard Dughet, called Poussin or Guaspere; 1616, Luigi Scaramuccia; 1617, Francesco Romanelli; 1623, Giacinto Brandi; 1623, Filippo Lauri; 1625, Carlo Maratti; 1634, Ciro Ferri; 1694, Pietro Bianchi; 1728, Raffael Mengs.

3. **VENETIAN SCHOOL.**—Faithful imitation of well-chosen subjects of nature, excellent coloring, admirable effect; design less perfect through the neglected study of the antique; this school is now extinct. 1421, Gentile Bellini; 1431, Andrea Mantegna; 1478, Giorgione; 1477, TIZIAN (Tiziano Vecelli da Cadore); 1480, G. A. Regillo; 1485, Sebastiano del Piombo; 1510, Jacopo da Ponte; 1512, J. Robusti, called Il Tintoretto; 1522, Paolo Farinati; 1522, Andrea Schiavone; 1528, Geronimo Muziano; 1532, Paolo Cagliari; 1535, Giuseppe Porta; 1539, Dario Varotari; 1540, Felice Riccio; 1540, Jacopo Palma (Il Vecchio); 1544, Jac Palma; 1549, Giov. Contarino; 1560, Maria Tintoretto; 1561, Leonardo Corona; 1586, Tiberio Tinelli; 1590, Aless. Varotari; 1600, Aless. Turchi; 1635, Giov. B. Langetti; 1642, Andrea Pozzo; 1656, Franc. Trevisani; 1659, Sebast. Ricci; 1666, Ant. Balestra; 1672, Rosa Albi Carriera; 1675, Giov. Ant. Pellegrini; 1682, G. B. Piazzetta; 1687, Ant. Canale; 1693, Giov. Bat. Tiepolo; 1699, Giuseppe Nogari.

4. **LOMBARD AND BOLOGNESE SCHOOLS.**—Correggio, born in Lombardy, not having founded a permanent School, but having been imitated by the painters of Bologna, these two Schools are conjoined. Correggio's distinguished characteristics are a seducing and voluptuous (though perhaps somewhat affected) grace in his figures and attitudes, and a magic harmony in his coloring. Tibaldi and the Caracci introduce a more elevated character of design, and many of their pupils unite therewith the fine coloring and the graces of Correggio. 1450, Francesco Franco; 1490, F. Primaticcio; 1494, CORREGGIO Antonio Allegri; 1495, Polidori Caldari; 1504, Fr. Mazzuoli; 1522, Pellegrino Tibaldi; 1546, Camillo Procaccini; 1559, M. Angelo Amerigi, called Carravaggio; 1555, Lodov. Caracci; 1557, Agostino Caracci; 1560, Anniba'e Caracci; 1560, Bartol. Schidone; 1575, Guido Reni, called Guido; 1576, Lionello Spada; 1577, Aless. Tiarini; 1578, Francesco Albano; 1580, Giacomo Cavedone; 1581, Dom. Zampieri, called Domenichino; 1581, Giov. Lanfranco; 1588, Frances Gessi; 1590, G. F. Barbieri; 1597, Lodov. Lana; 1600, Mic. Ang. Colonna; 1606, Grima'di; 1618, Giorg. And. Sivani; 1612, Simone Cantarini; 1624, P. Fran. Mola; 1628, Cignani; 1638, P. F. Caroli; 1643, Lodov. Quaini; 1648, Ant. Franceschini; 1654, Guis. del Sole; 1657, Fer. Gali Babiena; 1665, Guis. Maria Crespi; 1668, Dom. Maria Viani; 1671, Donato Creti; 1674, Giov. P. Zanotti; 1691, G. P. Panini.

(**NEAPOLITANS, GENOISE, SPANIARDS.** These nations are not regarded as having founded general Schools; their painters are formed on the masters of the great Italian Schools. Neapolitan.—The painters of this nation are reproached with being in general somewhat affected. Pietro and Tommaso Stefani, d. 1310; Fil del Tesoro, 1320; 1500, And. Sabbatani; 1560, Guis. Cesare d'Arpino; 1630, Aniello Falcone; 1603, Mario Nuzzi; 1613, Matteo Petri; 1615, Salvatore Rosa; 1631; Luca Giordano; 1657, Fran. Solimene; 1661, Nunzio Ferajoli; 1679, Sebast. Conca; 1693, Carl Corrado. Genoese are often incorrect in design.—1430, Nich. da Vottri; 1527, Cambiasi; 1544, G. B. Paggi; 1557, Bern. Castelli; 1581, Bernardo Strozzi; 1590, Gio. Carlone; 1616, Benedetto Castiglione; 1625, F. M. Borzoni; 1639, G. B. Gaudi; 1644, Greg. Ferrari; 1654, Bart. Guidoboni; 1660, Il Molinarotto. Spaniards.—These painters have especially imitated the Venetian School, and often display its brilliant coloring.—1400, Alonso Berragente; 1487, Blaise de Prado; 1519, Mo-

rales; 1528, Luis de Vargas; 1532, J. F. Ximenez de Navarete; 1550, Pablo de las Rovlas; 1589, Josef Ribera; 1599, Don Diego Velasquez de Silva; 1601, Alonso Cano; 1610, Henrique de las Marinas; 1613, Bartolomé Esteban de Murillo; 1617, Franc. Rizzi; 1631, Matias de Torres; 1640, Pedro de Nunez; 1640, Juan de Alfaro; 1651, Juan C. Falco; 1663, P. Pietri.)

5. **GERMAN SCHOOL.**—This school having never had a common point of union, bears no general and distinctive character; it produces, in the different styles of painting, rival artists to the great masters of Italy and of the Netherlands. 1297, Th. de Matina; 1357, Theo. de Prague; 1357, N. Wurmser; 1479, Albert Durer; 1492, Lucas Müller; 1498, Hans Holbein; 1515, Lucas Cranach; 1534, Tobias Stimmer; 1550, Christ. Schwartz; 1556, John Van Aachen; 1564, J. Rottenhammer; 1570, J. Lys; 1574, Adam Elzheimer; 1598, Sam. Hofmann; 1600, J. W. Bauer; 1606, Jo. Sandrart; 1611, Ch. Loth; 1616, Govaert Flink; 1618, P. Van der Faes; 1619, J. Spilberg; 1621, Leb. Stopkopt; 1625, J. Lingelback; 1631, J. Hen Roos; 1637, Jos. Warner; 1639, Gasp. Netscher; 1640, Ab. Mignon; 1647, M. S. Mérian; 1648, Godfrey Kneller; 1666, G. P. Ruggendas; 1668, J. R. Huber; 1669, Anna Wnser; 1685, Balthasar Denner; 1689, Fr. P. Ferg; 1698, J. E. Riedinger; 1709, Brinkmann; 1712, C. W. E. Dietrich; 1728, Raffael Mengs; 1730, Solomon Gessner.

6. **FLEMISH OR BELGIC SCHOOL.**—This School excels in coloring and in the faithful imitation of nature, but does not always exhibit sufficient nobleness of design; it produces eminent artists in every style; that to which Teniers has affixed his name had its birth in this School; the Academy at Antwerp, the cradle of this School, was founded in 1510, but there was a Society of Painters at Antwerp from the year 1442.—1306, Eubert Van Eyk; 1370, John Van Eyk; 1450, Quentin Messis; 1490, Ber. V. Orley; 1499, J. de Mabuse; 1553, Peter Knock; 1520, Frank Floris; 1534, Mar de Vos; 1536, J. Straden; 1540, F. Porbus; 1546, B. Spranger; 1548, C. Van Mander; 1550, H. Steenwyck; 1555, Denys Calvart; 1556, Otto Venus; 1569, P. Van Breughel; 1570, P. Neefs; 1573, S. Frank; 1576, Fr. Sneyders; 1577, Peter Paul Rubens; 1580, David Teniers; 1594, James Jordaens; 1599, Anthony Van Dyk; 1602, Phillip de Champagne; 1610, David Teniers; 1613, J. Van Artois; 1618, Gonzales Coques; 1634, Van der Meulen; 1640, Simon Varelst; 1668, G. F. Vanbruggen; 1672, Ab. Breughel; 1742, Henry de Coort.

7. **DUTCH SCHOOL.**—This School is especially distinguished by an eminent intelligence of the *chiaro oscuro*; exhibits good coloring, and a faithful imitation of nature in the minutest details. The style of precious finishing is carried to the highest pitch in this School. 1467, Erasmus; 1494, Luke of Leyden; 1498, Martin Hemskerck; 1518, An. Moro; 1564, Ab. Bloemart; 1579, Sol. de Brey; 1586, Cornelius Poelenberg; 1596, Leo Bramer; 1600, J. D. de Heine; 1600, John Wynants; 1606, Albert Cuyp; 1606, Paul Rembrandt van Ryn; 1608, Gerard Terburg; 1610, Adrian Van Ostade; 1613, Gerard Dow; 1615, Gabriel Metz; 1620, Philip Wouvermans; 1624, Nicholas Bergham; 1625, Paul Potter; 1631, Ludolph Bakhuysen; 1633, W. Van der Velde; 1635, Jac. Ruysdael, Hobbema; 1635, Fran. Miers; 1636, John Steen; 1637, Van den Heyden; 1638, Adrian van der Velde; 1640, Karel du Jardin; 1664, John Weenix; 1669, Adrian van der Werf; 1682, John Van Huysum.

**ENGLISH PAINTERS.**—Formed in general on the masters of the Flemish and Italian Schools; excel in portraits and landscapes, are unrivalled in water-colors.—1480, Hans Holbein; 1543, F. Zuccheri; 1572, Inigo Jones; 1601, P. Oliver; 1609, S. Cooper; 1610, W. Dobson; 1620, Ric. Gibson; 1619, John Greenhill; 1648, Godfrey Kneller; 1660, Luke Cradock; 1677, James Thornhill; 1697, William Hogarth; 1714, Rich. Wilson; 1723, Joshua Reynolds; 1727, Thom. Gainsborough; 1733, Sawrey Gilpin; 1734, P. J. de Louthembourg; 1735, David Allan; 1738, Benjamin West; 1745, James Strutt; 1746, James Northcote; 1748, J. F. Nollekins; 1748, Philip Reinagle; 1751, William Hamilton; 1752, Wm. Beechey; 1755, Thom. Stothard; 1759, Francis Bourgeois; 1761, John Opie; 1764, Geo. Morland; 1769, Thomas Lawrence; 1774, Edward Bird; 1776, John Constable; 1786, Will. Hilton; 1787, Geo. Hen. Harlow; Thomas Daniell; 1785, David Wilkie; 1786, R. B. Haydon; A. W. Calcott; 1789, W. Etty.

8. **FRENCH SCHOOL.**—The good painters of this School are formed on the model of the different Italian Schools, of which they bear the several characteristics; they are in general more successful in composition and design than in coloring. It is emancipated from the degradation and affected style it assumed after the death of Le Brun by Vien, and become the most numerous and flourishing school of all.—1490, Fran. Primaticcio; 1496, Rosso de Rossi; 1502, J. Cousin; 1582, Simon Vouet; 1594, Nicholas Poussin; 1600, Claude Lorraine; 1600, Le Va'tentin; 1600, James Blanchard; 1607, James Petitot; 1616, Sebastian Bourdon; 1617, Eustachius le Seur; 1619, Charles le Brun; 1640, Charles de la Fosse; 1644, John Jouvenet; 1657, Joseph Vivien; 1667, Nicholas Bertin; 1687, Anth. Rivalry; 1684, Ant. Watteau; 1688, Francis Le Moine; 1692, Noel N. Coypel; 1700, Chas. Natoire; 1794, F. Bouchier; 1712, Joseph Vernet; 1716, Vien; 1729, J. B. Deshayes; 1756, J. L. David; 1758, Carle Vernet; 1767, A. L. Girodet.

## ADDITIONS TO THE BIOGRAPHICAL INDEX.

(INCLUDING ACCIDENTAL OMISSIONS IN THE FORMER EDITIONS.)

| NATION.   | NAME AND PROFESSION.                                                               | BORN.           | DIED.         |
|-----------|------------------------------------------------------------------------------------|-----------------|---------------|
| Eng.      | Adelaide, Queen Dowager, widow of William IV.                                      |                 | 1850          |
| Eng.      | Adrian IV. (N. Breakspere), the only English pope                                  |                 | 1159          |
| Gr.       | Ægineta, Paulus, writer on medicine                                                |                 | 630           |
